### SUSTAINABILITY STATEMENT

At Kemira, over more than 100 years, our work at the cutting edge of chemical science has taken us on a groundbreaking journey of discovery. At the very center of this work has been our focus on molecules; those tiny particles composed of one or more atoms. Since 1920, our increasing understanding of these molecules has guided our research and development. The insights gained have driven our innovation, directed our strategy and helped deliver our growth.

Whether developing chemical applications to clean water, or innovating new products, like safe, renewable, biodegradable and water-resistant coated linings in food packaging – our industry-leading chemistry expertise lies at the heart of our long and proud company heritage.

It's this heritage of chemistry expertise that underpins our new operating model and our theme for 2025 and beyond, 'Growth: A New Horizon'.

With our new business units, Water Solutions, Packaging & Hygiene Solutions, and Fiber Essentials, along with our digital services, we are ready for both the next phase in our story and, in collaboration with our partners, to further enable our customers to succeed on their own sustainable path ahead.

**This is Kemira's 2024 Annual Review.**

# CEO's Review

**2024 was a significant period of change for Kemira. It was also my first year as CEO. Leading a company is a team effort, and our strength comes from our collective expertise and commitment to Kemira's bright future.**

We took several steps to accelerate our strategy execution and our transformation in 2024. In August, we announced a new Group Leadership Team, laying the groundwork for Kemira's next chapter. We also renewed our operating model and undertook a comprehensive organizational redesign aimed at enhancing customer centricity, sharpening strategic focus, accelerating delivery, and driving growth and shareholder value. Starting in January 2025, Kemira moved to a customer solution-based organization with three new customer-facing business units: Water Solutions, Packaging & Hygiene Solutions and Fiber Essentials.

Kemira's solid performance continued with strong profitability. Revenue reached EUR 2,948.1 million and operative EBITDA margin was 19.90%. We updated our long-term financial targets, aiming for more than 4% organic growth on average while retaining operative EBITDA within 18–20% and operative ROCE above 16%. We took further steps on our profitable growth strategy execution journey with several investments and one acquisition, entering the activated carbon market for micropollutant removal.

Our net promoter score (NPS) reached an all time high in 2024 and our employee engagement stayed strong. Fostering diverse talent remains essential to driving innovation, resilience and long-term growth. By embracing different perspectives, we ensure our business is well-equipped to meet the needs of our global customers and stakeholders. Our safety focus is strong and will continue to be going forward. Kemira's ambitious climate targets were validated by the Science Based Target Initiative, and our long-term target is to become carbon neutral by 2045 for scope 1 and 2.

Our business environment remains complex which means that we must be even more agile and flexible to leverage the opportunities. We will continue to collaborate widely with partners from the private sector to academia to speed up our innovation, and we will apply our chemistries to new growth platforms to continue our sustainability-driven growth journey.

I want to thank all our stakeholders: customers, suppliers and other partners, as well as our Kemira employees, for another successful year of collaboration.

ANTTI SALMINEN  
President & CEO

### FINANCIAL STATEMENTS

### SUSTAINABILITY STATEMENT

From our roots in Finland to the global presence Kemira holds today, the bond that connects our past, our present and our ambitious vision for the future, has been a core driver of our success to date. But we are far from standing still. Quite the opposite, in fact. While we will continue to build on our legacy and the many exceptional attributes that have supported our transformation

and sustained our long-term growth to the present, we are also fully prepared to embrace the new and increasingly complex world in which we operate.

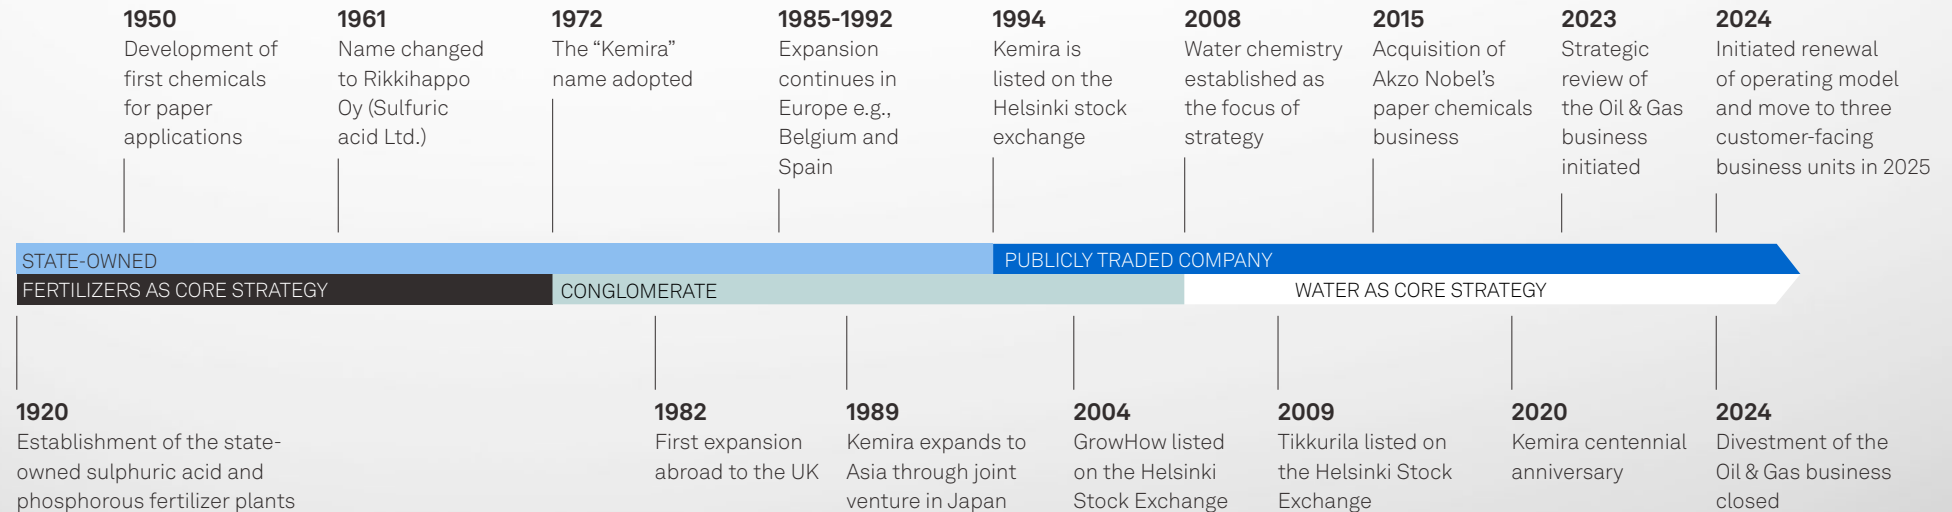

Therefore, in our company's 105th year, we have begun to write a bold new chapter in our rich history. On January 1, 2025, our new operating model came into force; a model

designed to better meet our profitable growth ambitions and better serve our customers. The new model contains three customer-focused business units: Water Solutions, Packaging & Hygiene Solutions, and Fiber Essentials.

We are building on a solid foundation. In 2024, Kemira's strengths included a strong business

model with a clearly defined and customer-centric portfolio, as well as an efficient operation organization with around 5000 talented employees. In the years to come, we must be more courageous and more open. We will develop our growth mindset as well as our 'outside-in' thinking, and our innovation. By 2030, Kemira aims to be the industry-leading provider of sustainability solutions.

#### KEMIRA'S TRANSFORMATION INTO A WATER-FOCUSED COMPANY

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

Water Solutions is our largest business unit with a firm ambition to significantly grow our global water business, both organically and inorganically. The Packaging & Hygiene Solutions business unit focuses on, among others, the growing renewable solutions market, and particularly packaging solutions, where our product offering will strongly support our customers on their critical sustainability journey. Finally, our Fiber Essentials unit focuses on the pulp and bleaching market, where our products play an essential role in the value chain.

In addition, we have also established a centralized Operations unit to further strengthen our operational backbone, thus enabling stronger cooperation and enhanced efficiency. Furthermore, we have changed our ways of working in Research & Development. Product Development has moved into the new business units, increasing the proximity to our valued customers and the unit's autonomy to prioritize initiatives to result in increased speed-to-market. The new Research & Innovation unit is focused on long-term

research and the expansion of our leading portfolio of patented technologies.

A New Ventures and Services unit has also been established, and though not reported as a separate business unit externally, it will act as a growth engine through the development and commercialization of new products and services, as well as develop digital services for all business unit customers.

With our new operating model built on our strong foundations, our enhanced

transformation to a leading provider of sustainable solutions represents a significant new phase in our journey. As we look ahead, we are now better able to navigate the complex future global shifts and trends that will direct our ambitious growth path. We are now ready, together with our partners and customers, to use our more than 100 years' chemical expertise to protect and sustain the planet's most precious resources.

### CORPORATE GOVERNANCE

### FINANCIAL STATEMENTS

### SUSTAINABILITY STATEMENT

#### KEMIRA AND IFF ENHANCE THEIR COLLABORATION

As part of a strategic cooperation to provide new renewable alternatives to fossil-based products, the two companies announced the completion of a market-entry scale industrial polymer plant.

#### KEMIRA'S SOLUTION 'WINS GOLD' AT THE 2024 PARIS OLYMPIC AND PARALYMPIC GAMES

KemConnect™ DEX, Kemira's performic acid solution, was utilized to disinfect treated wastewater before discharging, in preparation for the swimming events in the Seine River.

#### KEMIRA ACCELERATES THE SWITCH TO RENEWABLE SOLUTIONS

Derived from renewable feedstocks, the launch of biomass balanced wet strength resins for the paper industry are a genuine drop-in solution with immediate sustainability benefits.

#### KEMIRA EXPANDS ITS CAPACITY IN NANJING, CHINA

To respond to increased market demand, Kemira expanded its ASA sizing agents capacity which are used to improve water resistance in paper and board, including packaging solutions.

#### KEMIRA AND PA CONSULTING COLLABORATE ON SUSTAINABLE FOOD PACKAGING

The strategic collaboration aims at accelerating the development of an innovative polysaccharide-based renewable barrier coating material, supporting the transformation into more sustainable food packaging.

#### KEMIRA ACQUIRES NORIT'S UK REACTIVATION OPERATIONS

Kemira expanded its water treatment offering by entering the activated carbon market for micropollutants removal.

#### KEMIRA EXPANDS SODIUM CHLORATE CAPACITY IN SOUTH AMERICA

The expanded capacity in Ortigueira site in Brazil will allow Kemira to capitalize on growing pulp & paper market opportunities.

#### KEMIRA RENEWS ITS OPERATING MODEL AND LEADERSHIP TEAM

The announced changes to Kemira's operating model will better meet profitable growth ambitions and the move to three externally reported business units.

#### KEMIRA'S AMBITIOUS SCIENCE-BASED TARGETS VALIDATED

The Science Based Targets initiative (SBTi) approved and validated Kemira's absolute Scope 1, 2 and 3 near-term and long-term emissions reductions targets, an important contribution to tackling accelerating climate change.

#### KEMIRA EXPANDS ITS CAPACITY IN SPAIN AND NORWAY

Supporting customer sustainability and circular solutions in Spain, the expanded capacity will cater for growing demand in biogas applications and phosphorus removal. In Norway, the expansion of coagulant capacity will meet growing market demand and ensure production reliability in the Nordic region.

- Kemira at a Glance
- Key Highlights
- How We Create Value
- Our Strategy**
- Our Innovation
- Safety as a Priority
- Our Business Today
- Our Sustainability in Action

### CORPORATE GOVERNANCE

### FINANCIAL STATEMENTS

### SUSTAINABILITY STATEMENT

**At Kemira, we are advancing our growth strategy with an ambitious focus on sustainability, and a stronger commitment to delivering solutions that address global challenges.**

Our progress in 2024 includes strategic portfolio adjustment that strengthens our focus. We completed our first acquisition in micropollutant removal in EMEA to accelerate growth in our water business, and divested our Oil and Gas related portfolio to concentrate on focused markets. In August 2024, we also announced a new operating model for 2025 and beyond, which further enhances the execution of our growth strategy with a more agile, customer-centric approach.

These moves allow us to move forward with clarity and purpose and we have sharpened three core strategic priorities:

#### EXPANDING IN WATER

Growing our water business remains our top priority. Our goal is to double this business, leveraging both organic growth and strategic acquisition, such as our expansion in Europe in 2024. This focus is driven by the increasing demand for water solutions in response to global water scarcity and heightened industrial needs, reinforcing our role as a leader in sustainable water treatment.

#### BUILDING LEADING RENEWABLE SOLUTIONS PORTFOLIO

The second priority is to build a leading and comprehensive portfolio of renewable solutions, by both enabling a

sustainability transformation in our existing markets, as well as leveraging our many capabilities in the new circularity driven markets. Through innovation and a commitment to renewables, we aim to lead the way in providing solutions that benefit our customers and the environment.

#### UNLOCKING NEW GROWTH PLATFORMS

The third strategic priority is to unlock new growth platforms and to increase our penetration into selected new high-growth adjacent markets. By diversifying our portfolio and harnessing the power of our digital solution, we can capture new opportunities in emerging sectors that align with evolving market needs.

Our growth priorities are firmly aligned with major global megatrends—decarbonization, circularity, water scarcity, and resource efficiency—that are reshaping industries and guiding our focus. By aligning our business priorities with these trends, we are better positioned to meet urgent needs and to lead in building a sustainable future.

To support these priorities, we are strengthening strategic partnerships, optimizing feedstock conversion processes and enhancing product innovation. Together with mergers and acquisitions, this approach enables us to adapt to market changes, scale effectively, and continuously meet evolving customer demands. This further enables us to create long-term value for our stakeholders and foster a positive impact on the world.

“At Kemira, we are driving growth by focusing on sustainable solutions. With a clear focus on our water and renewable solutions portfolio, we are meeting the evolving needs of our customers and creating value for our shareholders.”

Linus Hildebrandt  
EVP, Strategy

### SUSTAINABILITY STATEMENT

**For over a century, innovation has been a key part of Kemira's DNA. This fundamental cornerstone of our operations can now draw on a comprehensive and industry-leading portfolio of patented technologies, and trusted and long-term collaboration with our customers, as well as academic and commercial partnerships – both large and small – around the world.**

### BUILDING ON R&I FOR THE FUTURE

Kemira's newly formed Research & Innovation (R&I) unit concentrates on delivering groundbreaking research, and a stronger focus on long-term innovation, with renewable solutions at the core of the unit's work. By embedding product development within our business units, we have increased proximity to customers and created the autonomy to prioritize initiatives that accelerate speed-to-market.

This strategic shift in R&I represents our transition from predominantly incremental projects to a majority being classified as transformational. This shift now clearly aligns with our new growth strategy, focusing on pioneering and truly innovative solutions that are new to the industry and to our customers.

## CORPORATE GOVERNANCE

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

This approach signifies our deep and long-term commitment to developing groundbreaking innovations that require a unique fusion of skills, a forward-thinking approach, and a willingness to venture into uncharted territories. This evolution reflects our dedication to pushing the boundaries of what's possible in chemical solutions, ensuring that our long-term R&I strategy is not only about sustaining the present, but also about fundamentally shaping the future of sustainable chemistry.

### OUR INNOVATION TOOLBOX

Today, our new innovation toolbox is more robust than ever, reflecting deeper and more enhanced knowledge of chemistry and applications know-how across our three business units, Water Solutions, Packaging & Hygiene Solutions, and Fiber Essentials. In addition, our team is further developing state-of-the-art digital capabilities, pioneering smart solutions together with our valued partners and customers.

The increase in patent applications across recent years highlights our shift towards innovative projects in growing areas like renewable coated barriers, textiles and molded fiber, but also on strengthening our core business. The Finnish Patent and Registration Office recognized Kemira as holding the fifth position among Finnish domestic companies for the highest volume of patent applications filed in 2023. Kemira leads its industry-specific reference group, securing the top position in its sector for patent submissions.

### OUR INNOVATION MINDSET

In the field of R&I, a strong background in chemistry and engineering is essential. However, R&I is about much more than just scientific knowhow and other technological skillsets; it also requires the utilization of psychological flexibility, resilience, and strong motivation. These skills are becoming ever more intrinsic to our future operations and company growth.

For increasingly complex issues, greater emphasis on deep-dive collaboration, notably with startups and other external partners, is an area which will form an important component of our new global R&I strategy. We see it as a win-win. By engaging with external entities, we not only broaden our knowledge base but also accelerate the innovation process.

A key highlight in 2024 was the Kemira Technical Conference 2024, held in Helsinki, Finland; a landmark event that celebrated innovation and technical excellence within Kemira. Featuring top-tier technical expertise and fostering collaboration across the organization, under the theme "Technical Excellence and Collaboration", the conference showcased cutting-edge work, spanning core business areas and strategic growth fields. The main topics included renewable solutions (bio-based barriers, bio-based polymers, and others), new concepts for water treatment (micropollutant removal and more), textiles, molded fiber products, and digital services.

"Our focus on strategic partnerships and bold innovation reflects our long-term commitment to pioneering responsible and industry-leading products. By pushing the boundaries of chemistry, we're helping to shape a future where renewables lead the way in sustainable chemical solutions."

Sampo Lahtinen  
SVP, Growth Accelerator

## Safety as a Priority

### CORPORATE GOVERNANCE

### FINANCIAL STATEMENTS

### SUSTAINABILITY STATEMENT

**At Kemira, safety is always our top priority. Throughout the year, we strive to ensure responsible operations as well as the safe production and use of our products throughout their lifecycle. Our ongoing target is to achieve zero harm to our employees, our communities and the environment, to deliver customer satisfaction, and to meet ambitious sustainability and profitability targets.**

We understand that the responsible management of our operations and products, from inception to utilization, is critical for the wellbeing of people and the environment. Safety is the foundation for all our operations, and includes people safety, environmental safety, process safety, chemical safety, transportation safety and asset integrity.

Every individual throughout Kemira's 58 manufacturing sites globally has a critical role to play in ensuring a safe work environment. The systematic compliance with Kemira Life-Saving Rules, together with continual improvements to safety culture, helps to ensure that every employee returns home safe and unharmed each day. Kemira proactively promotes a culture where safety is a shared value; sets, and monitors ambitious key performance indicators; and launches new initiatives to enhance overall safety performance. In 2024, Kemira conducted a Shop Floor Focus Training Program (see the case study on page 15), for driving safety culture and

operational improvements across Kemira manufacturing sites worldwide. In the EMEA region, Kemira also conducted a Transportation Safety Enhancement Program (see the case study on page 16) aimed at improving safety in Kemira's transportation operations. Safety performance is closely tied to Kemira's metrics at all levels of employees.

In 2024 Kemira recorded zero permanent occupational incidents. In addition, the incident severity declined, resulting in fewer lost time incidents compared with 2023. However, due to several minor hand and finger injuries the number of Total Recordable Injuries (TRI) was 43, and Total Recordable Injury Frequency (TRIF) was 3.2 covering Kemira's own workforce and contractor incidents per one million working hours. TRIF was above the target (1.9 in 2024) and this resulted in Kemira re-evaluating the target and adjusting it from 1.5 to 2.2 by end of 2025, and from 1.1 to 1.5 by end of 2030.

"Preventing incidents and accidents is critical. To reach the next level, besides compliance, we need to focus more on people competences and safety behaviors. We are one Kemira, and by being mindful and vigilant, we can upgrade our learning and safety behaviors on the path towards zero incidents."

Anne Helenius-Heir  
VP, EHSQ

### CASE

# Supervisors scored high in safety training

Supervisors working at Kemira sites scored high in safety training in 2024. For the training, a major collaboration between Kemira's Manufacturing, Global and Local Environment, Health, Safety and Quality (EHSQ) was implemented, in a concentrated effort to elevate safety standards and redefine supervisory roles across the company's 58 manufacturing operations throughout the EMEA, Americas and APAC regions. This collaborative approach was designed to enhance the effectiveness of the training and promote a unified safety culture across the organization. The program took place from April to December.

The 'Shop Floor Training' initiated by the Manufacturing and Technology Steering Committee consisted of a three-day face-to-face program designed to equip the supervision level of manufacturing with clear and

consistent expectations and responsibilities, as well as a comprehensive safety toolbox, 'Safety 101'.

Beginning with a half-day session dedicated to setting forth supervisory roles and responsibilities and recognizing the pivotal role that supervisors play in manufacturing, the learning underlined their key role in the safety performance of their site and the importance of maintaining and nurturing a positive safety culture along with driving operational excellence. The training element was then delivered by the regional manufacturing heads to shop floor supervisors from each site.

The initiative dedicated the remaining time to safety training and the 'Safety 101' toolbox, authored by both the Local and Global EHSQ teams. The toolbox covers a wide array of essential topics for fostering a safe working environment,

and from enforcing life-saving rules to conducting root-cause analysis and incident reporting, supervisors received thorough training on a number of essential safety protocols.

This global initiative to train Kemira's supervisors on safety represented a significant effort at the manufacturing sites to boost practical safety measures on the shop floor throughout the company's global operations and enhance safety behaviors and life-saving rules. Its aim was to instill a safety-first mindset among supervisors and employees and ensure that safety was not just about numbers but about people and their wellbeing. The future ambition of this initiative is to target behavioral safety, as well as safety compliance and competencies, with the goal of strongly improving Kemira's safety culture at all supervisory levels. The sessions were conducted in local languages throughout the sites, and the feedback was very positive.

# Positive results for the EMEA Transport Safety Program

In 2024, Kemira's Transportation Safety enhancement program had a positive impact on the daily safety of the company's transportation operations. The program utilized revised and updated processes and aligned roles and responsibilities across the organization in the EMEA region. The program consisted of three streams – shipment document compliance, delivery operations, and manufacturing site operations concerning the carriers – and the streams contained several projects.

The program was initiated in 2023, due to the increasing number of safety issues recorded in Kemira's transportation operations since 2020. The impact of the program is followed through process compliance and the amount of Category A transportation incidents.

A number of 'human-related' factors were identified as being behind the rise in incidents, including less post-Covid-19 face-to-face contact, a decline in well-trained drivers in the region, many experienced drivers retiring, and a dramatic reduction in driver availability due to the war in Ukraine, and other challenging macroeconomic indicators.

After detailed work to ensure that the shipping documents contained the correct content, the enhancing of safety skill-set requirements of the subcontracted partners, and a clear focus on operations within selected Kemira's manufacturing sites, the positive impact of the safety program reaped dividends in 2024. As a result, there was a noted decline in the number of incidents compared to the previous few years. In 2024, the key performance indicator benchmark was 1.0 to receive a 'green' rating, and Kemira recorded a score of 0.4 within the EMEA region.

“Transportation safety is critical to our operations. Working closely together with our manufacturing sites helps ensure that those involved in transportation operations can focus on important safety topics. In 2025, learned best practices will be implemented throughout our operations in EMEA.”

Lilli Piispa  
VP, SCM, EMEA  
Supply Chain Management

### SUSTAINABILITY STATEMENT

Scarce water resources, accelerating climate change and sustainably meeting the needs of a growing global population with limited resources, are some of the most pressing and critical challenges of our times. At Kemira, employees across our two business segments in 2024, Pulp & Paper\*, and Industry & Water\*, worked intensely, in collaboration with our partners, to develop, enhance and deliver innovative and industry-leading solutions and products for our valued global customers.

\* On January 1, 2025, Kemira updating its operating model and moved to a customer solution-based organization with three new customer-facing business units; Water Solutions, Packaging & Hygiene Solutions, and Fiber Essentials.

### SUSTAINABILITY STATEMENT

While addressing global megatrends, urban and industrial water and wastewater treatment plants must also adhere to increasingly stringent regulatory requirements. Kemira offers a range of innovative solutions to optimize all stages of the water treatment process and reduce expenses for energy, labor and chemicals, while safely achieving water quality targets.

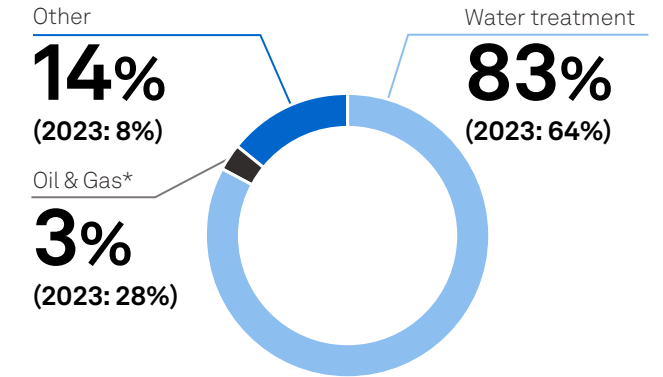

“In 2024, we were very successful in securing the base business profitability in water treatment applications. We were able to positively grow our volume in some areas, for example, in inorganic coagulants, as well as win some new polymer business, particularly in EMEA. In addition, we successfully launched new biomass balanced polymer, a renewable product line, one of our strategic initiatives. Through these products, we are enabling our customers, including cities like Barcelona, Turin and Stuttgart as examples, to meet their own sustainability ambitions, using renewable rather than fossil-derived chemistry. In North America, we further opened up the next chapter, with new customers interested in our renewable polymer chemistry solutions. A final highlight was the 2024 Paris Olympics, where we had our innovative disinfection technology applied at the Seine Amont Wastewater Treatment Plant in Valenton, Europe’s second largest treatment plant, and the last step before the treated wastewater flowed into the Seine River in preparation for the triathlon events.

Looking at 2025, now that we have updated our operating model, we can create more customer intimacy and focus greater attention on additional business opportunities in both industry and urban areas. This is the key going into 2025: we still want to continue with our excellent base business, which the new organizational structure enables, but at the same time, to be fully prepared for the new regulatory changes, both in Europe and in North America. There are going to be even tighter regulations for water treatment in Europe, for example, and particularly from the new Urban Wastewater Treatment Directive as approved in 2024. We are also developing some new initiatives like activated carbon technology to remove micro pollutants which we are adding to our portfolio. As part of this new market for Kemira, we made a small acquisition in the UK and announced the planning of our activated carbon reactivation investment in Sweden. We are looking forward to expanding in 2025 as part of our ambitions in our new Water Solutions business unit and our target is to double our revenue in the future. Taken together, I feel incredible pride for all the work the whole team achieved in 2024, and the feeling of personal excitement at the new organizational structure and focus areas as we move forward into 2025.”

Tuija Pohjolainen-Hiltunen  
President, Segment I&W (in 2024), and  
EVP, Water Solutions (from January 2025)

### INDUSTRY & WATER APPLICATION SPLIT

\* Kemira announced the divestments of its Oil & Gas portfolio in December 2023 and completed the divestment on February 2, 2024.

# Activated carbon purifies water of many micropollutants

In June 2024, Kemira expanded its water treatment portfolio and entered the activated carbon market for micropollutants removal through the acquisition of Norit's UK reactivation operations. Activated carbon is the most common technology to remove taste and odor in drinking water, and delivers excellent water purification for use in food processing, and all the areas where high-grade water is required for manufacturing and industrial processes. Activated carbon also removes micropollutants including PFAS ('forever chemicals') in water treatment applications.

Micropollutant removal is expected to become increasingly relevant for water and wastewater treatment plants due to the increasing concern for consumer health and environmental safety. PFAS removal from drinking water and micropollutant removal from wastewater have also been introduced in recent EU legislative updates.

Kemira is already an established player in solid liquid separation, with the company's leading chemical products enabling water treatment plants to clean, reuse, or recycle wastewater. This process allows for the removal of relatively 'big' particles. Activated Carbon technology allows Kemira customers to remove far smaller particles and enable water-focused companies to utilize an effective "polishing" process to further purify the water.

Activated carbon is derived from sources as varied as peat, wood and even coconut shells, and once it is first produced, the Virgin Activated Carbon contains an associated cost and carbon footprint. The acquired reactivation facility produces 'Green' reactivated carbon for potable water and food-related applications, and 'Amber' reactivated carbon for other non-food related applications. With the recent acquisition, Kemira is now able to regenerate (or reactivate) the used, or 'spent' activated carbon using a high temperature oven that burns out the micropollutants and other contaminants. This process can be repeated, depending on use cases, up to 10 times, allowing the carbon material to become inherently more sustainable. As a result, the total CO<sub>2</sub> burden of reactivated carbon is a small fraction of the virgin material, and through its entire lifecycle is estimated to provide an emissions reduction of up to 90% if regenerated to its feasible maximum limit.

Currently, Kemira is only servicing UK customers, but is in the process of completing its EU REACH registration, which will enable it to import and export Activated Carbon goods, allowing the company to source more materials and also to serve many more customers outside the UK.

“Activated carbon, particularly in terms of where regulations are heading, will enhance the removal of pharmaceutical micropollutants and PFAS chemicals. It's early days, but we're learning and refining our business, and are planning to establish sites in Europe in the future.”

David Normington  
Director, Product Lines,  
Process Chemicals

### FINANCIAL STATEMENTS

### SUSTAINABILITY STATEMENT

Cellulosic fiber, the renewable and abundant wood, and woody plant-derived raw material, plays an essential role in the global circular economy. With our chemistry expertise, we enable the manufacturing of a wide range of traditional and new end-products, from recyclable paper and board packaging to tissue products and textiles. We help our customers achieve resource-efficient and compliant production processes as well as functional and safe end products.

“The whole value chain saw the expected pickup in consumer demand in early 2024, but over the summer, especially in Europe and the APAC region, consumer confidence declined and the market for packaging and hygiene products stagnated in the third and fourth quarter. That said, our growth trajectory was upwards, and it was a positive year for us. One highlight for 2024 is that we made a strategic decision to enter India, currently the fastest growing paper market in the world. In 2025, we will have an established team in place to accelerate our growth in the country. In addition, we also initiated a third production line of ASA sizing agent in China, and our projected growth in both countries shows our continued dedication and commitment to the Asia Pacific region.

The other major project of 2024 was the preparation for Kemira's new operating model which came into effect in January 2025. It allows us to further focus on the

growth areas of packaging solutions and hygiene papers, while maintaining our strong geographical presence in bulk chemicals. The new business unit gives us a clear mandate in packaging and hygiene solutions to grow our presence in those areas. And within the packaging space, you also have the new emerging technologies driven by increasing consumer demand for sustainable solutions. So, the paper or the board will largely replace today's solutions, and the future will be renewable. It is in these areas we talk about the 'paperization' of packaging, and this will be the primary focus of our packaging and hygiene solutions as we move into 2025. One example in this area is our new collaboration with PA Consulting on renewable coating products (see our case study on page 21). Additionally, in 2024 our work in advanced chemistries for molded fibers (see case study on page 22), and our broad expertise in developing solutions for the paper and board domain, enabled the launch of our new molded fiber solution. FennoGard 3D was introduced in January 2025, as part of our full and global portfolio of molded fiber solutions, launching in 2025.”

Harri Eronen  
Interim President, Segment P&P and  
Head of Region EMEA (in 2024),  
and EVP, Packaging & Hygiene Solutions  
(from January 2025)

# Collaboration for a renewable future in packaging

In early 2024, Kemira and PA Consulting formed a strategic collaboration with the aim of accelerating the development of a new renewable coating technology, thereby supporting the transformation into more sustainable food packaging. The collaboration is focused on bringing to market an innovative “alpha-glucan” renewable barrier coating, which provides an inherently strong environmental profile, including recyclability and compostability, combined with excellent barrier properties for flexible food packaging applications. This alpha-glucan barrier technology is based on IFF’s Designed Enzymatic Biomaterial™ (“DEB”) production platform, a cutting-edge biotechnology process that enables the production of new renewable polymers with enzymatic polymerization.

For Kemira, the rationale behind the collaboration, at its most simple, is about moving away from plastic films in favor of renewable and biodegradable paper where possible, and in places where the technology can make a positive impact in a significant volume. The major global brands driving sustainable packaging forward have targets to replace fossil-based materials with renewable alternatives, and/or use more recyclable materials in the future. In many regions, mixed waste streams combining both plastics and fiber-based materials are difficult to recycle. Therefore, having renewable packaging that breaks down more easily and results in a higher-quality recovery of the fiber is highly valuable.

During 2024, Kemira and PA Consulting engaged with more than 100 different brands with the view to developing a replacement for single or multi-layer plastic film-based packaging materials. At the end of 2024, the collaboration project successfully reached the proof-of-concept stage, setting the stage for scale-up during the next few years.

In addition to the alpha-glucan barrier program, and as a further demonstration of Kemira’s commitment to sustainable paper-based packaging, Kemira also continued the development of PHA-based barriers. The first commercial phase of a flexible, heat-sealable package created for a globally recognized brand is expected to take place in 2025, and will be based on a new proprietary formulation that includes PHA, a biodegradable polyester produced by Kemira’s partner, Danimer Scientific.

Developing new chemical solutions for demanding applications, especially those used in direct food and beverage contact, requires time and dedicated knowledge. Later in 2025, and through our collaboration with PA Consulting, we are aiming to be in a commercial position to launch a limited portfolio of renewable coating technology solutions in limited markets.

“Legislation, consumer expectations and brand commitments are driving the renewable packaging industry forward. Our target is that in the next few years, our work with PHA and alpha-glucan-based formulations will be utilized by major brands in the food and beverage renewable packaging sector.”

Adam Tonzi  
VP, Biomaterials,  
Paper & Board

## CASE

# Molded fiber – forming a renewable future

In recent years, the critical need to reduce plastic waste has driven research into more sustainable alternatives to traditional packaging. Recyclable and compostable packaging made from renewable resources, like molded fiber products, is increasingly being seen as a viable solution.

To replace plastic, fiber-based packaging needs to contain barrier properties for oil, grease, oxygen, and moisture. In the past, PFAS compounds (known as ‘forever chemicals’) were quite commonly used in molded fiber, and safe alternatives are needed to replace these compounds.

For Kemira, understanding and developing both molded fiber and barrier technologies is essential to ensuring that recyclable and compostable packaging can perform reliably in various applications, from food and liquid protection to cosmetic and hygiene products.

Kemira’s commitment to this sector is unwavering, bolstered by a robust product portfolio and a strategic position within the APAC region, which is responsible for 70% of the world’s molded fiber production. Continued partnerships with globally recognized brands underscore Kemira’s role as a trusted leader, with a promising outlook for future growth and innovation.

As part of intense collaborative work in this field, Kemira is a member of the RISE Wet Moulding Barrier project under the Bioeconomy Research Programme. A consortium of industry partners, together with RISE as the coordinator, are currently

investigating various aspects regarding barriers for packaging products produced using wet moulded fiber materials. In addition, Kemira is also part of Zero F, a Horizon Europe project with a focus on a safer future without harmful PFAS compounds. With 12 research and industry partners from nine countries across Europe joining forces to develop renewable coating alternatives to replace PFAS compounds in food packaging and textiles, the collective ambition to move the industry forward is palpable.

Following intense development work throughout 2024, Kemira will launch and begin commercializing its proprietary and advanced oil and grease resistant (OGR) chemistry, FennoGuard 3D, in early 2025. This PFAS-free dispersion barrier coating meets the requirements of customers and brand owners and fulfills all major regulatory requirements worldwide. Additionally, Kemira made significant progress in 2024 on its next-generation biodegradable barrier product for molded fiber, made from renewable raw materials and planned for launch in 2025.

Another highlight of 2024 were efforts to bring about the 2025 launch of a complete molded fiber product portfolio – a portfolio including both process and functional chemistries for improving process efficiency and creating needed properties such as hydrophobicity and strength – to all three regions (EMEA, Americas, APAC). This product portfolio is PFAS free and follows the latest global regulations and restrictions. Building on its experience and established market presence, Kemira is now focused on supporting the evolving industry by developing solutions that meet the needs of more demanding end markets.

## SUSTAINABILITY STATEMENT

### CASE

## Ongoing efforts in textile recycling

In 2024, less than 1% of textiles globally were recycled, and most were landfilled or burned. In the European Union, for example, approximately 5.8 million tons of textiles are discarded annually, the equivalent of 11.3 kg per person. This less than positive trend is partly the result of ongoing consumer confusion with how to dispose of textiles, like clothes, and the impractical collection of the textiles to date.

Under **EU rules on waste**, Member States are required to set up a separate collection of textiles by 1 January 2025. For this to happen, the separate collection, sorting, reuse and recycling capacities within the EU will require strengthening. For Kemira, it is in post-industrial and post-consumer textile waste recycling where the company can play a critical role in the future. Specifically by providing leading chemical solutions to third-party mechanical and chemical textile recyclers, as well as to companies in the next stage of the process, namely textile producers who are utilizing the recycled fibers.

As part of efforts to boost public and professional dialogue, collaboration and knowledge sharing across the value chain within the sustainable textile fiber domain, VTT (Technical Research Centre of Finland), Kemira and Valmet joined forces to host the first-ever Nordic Textile Fibre Day in Helsinki, Finland, in January 2024. The event brought together over 100 key industry stakeholders from a region currently seen

as at the forefront of pioneering textile fiber innovations, and it explored the latest developments in man-made cellulosic fibers (MMCF) and textile recycling.

However, the processes to develop chemical solutions to meet specific textile recycling needs are complex. With many textiles comprised of more than one material, this presents multiple challenges in the fiber-to-fiber recycling process. Moreover, decolorization, non-cellulosic fibers, and many other impurities from recycled textiles will continue to hold back the rapid increasing in volume of recycled fibers ready for future MMCF production.

Kemira, however, is being proactive in the field. During 2024, chemical solutions that support the fiber recycling process and which help both maximize the removal of synthetic fibers and minimize the loss of valuable cellulosic fibers, were further developed. As part of the process, Kemira has also been undertaking studies together with its customers, both as part of Kemira's internal RD&I, as well as at the customers own facilities. In addition, Kemira's chemistry and application expertise in existing pulp bleaching processes can also be applied in treating cellulose-based pulp. This, in turn, helps decolorize textile waste and turn it into dissolving pulp that is highly reactive and meets the requirements for fiber reuse in high-value applications. The hard work will continue in 2025 and beyond.

“We have the ability to work together with our partners and customers across the value chain to find the most optimal solutions in the textile recycling sector. Our job at Kemira is to get in early with industry-leading solutions to help move this whole process forward.”

Jörg Schöner  
Senior Manager,  
Global Business Creation,  
Textile Fibers

### SUSTAINABILITY STATEMENT

**Sustainability is a business imperative. It means reducing climate impacts, increasing water resilience and using resources responsibly. For Kemira, it is also about tightly linking our sustainability targets with our business strategy.**

In 2024, we updated our global sustainability program and increased our ambition levels in our sustainability-driven strategic priorities. Our commitment to sustainability supports our customers and drives our profitable growth.

To make our work as beneficial as possible, we have made a comprehensive impact, risk and opportunity analysis of our sustainability matters throughout our value chain with the lens of short-, medium- and long-term timescales, a process that enables us to identify the issues that are most important to us and our stakeholders.

And what is important to us is water, circularity, climate and nature, and our people at the centre – because nothing happens without our people. These are our four sustainability focus areas where we can make the biggest positive contributions across economic, social, and environmental dimensions. Our chemistry expertise can be best utilized, together with our digital know-how, to help mitigate the most critical planetary challenges we currently face: water scarcity, resource scarcity and accelerating climate change.

Sustainability for us means two things. Reducing our value chain-wide negative impacts is important, and through our commitment to the Science Based Targets initiative and our ambitious GHG reduction targets, our firm ambition is to actively deliver concrete actions to mitigate our impact. Besides reducing our footprint, we put major efforts into increasing our positive business impacts, or handprint and societal impact, meaning how much water we clean, how we transform the chemistry origins in our value chain by moving from fossil materials to renewable ones and how our solutions improve the customer resource efficiency for our resource intensive customers globally.

To that end, our shared global ambition to build a sustainable world is articulated in the UN Sustainable Development Goals (SDGs), and as part of our new sustainability strategy for 2025 and beyond, we focus on the four goals where Kemira can make the most significant impact: SDG 6; clean water and sanitation, SDG 8; decent work and economic growth, SDG 12; responsible consumption and production, and SDG 13; climate action.

“In 2024 we have focused on developing our sustainability work and taking the first steps towards a full alignment of our sustainability program and business strategy. Our aim in the coming years is to go from the remains of feel-good corporate responsibility to hard-nosed sustainable value creation.”

Rasmus Pinomaa  
Director,  
Corporate Sustainability

**SUSTAINABILITY STATEMENT**

Our shared global ambition to build a sustainable world is articulated in the UN Sustainable Development Goals (SDGs), and we focus on the four SDGs where Kemira can make the most significant impact: 6, 8, 12, and 13.

We prioritize four sustainability themes — water, circularity, climate & nature and people — that are most material to us, where we can make the biggest positive contributions across economic, social, and environmental dimensions.

**OUR TARGETS AND PROGRESS:**

**Improving safety\***

Reduce our Total Recordable Injury Frequency (TRIF) across our operations to 2.2 by the end of 2025, and 1.5 by the end of 2030.

**Fostering inclusivity**

Reach top 10% cross industry norm for Diversity & Inclusion by the end of 2025.

**Leading water management**

Achieve a Climate Disclosure Project (CDP) water security score for leadership of A or A- by the end of 2025.

**Enhancing waste impacts**

Reduce disposed production waste intensity by 15% by the end of 2030, from a 2019 baseline (4.4).

**Reducing emissions\*\***

Reduce GHG emissions from Scope 1 and 2 by 51.23% by the end of 2030, compared to base year 2018.  
Reduce GHG emissions from Scope 3 by 32.5% by the end of 2033, compared to base year 2021.

**Expanding our renewable offering**

Derive more than EUR 500 million from renewable solutions by the end of 2030.

	RESULT 2024	TARGET
<b>Improving safety*</b> Reduce our Total Recordable Injury Frequency (TRIF) across our operations to 2.2 by the end of 2025, and 1.5 by the end of 2030.	3.2	1.5
<b>Fostering inclusivity</b> Reach top 10% cross industry norm for Diversity & Inclusion by the end of 2025.	>25%	10%
<b>Leading water management</b> Achieve a Climate Disclosure Project (CDP) water security score for leadership of A or A- by the end of 2025.	B	A / A-
<b>Enhancing waste impacts</b> Reduce disposed production waste intensity by 15% by the end of 2030, from a 2019 baseline (4.4).	4.2	15%
<b>Reducing emissions**</b> Reduce GHG emissions from Scope 1 and 2 by 51.23% by the end of 2030, compared to base year 2018. Reduce GHG emissions from Scope 3 by 32.5% by the end of 2033, compared to base year 2021.	34.5%	51.23%
	19.5%	32.5%
<b>Expanding our renewable offering</b> Derive more than EUR 500 million from renewable solutions by the end of 2030.	EUR 240 million	EUR 500 million

\*TRIF: Kemira re-evaluated the safety target and adjusted it from 1.5 to 2.2 by end of 2025, and from 1.1 to 1.5 by end of 2030. Target for 2024 was 1.9.

\*\*Near-term GHG emission reduction targets for Scope 1, 2 and 3 were validated by SBTi in 2024.

**Our Sustainability in Action**

**CORPORATE GOVERNANCE**

**FINANCIAL STATEMENTS**

**SUSTAINABILITY STATEMENT**

**Our circular economy actions are critical to our operations at Kemira. These actions go far beyond simple recycling. Rather, they require fundamental changes to the way our materials are sourced, and how our products are designed, produced, sold, used and disposed of throughout the global value chain.**

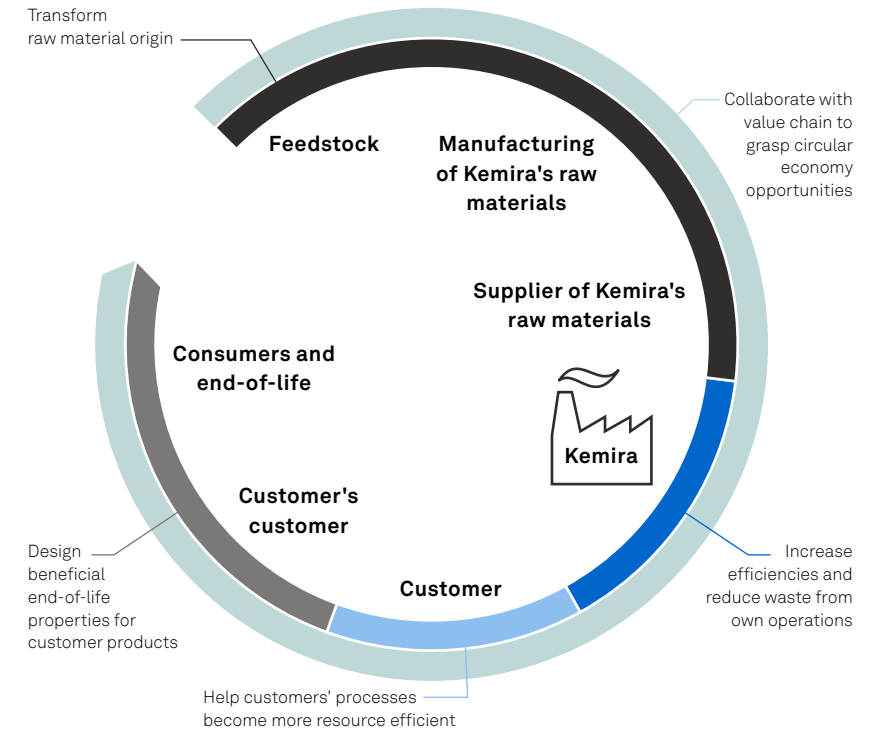

We have a vast range of opportunities available to help shape a more circular world. We achieve this through the comprehensive adoption of circular business practices across our own operations and throughout the value chain, empowering our valued customers to become more energy, resource, waste, and water efficient. This, in turn, helps our customers reduce their overall environmental impacts, like carbon footprint, and create better solutions for further downstream partners.

Our work is structured around our five circularity principles (see infographic). These principles refer to the transformation of raw materials, increasing efficiencies and reducing waste, helping our customers to become more resource efficient, designing optimized end-of-life properties for products, and collaborating with third-party entities in the value chain to boost circularity-related opportunities.

As part of this process, the sourcing of materials is essential to ensuring an efficient circular economy, and turning circular raw materials into new innovative products is where we are uniquely positioned to empower our customers. By increasing the use of recycled, and renewable raw materials, co-developing new products with circular properties, and innovating in new ways to reduce waste, we drive circularity across the industries we work with.

Throughout 2024, and related to our own operations and value chain, we continued to prioritize increasing the share of renewable and recycled raw materials used across our production units. In 2024, around 52% of used raw materials were renewable and recycled. In addition, approximately 70-80% of the raw materials in our coagulants are already sourced from recycled materials, including from other industries' side-streams and waste by-products.

Another focus area is our renewable solutions portfolio, which offers concrete ways for our customers to incorporate a greater share of circular materials into their own processes. This portfolio is on-track to reach EUR 500 million in sales by 2030. In 2024, we totaled EUR 240 million in sales, in collaboration with our business segments and supported by our Growth Accelerator unit. We will further enhance our efforts in 2025.

Meanwhile, our digital solutions – such as KemConnect™ - can optimize resource efficiency for customers to keep waste and water use to an absolute minimum, offering significant cost and emissions savings while increasing water resilience.

By working with our customers and focusing our circular efforts on the sourcing of the materials we all need, Kemira is dedicated to securing the future availability of natural resources and unlocking more value from the limited resources we have.

## RENEWABLE CARBON INITIATIVE

Kemira has joined the Renewable Carbon Initiative (RCI) to partner with leading companies and accelerate the industry shift from fossil carbon to renewable carbon and raw materials. Becoming a member of the RCI demonstrates Kemira's commitment to advancing innovative sustainability practices with a focus on promoting circularity and a bio-based economy. RCI champions the transition

from fossil carbon to renewable carbon for all organic chemicals and materials. The relevant sources of renewable carbon include biomass, CO<sub>2</sub> and recycling. The RCI, founded in September 2020, is a group of more than 50 pioneering companies from the entire chemical value chain from raw material to end-of-life.

## SUSTAINABILITY STATEMENT

“Through highly complex chemical processes, we are working to develop new molecular formulations that can transform waste side-streams into valuable products. We are in the early stages of this work but are excited about the potential benefits for the environment and the community in the long term.”

Jussi Nikkarinen  
Sr. Research Scientist,  
Polymer Chemistries,  
R&D and Technology, Kemira

## CASE

# Enhancing circularity – from waste by-products to new products

We are actively exploring how to better utilize by-products from manufacturing and water treatment processes. Rather than discarding these by-products (or side-streams), we see a significant opportunity to recycle and reuse them, contributing to a more circular economy. One such example is the potential use of ADAME by-products. ADAME (Dimethylaminoethylacrylate) is used in the composition of many industrial products, including hydrosoluble agents for dispersants, thickeners and flocculating agents. In 2024, we planned to test the reuse of around 1,800 tonnes of by-products at Kemira's San Giorgio site in Italy as part of an ongoing pilot initiative. The test will take place in spring 2025.

This circularity project was initiated in 2022 by Kemira's engineering and technology unit, with the goal of improving process efficiency at the San Giorgio chemicals plant. The site produces polymers for different customer applications in the pulp and paper and water treatment sectors.

As part of the project, we are developing new analytic methods to better understand the yield of the polymer process and the resultant waste-stream by-products. When the chemists realized they could not meaningfully improve the 90% yield of the ADAME products, the idea was suggested that instead of incinerating the 10% waste by-product – a viscous molten liquid sludge named 'ADAME heavy' – the waste-stream could be separated and the raw materials used to synthesize what ultimately became surface active agents' products used in many different applications.

At this stage, we are still in the experimental phase, and the development of these new products is ongoing. If successful, these products could be used in a variety of applications, including anti-corrosion agents, textile and fiber softeners, emulsion stabilizers, and even foaming agents designed to significantly reduce water consumption in the paper and board industry, which traditionally relies heavily on water. The effort we are taking today lays the foundation for a potential breakthrough in sustainable manufacturing and circularity.

### CASE

# Kemira's products help to protect lakes from phosphorus

In 2024, Kemira continued efforts in its own operations and value chain to increase the share of renewable and recycled raw materials used across its 58 global manufacturing sites. As part of this work, around 70–80% of the raw materials used in the manufacturing of coagulants were sourced from recycled materials, including other industries' waste streams. These are known as Alternative Raw Materials (ARMs) and they result in a lower carbon footprint for Kemira's iron and aluminum coagulants.

The role of coagulation in water treatment is significant: it is the complex process of reducing the electric repulsion between particles by the addition of iron or aluminum salts (inorganic coagulants) to the water. As a result, coagulants can successfully remove almost all particles (including most microplastics) from the water. In addition, some dissolved matter like phosphates are effectively removed with coagulants.

In 2024, Kemira cooperated with Easy Mining, a company that has developed technologies for recovery of products from waste streams. Kemira has collaborated with Easy Mining on recovery from sewage sludge ash where phosphorus, iron and aluminum can be recovered. Iron and aluminum are potential raw materials for Kemira's coagulant production and will further improve the circularity of this product group.

Phosphorus is a nutrient present in the wastewater that needs to be removed to avoid algae growth and eutrophication in our lakes, rivers and seas. At wastewater treatment plants, coagulants are used to precipitate the phosphorus from the wastewater and separate it to the sludge produced. When the sludge is incinerated, an ash is produced that can be upgraded in Easy Mining's process and coagulants can be recycled.

In the past, many companies neglected to utilize their waste streams, as they saw no value from doing so. But now, many companies see a public and commercial value in finding solutions for their waste streams, as well as their need to respond to increasing legislative pressure to deliver reduced or zero waste targets. During 2024, Kemira was approached by many companies who now see an enhanced value-added benefit to both recycling resources and reducing emissions. Most of these companies are heavy industries, including titanium dioxide plants and steel mills. Kemira is confident that the share of recycled materials being used in its manufacturing of coagulants will increase in the next decade.

“We have initiated new venture technologies and several projects with partners are aimed at utilizing alternative and recycled raw materials to create our coagulants. Further commercializing our expertise is part of our long-term vision of enhancing circular raw material use.”

Jakob Smusin  
Senior Technology Manager

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

**We are determined to reduce the impact of climate change, not only within our own operations but also across our entire value chain. These actions involve our suppliers and customers and benefit our communities. Our collaborative efforts have already led to a reduction in our Scope 1&2 emissions of 34.5% at the end of 2024, compared to our 2018 base year, keeping us on the road towards our 2030 target to reduce the Scope 1&2 emissions by 52%. In 2024 we also published a target for Scope 3 emissions, where we have been able to stay on the science-based targets guided trajectory in the past years. Great examples for our Scope 3 work is our focus on renewable materials, but also our logistics. For example, in Sweden, deliveries to municipal water treatment facilities have been running with hydrogenated vegetable oil since the start of 2024. This has led to a significant 70% reduction in carbon footprint on customer deliveries.**

### CLIMATE TARGETS VALIDATED BY THE SBTi

In October 2024, the SBTi approved and validated Kemira's near-term science-based emissions reduction target. The SBTi has classified Kemira's Scope 1 and 2\* target ambition as in line with a 1.5°C trajectory as part of the global agenda of the Paris Agreement. Kemira also commits to reduce absolute Scope 1&2 emissions by 51.23% by 2030 compared to the 2018 base year.

\* Scope 1, 2 & 3 emissions as defined by the Greenhouse Gas Protocol. Scopes 1 & 2 cover the emissions related to Kemira's own production. Scope 3 includes all other relevant emissions throughout the value chain.

## CORPORATE GOVERNANCE

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

In addition, Kemira has also committed to reduce absolute Scope 3 GHG emissions from purchased goods and services, and upstream and downstream transportation and distribution, by 32.5% by 2033 from the 2021 base year. Kemira will continue to keep its long-term ambition of becoming carbon neutral by 2045 for Scopes 1 and 2.

The SBTi is a partnership between CDP, the United Nations Global Compact, the World Resources Institute and the World Wide Fund for Nature, to drive climate action by enabling companies to set science-based emissions reduction targets.

### DRIVING THE TRANSITION TO EMISSION-FREE ENERGY

The sources of the energy we use play a significant role in the climate impacts of our own operations, which is why Kemira is making ongoing and dedicated efforts, both big and small, to transition its production sites to emission-free energy. In 2024, approximately 72% of our purchased energy was emission-free. With sites like our Swedish facility drawing 50% of its electricity from wind and our Finnish sites increasingly powered by nuclear and renewable sources.

Kemira is also currently evaluating ten of its plants worldwide for potential solar power projects. In 2024, our target to establish a 100% renewable electricity site in California was both realized and implemented.

An example of an important but smaller-in-size measure to further reduce our emissions relates to our opting for greener energy sources to get shipments from A to B. In 2024, our team in California completed their first liquid bulk deliveries using electric trucks powered by solar energy, exemplifying our commitment to greener energy sources for shipments. Additionally, in Europe, we have been delivering to municipal water treatment facilities in Sweden with diesel vehicles now running on hydrogenated vegetable oil since the start of 2024, leading to a significant 70% reduction in carbon footprint for those customers. These efforts drive us closer to our Scope 3 targets and strengthen the resilience of our supply chain.

## RAW MATERIAL TRANSFORMATION ANALYSIS

In 2024, Kemira conducted an internal Scope 3.1 GHG abatement analysis to identify key abatement levers. Above 50% of Kemira's Scope 3.1 abatement relies on renewable electricity and heat for our Tier 1 and Tier 2 suppliers. The key levers also consider renewable feedstocks, including renewable naphtha, ammonia and methanol, and the implementation of carbon capture and storage (CCS) technologies to emission intensive processes, like steam methane reformers and stream crackers. The Scope 3.1 abatement strategy includes a combination of levers influenced by both Kemira and our suppliers. These levers include innovating sustainable material sourcing, enhancing resource circularity, and improving efficiencies throughout our supply chain.

## IMPROVING TRANSPARENCY FOR INFORMED CLIMATE ACTION

Throughout 2024, Kemira's climate action initiatives involved mitigating site-specific climate impacts and further preparing for climate disclosure requirements, particularly the new EU regulations on Corporate Sustainability Reporting (CSRD) and its European Sustainability Reporting Standards (ESRS) that came into force for financial year 2024.

In addition, Kemira continued its efforts to enhance its significant project to model climate risk scenarios, which started with a limited number of manufacturing sites in 2022 and expanded to encompass a broader range of locations

throughout 2023 and 2024. This project addresses both physical risks related to the impacts of climate change and transitional risks, including financial ones.

To increase transparency, Kemira actively reports on sustainability to platforms such as CDP and EcoVadis, 2023 scores of 'B' in both climate and water rankings. We also retained top industry positioning with EcoVadis Gold and MSCI's AAA rating, placing us among the global leaders in our industry. These ratings reflect our strong performance in environmental, social, and governance areas, with commitments to continually strengthen our impact.

## MAKING BIODIVERSITY MORE VISIBLE

Kemira is a member of the ongoing Biodiversity ad-hoc group organized by the Finnish Chemical industry since 2022. For the past three years, we've been working to understand Kemira's impacts, dependencies, risks and opportunities related to biodiversity in our direct operations and upstream value chain. We have conducted several internal biodiversity assessments using specialized tools like IBAT (Integrated Biodiversity Assessment Tool) and WWF Biodiversity Risk Filter, and we had a pilot-scale consultancy-led project in 2023. In 2024, we completed a half a year training for the Science-Based-Targets for Nature (SBTN), organized by the UN Global Compact Finland alongside 14 renowned Finnish companies.

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

“A truly symbiotic and beneficial relationship between Kemira’s plant and Helsingborg city, this ongoing union clearly shows how district heating, circularity and lower-emission logistics can successfully contribute to global climate efforts and also positively enhance the community impact.”

Peter Kihlgren  
Managing Director, Sweden

## CASE

# Marking 50 years of groundbreaking climate, energy and circularity actions in Helsingborg

In 2024, Kemira and Öresundskraft’s cooperation regarding the residual heat from Kemira’s manufacturing site in Helsingborg, Sweden, marked its 50th anniversary. Across the decades, this cooperation has bolstered the competitiveness of the companies, significantly reduced CO<sub>2</sub> emissions, and led to positive regional economic benefits.

Launched in 1974, the cooperation began when hot water from the then Boliden Kemi began pumping out of the Helsingborg district heating network. At the same time, the oil crises of 1974 and 1979 had caused the oil price to dramatically increase, and the utilized residual heat was an important first step in moving away from oil dependence.

Based on commercial principles for the benefit of both parties, having an outlet for the residual heat gives Kemira a competitive advantage. For Öresundskraft, the residual heat is the foundation for the district heating of Helsingborg and delivers about 40% of the total heating needs.

The most noted benefit of the collaboration has been the resulting reduction in carbon emissions. From 1974-2024, the total CO<sub>2</sub> savings have been calculated at around 2 million tonnes, the equivalent of some 27,000 tanker trucks full of gasoline, or approximately 1,340,000 homes’ average electricity use for one year.

Beyond CO<sub>2</sub> reduction, Kemira’s lower-emissions logistics and advanced environmental controls, including filtration and scrubbing technologies, have decreased other pollutants like sulfur dioxide, nitrogen oxides, and volatile organic compounds. Additionally, using residual heat has reduced reliance on virgin natural resources.

At the site, Kemira’s largest global manufacturing facility, sulfuric acid is produced, and the entire process of producing sulfuric acid is exothermic. While a few other sources of energy are also utilized, like natural gas for certain high energy or high temperature processes, in total, the site recovers 600 gigawatt hours per year, the equivalent to the annual heating requirements of around 30,000 Swedish houses. Most of this energy comes from sulfur combustion, a CO<sub>2</sub>-free process, making it an environmentally friendly energy source.

This collaboration across five decades is now understood to be one of the oldest, as well as the longest district heating agreements in the world.

### FINANCIAL STATEMENTS

### SUSTAINABILITY STATEMENT

**At Kemira, we recognize the critical importance of clean water as a non-negotiable foundation of life. And in a world facing the increasing challenges of climate change and a growing population, ensuring access to this invaluable natural resource has been at the very core of our company ethos for many decades.**

We provide solutions for clean and safe water that improve our customers water resilience and mitigate their risks towards water scarcity. In 2024, our solutions helped to clean more than 21 billion m<sup>3</sup> of water – enough water to supply about 370 million people for one year (the average person uses about 155 liters of water per day) or the equivalent of around eight million Olympic-sized swimming pools – while efforts within our own operations have ensured continuous improvement in water recycling and freshwater use.

We offer solutions to water-intensive industries that enable them to minimize and improve their water impacts. Through our products, they are empowered to both use less water and usher in processes to increase reuse and recycling. Recycling water, rather than drawing from freshwater sources, is part of our strategic goal of enhancing water resilience wherever we operate. Kemira is strongly dedicated to delivering cleaner and more sustainable water management.

### FASTER FORWARD INITIATIVE

In September 2023, Kemira joined the UN Global Compact Faster Forward Initiative, a world-wide effort that unites businesses to take measurable, credible, and ambitious action to accelerate the progress on the UN's 17 Sustainable Development Goals (SDGs). Kemira is committed to building water resilience through its participation.

A commitment of this kind means Kemira must build water resilience across global operations and supply chains and join hands to achieve collective positive water impact in at least 100 vulnerable prioritized water basins by 2030.

Kemira operates globally in regions where water scarcity is already an issue. Here Kemira can improve

water resilience through improving recycling of water, securing quality of drinking water and making sure that water is treated and nutrition loads, for example, are minimized before it ends up in nature.

Kemira has been proactive in addressing water-related challenges for many decades. It has an ongoing commitment to the CEO Water Mandate, where it strives to promote water stewardship best practices. Kemira's firm ambition is to elevate its water management to a Leadership level, as determined by the CDP Water Security scoring methodology, by the end of 2025. In addition, Kemira and its partners work together to apply innovations to secure a safe and clean water circularity.

### CASE

# Our products help millions of people globally to have access to clean water

Our positive external water impact includes providing chemical solutions that help clean around 21 billion cubic meters of water every year. This vast number is equivalent to the annual consumption needs of approximately 370 million people. However, our firm commitment to water management extends beyond the water-intensive industries we provide our solutions to. We likewise uphold the same high standards throughout our own operations.

In 2024, we further enhanced our efforts to improve our own water balance accuracy, to track our water usage and recycling data, and to fully map our water impacts across all sites. These actions were taken so that we could implement more informed, targeted actions to conserve and preserve our own water consumption. The process included mapping of gaps in water accounting and installation of additional measurements at sites to reduce uncertainty in site specific water balances. In addition, water-related risks and opportunities are assessed at each Kemira plant and at a corporate level using scenario analysis. Mapping and conservation efforts in recent years have been particularly targeted to the sites located in water-stressed and water-scarce areas.

Kemira has 58 manufacturing sites globally. In 2024, 12 of Kemira's sites were located in water stress areas. It is deemed critical that the water consumption and accounting minimizes uncertainties, so we are able to track and quantify the impact of our improvements at all our sites and especially the sites located in water-stressed and water-scarce areas. Water withdrawal and discharge data, and calculated water consumption is collected in accordance with GRI standards. Our water management project strongly emphasizes the importance of accurate and foundational water accounting for both our mandatory and legislative-driven sustainability reporting, and for our continuous improvement to reduce water impacts.

As part of this process, Kemira has a target to improve water management to Leadership level based on CDP Water Security scoring methodology by the end of 2025, to show our customers and other stakeholders that our own water management is both at a high level and transparent.

“Our products really help many millions of consumers globally to have access to clean water. But it is also critical that our own house is in order and we have actions to reduce water related impacts and risks in our own operations and our water accounting is accurate. This important work will continue throughout 2025 and beyond.”

Teemu Mattila  
Manager, Environmental Safety,  
EHSQ

## SUSTAINABILITY STATEMENT

**Our valued and professional Kemira team drives our success and is front and center in our global operations collaborating across regions, businesses, and functions and with our customers and other stakeholders. Three Kemira principles support the development of the growth culture, accelerate strategy execution and drive performance: Focus on Growth, Collaborate to Succeed, and Deliver Value.**

These principles are the high-level guidance for everyone in Kemira and are aligned with our purpose, values and strategy. They help us to anticipate the future needs of our customers, to embrace a growth mindset to develop sustainable long-term solutions and ensure that the whole organization has competences for growth. Embracing diversity, equity and promoting an inclusive environment not only enhances our innovation, but also boosts employee engagement, wellbeing, and satisfaction, factors which strongly contribute to our shared and successful growth journey and sustainability transformation. In 2024, we continued to promote an environment where every individual can feel respected, empowered and valued, with plenty of opportunities for learning and development.

In 2024, Kemira underwent a transformative journey as a company, with the announcement of a new CEO, a new structure, and a new operating model. These changes aimed to increase customer centricity, strategic focus, speed of delivery and accelerate growth and shareholder value creation. As part of the transformation process, we intensified the growth culture dialogue as well as greater adoption of the Kemira principles so everyone can contribute to Kemira's growth journey. By year end, adoption of the Kemira Principles and the associated nine habits were completed by 63% of our global employees via a short e-learning course.

## SUSTAINABILITY STATEMENT

As part of our long-established and comprehensive framework to advance our commitment to diversity, equity and inclusion, our employee engagement has been consistently strong over the years, and 2024 continued the solid progress. In May 2024, the Kemira engagement score was 80, a result notably above the external manufacturing benchmark of 74. We completed 20 diversity focused workshops at our manufacturing sites and 70% of all our manufacturing sites have now been covered by these workshops during 2023–2024.

The 2024 Inclusion Index declined slightly compared to the previous year, reaching 77 (78) compared to the top 10% cross industry benchmark of 80, based on MyVoice May 2024.

- Key achievements include the internal staffing of leadership roles of the new organization.
- Updated Kemira Principles learning program for our employees to understand our new principles and operating model were implemented.
- Our Employee Resource Groups (ERG) actively help to promote an inclusive workplace through various initiatives. In August, KemPride and the Women's Network visited our manufacturing site in the Netherlands, one of the largest in Europe and discussed many important topics related to diversity, equity, and inclusion, as well as reiterated the importance of the ethos 'One Kemira' within the company.
- A wellbeing month in September and a learning month in October boosted employee resilience and prepared the employees for the transition to a new 2025 operating model.

“In 2024, our readiness for future growth and our ongoing commitment to diversity and employee wellbeing were further advanced. But we are on a transformational journey, and in 2025, I am excited to help our valued employees to successfully adapt and flourish in this next phase in our growth story.”

**Corporate Governance Statement 2024**

Board of Directors

Group Management

Remuneration Report 2024

**FINANCIAL STATEMENTS**

**SUSTAINABILITY STATEMENT**

## Introduction

Kemira Oyj’s corporate governance is based on the Articles of Association, the Finnish Companies Act, and Nasdaq Helsinki Ltd.’s rules and regulations on listed companies. Kemira complies with the Finnish Corporate Governance Code, which is publicly available at [website of the Securities Market Association](#).

This statement is presented separately from the annual report by the Board of Directors. Kemira’s Audit Committee has reviewed the Corporate Governance Statement. The Company’s Auditor, Ernst & Young Ltd, has verified that the statement has been issued and that the description of the main features of internal control and risk management related to the financial reporting process included in the statement is consistent with the Financial Statements.

## Governance bodies

The General Meeting of Shareholders, the Board of Directors and the Managing Director (the President & CEO) are responsible for Kemira’s governance and operations. Their tasks are defined based on the Finnish Companies Act and Kemira’s Articles of Association.

## GENERAL MEETING OF SHAREHOLDERS

Kemira Oyj’s General Meeting of Shareholders is the Company’s highest decision-making body, and it is held at least once a year. The Annual General Meeting (AGM) must be held each year by the end of June. The AGM decides on matters within its competence under the Companies Act and the Articles of Association, such as the adoption of the financial statements and the dividend payout, the discharge from liability of Board members, Managing Director and his/her Deputy, the election of Chair, Vice Chair and other members of the Board of Directors and their remuneration, and the election of the auditor and the sustainability reporting assurance provider and their fees.

Notice to the General Meeting shall be released on the Company’s website no earlier than two months and no later than three weeks before the meeting and at least nine days before the record date of the meeting. Additionally, if so decided by the Board of Directors, the Company may publish the notice to the General Meeting in one nationwide newspaper.

Kemira Oyj’s Annual General Meeting was held in Helsinki on March 20, 2024. A total of 669 shareholders were represented at the meeting, either as having voted in advance, in person, by legal representative or by proxy, and a total of 104,237,719 shares and votes were represented at the beginning of the meeting.

The documents related to the AGM are available on Kemira’s website [kemira.com](#).

## NOMINATION BOARD

The 2012 Annual General Meeting decided to establish a Nomination Board consisting of the shareholders or the representatives of the shareholders to prepare annually a proposal for the next AGM concerning the composition and remuneration of the Board of Directors. The Nomination Board consists of the representatives of the four largest shareholders of Kemira Oyj based on the situation on May 31 preceding the AGM, and the Chair of Kemira Oyj’s Board of Directors acts as an expert member. The members of the Nomination Board shall elect a Chair at the first meeting of the Board. The Group General Counsel acts as the Secretary of the Nomination Board.

The Nomination Board has a Charter approved by the General Meeting that defines more precisely the process to elect its members and Chair as well as its tasks and meeting routines. The Charter was last amended and approved by the Annual General Meeting in 2023. The Charter is publicly available on the Company’s [website](#).

According to its Charter, the Nomination Board will meet at least two times a year, with authority to convene additional meetings as circumstances require. The members present at the meeting shall constitute a quorum if at least three of the members are present at the meeting.

In June 2024, the following representatives of the four largest shareholders were appointed to Kemira’s Nomination Board: Ville Kivelä, Chief Investment Officer, Oras Invest Oy;

Hanna Kaskela, Senior Vice President, Sustainability & Communications, Varma Mutual Pension Insurance Company; Lisa Beauvilain, Global Head of Sustainability & Stewardship, Executive Director, Impax Asset Management plc; Annika Ekman, Head of Equities, Ilmarinen Mutual Pension Insurance Company, and as an expert member, Matti Kähkönen, Chair of Kemira’s Board of Directors. Ville Kivelä is the Chair of the Nomination Board and Group General Counsel Jukka Hakkila acts as the Secretary of the Nomination Board. In the beginning of the year 2024 before the AGM, the members of the Nomination Board were Ville Kivelä, Pauli Anttila (resigned on February 13, 2024 before any meetings in 2024), Lisa Beauvilain, Hanna Kaskela and Matti Kähkönen.

The Nomination Board met nine times in 2024 with an attendance rate of 100%. Each member’s participation in the Nomination Board meetings was as follows:

Name	Participation in meetings	Participation percentage
Anttila, Pauli	0/0	–
Beauvilain, Lisa	9/9	100%
Ekman, Annika	8/8	100%
Kaskela, Hanna	9/9	100%
Kivelä, Ville	9/9	100%
Kähkönen, Matti	9/9	100%
<b>Total</b>	<b>44/44</b>	<b>100%</b>

## BOARD OF DIRECTORS

### Composition

According to the Articles of Association, the AGM elects the Chair, Vice Chair and other members of the Board of Directors. In accordance with the Articles of Association, the Board of Directors comprises 5–10 members. The term of the members of the Board of Directors expires at the close of the next AGM following their election.

On March 20, 2024, the Annual General Meeting elected eight members to the Board of Directors. The AGM re-elected Tina Sejersgård Fanø, Werner Fuhrmann, Matti Kähkönen, Timo Lappalainen, Fernanda Lopes Larsen, Annika Paasikivi, Kristian Pullola and Mikael Staffas to the Board of Directors. Matti Kähkönen was re-elected the Board’s Chair and Annika Paasikivi was re-elected the Vice Chair. The composition of the Board of Directors remained unchanged in the AGM. Fernanda Lopes Larsen resigned from the Board of Directors effective as of July 31, 2024. Group General Counsel Jukka Hakkila acts as the Secretary of the Board of Directors.

All of the Board members are independent of the Company. The Board members are also independent of significant shareholders of the Company except for Vice Chair Annika Paasikivi. Paasikivi is the Managing Director of Oras Invest Oy, which owns over 10% of Kemira Oyj’s shares.

The personal information concerning members of the Board of Directors can be found in the section Group Management and their holdings can be found under the heading Insiders.

### Principles concerning the diversity of the Board of Directors

The Board of Directors has adopted the following principles and targets concerning the diversity of the Board of Directors. When designing the composition of the Board of Directors, the Nomination Board of the Company assesses the Board’s composition from the viewpoint of the Company’s current and future business needs, while taking into account the diversity of the Board. The diversity of the Board of Directors will be assessed from various viewpoints. Kemira’s Board of Directors shall have sufficient and complementary experience and expertise in the key industries and markets relevant to Kemira’s business. In addition, an essential element is the personal characteristics of the members and their diversity. The Company’s aim is that the Board of Directors represent diverse expertise in different industries and markets, diverse professional and educational backgrounds, diverse age distribution and both genders. The objective is that both genders are represented in the Board by at least two members.

The Sustainability Governance section of the Company’s Sustainability Statement contains a table describing the implementation of diversity on the Board of Directors. The table presents the experience and expertise of the Board members in various leadership positions and in relevant industries and markets. The table also includes the gender, age, nationality and term of office of each Board member on Kemira’s Board of Directors. The gender distribution of the Board is 71% male and 29% female (until July 31, 2024: 62% male and 38% female). The Board members represent four nationalities (until July 31, 2024, five nationalities). On the

## SUSTAINABILITY STATEMENT

date of the AGM, the age distribution of the members was as follows: two members were below 50 years, three members were below 60 years, two members were below 70 years and one member was over 70 years. All Board members have a master's degree, mainly in engineering or economics. The Company believes that its Board of Directors complies with its published diversity principles.

### Tasks and duties

According to the Finnish Companies Act, the Board of Directors is responsible for ensuring the administration of the Company and the proper organization of its operations. The Board of Directors is responsible for ensuring that the Company's accounting and financial management are properly supervised.

The Board has drawn up a written Charter defining its key duties and procedures. The Charter is publicly available on the Company's [website](#). The following is a description of the essential contents of the Charter.

The Board has access to sufficient information about the Company's business operations, operating environment and financial position. The Board receives information regularly concerning the financial performance, the market situation and significant events within the Group's operations. The CEO shall immediately inform the Chair of any significant events concerning the Company and the Chair and the CEO will consider whether the Board has to be convened or informed.

The following matters shall be the principal duties of the Board: to review and approve the Company's strategic objectives and plans and monitor their implementation; to review and approve annually the financial targets and forecasts; to define and approve the Code of Conduct and the key corporate policies in key management control areas

like risk management, financial control, financing, internal control, information security, corporate communications and human resources; to approve the Remuneration Policy of the Governing Bodies and the Remuneration Report; to approve Kemira's values, the sustainability targets and the Sustainability Report; to define the principles for the monitoring and evaluation of related party transactions; to approve the organizational structure of the Company and to appoint and discharge the CEO, the CEO's deputy, the members of the Audit Committee and the Personnel and Remuneration Committee as well as approve the members of the Management Board / Group Leadership Team; to approve the Company's Capital Investment and Lease Commitment Policy as well as investments and lease commitments exceeding € 10 million; to approve acquisitions, divestments, mergers and joint ventures or comparable transactions when the value is exceeding € 5 million; to ensure, that supervision of the bookkeeping and the financial matters of the Company are properly organized, and to ensure proper preparation of and to approve the interim and annual financial statements of the Company and consolidated financial statements of the Group according to the local prevailing laws and regulations and International Accounting Standards (IAS) or International Financial Reporting Standards (IFRS); to review the Auditor's report; to ensure that the Company has adequate planning, information, and control systems and resources for monitoring results and managing risks in operations; to monitor and evaluate the performance of the CEO and the members of the Management Board / Group Leadership Team and to decide upon their remuneration and benefits; to ensure continuation of the business operations by succession planning for key persons; to define and approve the main principles for the incentive bonus systems within the Company; to convene General Meetings of Shareholders; and to decide upon other significant matters not belonging to the day-to-day operations. The Board approves the group

treasury policy and accordingly the major long term loans and Company guarantees.

The Board reviews the report of the CEO on the Group's operations, review the reports of the Board Committees; conducts an annual evaluation of its operations and working methods; approves annually the Charters of the Board and its Committees; conducts the independence evaluation of the Directors and report which directors are independent of the Company and which are independent of the significant shareholders, and reviews other matters submitted by a Director or the CEO.

According to the Charter of the Board of Directors, the Board must convene regularly and at least eight times a year. The Board of Directors has a quorum when more than half of the directors are present. The opinion which has been supported by more than half of those present shall become the decision or, in the event of votes being equal, the opinion with which the Chair concurs.

In 2024, the Board of Directors met 11 times. The average attendance rate at the meetings was 99%. Each director's attendance in the meetings was as follows:

Name	Participation in meetings	Participation percentage

### BOARD COMMITTEES

Kemira Oyj's Board of Directors has appointed two committees: the Audit Committee and the Personnel and Remuneration Committee.

#### Audit Committee

The Audit Committee works in accordance with its Charter approved by the Board of Directors. The Charter is publicly available on the Company's [website](#). The following describes the main content of the Charter.

With respect to Financial Statements, the Committee monitors the reporting process of financial statements; monitors the statutory audit of the financial statements and consolidated financial statements; reviews significant accounting and reporting issues; reviews with management and the external auditors the results of the audit; reviews the annual financial statements and consider whether they are consistent with information known to Committee members and reflect appropriate accounting principles; reviews other relevant sections of the Annual Report; reviews interim financial statements; reviews the description of the main features of the internal control and risk management systems pertaining to the financial reporting process, which is included in the Company's Corporate Governance Statement; reviews the Corporate Governance Statement; and reviews the Sustainability Report.

With respect to Internal Control, the Committee monitors the effectiveness of Kemira's overall system of internal control, understands the scope of internal and external auditors' review of internal controls related to accounting matters and financial reporting. With respect to Internal Audit, the Committee reviews and evaluates the charter, annual plans, activities and staffing of the internal audit function; ensures that there are no restrictions or limitations regarding the activities of the internal audit function; monitors the

effectiveness of the internal audit function; as and when needed, meet separately with the chief auditor to discuss any matters that the committee or internal audit consider necessary; and approves the annual Internal Audit Plan.

With respect to External Audit, the Committee reviews and evaluates the external auditors' proposed audit scope and approach, reviews and confirms the independence of the external auditors, as and when needed, meets separately with the external auditors to discuss any matters that the Committee or auditors consider necessary, reviews and evaluates the process of selecting external auditors and follows eventual regulatory changes regarding selection and rotation requirements; preapproves, subject to delegation, and monitors all non-audit services to be purchased from the external audit firm/auditor; prepares the proposals for the election of the external auditor and the sustainability assurance provider and for their compensation to be proposed by the Board to the AGM. The Committee oversees the sustainability reporting and its assurance.

With respect to Compliance; the Committee reviews the effectiveness of the system for monitoring compliance with laws and regulations and the results of management's investigation and follow-up (including disciplinary action) of any instances of noncompliance; reviews the findings of any examinations by regulatory agencies, and any auditor observations; reviews the process for communicating the Kemira Code of Conduct to company personnel, and for monitoring compliance therewith. With respect to Risk Management; the Committee monitors the efficiency of the Company's risk management systems. In addition, the Committee among others reviews periodically the material legal cases in which the Company is involved and reviews the principles concerning the monitoring and assessment of related party transactions.

According to its Charter, the Audit Committee consists of not less than three members of the Board of Directors. The majority of the members shall be independent of the Company and at least one member shall be independent of significant shareholders. The members shall have sufficient expertise and experience with respect to the Committee's area of responsibility and the mandatory tasks related to auditing. According to its Charter, the Audit Committee shall convene at least four times a year. The Audit Committee has a quorum when at least three members are present in the meeting.

After the 2024 AGM, the Board elected Kristian Pullola as the Chair and Werner Fuhrmann, Timo Lappalainen and Fernanda Lopes Larsen as members of the Audit Committee. Fernanda Lopes Larsen resigned from the Board and the Audit Committee as of July 31, 2024. All members of the Committee are independent of the Company and its significant shareholders. Between January 1 and March 20, 2024, the Committee Chair was Timo Lappalainen and the members were Werner Fuhrmann, Fernanda Lopes Larsen and Kristian Pullola.

The Audit Committee met five times in 2024 with an attendance rate of 100%. Each member's attendance in the Audit Committee meetings was as follows:

Name	Participation in meetings	Participation percentage
Fuhrmann, Werner	5/5	100%
Lappalainen, Timo	5/5	100%
Lopes Larsen, Fernanda	3/3	100%
Pullola, Kristian	5/5	100%
<b>Total</b>	<b>18/18</b>	<b>100%</b>

### Personnel and Remuneration Committee

The Personnel and Remuneration Committee works according to its Charter confirmed by the Board of Directors. The Charter is publicly available on the Company's [website](#). The following describes the main content of the Charter.

The Committee will carry out the following responsibilities. Regarding remuneration matters, the Committee prepares matters relating to the compensation and other financial benefits of the CEO, his/her deputy and the members of the Management Board / Group Leadership Team; prepares matters pertaining to the remuneration schemes of the Company; prepares the Remuneration Policy for the Governing Bodies; evaluates remuneration of the CEO, his/her deputy and the members of the Management Board / Group Leadership Team as well as ensures that the remuneration schemes are appropriate; and reviews annually the Remuneration Report. Regarding nomination matters, the Committee prepares matters relating to the appointment of the CEO, his/her deputy and the members of the Management Board / Group Leadership Team as well as identification of their potential successors; plans matters pertaining to the development of the organization; and evaluates the senior management performance.

According to its Charter, the Committee consists of no less than three members, the majority of which shall be independent of the Company. According to its Charter, the Committee shall convene at least twice a year. The members present at the meeting shall constitute a quorum if at least three of the members are present at the meeting.

After the 2024 AGM, the Board elected Annika Paasikivi as the Chair, and Tina Sejersgård Fanø, Timo Lappalainen, and Mikael Staffas as members of the Personnel and Remuneration

Committee. All Committee members are independent of the Company. Between January 1 and March 20, 2024 the Committee members were Matti Kähkönen (Chair), Tina Sejersgård Fanø, Timo Lappalainen and Mikael Staffas.

In 2024, the Personnel and Remuneration Committee met eight times. The attendance rate at the meetings was 94%. Each member's attendance in the Personnel and Remuneration Committee meetings was as follows:

Name	Participation in meetings	Participation percentage
Fanø, Tina Sejersgård	6/8	75%
Kähkönen, Matti	1/1	100%
Lappalainen, Timo	8/8	100%
Paasikivi, Annika	8/8	100%
Staffas, Mikael	8/8	100%
<b>Total</b>	<b>31/33</b>	<b>94%</b>

### MANAGING DIRECTOR

The Managing Director (the President & CEO) is in charge of the day-to-day management of the Company in accordance with the instructions and orders issued by the Board of Directors. The Board of Directors appoints and discharges the Managing Director, decides on the financial benefits within the framework of the valid remuneration policy presented to the General Meeting and on other terms of the service, and supervises the operations of the Managing Director. The Managing Director may undertake measures that are unusual or extensive, considering the scope and nature of the operations of the Company, only with the authorization of the Board of Directors. The Managing Director is responsible for ensuring that the Company's accounting practices are in compliance with the law and that the financial matters are organized in a reliable manner. The Managing Director is the Chair of Kemira's

Management Board / Group Leadership Team. The Board of Directors may appoint a Managing Director's deputy.

Kemira Oyj's Managing Director is President & CEO Antti Salminen as of February 12, 2024. CFO Petri Castrén was the Interim President & CEO and Managing Director until February 11, 2024. Group General Counsel Jukka Hakkila is the Managing Director's Deputy.

The Managing Director, the Interim Managing Director and the Managing Director's Deputy, including their related parties, were not involved in any substantial business relationships with the Company during the reporting period.

The personal information concerning the Managing Director, the Interim Managing Director and the Managing Director's Deputy is set forth under the section Group Management, and their shareholdings can be found in the section Insiders. The financial benefits related to the employment of Managing Director, Interim Managing Director and Managing Director's Deputy are described in the Remuneration Report.

### MANAGEMENT BOARD

The following describes Kemira's Management Board during the reporting period 2024. In August 2024, the Company announced that the composition and name of the Management Board will change effective from January 1, 2025. The new name is Group Leadership Team. Its members have been presented on the Company's website.

The Management Board was a non-statutory management body consisting of the operative management of the Company. It was responsible for securing the long-term strategic development of the Company.

## CORPORATE GOVERNANCE

### Corporate Governance Statement 2024

Board of Directors

Group Management

Remuneration Report 2024

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

During the reporting period, Kemira's Management Board consisted of Antti Salminen (Managing Director, President & CEO), Petri Castrén (CFO), Harri Eronen (Interim President, Pulp & Paper), Linus Hildebrandt (EVP, Strategy), Matthew R. Pixton (CTO), Esa-Matti Puputti (EVP, Operational Excellence & Sustainability), Eeva Salonen (EVP, HR) and Tuija Pohjolainen-Hiltunen (President, Industry & Water). The Managing Director was the Chair of the Management Board and the Group General Counsel acted as its Secretary.

The personal information of the Management Board members is presented in the section Group Management and their holdings can be found in the section Insiders. The decision-making process and main principles of remuneration of the members of the Management Board, other than the Managing Director, are described on the Company's [website](#).

### OPERATIONAL ORGANIZATION

The following describes Kemira's operational organization that was effective until the end of year 2024. In August 2024, the Company announced that its operative organization will change effective from the beginning of year 2025. Information about the Company's new organization has been presented on the Company's website.

Kemira had organized its business into two customer-based segments. The Pulp & Paper segment focused on serving customers in the pulp and paper industry and the Industry & Water segment focused on serving customers in the municipal and industrial water treatment. The segments had a strategic leadership role, as they formulated their respective business strategies and guided strategy implementation within the segment. Operational business responsibilities and the Profit & Loss responsibility belonged to each of the segments.

The segments were guided by policies and guidelines defined by global functions. Global functions are responsible for developing policies, processes, guidelines and tools related to their respective functional areas on a global basis. Such policies and processes are complied with throughout the Company. Functions also have representatives in each geographic region. Regional functions ensure that the global policies are implemented and adhered to in the regions. They are also responsible for supporting the business locally in the region.

Kemira's operations are geographically divided into three business regions: Europe, Middle East and Africa (EMEA), Americas and Asia Pacific (APAC). The Region Heads provide operational support and co-ordination within the region and steer all regional development projects.

## Internal control

Kemira maintains an internal control system to ensure the effectiveness and efficiency of its operations, including the reliability of financial and operational reporting and compliance with applicable regulations, policies and practices. Internal control is an integral part of all of Kemira's operations and covers all levels of the Group. The entire Group's personnel are responsible for internal control and managers monitor its effectiveness as part of operational management.

Kemira's corporate values, Code of Conduct and Group-level policies and procedures guide corporate governance and internal control within the Group. The internal policies and the Kemira Code of Conduct have been communicated to all Group staff. The Group also provides training on the main policies for people who need to know such policies. The Code of Conduct is trained to all employees. Every employee has the right and duty to report any violations of the law, the Code of Conduct or Group policies. The main components of internal control are the management and organizational culture, risk assessment, control activities, reporting and communication, as well as monitoring and auditing.

## Insiders

Kemira Oyj complies with the EU Market Abuse Regulation, Finnish Securities Market Act, the rules and regulations issued by the European Securities and Markets Authority (ESMA) and Finnish Financial Supervision Authority (Fin-FSA), and the Guidelines for the Insiders of Listed Companies issued by Nasdaq Helsinki Ltd. The Company has identified the persons and vice-persons responsible for the various areas of insider administration within the Company, including compliance in general, decision-making on the publishing of insider information and on delaying the publication, maintaining the insider list, overseeing compliance with trading restriction as well as the publication of transactions made by the persons discharging managerial responsibilities and their closely associated persons involving stocks and other financial instruments relating to Kemira.

The Company has determined, as required by the Market Abuse Regulation, that the persons discharging managerial responsibilities within the Company include the Board of Directors, the Managing Director (President & CEO), Management Board / Group Leadership Team as well as the secretary of Board of Directors and Management Board. The persons discharging managerial responsibilities are responsible for identifying their closely associated persons and to disclose the same to Kemira. Kemira discloses via a stock exchange release all transactions made by the persons discharging managerial responsibilities and their closely associated persons and companies involving stocks and other financial instruments relating to Kemira, as required by the Market Abuse Regulation.

According to the law, a person discharging managerial responsibilities must not make transactions with stocks or other financial instruments of a listed company during a period of 30 days preceding the publications of the interim or annual financial report of a listed company. Kemira applies a similar 30-days trading restriction to those Kemira Group employees who are involved in the preparation or publication of the interim or annual financial report and who have access to group level unpublished financial information.

Kemira Oyj's insider list is maintained by the legal department (from 2025, Group Governance & Compliance department of the Company). The attached table lays out the number of stocks owned by the persons discharging managerial responsibilities for Kemira Oyj, either directly or through companies under their control, on December 31, 2024.

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

## Internal Audit

Kemira Group's Internal Audit function provides independent appraisal and assurance for the review of operations within the Group in order to support the management and the Board of Directors in fulfilling their oversight responsibilities. The purpose is to evaluate and contribute to the improvement of risk management, control and governance systems in the Group. The purpose, authority and responsibilities of the unit are defined in the Kemira Internal Audit Charter approved by the Audit Committee.

Internal auditors have complete and unrestricted access to all Kemira activities. Internal Audit is free to determine the scope of internal auditing, the ways of performing its work, and the communication of its findings.

Internal Audit reports to the Audit Committee and administratively to the Group General Counsel. Internal Audit reports all of its observations to the responsible management and to the auditor. In addition, Internal Audit regularly reports the most essential and material observations to the Audit Committee. Furthermore, Internal Audit has direct and unrestricted access to the Chair of the Audit Committee for all necessary discussions.

## Audit

Under the Articles of Association, the General Meeting elects an audit firm certified by the Auditor Oversight, a department of Finnish Patent and Registration Office, as the Company's auditor. The audit firm appoints the Principal Auditor, who is an Authorized Public Accountant certified by

the Auditor Oversight, a department of the Finnish Patent and Registration Office. The auditor's term of office continues until the next Annual General Meeting after the Auditor's election.

The 2024 Annual General Meeting re-elected Ernst & Young Ltd as the Company's auditor, with Mikko Ryttilahti, APA, acting as the Principal Auditor. The 2024 AGM elected Ernst & Young Ltd as the Company's sustainability reporting assurance provider, with Mikko Ryttilahti, APA and authorized sustainability reporting assurer, acting as the principal assurer.

In 2024, the audit fee paid globally to the audit firm Ernst & Young totaled EUR 1.7 million. In addition, a total of EUR 0.1 million was paid as fees for tax services and 0.2 million as fees for other services.

## Control and risk management systems pertaining to the financial reporting process

Kemira's Board of Directors defines the main principles of risk management and approves the Group's risk management policy. The business segments and functions are responsible for identifying, assessing and managing risks involved in their activities. The Group's Risk Management function coordinates and supports risk management. Kemira's internal control system covers Group operations, including financial reporting. The internal control activities are carried out in all organizational levels as part of the Group's daily operations. A more detailed description of risks and risk management can be found in Board of Directors Review and on the Company's [website](#). A general description of Kemira's internal control system can be found above under the heading Internal control.

The following describes how Kemira's internal control and risk control work in connection with the financial reporting process to ensure that the financial reports published by the Company give correct information of the Company's financial situation.

## ROLES AND RESPONSIBILITIES

Kemira's Board of Directors ensures that the Company has sufficient resources for risk management and control, and that the control has been arranged appropriately, and that the financial statements provide correct and sufficient information of the Company. The Board of Directors is assisted by the Audit Committee in these tasks. The Managing Director handles the Company's everyday management in accordance with instructions and orders set by the Board of Directors. The Managing Director is responsible for the Company's accounting being lawful and that assets are managed responsibly.

The CFO is responsible for the general control system of financial reporting. The areas of responsibility between the financial administration of the Group and the regions have been defined precisely. Group-level financial functions support, monitor, instruct and offer training to the financial organizations of the regions. Group-level financial functions are also responsible for the Group's financial reporting and support segment controllers in analyzing business processes. Financial organization in the regions is responsible for the function of the accounting processes and accuracy of figures in their region. Controlling in segments operates under the segments' business management and analyzes and supports the business processes.

The Group's IT function has a significant role both in financial reporting and internal control, as reporting and many control measures, such as process monitoring, are based on IT solutions.

## ANNUAL REVIEW

## CORPORATE GOVERNANCE

### Corporate Governance Statement 2024

Board of Directors

Group Management

Remuneration Report 2024

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

The Internal Audit function including its tasks and areas of responsibility are described more specifically above, under the heading Internal Audit.

### RISK MANAGEMENT

The Group's financial administration is responsible for managing risks related to the financial reporting. The risks are identified, assessed and managed in connection with the Group's general risk management process and separately as part of financial administration's own operating processes. The Group's financial administration assesses risks it has recognized related to financial reporting. The aim of the risk assessment is to identify and assess the most significant threats affecting financial reporting, to define which function or process the risks are associated with, and to determine how the risks would affect the Group's financial reporting if they were to materialize. The Group's financial administration and Risk Management are responsible for ensuring that the risks are reassessed regularly.

### FINANCIAL REPORTING AND CONTROL

The internal control and risk management systems pertaining to the financial reporting process have been designed so that sufficient certainty on the reliability of the financial reporting can be obtained and that the financial statements have been prepared in accordance with applicable laws and regulations. Kemira complies with the international standards for financial statements (IFRS) which are applicable in the EU, and other requirements specific to listed companies. Kemira Group policies and procedures define in detail the processes and principles of accounting and financial reporting to be applied in all Group companies.

The purpose of the policies and procedures is to ensure the reliability of financial reporting. The Group has a uniform and comprehensive Enterprise Resources Planning (ERP) system that ensures fast and reliable access to data. Subsidiaries report their figures from the ERP system to the Group, using a uniform Group reporting system. The financial organizations of the Group, segments and regions check the correctness of the figures in the Group reporting system in accordance with the responsibility areas described above. Proper control of financial administration, financial reporting and accounting processes is a basic requirement for the reliability of financial reporting. The Group financial administration has determined the appropriate control functions, the objectives of each control function, and how the effectiveness of the control functions is monitored and checked based on a risk analysis it performs. The control functions are described in the above-mentioned risk documentation, and financial administration is responsible for their practical implementation.

Financial reporting control is performed either continuously as part of the transactions of the Company's monitoring processes, such as purchasing and sales processes, or alternatively monthly or annually as part of the reporting process.

### COMMUNICATION

Through a well-functioning internal control environment, Kemira aims to secure the timeliness, accuracy and transparency of the Company's internal and external communication. The most essential guidelines and regulations concerning the financial reporting, internal control and risk management, such as the guidelines regarding the principles of preparation of the financial

statements and financial reporting, are available to all employees via the group intranet. Kemira arranges internal training for its personnel regarding internal control and financial reporting, as well as use of the relevant tools.

### MONITORING

The functioning of internal control, risk management and reporting systems is constantly monitored as part of daily management of the Company. Each segment, function and region are responsible for implementing internal control, its efficiency and reliability of reporting within their area of responsibility. The Group financial administration monitors the functionality and reliability of the financial reporting process and principles at the Group level. The financial reporting processes are also monitored by the Internal Audit function.

## Principles for related party transactions

The Board of Directors of the Company has approved a policy regarding related party transactions. The policy sets forth the Company's process for the monitoring, assessment, and decision-making of related party transactions, as well as the public disclosure of information about related parties and related party transactions. The purpose of the policy is to prevent a related party from taking undue advantage of its position and to provide adequate protection for the interests of the Company and its shareholders. The policy aims to ensure that related party transactions are decided without a conflict of interest, do not negatively affect shareholders' value or the Company's profit, and are made transparently.

## ANNUAL REVIEW

## CORPORATE GOVERNANCE

### Corporate Governance Statement 2024

Board of Directors

Group Management

Remuneration Report 2024

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

The Board of Directors has decided that the following persons are related parties of Kemira: Members of the Board of Directors, the Managing Director and his/her deputy, other members of the Management Board / Group Leadership Team, and such other employees belonging to the management of Kemira Group who have influence in making financial and operational decisions in Kemira Group and who have been considered to be related parties by the Group General Counsel, and close family members of the persons mentioned above. Related party entities include entities of Kemira Group, entities controlled by a related party, and Pension Fund Neliapila. The legal department of the Company maintains an up-to-date register of the Company's related parties.

All proposed related party transactions must be disclosed to the Company's legal department in advance, except for certain customary transactions such as remuneration paid in accordance with the Company's remuneration practices, and transactions having a value not exceeding EUR 5,000. The Company's legal department, assisted by the Finance & Accounting department, assesses whether a proposed related party transaction is made within the ordinary course of Kemira's business and whether it is made on customary commercial terms. Related party transactions that are made either outside the ordinary course of business of Kemira's or on other than customary commercial terms must be approved in advance by the Board of Directors. The Company's Finance & Accounting department also monitors transactions made with the related parties within the framework of its own controlling and monitoring system.

The Board of Directors, the Managing Director, and the General Meeting will take into account and comply with the disqualification rules set forth in the applicable laws when considering and deciding on related party transactions. In accordance with the applicable laws and the Rules of Exchange, the Company publicly discloses related party transactions which are material from the shareholders' perspective and have been entered into either outside of the ordinary course of business or on other than customary commercial terms.

### Remuneration Report 2024

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

The Remuneration Report describes the remuneration of Kemira Governing Bodies, *i.e.*, the Board of Directors, the President & CEO and the CEO's Deputy of Kemira Oyj, for the financial year 2024 as required by the Finnish Securities Market Act, the Finnish Limited Liability Companies Act and the Finnish Corporate Governance Code 2025 issued by the Securities Markets Association.

The report is divided into following sections:

- Pay-for-performance during the preceding five years
- Remuneration of the Board of Directors for the preceding financial year

## Letter from the Chair of the Personnel and Remuneration Committee

Dear Shareholders,

I am pleased to present Kemira's Remuneration Report for the financial year 2024. Kemira's solid performance continued with strong profitability. The revenue reached EUR 2,948 million and the operative EBITDA margin was 19.9%. Kemira's long-term financial targets were updated with an aim for more than 4% organic growth on average while retaining operative EBITDA within 18–20% and operative ROCE above 16%. Further steps were taken on the profitable growth strategy execution journey with several investments and one acquisition as Kemira entered the activated carbon market for micropollutant removal.

The year 2024 was a significant period of change for Kemira. With the appointment of our new President & CEO Antti Salminen who started in February and the announcement of the new Group Leadership Team in August, groundwork was laid for the new chapter. Alongside these leadership changes, we renewed our operating model and undertook a comprehensive organizational redesign aimed at enhancing customer centricity, sharpening strategic focus, accelerating delivery, and driving growth and shareholder value. As part of this transformation, we unfortunately had to say goodbye to some colleagues who exited Kemira by the end of 2024. I want to sincerely thank them for their invaluable contributions in building the strong foundation that supports Kemira today.

We enter this new era of ambition and growth with confidence and momentum. Kemira remains committed to its profitable

growth strategy and the strategic priorities are reflected in the incentive programs. During the year, the Board of Directors launched a new Performance Share Plan. Targets set for the first performance period 2025-2027 reinforce the ambition for growth and long term value creation. Along the design of the new Performance Share Plan, the remuneration mix has been rebalanced, and slightly more weight has been put to shortterm incentive opportunities to incentivize executives for speedier strategy execution.

The Remuneration Policy for the Governing Bodies of Kemira Oyj (the "Policy") was reviewed in the end of 2023, and it came into effect as of January 1, 2024. It was presented to the Annual General Meeting in 2024, and was well received in advisory resolution. The Annual General Meeting 2024 furthermore approved the Remuneration Report 2023 in the advisory resolution. In 2024, the remuneration of the Board of Directors, the President & CEO and his deputy complied with the Policy, and no decisions deviating from the Policy were made. No clawbacks of any remuneration were carried out.

Kemira continues to follow the total remuneration approach built around the principles of pay-for-performance, competitive market-driven remuneration, and effective communication. These principles aim to align the interests of the President & CEO, operative management, employees, and shareholders. I want to thank each of the 4,746 Kemira global team members for their commitment to Kemira's continued success and our shareholders for their trust and confidence in Kemira.

## SUSTAINABILITY STATEMENT

### PAY-FOR-PERFORMANCE DURING THE PRECEDING FIVE YEARS

Kemira is a global company with operations and employees in multiple countries, and the market remuneration levels differ significantly between these countries. To ensure the alignment of the interests of the CEO and the shareholders, a significant portion of the CEO's total remuneration opportunity is attributed to variable components, particularly long-term incentive plans. In contrast, employee remuneration is less volatile, with a smaller portion of total remuneration consisting of variable remuneration.

The Board members do not participate in any incentive plans and thus the remuneration of the Board is more stable in nature.

The table sets out the remuneration paid during the respective year, considering that a portion of that remuneration may have been earned during the previous year.

Over the past 5-year period, the CEO's actual paid remuneration is well aligned with the Company's performance development as visualized in the table and graphs. Kemira has placed increased focus on profitable growth since 2020. Over the long-term Kemira has become a fundamentally stronger company following numerous actions to improve the Company's profitability. The operative EBITDA has grown from EUR 435 million in 2020 to EUR 585 million in 2024.

**REMUNERATION OF THE BOARD OF DIRECTORS FOR THE PRECEDING FINANCIAL YEAR**

As stated in the Policy, the Annual General Meeting may at its discretion decide to remunerate the Board with one or more types of remuneration, such as cash and shares. According to the decisions made in the Annual General Meeting 2024, the members of the Board of Directors are paid an annual fee and a fee per meeting. The members of the Board of Directors are not eligible for the short-term bonus plan or the long-term share incentive plan, or supplementary pension plans of Kemira Oyj.

The annual fees are as follows:

- the Chair will receive EUR 125,000 per year
- the Vice Chair and the Chair of the Audit Committee EUR 70,000 per year
- the other members EUR 54,000 per year.

A fee payable for each meeting of the Board of Directors and the Board Committees are paid based on the method and place of the meeting as follows:

- EUR 750 for each meeting remotely participated or in the member's country of residence.
- EUR 1,500 for each meeting participated on the same continent of the member's country of residence.
- EUR 3,000 for each meeting participated on a different continent than the member's country of residence.

The meeting fees are to be paid in cash. Travel expenses are reimbursed according to Kemira's travel policy. In addition,

the Annual General Meeting 2024 decided that the annual fee shall be paid as a combination of the Company's shares and cash in such a manner that 40% of the annual fee is paid with Kemira shares owned by the Company or, if this is not possible, Kemira shares acquired from the securities market, and 60% is paid in cash.

In the financial year 2024, the following fees were paid to the members of the Board. No other fees or remuneration were paid to any member of the Board.

Board of Directors <sup>1)</sup>	Annual fee, EUR	Remuneration for Board and committee meetings, EUR	Total 2024, EUR
Kähkönen, Matti	125,000	9,900	134,900

## FINANCIAL STATEMENTS

## SUSTAINABILITY STATEMENT

### REMUNERATION OF THE CEO, THE CEO'S DEPUTY AND THE INTERIM CEO FOR THE PRECEDING FINANCIAL YEAR

As stated in the Policy, the remuneration of the CEO might comprise base salary and benefits, performance-based incentive plans, supplementary pensions, insurances and other one time payments.

Antti Salminen was appointed as the President and CEO of Kemira as of February 12, 2024. In 2024, the total remuneration paid to him amounted to EUR 1,843,597 and is based on his previous position as the President, Segment Pulp & Paper and the CEO position. Short-term incentive plan based on the 2023 performance period and long-term share incentive based on the three-year performance period 2021–2023 including the cash portion of the reward was based on Antti Salminen's previous position.

The position of the CEO's Deputy is held as a secondary role by Jukka Hakkila, Group General Counsel. Due to the secondary nature of the responsibilities, the Company does not pay remuneration for holding this role, instead, the holder receives the remuneration based on his primary position at Kemira.

Petri Castrén acted as Interim CEO during the period from July 18, 2023 until February 11, 2024. In 2024 total remuneration paid to him amounted to EUR 1,667,054 and is based on the Interim CEO position and his primary position as the CFO. The remuneration of the Interim CEO consisted

of fixed salary and short-term incentive plan. Petri Castrén received an achievement award as one-time payment in February 2024 for his excellent performance as the Interim CEO and the CFO. Long-term share incentive plans were based on his primary position as the CFO.

	Base salary and benefits, EUR	Short-term incentive plan, EUR	Long-term share incentive plan <sup>1)</sup> , EUR	One-time payments	Total 2024, EUR
CEO, Antti Salminen <sup>2)</sup>	608,544	122,738	1,112,314		1,843,597
CEO's Deputy, Jukka Hakkila	203,028	80,534	622,896		906,458
Interim CEO, Petri Castrén <sup>2)</sup>	312,203	315,000	889,851	150,000	1,667,054

Individual figures presented in the table have been rounded to the nearest exact figure. Therefore, the sum of the individual figures may deviate from the total figure.

<sup>1)</sup> Including cash portion of the reward intended for taxes.

<sup>2)</sup> Total remuneration in 2024: Antti Salminen as the President Segment P&P until February 11, 2024 and the CEO as of February 12, 2024. Petri Castrén as the Interim CEO until February 11, 2024 and the CFO as of February 12, 2024.

### CEO<sup>1)</sup> REMUNERATION SPLIT IN 2024

## REMUNERATION ELEMENTS

Remuneration elements and incentive opportunities have followed the applicable Kemira Remuneration Policy in force at the time of the decision-making.

REMUNERATION ELEMENT	CEO REMUNERATION	CEO's DEPUTY REMUNERATION	INTERIM CEO REMUNERATION
<b>Base Salary and Benefits</b>	The annual base salary was EUR 608,544 including mobile phone benefit.	The annual base salary was EUR 203,028 including mobile phone benefit.	The annual base salary was EUR 312,203 including car and mobile phone benefit.
<b>Supplementary Pension</b>	No supplementary pension was offered to the CEO.	No supplementary pension was offered to the CEO's Deputy.	No supplementary pension was offered to the Interim CEO.
<b>Short-Term Incentives (STI)</b> The performance criterion described in the table on page 57.	<p><b>Performance period 2023</b> The maximum STI opportunity was 60% of the annual base salary. The total weighted outcome of the performance criterion was 63%. Short-term incentives based on performance period 2023 was EUR 122,738 which was paid in 2024. The STI for the performance period 2023 was based on his previous position as the President, Segment Pulp &amp; Paper.</p> <p><b>Performance period 2024 and due payment</b> The maximum STI opportunity is 80% (the CEO position) and 60% (previous position) of the annual base salary. The total weighted outcome of the performance criterion was 79% and 72%, respectively. Due short-term incentives based on performance period 2024 is EUR 355,208 and will be paid in 2025.</p>	<p><b>Performance period 2023</b> The maximum STI opportunity was 60% of the annual base salary. The total weighted outcome of the performance criterion was 71%. Short-term incentives based on performance period 2023 was EUR 80,534 which was paid in 2024.</p> <p><b>Performance period 2024 and due payment</b> The maximum STI opportunity is 60% of the annual base salary. The total weighted outcome of the performance criterion was 79%. Due short-term incentives based on performance period 2024 is EUR 91,330 and will be paid in 2025.</p>	<p><b>Performance Period 2023</b> The maximum STI opportunity was 80% of the annual base salary. The total weighted outcome of the performance criterion was 75%. Short-term incentives based on performance period 2023 was EUR 315,000, which was paid in 2024. In addition, an achievement award EUR 150,000 was paid to Petri Castrén as an one-time payment in February 2024.</p> <p><b>Performance period 2024 and due payment</b> The maximum STI opportunity for the Interim CEO position is 80% of the annual base salary. The total weighted outcome of the performance criterion with pro rata was 79%. Due short-term incentives based on performance period 2024 with pro rata until February 11, 2024 is EUR 37,854 and will be paid in 2025.</p>
<b>Long-Term Incentives (LTI)</b> The performance criterion described in the table on page 57.	<p><b>Performance period 2021–2023</b> The maximum reward opportunity for the PSP2021–2023 performance period was 27,500 shares and cash portion intended to cover taxes and the tax-related costs arising from the reward. The reward opportunity for the CEO was based on his previous position as the President, Segment Pulp &amp; Paper. The outcome of the reward was 100%, reflecting 27,500 number of shares. The reward EUR 1,112,314, including the cash portion, was paid in March 2024.</p> <p><b>Performance period 2022–2024 and due payment</b> The maximum reward opportunity for the PSP 2022–2024 performance period for the CEO is 44,000 shares and a cash portion intended to cover taxes and the tax-related costs arising from the reward. The outcome of the reward is 100% reflecting 44,000 number of shares. The reward will be paid in 2025.</p>	<p><b>Performance period 2021–2023</b> The maximum reward opportunity for the PSP 2021–2023 performance period for the CEO's Deputy was 15,400 shares and a cash portion intended to cover taxes and the tax-related costs arising from the reward. The outcome of the reward was 100% reflecting 15,400 number of shares. The reward EUR 622,896 including the cash portion, was paid in March 2024.</p> <p><b>Performance period 2022–2024 and due payment</b> The maximum reward opportunity for the PSP 2022–2024 performance period for the CEO's Deputy is 15,400 shares and a cash portion intended to cover taxes and the tax-related costs arising from the reward. The outcome of the reward is 100% reflecting 15,400 number of shares. The reward will be paid in 2025.</p>	<p><b>Performance Period 2021–2023</b> The maximum reward opportunity for the PSP2021–2023 performance period for the Interim CEO was based on his main position as the CFO. The maximum reward opportunity for the PSP2021-2023 performance period was 22,000 shares and a cash portion intended to cover taxes and tax-related costs arising from the reward. The outcome of the reward was 100% reflecting 22,000 number of shares. The reward EUR 889,851, including the cash portion, was paid in March 2024.</p>

**SUSTAINABILITY STATEMENT**

In 2024, Kemira Group's revenue decreased by 13% to EUR 2,948.1 million (3,383.7) due to the divestment of Oil & Gas and. Revenue in local currencies, excluding acquisitions and divestments, decreased by 1% following lower revenue in the Pulp & Paper segment. Sales volumes increased in both segments. Sales prices declined, particularly in the Pulp & Paper segment, as sales prices for energy-intensive pulp and bleaching chemicals declined in H1 2024 from an elevated comparison period in H1 2023.

Operative EBITDA decreased by 12%, to EUR 585.4 million (666.7), mainly due to the divestment of Oil & Gas. The Oil & Gas divestment adjusted operative EBITDA decreased to EUR 582.1 million (595.9). The Oil & Gas divestment adjusted operative EBITDA in Industry & Water increased, while it declined in the Pulp & Paper segment due to lower sales prices. The operative EBITDA margin increased slightly to 19.9% (19.7%). The Oil & Gas adjusted operative EBITDA margin was strong, at 20.0% (20.6%), with solid margin performance in both segments.

EBITDA increased by 2% to EUR 550.7 million (540.0). The difference between it and operative EBITDA is explained by items affecting comparability, which were mainly related to Kemira's new organization and the expected underutilization of a single-asset energy company in Pori, Finland, majority owned by Kemira via Pohjolan Voima. Items affecting comparability in the comparison period were mainly related to the loss from the divestment of the Oil & Gas business.

Operative EBIT decreased by 14% to EUR 398.7 million (463.0) compared to the previous year, mainly due to the divestment of Oil & Gas. Oil & Gas divestment adjusted operative EBIT decreased by 5% to EUR 395.5 million (415.5). EBIT increased by 8% to EUR 363.2 million (336.4).

Cash flow from operating activities was solid, at EUR 484.6 million (546.0).

EPS (diluted) increased by 25%, to an all-time high EUR 1.61 (1.28). The comparison period was impacted by the loss from the divestment of the Oil & Gas business.

The Board of Directors proposes to the Annual General Meeting 2025 a cash dividend of EUR 0.74 per share (0.68), totaling EUR 114 million (104). It is proposed that the dividend be paid in two installments, in April and in November.

## The Oil & Gas divestment

Kemira divested its Oil & Gas (O&G)-related portfolio on February 2, 2024. All comparisons in this report are made to the comparison period which includes the Oil & Gas-related portfolio. Kemira's 2024 figures include around EUR 45 million of revenue and around EUR 3 million of operative EBITDA from Oil & Gas. Kemira has also presented the Oil & Gas divestment adjusted figures and performance in the relevant parts of the report, which reflect the underlying business performance of Kemira's Pulp & Paper and Industry & Water segments. Kemira's management follows the Oil & Gas divestment adjusted figures. The adjusted figures for the comparison period are also available in a separate stock exchange release, published on February 9, 2024 and on [kemira.com/investors](https://kemira.com/investors). Kemira's outlook for 2024 includes the Oil & Gas-related portfolio until the closing date of the divestment, February 2, 2024.

Unless otherwise stated, all comparisons in this report are made to the corresponding period in 2023.

Kemira provides certain financial performance measures (alternative performance measures) that are not defined by IFRS. Kemira believes that alternative performance measures followed by capital markets and by Kemira management, such as revenue growth in local currencies, excluding acquisitions and divestments (=organic growth), EBITDA, operative EBITDA, operative EBIT, cash flow after investing activities and gearing provide useful information on Kemira's comparable business performance and financial position. Selected alternative performance measures are also used as performance criteria in remuneration.

Kemira's alternative performance measures should not be viewed in isolation from the equivalent IFRS measures, and alternative performance measures should be read in conjunction with the most directly comparable IFRS measures. Definitions of the alternative performance measures can be found in the definitions of the key figures in this report, as well as at [www.kemira.com](http://www.kemira.com) > Investors > Financial information. All the figures in this report have been individually rounded and consequently the sum of the individual figures may deviate slightly from the total figure presented.

In addition to the above key figures and ratios, other key figures which are describing the Group's financial performance are presented in the Other financial information section under Group key figures.

## Financial performance in 2024

**Revenue** decreased by 13% due to the divestment of Oil & Gas and revenue in local currencies, excluding acquisitions and divestments, decreased by 1% following lower revenue in the Pulp & Paper segment. Sales volumes increased in both segments. Sales prices declined, particularly in the Pulp & Paper segment, as sales prices for energy-intensive pulp and bleaching chemicals declined in H1 2024 from an elevated comparison period in H1 2023.

Revenue	2024	2023	Δ%	Organic growth*, %	Currency impact, %	Acq. & div. impact, %
	EUR, million	EUR, million				
Pulp & Paper	1,646.7	1,748.2	-6	-4	-1	-1
Industry & Water	1,301.4	1,635.5	-20	+3	0	-28
<b>Total</b>	<b>2,948.1</b>	<b>3,383.7</b>	<b>-13</b>	<b>-1</b>	<b>0</b>	<b>-14</b>
Industry & Water, O&G divestment adjusted	1,256.9	1,140.9	+10			
<b>Total, O&amp;G divestment adjusted</b>	<b>2,903.5</b>	<b>2,889.0</b>	<b>+1</b>			

The Industry & Water, O&G divestment adjusted revenue of EUR 1,256.9 million includes contract manufacturing for Sterling Specialty Chemicals (the acquirer of Kemira's Oil & Gas business). Organic growth excludes the impact of contract manufacturing for Sterling Specialty Chemicals.

\*Revenue growth in local currencies, excluding acquisitions and divestments.

Geographically, the revenue split was as follows: EMEA (Europe, Middle East, Africa) 52% (48%), the Americas 38% (43%) and Asia Pacific 10% (9%).

**Operative EBITDA** decreased by 12%, to EUR 585.4 million (666.7), mainly due to the divestment of Oil & Gas. The Oil & Gas divestment adjusted operative EBITDA decreased to EUR 582.1 million (595.9). The Oil & Gas divestment adjusted operative EBITDA in Industry & Water increased, while it declined in the Pulp & Paper segment due to lower sales prices. The operative EBITDA margin increased slightly to 19.9% (19.7%). The Oil & Gas adjusted operative EBITDA margin was strong, at 20.0% (20.6%), with solid margin performance in both segments.

Variance analysis, EUR million	Jan-Dec

## SUSTAINABILITY STATEMENT

Items affecting comparability, EUR million	2024	2023
<b>Within EBITDA</b>	-34.8	-126.7
Pulp & Paper	-20.6	-22.9
Industry & Water	-14.1	-103.7
<b>Within depreciation, amortization and impairments</b>	-0.7	0.0
Pulp & Paper	-0.7	0.0
Industry & Water	0.0	0.0
<b>Total items affecting comparability in EBIT</b>	-35.5	-126.7

**Depreciation, amortization, and impairments** were EUR 187.4 million (203.6), including the EUR 5.8 million (6.9) amortization of purchase price allocation.

**Operative EBIT** decreased by 14% compared to the previous year, mainly due to the divestment of Oil & Gas. Oil & Gas divestment adjusted operative EBIT decreased by 5%.

**EBIT** increased by 8% and the difference between the two is explained by items affecting comparability which are described in the EBITDA section above. Items affecting comparability in the comparison period are also described in the EBITDA section above.

**Net finance costs** totaled EUR -26.9 million (-44.4). The decrease was driven by lower net debt and resulting lower net interest expenses. **Income taxes** were EUR -73.6 million (-80.7), with the reported tax rate being 22% (28%). **Net profit** for the period increased by 24% as the comparison period was impacted by the loss from the divestment of the Oil & Gas business.

## Financial position and cash flow

Cash flow from operating activities in January-December 2024 was solid, at EUR 484.6 million (546.0). Cash flow after investing activities increased to EUR 411.8 million (349.3). In addition, Kemira received proceeds during Q1 2024 following the divestment of its Oil & Gas business. Kemira's supplementary pension fund, Neliapila, also returned excess capital totaling EUR 12 million during Q1 2024. Net working capital decreased compared to end of year 2023.

At the end of the period, interest-bearing liabilities totaled EUR 810.7 million (937.8), including lease liabilities of EUR 132.2 million (121.4). The average interest rate of the Group's interest-bearing loan portfolio (excluding leases) was 2.8% (2.8%) and the duration was 13 months

(16). Due to a strong cash position, fixed-rate loans accounted for 114% (77%) of net interest-bearing liabilities, including lease liabilities.

Short-term liabilities, maturing in the next 12 months, amounted to EUR 263.6 million. On December 31, 2024, cash and cash equivalents totaled EUR 519.2 million (402.5). In Q4 2024, Kemira drew down on a bilateral loan of EUR 50 million with maximum 10 year maturity. The Group retains a EUR 400 million undrawn committed credit facility, maturing in 2026.

At the end of the period, Kemira Group's net debt was EUR 291.5 million (535.2), including lease liabilities. The equity ratio was 53% (48%) while gearing was 16% (32%). At the end of December 2024, net debt / operative EBITDA was at a record-strong level of 0.5.

Kemira is exposed to transaction and translation currency risks. The Group's most significant transaction currency risks arise from the US dollar, the Chinese renminbi, the Canadian dollar and the Swedish krona. At the end of the year, the US dollar denominated exchange rate risk against EUR had an equivalent value of approximately EUR 142 million, of which 62% was hedged on an average basis. The Chinese renminbi denominated exchange rate risk against EUR had an equivalent value of approximately EUR 121 million, of which 74% was hedged on an average basis. The Canadian dollar denominated exchange rate risk against EUR was approximately EUR 41 million, of which 73% was hedged on an average basis. The Swedish krona denominated exchange rate risk against EUR had an equivalent value of approximately EUR 39 million, of which 71% was hedged on an average basis. In addition, Kemira is exposed to smaller transaction risks against EUR, mainly in relation to the Danish krona, the Polish zloty, the Korean won and the Norwegian krona and against USD mainly in relation to the Brazilian real and the Canadian dollar, with annual exposure in those currencies being approximately EUR 144 million.

As Kemira's consolidated financial statements are compiled in euros, Kemira is also subject to a currency translation risk to the extent to which the income statement and balance sheet items of subsidiaries located outside Finland are reported in a currency other than the euro. The most significant currency translation exposure derives from the US dollar and the Canadian dollar. The strengthening of these currencies against the euro would increase Kemira's revenue and EBITDA through a translation effect.

## SUSTAINABILITY STATEMENT

## Capital expenditure

In January-December 2024, capital expenditure excluding acquisitions decreased by 18%, to EUR 167.3 million (204.9). Oil & Gas divestment adjusted capital expenditure decreased by 11%, to EUR 167.3 million (187.7). Capital expenditure excluding acquisitions (capex) can be broken down as follows: expansion capex 12% (16%), improvement capex 25% (28%) and maintenance capex 64% (55%).

## Research and Development

In January-December 2024, total research and development expenses were EUR 33.8 million (34.2), representing 1.1% (1.0%) of the Group's revenue. Sustainable and renewable solutions are cornerstones of Kemira's strategic priorities, and consequently they are also the focus of a majority of Kemira's R&D projects. In addition, over half of Kemira's ongoing R&D projects are being worked in collaboration with external partners.

Kemira's research and development is an enabler of growth and further differentiation. New product launches contribute to the efficiency and sustainability of customer processes as well as to improved profitability. Both Kemira's future market position and profitability depend on the company's ability to understand and meet current and future customer needs and market trends, as well as on its ability to innovate with differentiated products and applications.

At the end of 2024, Kemira had 388 (419) patent families, including 1,868 (2,041) granted patents and 929 (963) pending applications. During 2024, Kemira applied for 54 (55) new patents and started 21 new product development projects, 81% of them aiming to improve customer' resource efficiency. At the same time, Kemira started the commercialization of 24 new products, originating from 14 different projects. Kemira has also started several external partnerships in order to innovate and commercialize new renewable solutions for its customers. During 2024, Kemira R&D implemented a program to improve the time-to-market of R&D projects (the time required from project start to commercial launch). The program resulted in a significant shortening of the time-to-market, with a 43% improvement compared to 2023.

## Human resources

At the end of the period Kemira Group had 4,698 employees (4,915). Kemira had 779 (790) employees in Finland, 1,738 (1,709) employees elsewhere in EMEA, 1,242 (1,484) in the Americas and 939 (932) in APAC. The number of employees decreased from the comparison period due to the divestment of Oil & Gas.

## Sustainability

Kemira's sustainability work is guided by the UN's Sustainable Development Goals (SDGs) and covers economical, environmental and social topics. Our focus is on Clean Water and Sanitation (SDG 6), Decent Work and Economic Growth (SDG 8), Responsible Consumption and Production (SDG 12) and Climate Action (SDG 13). More information on sustainability at Kemira can be found in the 2024 Sustainability Statement, prepared according to the Corporate Sustainability Reporting Directive requirements (CSRD).

## SUSTAINABILITY PERFORMANCE IN 2024

### Safety

TRIF\* in 2024 was 3.2 (2023: 2.5). In 2024, Kemira ran a global safety training program with the aim of training all 350 first line managers at all Kemira manufacturing sites. Kemira also re-evaluated the safety target and adjusted it from 1.5 to 2.2 by end of 2025, and from 1.1 to 1.5 by end of 2030.

### People

Kemira's target is to reach the top 10% cross industry benchmark for Diversity & Inclusion (DEI) by the end of 2025, as measured by our Inclusion Index. The current gap to the top 10% is 3 points. In 2024, our DEI program progressed as planned. During the year, over 86% of employees had completed DEI awareness eLearning and 21 inclusive leaders workshops were completed, covering key themes such as psychological safety and inclusive leadership behaviors. In January 2025, Kemira was ranked among the top ten Large Cap-listed companies in Finland in the Nordic Business Diversity Index 2025, based on the data collection period October-December 2024.

## SUSTAINABILITY STATEMENT

### Circularity

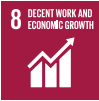

Kemira continued to progress its renewable solutions strategy in 2024. Kemira e.g. announced together with IFF a successful completion of a renewable polymer plant in Finland and that it is exploring options to expand the partnership with IFF by setting up a manufacturing joint venture in Finland. Renewable solutions revenue increased to EUR 240 million in 2024. In 2024, Kemira continued to reduce waste volumes in its manufacturing operations - both hazardous and non-hazardous waste. Since 2019, Kemira's total waste in manufacturing operations has decreased by over 50% (hazardous waste by 70% and non-hazardous waste by more than 40%). The decrease is mostly due to decrease in the proportion of waste-intensive products. Kemira's disposed production waste intensity increased to 4.2 in 2024.

### Water

In line with our ambition to expand the water business, Kemira entered the activated carbon market for micropollutants removal via an acquisition in the United Kingdom. In 2024, Kemira continued to reduce water consumption in its manufacturing operations. Since 2019 Kemira's water consumption in manufacturing operations has decreased by over 25%. The decrease is mostly due to decrease in the proportion of water-intensive products. In 2024, Kemira also continued efforts to reduce water impacts in our own operations. Kemira's life cycle assessment capabilities were further strengthened to better understand water impacts throughout the value chain. The new CDP Water Security ratings were published in February 2025. Kemira has retained a B score (Management level) since the first full reporting questionnaire in 2021, even as the scoring criteria have been tightened in the intervening years.

### Climate

The Science Based Targets Initiative (SBTi) validated Kemira's scope 1, 2 and 3 emission reduction targets in October 2024. Kemira has committed to reducing scope 1 and 2 emissions by 51.23% by the end of 2030, from a 2018 base year, and scope 3 emissions by 32.5% by the end of 2033 from a 2021 base year. During 2024, Kemira's scope 1, 2 and 3 emissions were rather stable despite higher sales volumes, which is aligned with the SBTi target trajectory. The new CDP Climate Change 2024 ratings were published in February 2025. Kemira retained its B score.

SDG	KPI	UNIT	2024	2023
	<b>SAFETY</b> TRIF* 2.2 by the end of 2025 and 1.5 by the end of 2030 <small>*TRIF = total recordable injury frequency per million hours, Kemira + contractors</small>		3.2	2.5
	<b>PEOPLE</b> Reach Glint top 10% cross industry norm for Diversity & Inclusion by the end of 2025		Slightly outside the top 25%	In the top 25%
	<b>CIRCULARITY</b> Reduce waste intensity** by 15% by the end of 2030 from a 2019 baseline of 4.4 <small>**kilograms of disposed production waste per metric tonnes of production</small>	kg/tonnes of production	4.2	4.1
	Renewable solutions > EUR 500 million revenue by the end of 2030	EUR million	240	226
	<b>WATER</b> Reach the Leadership level (A) in water management by the end of 2025 measured by CDP Water Security scoring methodology.	Rate scale A-D	B	B
	<b>CLIMATE</b> Scope 1 and 2**** emissions -51.23% by the end of 2030, compared to 2018 baseline of 894 ktCO <sub>2</sub> e.	ktCO <sub>2</sub> e	586	589
	Scope 3 emissions by -32.5% by the end of 2033 from a 2021 base year of 2,337.5 ktCO <sub>2</sub> e.	ktCO <sub>2</sub> e	1,881	1,863

\*\*After the divestment of the Oil & Gas business, Kemira's waste target was adjusted in Q2 to exclude the impact of all divestments since the baseline year 2019. Reported figures for 2022 and 2023 have also been adjusted.

\*\*\*Kemira's climate target has been updated to align with the SBTi validated target. Baseline years and years 2023 and 2024 have been adjusted to reflect the divestment of the Oil & Gas business and other minor divestments.

\*\*\*\*Scope 1: Direct greenhouse gas emissions from Kemira's manufacturing sites, e.g. the generation of energy and emissions from manufacturing processes. Scope 2: Indirect greenhouse gas emissions from external generation and purchase of electricity, heating, cooling and steam. Scope 3: Indirect greenhouse gas emissions from purchased raw materials, traded goods and transportation of materials.

## Segments

### PULP & PAPER

Pulp & Paper has unique expertise in applying chemicals and in supporting pulp and paper producers in innovating and constantly improving their operational efficiency as well as end product performance and quality. The segment develops and commercializes new products to meet the needs of its customers, thus ensuring a leading portfolio of products and services for the bleaching of pulp as well as the paper wet-end, focusing on packaging, board and tissue.

Pulp & Paper continues to leverage its strong application portfolio in North America and EMEA while also building a strong position in the emerging Asian and South American markets. As of Q1 2025, the Pulp & Paper business will be split into two business units: Packaging & Hygiene Solutions and Fiber Essentials to sharpen strategic focus and to accelerate profitable growth.

## SUSTAINABILITY STATEMENT

The segment's **revenue** decreased by 6%. Revenue in local currencies, excluding divestments and acquisitions, decreased by 4%. This was mainly due to lower sales prices, particularly in energy-intensive pulp and bleaching chemicals where sales prices declined in H1 2024 from an elevated comparison period, before stabilizing during the second half of 2024. Sales volumes increased in all product groups and in all geographical regions, particularly in specialty chemicals and geographically in the EMEA region.

In **EMEA**, revenue decreased by 9%, to EUR 813.2 million (891.4), mainly due to lower sales prices in bleaching chemicals, where sales prices declined from an elevated comparison period. Sales volumes increased, particularly in sizing chemicals.

In **the Americas**, revenue decreased by 2%, to EUR 560.9 million (573.1). Revenue in local currencies, excluding acquisitions and divestments, increased by 1% as sales volumes increased across product groups, particularly in specialty chemicals. Sales prices decreased in all product groups.

In **APAC**, revenue decreased by 4%, to EUR 272.6 million (283.6). Revenue in local currencies, excluding acquisitions and divestments, decreased by 2% due to lower sales prices in all product groups. Sales volumes increased, particularly in specialty chemicals.

**Operative EBITDA** decreased by 8% as lower sales prices and higher fixed costs were not fully offset by successful variable cost management and higher sales volumes. The operative EBITDA margin declined slightly, to 18.4%. **EBITDA** decreased by 8%. The difference between it and operative EBITDA is explained by items affecting comparability, which were mainly related to Kemira's new organization and the expected underutilization of a single-asset energy company in Pori, Finland, majority owned by Kemira via Pohjolan Voima. Items affecting comparability in the comparison period mainly consisted of a provision related to the expected underutilization of a single asset energy company in Pori, Finland, majority owned by Kemira via Pohjolan Voima and to a loss from the divestment of most of our colorants business.

## SUSTAINABILITY STATEMENT

### INDUSTRY & WATER

Industry & Water offers a wide range of innovative solutions to optimize all stages of the water treatment process, while also safely achieving water quality targets and meeting constantly tightening regulations. The segment serves both municipal and industrial customers. Kemira's water treatment product portfolio mainly consists of coagulants and polymers which play a critical role in enabling resource-efficient operations at our customers' sites. Kemira has a strong market presence in water treatment in Europe and in North America. Water is expected to be a key contributor for Kemira's future revenue growth going forward and our new long-term ambition is to double our revenue in water. As of Q1 2025, the business unit will be called Water Solutions.

The segment's **revenue** decreased by 20% due to the divestment of Oil & Gas. Revenue in local currencies, excluding acquisitions and divestments, increased by 3%. Sales volumes increased in both polymers and coagulants. Sales prices decreased across product groups. Currencies had a positive impact.

In **EMEA**, revenue was stable at EUR 730.6 million (730.4). Sales volumes increased in all product groups, particularly in polymers. Sales prices decreased.

In **the Americas**, revenue decreased by 38%, to EUR 552.0 million (885.1) due to the divestment of Oil & Gas. Revenue in local currencies, excluding acquisitions and divestments, increased by 7%, following higher sales volumes in coagulants. Sales prices also increased.

In **APAC**, revenue decreased by 6% to EUR 18.8 million (20.0).

**Operative EBITDA** decreased by 16% following the divestment of Oil & Gas. The operative EBITDA margin increased to 21.7%. Oil & Gas divestment adjusted operative EBITDA increased by 5%, to EUR 279.1 million (EUR 265.0 million). The Oil & Gas divestment adjusted operative EBITDA margin was strong at 22.2% (23.2%), following successful variable cost management and higher sales volumes. **EBITDA** increased by 16% and the difference to operative EBITDA is explained by items affecting comparability which were mainly related to the divestment of Oil & Gas and Kemira's new organization. Items affecting comparability in the comparison period were mainly related to the expected loss from the divestment of Oil & Gas.

\*12-month rolling average

Kemira divested its Oil & Gas-related portfolio on February 2, 2024. Kemira's 2024 figures includes the Oil & Gas-related portfolio until February 2, 2024. The Oil & Gas-related portfolio had a revenue of EUR 44.6 million and operative EBITDA of EUR 3.3 million until the closing of the divestment. Kemira has also presented Oil & Gas divestment adjusted figures, which reflect the underlying business performance of the segment.

## SUSTAINABILITY STATEMENT

## The parent company's financial performance

Kemira Oyj's revenue decreased to EUR 1,950.3 million (2,030.4) in 2024. EBITDA was EUR 148.5 million (195.7). The parent company's financing income and expenses were EUR 97.9 million (-24.9) following a lower write-off of group company shares and higher dividend income, currency exchange income and other financial income. The net result for the financial year increased to EUR 183.6 million (104.2) following increased financing income. Total capital expenditure was EUR 15.4 million (18.2), excluding investments in subsidiaries.

Kemira Oyj had 506 (2023: 500, 2022: 502) employees on average during 2024.

Related party transactions as defined in the Finnish Company Act have been presented in Note 24 Related Party Transactions.

## Kemira Oyj's shares and shareholders

On December 31, 2024, Kemira Oyj's share capital amounted to EUR 221.8 million and the number of shares was 155,342,557. Each share entitles the holder to one vote at the Annual General Meeting.

At the end of December 2024, Kemira Oyj had 48,255 registered shareholders (49,659 on December 31, 2023). Non-Finnish shareholders held 38.3% of the shares (34.7% on December 31, 2023), including nominee-registered holdings. Households owned 18.1% of the shares (19.0% on December 31, 2023). Kemira held 1,359,348 treasury shares (1,722,725 on December 31, 2023), representing 0.9% (1.1% on December 31, 2023) of all company shares.

Kemira Oyj's share price increased by 16% during the reporting period and closed at EUR 19.52 on the Nasdaq Helsinki at the end of December 2024 (16.79 on December 31, 2023). The shares registered a high of EUR 24.58 and a low of EUR 15.96 in January-December 2024 and the average share price was EUR 19.84. The company's market capitalization, excluding treasury shares, was EUR 3,006 million at the end of December 2024 (2,579 on December 31, 2023).

In January-December 2024, Kemira Oyj's share trading turnover on the Nasdaq Helsinki was EUR 892 million (EUR 688 million in January-December 2023). The average daily trading volume was 183,567 shares (174,707 in January-December 2023). The total volume of Kemira Oyj's

share trading in January-December 2024 was 63 million shares (57 million shares in January-December 2023), 25% (23% in January-December 2023) of which was executed on other trading platforms (e.g. Turquoise, CBOE DXE). Source: Nasdaq and Kemira.com.

Kemira was included in the Euro Stoxx 600 index in June 2024 and in the Finnish OMX25 index in August 2024.

## FLAGGING NOTIFICATIONS

**February 13, 2024:** Solidium Oy's shareholding decreased to below 5% as Solidium Oy sold all the Kemira shares in its possession.

## Management shareholding

The members of the Board of Directors as well as the Interim President and CEO and his Deputy held 280,562 (214,529) Kemira Oyj shares on December 31, 2024 or 0.18% (0.14%) of all outstanding shares and voting rights (including treasury shares and shares held by the related parties and controlled corporations). Antti Salminen, President and CEO, held 99,166 shares on December 31, 2024. Members of the Management Board, excluding the President and CEO and his Deputy, held a total of 286,517 shares on December 31, 2024 (245,128), representing 0.18% (0.16%) of all outstanding shares and voting rights (including treasury shares and shares held by the related parties and controlled corporations). Up-to-date information regarding the shareholdings of the Board of Directors and Management is available on Kemira's website at [kemira.com/investors](https://kemira.com/investors).

## AGM decisions

### ANNUAL GENERAL MEETING

Kemira Oyj's Annual General Meeting held on March 20, 2024, approved the Board of Directors' dividend proposal of EUR 0.68 per share for the financial year 2023. The dividend was paid in two installments. The first installment of EUR 0.34 per share was paid on April 4, 2024. The Annual General Meeting also authorized the Board of Directors to decide on the record date and the payment date for the second installment of the dividend.

The Board of Directors decided on the record date and the payment date for the second installment of the dividend of EUR 0.34 at its meeting on October 24, 2024. The payment date of the second installment of the dividend was November 5, 2024. Kemira announced the resolution of the Board of Directors with a separate stock exchange release and confirmed both the record and the payment dates.

The 2024 AGM authorized the Board of Directors to decide upon the repurchase of a maximum of 6,500,000 of the company's own shares ("Share repurchase authorization"). This corresponds to approximately 4.2% of all shares and votes in the company. The shares shall be repurchased by using unrestricted equity, either through a tender offer with equal terms to all shareholders at a price determined by the Board of Directors or otherwise than in proportion to the existing shareholdings of the company's shareholders (directed repurchase). The price paid for the shares repurchased through a tender offer under this authorization shall be based on the market price of the company's shares in public trading. The minimum price to be paid would be the lowest market price of the shares quoted in public trading during the authorization period and the maximum price the highest market price quoted during the authorization period. The price paid for the shares repurchased through directed repurchase under the authorization shall be based on the share price formed in public trading on the date of the repurchase or a price otherwise formed on the market. The shares shall be acquired and paid for in accordance with the rules of Nasdaq Helsinki and the rules of Euroclear Finland Ltd, as well as other applicable regulations. The shares may be repurchased to be used in implementing or financing mergers and acquisitions, or for developing the company's capital structure, improving the liquidity of the company's shares or for the payment of the annual fee payable to the members of the Board of Directors or implementing the company's share-based incentive plans. In order to realize the aforementioned objectives, the shares acquired may be retained, transferred further or cancelled by the company. The Board of Directors shall decide upon how the shares are to be repurchased and on the other terms related to any

## SUSTAINABILITY STATEMENT

share repurchase. The Share repurchase authorization is valid until the end of the next Annual General Meeting. The authorization was not used by December 31, 2024.

The Annual General Meeting authorized the Board of Directors to decide to issue, through one or through several share issues, a maximum of 15,600,000 of new shares and to transfer a maximum of 7,800,000 of the company's own shares currently held by the company ("Share issue authorization"). The new shares may be issued and the company's own shares held by the company may be transferred, either for consideration or without consideration. The new shares may be issued and the company's own shares held by the company may be transferred to the company's shareholders in proportion to their current shareholdings in the company, or by disapplying the shareholders' pre-emption right, through a directed share issue, if the company has a weighty financial reason to do so, such as financing or implementing mergers and acquisitions, developing the capital structure of the company, improving the liquidity of the company's shares or, if it is justified, for the payment of the annual fee payable to the members of the Board of Directors or implementing the company's share-based incentive plans. The directed share issue may be carried out without consideration only in connection with the implementation of the company's share-based incentive plans. The subscription price of new shares shall be recorded in the invested unrestricted equity reserves. The consideration payable for the company's own shares shall be recorded in the invested unrestricted equity reserves. The Board of Directors shall also decide upon any other terms related to the share issues. The Share issue authorization is valid until May 31, 2025. The share issue authorization has been used and shares owned by the Group were conveyed to members of the Board of Directors and key employees in connection with their remuneration.

The Annual General Meeting decided for the Articles of Association to be amended in full, to better reflect market practices and to update certain wordings and phrases to reflect current applicable regulations.

Furthermore, the Annual General Meeting issued the advisory resolution on the acceptance of the Remuneration Report 2023. The Annual General Meeting also issued the advisory resolution on the acceptance of the Remuneration Policy for the Governing Bodies.

The AGM elected Ernst & Young Oy to serve as the company's auditor, with Mikko Rytilahti, Authorized Public Accountant, acting as the key audit partner. Ernst & Young Oy was also elected as the sustainability assurance provider with Mikko Rytilahti, Authorized Public Accountant and Authorized Sustainability Auditor, assuring the sustainability report.

## Corporate governance and group structure

Kemira Oyj's corporate governance is based on the Articles of Association, on the Finnish Companies Act and on Nasdaq Helsinki's rules and regulations on listed companies. Furthermore, the company complies with the Finnish Corporate Governance Code. The company's corporate governance is presented as a separate statement on the company's website.

## BOARD OF DIRECTORS

On March 20, 2024, the Annual General Meeting elected eight members to the Board of Directors. The Annual General Meeting re-elected Tina Sejersgård Fanø, Werner Fuhrmann, Matti Kähkönen, Timo Lappalainen, Fernanda Lopes Larsen, Annika Paasikivi, Kristian Pullola and Mikael Staffas. Matti Kähkönen was elected as the Chair of the Board of Directors and Annika Paasikivi was elected as the Vice Chair. Fernanda Lopes Larsen resigned from the Board as of July 31, 2024 for time management reasons and as she was elected as a member of the Board of Directors of another company. In 2024, Kemira's Board of Directors met 11 times, with a 99% attendance rate.

Kemira Oyj's Board of Directors has appointed two committees: the Personnel and Remuneration Committee and the Audit Committee. The Personnel and Remuneration Committee is chaired by Annika Paasikivi and has Tina Sejersgård Fanø, Timo Lappalainen and Mikael Staffas as members. Matti Kähkönen was a member of the committee until the Annual General Meeting. In 2024, the Personnel and Remuneration Committee met 8 times, with a 94% attendance rate. The Audit Committee was chaired by Timo Lappalainen until the Annual General Meeting and by Kristian Pullola after that. The Committee's third member is currently Werner Fuhrmann. In addition, Fernanda Lopes Larsen was a member until her resignation July 31, 2024. In 2024, the Audit Committee met 5 times, with a 100% attendance rate.

## STRUCTURE

In 2024, Kemira divested its Oil & Gas-related portfolio. The divestment of the Oil & Gas business was closed on February 2, 2024.

## Short-term risks and uncertainties

### PRICE AND AVAILABILITY OF RAW MATERIALS AND COMMODITIES

A significant and sudden increase in the cost of raw materials, commodities or logistics could place Kemira's profitability at risk if Kemira is not able to pass on such increases in product prices without delay. For instance, considerable and/or rapid changes in oil and gas derivatives or in electricity prices could materially impact Kemira's profitability. Changes in the raw material supplier field, such as a consolidation or decreasing capacity may also increase raw material prices. Furthermore, significant demand changes in industries that are the main users of certain raw materials may lead to raw material price fluctuations. In 2024, raw material and commodity prices, including the prices of energy and electricity, decreased compared to 2023.

Poor availability of certain raw materials may affect Kemira's production and profitability if Kemira fails to prepare adequately, by mapping out alternative suppliers or opportunities for process changes. Raw material and commodity-related risks can be monitored effectively and be managed by Kemira's centralized Sourcing unit. Risk management measures include, for instance, forward-looking forecasting of key raw material and commodity prices, the synchronization of raw material purchase and sales agreements, captive manufacturing of some of the critical raw materials, strategic investments in energy-generating companies and hedging a portion of the total energy and electricity spend. Kemira demonstrated good resilience in managing its raw material risks in 2024.

### SUPPLIERS

The continuity of Kemira's business operations is dependent on the reliable supply of good-quality products and services. Kemira has numerous partnerships and other agreements with third-party product and service suppliers in place, to help secure its business continuity. Certain products used as raw materials are considered critical as purchases can only be made economically from a sole supplier or from a single source. In the event of a sudden and significant loss or interruption to the supply of such a raw material, Kemira's operations could be impacted and this would have a negative effect on Kemira's business. Ineffective procurement planning, supply source selection, contract administration as well as inadequate supplier relationship management create a risk of Kemira not being able to fulfill its promises to customers. There were no significant raw material shortages that impacted Kemira's manufacturing operations during 2024.

Kemira sources a large share of its electricity in Finland at production cost (the Mankala principle), through its partial ownership of the electricity producing hydro and nuclear assets of Teollisuuden Voima and Pohjolan Voima. Significant long-term disruptions to the production levels of these assets could have an adverse financial impact on Kemira. Kemira sources electricity at production cost from these assets, which might be lower or higher relative to market electricity prices.

Kemira continuously aims to identify, analyze and engage third-party suppliers in a way that ensures security of supply and the competitive pricing of end products and services. Collaborative relationships with key suppliers are developed in order to uncover and realize new value and to reduce risk. Supplier performance is also regularly monitored, as a part of the supplier performance management process. Due to the high-risk environment relating to suppliers in the chemical industry, risk management and mitigation in this area is subject to a continuous level of high focus.

### HAZARD RISKS

Kemira's production activities are exposed to many hazard risks – such as fires and explosions, machinery breakdowns, natural catastrophes, exceptional weather conditions and environmental incidents – and to the consequent possible liabilities as well as the risks to employee health and safety. These risk events may derive from several factors, including (but not limited to) unauthorized IT system access by a malicious intruder or other cyber security issues causing possible damage to systems and which in turn could lead to financial losses and supply disruptions. A systematic focus on achieving set targets, certified management systems, efficient hazard prevention programs, the promotion of an active safety culture, adequate maintenance and competent personnel all play a central role in managing these hazard risks. In addition, Kemira has several insurance programs that protect the company against the financial impacts of hazard risks. Kemira is continuously and systematically maintaining and enhancing its information security procedures and technical controls, including cybersecurity measures focused on protecting digital assets. Kemira safeguards critical assets such as business-critical information, personal data and systems within business and on-premises manufacturing and cloud environments from potential threats such as cyberattacks, data breaches and unauthorized access. Kemira is committed to fostering

## SUSTAINABILITY STATEMENT

a culture of security awareness through regular personnel training and education programs. Kemira expects all staff to report incidents promptly and efficiently, thereby enabling effective responses to any security threats. Kemira's Board of Directors regularly reviews information security-related risks. Throughout 2024, Kemira did not experience any significant information security related incidents.

Kemira's operations rely on functional and up-to-date IT systems. There were no significant IT related issues during 2024.

### CHANGES IN CUSTOMER DEMAND

A significant, unforeseen decline in the use of certain chemicals (e.g. chemicals for packaging and board production) or in the demand for customers' products and operations could have a negative impact on Kemira's business. A significant decline in certain raw material and utility prices (e.g. oil and gas derivatives and metals) may shift customers' activities towards areas where fewer chemicals are needed. Also, increasing awareness of and concern regarding climate change and more sustainable products may alter customer demand, for instance, in favor of water treatment technologies with a lower consumption of chemicals. On the other hand, possible capacity expansion by customers could increase chemical consumption and could, in such a way, challenge Kemira's current production capacity.

In order to manage and mitigate these risks, Kemira systematically monitors leading and early warning indicators that focus on market developments. Kemira has also continued to focus on the sustainability of its business and is further improving the coordination and cooperation between the Business Development, R&D and Sales units, in order to better understand the future needs and expectations of its customers. During 2024, Kemira continued the commercialization of new, renewable solutions such as biomass-balanced polymers and renewable coatings. Kemira also announced the formation of a new New Ventures & Services unit, planned to be operational in January 2025. The new unit aims to accelerate the commercialization of various renewable initiatives and services. Timely capital investments as well as continuous discussions and follow-ups with customers ensure Kemira's ability to respond to changes in demand. Kemira's geographical and customer industry diversification also provide partial protection against the risk of changing customer demands.

To respond to expected changes in customer requirements, Kemira has also revised its strategy to focus more on renewable solutions and has also started several external

partnerships in order to innovate and commercialize new renewable solutions for its customers. Renewable solutions are a significant component of Kemira's growth ambitions for the future. Kemira expects to continue investing in renewable solutions projects, the commercialization of which often involves risks related to e.g. market demand.

In 2024, Kemira announced a new operating model to increase customer-centricity, the speed of product commercialization and agility. As of January 1, 2025, Kemira has three business units: Water Solutions, Packaging & Hygiene Solutions and Fiber Essentials. The way of working in R&D was also changed as of January 1, 2025 and product development was moved into the business units to increase customer-centricity. The new structure aims to better anticipate customers' changing needs and to bring new products and solutions to the market faster.

### ECONOMIC CONDITIONS AND GEOPOLITICAL CHANGES

Uncertainties in global economic and geopolitical developments are considered to include direct and indirect risks, such as a lower-growth period in global GDP and possible, unexpected trade-related political decisions, both of which could have unfavorable impacts on the demand for Kemira's products. Certain political actions or changes, especially in countries that are important to Kemira, could cause business interference or other adverse consequences. The ongoing war in Ukraine, sanctions against Russia as well as ongoing geopolitical tensions in the Middle East create uncertainty in the global economy. Possible trade or supply chain disruptions following geopolitical tensions in eastern Asia and the Middle East could also have an impact on Kemira's operations. Kemira sources materials, particularly AKD wax, and has several local manufacturing facilities in APAC, deriving around 10% of its revenue from the region. Kemira does not currently have meaningful operations in the Middle East but could be exposed to supply chain disruptions, for example.

Weak economic development may bring about customer closures or consolidations, resulting in a diminished customer base. Unfavorable market conditions may also decrease the availability and add to the price risk of certain raw materials. Kemira's geographical and customer industry diversification only provides partial protection against these risks. Kemira continuously monitors geopolitical events and changes and always aims to adjust its business accordingly. Trade war-related risks are also actively monitored and taken into account in business planning. The risk of tariffs, particularly between the US and other geographical regions has increased significantly recently, which could impact Kemira's operations as well as customers in North America. Kemira predominantly produces locally for local customers and

## SUSTAINABILITY STATEMENT

only imports a small proportion of its raw materials to North America. Kemira is following tariff-related discussions closely and has made contingency plans should tariffs be introduced.

Possible extended strikes in Finland could negatively impact Kemira's ability to run its operations and could also create risks to near-term customer demand.

### COMPETITION

Kemira operates in a rapidly changing and competitive business environment that represents a considerable risk to meeting its goals. New players seeking a foothold in Kemira's business segments may use aggressive means as a competitive tool, which could affect Kemira's financial results. Major competitor or customer consolidations could change market dynamics and could possibly also alter Kemira's market position.

Kemira is seeking growth in product categories that might be less familiar and where new competitive situations prevail, particularly in renewable solutions. In the long term, completely new types of technology may considerably alter the current competitive situation. This risk is managed at both Group and segment levels, through the continuous monitoring of markets and competitors. Kemira aims to respond to its competition through the active management of customer relationships and through the continuous development of its products and services, to further differentiate itself from competitors and to remain competitive.

### ACQUISITIONS AND PARTNERSHIPS

Kemira is also actively looking for inorganic growth opportunities, particularly in water, that might be related to market consolidation, expanding geographic coverage or the launching of new technologies. In addition to organic growth, acquisitions are a potential way to achieve corporate goals in line with strategies. Consolidations are driven by chemical manufacturers' interests in realizing synergies and in establishing footholds in new markets. Acquisitions and/or partnerships may also be needed in order to enter totally new geographical markets and new product markets. However, the integration of acquired businesses, operations and personnel also involves risks. Joint ventures always require effective co-operation with joint venture partners. If integration is unsuccessful, the results may fall short of the targets set for such acquisitions. In a related development, Kemira acquired a small activated carbon reactivation facility in 2024.

Kemira has created mergers and acquisitions procedures and has established Group-level resources dedicated to actively managing mergers and acquisition activities and to supporting the execution of related business transactions. In addition, external advisory services are used to screen potential mergers and acquisition targets.

In November 2024, Kemira received an adverse court ruling in Yanzhou, China, related to the way Kemira's Joint Venture with Tiancheng Wanfeng Chemical Technology Co. (TCWF) is run. The joint venture, where Kemira holds 80% and TCWF 20%, mainly produces AKD wax and its key raw material, fatty acid chloride. The joint venture has been in operation in Shandong Province in China since 2018. Kemira has filed an appeal to a higher court in China as it believes the Yanzhou court ruling is without merit. There is a risk that the JV's operations might be impacted, depending on the outcome of the decision by the higher court.

### INNOVATION AND RESEARCH & DEVELOPMENT

Kemira's research and development is a critical enabler of organic growth and further differentiation. Kemira's future market position and profitability depend on its ability to understand and to meet current and future customer needs and market trends and its ability to innovate new, differentiated products and applications. Furthermore, new product launches contribute to the efficiency and sustainability of both Kemira's and its customers' processes, as well as to improved profitability. A failure to innovate or focus on disruptive new technologies and products or a failure to effectively commercialize new products and service concepts may result in the non-achievement of growth targets and may therefore negatively impact Kemira's competitive situation.

Innovation- and R&D-related risks are managed through effective R&D portfolio management and close collaboration between R&D and the two business segments. As of 2025, product development will move into the new business units, to further increase customer-centricity in the product development process. With the continuous development of innovation processes, Kemira is aiming for more effective and stringent project execution. Kemira continues to focus on the development of more differentiated and sustainable products and processes and also continuously monitors the sales of its new products and applications.

## SUSTAINABILITY STATEMENT

### CHANGES IN LAWS AND REGULATIONS

Kemira's business is subject to various laws and regulations which have a relevance in the development and implementation of Kemira's strategy. Laws and regulations can generally be considered an opportunity for Kemira, as tightening regulation is expected to drive water treatment market growth, with the phosphorus removal of effluent before discharge to a recipient for example. However, certain legislative initiatives supporting, for instance, the use of biodegradable raw materials or biological water treatment or limiting the use of aluminum, may also have a negative impact on Kemira's business. Significant changes in chemical, environmental or transportation laws and regulations may also impact Kemira's profitability through an increase in production and transportation costs. At the same time, such changes may also create new business opportunities for Kemira. As an example, possible restrictions on plastic packaging would likely benefit the fiber-based packaging industry and Kemira. In addition, Kemira is actively following the European Commission's proposal for Packaging and Packaging Waste Regulations and its implications, particularly for disposable packaging.

Inclusion of new substances in the REACH authorization process may also place further requirements on Kemira, where failure to obtain the relevant authorization could impact Kemira's business. Certain legislative proposals, especially in Europe, such as the PFAS restriction proposed during 2023, may in the long-term result in additional requirements for managing Kemira's manufacturing assets. However, tightening PFAS regulation is also expected to drive the demand for water treatment applications, e.g. activated carbon, and to be a driver of future growth. In addition, changes in import/export and customs-related regulations create a need for monitoring and mastering global trade compliance, in order to ensure compliant product importation, for example.

Kemira continuously follows regulatory developments, in order to maintain its awareness of proposed and upcoming changes to those laws and regulations that may have an impact, for instance, on its sales, production and product development needs. Kemira is actively collaborating with industry groups and other stakeholders and has established an internal process to manage substances of potential concern and to create management plans for them. These plans cover the options for replacing certain substances if they become subject to stricter regulation, for example. Kemira has also increased its focus and resources in the management of global trade compliance.

Regulatory effects are also systematically taken into consideration in strategic decision making. Kemira takes an active role in regulatory discussions, whenever this is justified from

the perspective of the industry or the business. In Europe in particular, after the election of a new EU Parliament and Commission, the political focus during the 2024-2029 mandate is on strengthening the EU's competitiveness and on the simplification and implementation of previous legislation which may have a positive impact on the chemical industry in general. In addition, new opportunities are expected in critical areas for Kemira, such as the Clean Industrial Deal, a revision of the EU Bioeconomy strategy and the upcoming Water Resilience Strategy which will be published during summer 2025. Based on these planned announcements, Kemira anticipates an increase in positive awareness, especially with regard to Kemira's water treatment activities and the renewable solutions portfolio. The planned revision of REACH, a regulatory cornerstone for chemical safety in Europe, will be closely followed by Kemira, in order to mitigate any potential regulatory or administrative burden.

Potential regulatory implications caused by changes in the US government and any subsequent legislation and trade policies is also being continuously monitored and assessed.

### TALENT MANAGEMENT

To secure competitiveness and profitable growth, as well as to improve operational efficiency, it is essential to attract and to retain personnel with the right blend of skills and competence. Kemira continuously seeks to identify people with high potential and the key competencies for future needs. Through the systematic development and improvement of compensation schemes, learning programs and career development programs, Kemira aims to ensure the continued presence and availability of skilled personnel in the future.

### CLIMATE-RELATED RISKS

Kemira has identified certain climate-related risks that could have an impact on its operations or on customer demand. Increased awareness of and concern regarding climate change and more sustainable products may, for example, change customer demand in favor of water treatment technologies with a lower consumption of chemicals. A proportion of Kemira's raw materials are fossil-based. Kemira has taken action to increase the share of renewable and recyclable raw materials in its portfolio and to reduce reliance on oil and gas derivatives. Many of Kemira's customers, particularly in the Pulp & Paper segment, have ambitions to be carbon neutral, which will likely have implications for Kemira and on the chemicals used in the customers' processes. Extreme weather patterns related to climate change, such as hurricanes and floods, could also impact Kemira's supply chain and suppliers as well as Kemira's own manufacturing sites. Several climate-related risks are included in Kemira's enterprise risk management portfolio and active monitoring and mitigation

planning continues. In 2024, Kemira continued efforts on climate risk scenario analysis, in accordance with the Task Force on Climate-related Financial Disclosures (TCFD) framework. Complementing these efforts, an in-depth geographical climate risk assessment will be completed in 2025, strengthening our resilience against future regulatory requirements such as carbon pricing mechanisms that can impact energy and chemical raw materials. In late 2023, Kemira conducted a geographical climate risk assessment in cooperation with an external third party.

A detailed description of Kemira's risk management principles is available on the company's website at [kemira.com/investors](https://kemira.com/investors). Financial risks are described in the Notes to the Financial Statements for the year 2024, which will be published on February 21, 2025.

## Dividend policy and dividend distribution

On December 31, 2024, Kemira Oyj's distributable funds totaled EUR 794,029,352 of which net profit for the period was EUR 183,609,785. No material changes have taken place in the company's financial position after the balance sheet statement date.

Kemira Oyj's Board of Directors proposes to the Annual General Meeting to be held on March 20, 2025 that a dividend of EUR 0.74 per share, totaling EUR 114 million, be paid on the basis of the adopted balance sheet for the financial year that ended on December 31, 2024. The dividend will be paid in two installments. The first installment, EUR 0.37 per share, will be paid to shareholders who are registered in the company's shareholder register maintained by Euroclear Finland Oy on the record date for the dividend payment: March 24, 2025. The Board of Directors proposes that the first installment of the dividend be paid out on April 3, 2025. The second installment, of EUR 0.37 per share, will be paid in November 2025. The second installment will be paid to shareholders who are registered in the company's shareholder register maintained by Euroclear Finland Oy on the record date for the dividend payment. The Board of Directors will decide the record date and the payment date for the second installment at its meeting in October 2025. The record date is planned for October 28, 2025 and the dividend payment date for November 4, 2025 at the earliest. Kemira's dividend policy aims for a competitive dividend that increases over time.

## Changes to Kemira's Management Board

On **January 29, 2025**, Kemira announced that Simon Bloem has been appointed as Chief Operations Officer and a member of Kemira's Group Leadership Team as of May 1, 2025. He joins Kemira from Envalior where he's been VP Global Manufacturing Materials since 2023.

On **August 16, 2024**, Kemira announced changes to its operating model to better meet its profitable growth ambitions. Kemira also announced a new Leadership Team, which will be effective as of January 1, 2025. The new operating model and new Leadership Team members are described in more detail below.

On **February 9, 2024**, Kemira announced that Harri Eronen has been appointed as Interim President of Kemira's Pulp & Paper segment and as a member of Kemira's Management Board as of February 12, 2024. The former President of the Pulp & Paper segment, Antti Salminen, started as President & CEO of Kemira on February 12, 2024.

## New operating model and Leadership Team as of January 1, 2025

On August 16, 2024, Kemira announced its plans to move to a new operating model and organizational structure to better enable profitable growth. The new operating model became effective on January 1, 2025. The changes aim to increase customer centricity, strategic focus and speed of delivery as well as to accelerate growth and shareholder value creation. As of January 1, 2025, Kemira moved to three externally reported business units: Water Solutions, Packaging & Hygiene Solutions and Fiber Essentials.

Water Solutions is Kemira's largest business unit, reflecting Kemira's ambitions to significantly grow the water business both organically and inorganically. The Packaging & Hygiene Solutions business unit focuses on, among others, the growing renewable solutions market, particularly packaging, where Kemira's renewable product offering supports customers on their sustainability journey. The Fiber Essentials business unit focuses on the pulp and bleaching market where Kemira's products play an essential role in the value chain.

In addition, Kemira established a centralized Operations unit and changed the ways of working in Research & Development. A New Ventures and Services unit was also established.

The new Group Leadership Team members started in their roles on January 1, 2025, led by the President and CEO **Antti Salminen**.

**Petri Castrén**, Chief Financial Officer

**Tuija Pohjolainen-Hiltunen**, Executive Vice President, Water Solutions

**Harri Eronen**, Executive Vice President, Packaging & Hygiene Solutions

**Antti Matula**, Executive Vice President, Fiber Essentials

**Simon Bloem**, Chief Operations Officer, Operations (will start May 1, 2025)

**Eeva Salonen**, Executive Vice President, People & Culture

**Linus Hildebrandt**, Executive Vice President, Strategy & Sustainability

**Sampo Lahtinen**, Executive Vice President, Research & Innovation

**Peter Ersman**, Executive Vice President, New Ventures & Services

Petri Castrén, Tuija Pohjolainen-Hiltunen, Eeva Salonen and Linus Hildebrandt were members of the previous Management Board. Harri Eronen was Interim President of the Pulp & Paper Segment and has been a member of the Management Board since February 2024.

## Other events during the review period

### PROPOSALS OF THE NOMINATION BOARD TO THE ANNUAL GENERAL MEETING 2025

On **December 17, 2024**, Kemira announced the proposals of the Nomination Board to the Annual General Meeting 2025.

The Nomination Board proposes to the Annual General Meeting of Kemira Oyj that eight members be elected to the Board of Directors and that the present members Tina Sejersgård Fanø, Werner Fuhrmann, Timo Lappalainen, Annika Paasikivi, Kristian Pullola and Mikael Staffas be re-elected as members and Susan Duinhoven and Matti Lehmus elected as new members of the Board of Directors. In addition, the Nomination Board proposes that Annika Paasikivi be elected as the Chair of the Board of Directors and Susan Duinhoven elected as the Vice Chair.

All the nominees have given their consent to the position and are independent of the company's significant shareholders except for Annika Paasikivi. Annika Paasikivi is the President & CEO of Oras Invest Oy and Oras Invest Oy owns over 10% of Kemira Oyj's shares.

Current Chair of the Board of Directors, Matti Kähkönen, has informed that he will no longer be available for re-election to the next term of the Board of Directors. Matti Kähkönen has served in Kemira's Board of Directors since 2021 and as the Chair since 2022. The Nomination Board wishes to thank Matti Kähkönen for his important work at the Board of Directors and significant contribution to Kemira Oyj during the past four years.

Susan Duinhoven, Ph.D. (Physical Chemistry), University of Wageningen, B. Sc. (Physical Chemistry), University of Amsterdam, born 1965, has served in multiple leadership positions, latest as the President and CEO of Sanoma Oyj from 2015 till January 1, 2024. She is a member of the Board of Directors of KONE Oyj. Susan Duinhoven is a Dutch citizen living in Finland.

Matti Lehmus, M. Sc. (Chemical engineering), Helsinki University of Technology and eMBA, Helsinki School of Economics, born 1974, has held several leadership positions in the chemical industry at Neste Corporation, latest as the President and CEO at Neste Corporation from 2022 until October 2024. Matti Lehmus is a Finnish citizen.

Regarding the selection procedure for the members of the Board of Directors, the Nomination Board recommends that shareholders take a position on the proposal as a whole at the Annual General Meeting. This recommendation is based on the fact that Kemira's shareholders' Nomination Board is separate from the Board of Directors, in line with a good Nordic governance model. The Nomination Board, in addition to ensuring that individual nominees for membership of the Board of Directors possess the required competences, is responsible for making sure that the proposed Board of Directors as a whole also has the best possible expertise and experience for the company and that the diversity principles of the company will be met, and that the composition of the Board of Directors meets other requirements of the Finnish Corporate Governance Code for listed companies.

The Nomination Board proposes that the remuneration paid to the members of the Board of Directors will be increased as follows (current remuneration in parentheses): for the Chair EUR 132,000 per year (EUR 125,000), for the Vice Chair and the Chair of the Audit Committee EUR 74,000 per year (EUR 70,000), for the Chair of the Personnel and Remuneration

Committee (if the person is not the Chair or Vice Chair of the Board of Directors) EUR 68,000 per year (EUR 65,000) and for the other members EUR 57,000 per year (EUR 54,000).

The Nomination Board proposes that a fee payable for each meeting of the Board of Directors and the Board Committees to be kept at the current level, and a fee be paid based on the method of participation and place of the meeting as follows: participating remotely or in a meeting arranged in the member's country of residence EUR 750, participating in a meeting arranged on the same continent as the member's country of residence EUR 1,500 and participating in a meeting arranged in a different continent than the member's country of residence EUR 3,000.

Travel expenses are proposed to be paid according to Kemira's travel policy.

In addition, the Nomination Board proposes to the Annual General Meeting that the annual fee be paid as a combination of the company's shares and cash in such a manner that 40% of the annual fee is paid with the company's shares owned by the company or, if this is not possible, shares purchased from the market, and 60% is paid in cash. The shares will be transferred to the members of the Board of Directors and, if necessary, acquired directly on behalf of the members of the Board of Directors within two weeks from the release of Kemira's interim report January 1 – March 31, 2025. The meeting fees are proposed to be paid in cash.

### Members of the Nomination Board

The Nomination Board has consisted of the following representatives: Ville Kivelä, Chief Investment Officer of Oras Invest Oy as the Chair of the Nomination Board; Hanna Kaskela, Senior Vice President, Sustainability and Communications, Varma Mutual Pension Insurance Company; Lisa Beauvilain, Global Head of Sustainability & Stewardship, Executive Director, Impax Asset Management plc and Annika Ekman, Head of Equities, Ilmarinen Mutual Insurance Company as members of the Nomination Board and Matti Kähkönen, Chair of Kemira's Board of Directors, as an expert member.

On **December 13, 2024**, Kemira announced that the new operating model is ready for January 2025. Kemira announced changes to its operating model and leadership team in August to better meet its profitable growth ambitions.

On **November 27, 2024**, Kemira announced that its change negotiations, initiated on October 14, 2024 had concluded. 23 employees in Finland will be made redundant as a result of these negotiations.

On **November 15, 2024**, Kemira announced its plans to construct a re-activation plant for activated carbon – the pre-engineering phase is ongoing and Kemira plans to expand its Helsingborg manufacturing site in Sweden and to invest a figure in the low double-digit millions of euros to construct the reactivation plant for activated carbon.

On **October 30, 2024**, Kemira announced its plans to close its manufacturing site in Vancouver, Canada. Kemira plans to consolidate some Pulp & Paper chemical production in North America, resulting in the closure of the manufacturing site in Vancouver, Canada. The Vancouver site has been producing process and functional chemicals for the Pulp & Paper segment.

On **October 17, 2024**, Kemira announced that the Science Based Targets Initiative (SBTi) had validated its climate targets. Kemira has committed to a 51.23% cut in greenhouse gas emissions from its own operations (scope 1 and 2 emissions) by 2030, relative to a 2018 baseline. This target is in line with limiting global warming to 1.5°C, currently the most ambitious criteria for science-based climate and emissions targets. Additionally, Kemira has committed to reducing absolute scope 3 greenhouse gas emissions from purchased goods and services and from upstream and downstream transportation and distribution processes by 32.5% by 2033, from a 2021 base year.

On **October 9, 2024**, Kemira announced that it will start change negotiations in Finland as it plans for a new operating model and organization to be effective as of January 1, 2025. The planned changes may lead to the reduction of a maximum of 40 employees.

On **September 25, 2024**, Kemira announced that it has updated its long-term financial targets to reflect profitable growth ambitions and a structurally higher margin profile.

On **September 24, 2024**, Kemira announced that it will explore the broadening of the strategic cooperation with IFF and also announced the successful completion of a market-entry scale renewable polymer plant in Finland.

On **September 23, 2024**, Kemira announced that it had completed an expansion of ASA sizing agents capacity in Nanjing, China, in response to increased market demand.

On **September 18, 2024**, Kemira announced that it will invest in increased coagulant capacity in Norway, to respond to increased market demand.

## SUSTAINABILITY STATEMENT

On **July 25, 2024**, Kemira announced that it will expand sodium chlorate production capacity in South America, to cater for growing pulp and paper market opportunities.

On **July 9, 2024**, Kemira announced that it is expanding coagulant production capacity in Spain, to cater for growing demand, for biogas applications and phosphorus removal in particular.

On **June 10, 2024**, Kemira upgraded its outlook for 2024, particularly for operative EBITDA. Kemira's end-markets have continued to recover and Kemira's strong performance in both segments has continued. Kemira now expects revenue to be between EUR 2,800 and 3,200 million and operative EBITDA to be between EUR 540 and 640 million in 2024. Earlier, Kemira had expected revenue to be between EUR 2,700 and EUR 3,200 million and operative EBITDA to be between EUR 480 and EUR 580 million. The assumptions behind Kemira's outlook were also updated.

On **March 18, 2024**, Kemira announced that it has received 115,000 shares from Kemira's supplementary pension fund, Neliapila. The shares were transferred to Kemira gratuitously, as part of the return of excess capital. Neliapila returned a total of EUR 12 million of excess capital to Kemira during Q1 2024.

## Acquisitions and divestments

On **September 3, 2024**, Kemira announced that it has completed the acquisition to purchase Norit's UK reactivation business, Purton Carbons Limited.

On **July 1, 2024**, Kemira announced the acquisition of Norit's UK reactivation operations. This acquisition marks the first step for Kemira in terms of expanding in to the activated carbon market for micropollutants removal.

On **February 2, 2024**, Kemira announced that it had completed the divestment of its Oil & Gas-related portfolio to Sterling Specialty Chemicals LLC, a US subsidiary of Artek Group, a global industrial chemicals group based in India. Approximately 250 employees transferred to the buyer as part of the transaction, which includes Kemira's manufacturing facilities in Mobile, Columbus and Aberdeen in the United States as well as the novel liquid polymer (NLP) manufacturing assets in Botlek, the Netherlands. The closing of the Teesport manufacturing facility in the United Kingdom is expected to happen later, subject to site-specific closing conditions.

## Outlook for 2025

### REVENUE

Kemira's revenue is expected to be between EUR 2,800 and EUR 3,200 million in 2025 (reported 2024 revenue: EUR 2,948.1 million).

### OPERATIVE EBITDA

Kemira's operative EBITDA is expected to be between EUR 540 and EUR 640 million in 2025 (reported 2024 operative EBITDA: EUR 585.4 million).

### ASSUMPTIONS BEHIND THE OUTLOOK

Kemira's end-market demand (in volumes) is expected to grow slightly during the year. The water treatment market is expected to grow in all regions. Both the pulp and the packaging and hygiene markets are expected to start to recover. Input costs are expected to be stable or to increase slightly. The outlook assumes no major disruptions to Kemira's manufacturing operations, to the supply chain or to Kemira's energy-generating assets in Finland. Foreign exchange rates are expected to remain at approximately current levels.

## Financial targets

On September 25, 2024, Kemira announced that its Board of Directors had approved the company's updated, long-term financial targets. Kemira's target for average annual organic growth has been changed to over 4% (previously: above the market growth) and the operative EBITDA margin target has been increased to 18–21% (previously 15–18%). Operative ROCE of over 16% has been added as the third, new target.

Governance information

**BASIS OF PREPARATION FOR CONSOLIDATED SUSTAINABILITY STATEMENT**

Kemira previously disclosed non-financial information based on the Non-Financial Reporting Directive (NFRD) and prepared the sustainability information in accordance with the Global Reporting Initiative (GRI) disclosures. Starting from 2024, Kemira now reports according to the Corporate Sustainability Reporting Directive (CSRD) requirements.

As of 2024, Kemira will no longer publish a separate Sustainability Report based on the Global Reporting Initiative (GRI). As the disclosure requirements between CSRD and GRI differ, some previously reported KPIs and metrics required by GRI will no longer be reported in this Sustainability Statement. Kemira has compiled a GRI index to ease the transition to CSRD reporting. The GRI index is available on Kemira's website.

In 2023, the European Union implemented the Corporate Sustainability Reporting Directive (CSRD) to strengthen sustainability reporting practices within the EU. The Corporate Sustainability Reporting Directive is aligned with the EU's objective to achieve climate neutrality by 2050 and to elevate sustainability reporting to a level of importance equal to financial reporting. The Corporate Sustainability Reporting Directive builds upon the foundation of the Non-Financial Reporting Directive and also expands the scope of reporting obligations on companies operating within the EU.

Kemira Group's Sustainability Statement has been prepared in accordance with the European Sustainability Reporting Standards (ESRS), as issued by the European Financial Reporting Advisory Group (EFRAG) in 2023. The sustainability disclosures and key metrics are based on Kemira's Double Materiality Assessment (hereafter materiality assessment) conducted during 2023-2024. The Sustainability Statement covers Kemira's value chain from upstream to downstream in full. Metrics, identified under topical standards, cover Kemira's own operations, unless otherwise specified. Further details regarding Kemira's value chain, the materiality

assessment process and its findings are outlined under *Business model, value chain and strategy*, and *Double Materiality Assessment*.

The Sustainability Statement has been assured (limited assurance) by Ernst & Young Oy, an independent third-party. Assurance was conducted in accordance with the international assurance standards ISAE 3000.

**Structure and content**

Kemira's Sustainability statement is structured based on the order and requirements of ESRS. It includes General disclosure and three main topical standard sections: Environmental information, Social information and Governance information. General disclosure includes e.g Kemira's materiality assessment process, threshold and identified material impacts, risks and opportunities. Material impacts, risks and opportunities and a management summary are presented at the beginning of each material topic section, these are then followed by Kemira's policies, actions, targets and metrics which are connected in each instance. More detailed content index based on ESRS can be found end of this *General disclosures* section.

**Scope of consolidation**

The consolidated sustainability information comprises the parent company Kemira Oyj and subsidiaries controlled by Kemira Oyj. Subsidiaries are all legal entities that Kemira Oyj has control over, as defined in the Financial Statements (in note 6.2. The Group's subsidiaries and investments in associates). The Scope of consolidation is the same as for the Financial Statements but associates are not included in the sustainability reporting. Consolidation of all sustainability data follows the principles above, unless otherwise specified.

The reporting period applicable to the Sustainability Statement coincides with the financial reporting period: January 1, 2024 to December 31, 2024. Comparisons in this statement are made to the corresponding period of 2023, and are provided when comparisons are available.

Governance information

**Sources of estimation and outcome uncertainty**

When preparing the Sustainability Statement in accordance with ESRS, management is required to make estimates and assumptions on the metrics. As a basis for calculation and preparation of the sustainability metrics Kemira applies quality controls to ensure data completeness. Sustainability data collection includes direct measurements, calculations and estimations. Estimates and assumptions are continuously evaluated and are based on past experience and an expectation of future events that may have material implications and are considered to be reasonable under the circumstances. Sources of estimation and outcome uncertainty are described in the reporting principles of each section.

**SUSTAINABILITY GOVERNANCE**

This Sustainability Statement describes sustainability governance at Kemira. Further information about Kemira's governance bodies, their tasks and duties as well as internal control processes and risk management can be found in the Corporate Governance Statement which is available on Kemira's website. Kemira's new operating model came in to force January 1<sup>st</sup> 2025 which will lead to changes in the organizational responsibilities during 2025. This Sustainability statement is based of the organizational structure of 2024.

**Kemira's sustainability governance**

The Board of Directors and the President & CEO are responsible for Kemira's management and operations, including sustainability matters, as defined in the Finnish Companies Act and Kemira's Articles of Association. Sustainability work is carried out throughout the organization as sustainability is integrated into Kemira's strategy. The materiality assessment, combined with Kemira's strategic ambitions, identified material sustainability topics, impacts, risks and opportunities forms the basis of Kemira's Sustainability Statement's topics.

**Sustainability governance chart**

**Board of Directors and Board Committees**

The Board of Directors' key duties include establishing Kemira's long-term goals and the strategy for achieving these. Sustainability is a key driver of Kemira's strategy and a requirement for Kemira's long-term success. By approving the company's strategy and monitoring its implementation, the Board of Directors is directly involved in setting the sustainability agenda at Kemira. The Board of Directors is responsible for approving Kemira's values, the sustainability targets and the Sustainability Statement. The Board of Directors has appointed two Committees to assist in fulfilling its responsibilities:

- 1. The Audit Committee** assists with oversight responsibilities for the financial and sustainability reporting process, the system of internal control, the internal and external audit and assurance process and Kemira's process for monitoring compliance with laws and regulations.
- 2. The Personnel and Remuneration Committee** assists in preparation of matters such as compensation linked with sustainability-related key performance indicators.

**Governance bodies' roles related to business conduct**

The Board of Directors approves Kemira's values and the Code of Conduct which are the foundation of Kemira's business ethics and corporate culture. The responsibilities of the Audit Committee include, among others above, reviewing the effectiveness of the company's system for monitoring compliance with laws and regulations; reviewing the results of the management's investigations of any instances of noncompliance and their follow-up actions; reviewing the findings of any examinations by regulatory agencies, and any auditor observations; reviewing the company's process for communicating the Code of Conduct to company personnel and for monitoring compliance therewith.

The Management Board approves the company's policies that relate to business conduct matters. These policies are described in the *G1 Business conduct* section under *Other business conduct policies*. The Management Board has acknowledged the importance of synchronizing corporate culture and strategy, which will lead to improved employee engagement, higher customer satisfaction, and ultimately increased sales and profitability. To this end, Kemira's Management Board has defined a set of principles, habits and behaviors that are the basis of Kemira's corporate culture. The Management Board members include the heads of both business segments and the main functions of the company and they consequently have versatile expertise in business conduct matters.

Environmental information

Social information

Governance information

Separate **Ethics and Compliance Committee** is tasked with safeguarding an impartial and competent assessment of internally and externally submitted misconduct reports alleging a potential violation of laws, the Code of Conduct or the company's policies. The Compliance Committee reports periodically to the Audit Committee. The members of the Ethics and Compliance Committee have expertise in the areas of legal compliance, business ethics, conducting investigations and human resources leadership.

**Composition and diversity of the Board of Directors**

The Annual General Meeting (AGM) elects the Chair, Vice Chair and other members of the Board of Directors. In accordance with the Articles of Association, the Board of Directors comprises 5–10 members. On March 20, 2024, the Annual General Meeting elected eight members to the Board of Directors. The AGM re-elected Tina Sejersgård Fanø, Werner Fuhrmann, Matti Kähkönen, Timo Lappalainen, Fernanda Lopes Larsen (resigned as of July 31, 2024), Annika Paasikivi, Kristian Pullola and Mikael Staffas to the Board of Directors. Matti Kähkönen was elected the Board's Chair and Annika Paasikivi was elected the Vice Chair. Company's Group General Counsel Jukka Hakkila acts as the Secretary of the Board of Directors.

The Board of Directors has adopted the following principles and targets concerning the diversity of the Board of Directors. When designing the composition of the Board of Directors, the Nomination Board of the company assesses the Board's composition from the viewpoint of the company's current and future business needs, while taking into account the diversity of the Board. The diversity of the Board of Directors will be assessed from various angles. Kemira's Board of Directors shall have sufficient and complementary experience and expertise in the key industries and markets relevant to Kemira's business. In addition, an essential element is the personal characteristics of the members and their diversity. The company's aim is that the Board of Directors represent diverse expertise in different industries and markets, diverse professional and educational backgrounds, diverse age distribution and both genders. The objective is that both genders are represented in the Board by at least two members. Kemira's current Board of Directors conforms to the Company's diversity targets. Versatile expertise from various industries and markets is represented in the Board of Directors, as are various professional and educational backgrounds. The Board of Directors also has access to relevant expertise concerning sustainability and the CSRD within Kemira's organization and can give advice when needed.

Board of Directors' and Management Board's diversity, %	2024	2023
<b>Independent members of Board of Directors</b>	100	100
<b>Non-executive members of Board of Directors</b>	100	100

**The Group's President & CEO and the Management Board**

The President & CEO is responsible for managing and developing Kemira in accordance with the guidance given by the Board of Directors and for implementing its decisions. The President & CEO reports regularly to the Board of Directors on financial and non-financial matters as well as on the business environment.

The Management Board is an operative management body, responsible for maintaining the long-term strategic development of the company. Kemira measures in the sustainability priority areas progress through group-level key performance indicators and targets approved by the Management Board or Board of Directors. Responsibility for individual corporate sustainability targets is shared between the members of the Management Board.

**The Sustainability Steering Team**

The Sustainability Steering Team is a cross-company senior-level management team with participants from wide ranging backgrounds, representing Kemira's relevant business units and functions. The main task of the Sustainability Steering Team is to prepare proposals for the Management Board on how to develop Kemira's corporate sustainability strategy, vision and ambition, and to steer the corporate sustainability-related programs. This includes ensuring the implementation of sustainability strategy, in addition to frequent follow-ups and reporting on the development to the Management Board and the Board of Directors.

**The Sustainability Reporting Compliance Team**

The Sustainability Reporting Compliance Team is a separate team focusing on sustainability reporting and compliance, which is formed of senior-level management and sustainability experts from different functions. It is responsible for leading the comprehensive alignment and the implementation of the reporting required by the Corporate Sustainability Reporting Directive, reporting to the Management Board and forward to the Audit Committee.

**Kemira's impacts, risks and opportunities management**

Kemira's Board of Directors oversees the implementation of strategy and regulation, including impacts, risks and opportunities management in sustainability matters through the materiality assessment. The Management Board is responsible for implementing actions to manage impacts, risks and opportunities as defined in the materiality assessment, coordinated by The Sustainability Reporting Compliance Team and conducted by subject matter experts in the business segments and functions. The progress of the impacts, risks and opportunities management is reported to the Sustainability Steering Team and the Management Board, and from there onwards to the Audit Committee. The Sustainability Steering Team reviews the results of the materiality assessment and shares guidance implementation of the sustainability programs, governance and targets for the Board of Directors and the Management Board. The Sustainability Steering Team is lead by Kemira's EVP of Strategy and it has overall responsibility for impacts, risks and opportunities management. Kemira's CFO and the Global Finance & Accounting function are accountable for that the Sustainability Statement is prepared based on the requirements and regulations. Kemira's Corporate Sustainability function together with the subject matter experts in individual business segments and functions are responsible for sustainability reporting.

The Board of Directors oversees the highest level of the implementation of the European Sustainability Reporting Standards and new reporting practices. The implementation of the European Sustainability Reporting Standards and other sustainability topics were presented in all Board of Directors meetings by Kemira's management to the members of the Board in 2023 and 2024:

- Sustainability strategy and targets
- The Sustainability program and policy updates
- The Sustainability report 2023 review
- The Modern slavery statement

- Sustainability reporting developments related to EU Taxonomy and the implementation of the Corporate Sustainability Reporting Directive
- Kemira's safety performance and other sustainability related key figures
- The progress of the materiality assessment process and results, material impacts, risks and opportunities

The Audit Committee complies with Kemira's sustainability reporting in all meetings. The main sustainability topics discussed by the Audit Committee and prepared by Kemira's management in 2023 and 2024:

- Sustainability reporting developments related to EU taxonomy and the implementation of the Corporate Sustainability Reporting Directive (CSRD)
- The Corporate Sustainability Reporting Directive and the European Sustainability Reporting Standard implementation plan, including a timeline, gap analysis and roles and responsibilities
- The Financial Supervisory Authority's inquiry on sustainability reporting implementation
- The progress of the materiality assessment process and results, material impacts, risks and opportunities
- Risk related to the implementation of new sustainability reporting practices
- A validation review of the Science Based Target initiative
- The Sustainability Statement 2024 draft

**Risk management over sustainability reporting**

Kemira's Board of Directors defines the main principles of risk management and approves the Group's Risk Management Policy. The business segments and functions are responsible for identifying, assessing and managing risks involved in their areas of operation. The Group's Risk Management function coordinates and supports risk management. This is a continuous process which is based on an iterative and collaborative methodology. The Group Risk Management function is also responsible for the group level risk overview, based on input from the business segments and functions and is further responsible for ensuring that risks are reported to and reviewed by the Management Board and the Board of Directors. The Internal Audit function is responsible for monitoring and evaluating the effectiveness of Kemira's risk management system.

**General disclosures**

Environmental information

Social information

Governance information

Kemira Oyj's risk management is based on the Finnish Corporate Governance Code, the Kemira Code of Conduct and on Kemira's values. The principles of Kemira's risk management are also in compliance with international risk management frameworks and standards such as ISO 31000 (Risk Management – Principles and Guidelines).

In accordance with its Enterprise Risk Management (ERM) process, Kemira conducts systematic and proactive assessments and mitigation of identified risks. Risks are grouped under various risk categories, with clearly defined responsibilities. The objective of risk management is to identify risks and opportunities in a proactive manner, to help ensure Kemira's long-term strategic development and to achieve Kemira's strategic and operational targets by supporting decision making by taking uncertainty and its effects into account.

Sustainability reporting risks are managed through Kemira's Integrated Management System, by precisely determined reporting processes and stringent internal controls. Kemira's internal control system covers all Group operations, including sustainability reporting. The internal control activities are carried out at all organizational levels, as a part of the Group's daily operations.

**Sustainability reporting and controls**

The sustainability reporting complies with Kemira's reporting principles and processes for annual financial reporting, risk management and internal controls. Kemira regularly assesses risks and related controls over the sustainability reporting processes, as part of Kemira's Enterprise Risk Management process. Internal process controls are in place for the reporting of sustainability data. Potential risks and uncertainties related to sustainability reporting are regularly addressed by the Audit Committee. Sustainability reporting compliance is assured by external auditors, by limited assurance.

Risks identified in the sustainability reporting relate to the completeness of qualitative and quantitative information as well as to the timing of reporting. In order to ensure that the reported information is accurate and timely, Kemira has implemented reporting systems and processes and has established internal controls. These controls include implementing a reporting governance structure and specifying the roles related to sustainability reporting within the corporate functions and business segments.

Kemira maintains risk management and internal control systems to ensure the effectiveness and efficiency of its operations, including the reliability of financial, non-financial and operational reporting and compliance with the applicable regulations, policies and practices. More details on this and on the governance model for internal controls can be found in the Corporate Governance Statement.

**Integration of sustainability-related performance in incentive schemes**

To ensure that sustainability transformation remains a high priority and drives profitable growth, Kemira has integrated key sustainability priorities into its incentive programs. Kemira provides performance-driven remuneration packages. Key sustainability priorities are reflected in the Group's incentive programs and are aligned with Kemira's sustainable and profitable growth strategy. Kemira has both long- and short-term incentive plans, with the long-term incentive plans targeted for selected individuals of senior management. Safety, with a 5% weight, has been a key performance indicator of the short-term incentive plan for several years and the short-term incentive program for 2024 includes a new target for strategic revenue growth.

The aim of the long-term incentive plan is to align the objectives of the shareholders and the persons participating in the plan, to increase the value of Kemira, to commit the participants to Kemira and to offer them a competitive reward plan. In addition to financial targets, sustainability targets are incorporated in the two latest performance periods (2023–2025 and 2024–2026) of the long-term incentive program. Revenue Growth of Renewable Solutions and the climate target for Scope 1 and 2 have been included in the long-term incentive plan since the beginning of 2023, both with a weight of 10%. The climate target reflects Kemira's commitment to annual reduction rate, in line with the Science Based Targets Initiative (SBTi) commitment. The Board of Directors defines and approves the main principles for the incentive schemes within Kemira, its values, sustainability targets and the Code of Conduct. More details on remuneration can be found in Kemira's Remuneration Report.

**Due diligence**

Kemira believes that acting ethically and responsibly is not only the correct thing to do but that it also benefits our business and stakeholders. Kemira works in accordance with the United Nations Guiding Principles, which require companies to conduct due diligence to protect and respect human rights and remedy the victims of business-related abuses. Kemira's Sustainability statement is structured according to our due diligence processes. Further information on Kemira's due diligence processes in the topical standard sections is shown in the table below.

Steps of due diligence	In the sustainability statement
Assess impacts and risks	Material impacts, risks and opportunities under General disclosure
Integrate and act to address impacts and risks	Action related to topical standards
Track the effectiveness of the efforts	Targets related to topical standards
Communicate impacts and risks	Material impacts, risks and opportunities under topical standards
Stakeholder engagement in due diligence processes	Policies related to topical standards Stakeholder engagement in General disclosure

**BUSINESS MODEL, VALUE CHAIN AND STRATEGY**

Kemira provides sustainable chemical solutions for water-intensive industries. Kemira has two business areas: Pulp & Paper and Industry & Water. Kemira had operations in 38 countries and had 58 manufacturing facilities at the end of 2024. In Pulp & Paper, Kemira provides chemical solutions for bleaching, packaging, tissue and printing and writing products. The main product categories in Pulp & Paper are bleaching chemicals, sizing and strength chemicals, various process chemicals and polymers. In Industry & Water, Kemira offers chemical solutions for municipal and industrial water treatment for both drinking water and waste water treatment. The main product categories in Industry & Water are coagulants and polymers. Kemira has three regional business areas: EMEA, APAC and the Americas. Kemira has a new operating model, effective from January 1, 2025 onwards. The new operating model has three business units: Water Solutions, Packaging and Hygiene Solutions and Fiber Essentials. The new operating model will increase customer centricity as well as speed and agility. Kemira will assess the impact of the new operating model on sustainability matters in 2025.

More information on Kemira's segments' and regions' financial performance (ESRS2 SMB-1, 40 (b, c), changes to our operations and the number of personnel by geographical area (ESRS2 SMB-1, 40 (a) i-iii) can be found in the Financial Statements (Board of Directors' Review, Financial performance 2024 and Segments, in notes 2.1. Segment information, 2.2 Other operating income and expenses and 3.6 Business combinations). Profitable sustainable growth is Kemira's strategic objective. Sustainability is integrated into Kemira's strategy and long-term success as Kemira's customers are increasingly asking for sustainable solutions. Kemira provides its customers with solutions that help them to improve the resource efficiency of their operations. In 2024, 58% of Kemira's revenue came from products that improve customer resource efficiency, e.g. energy and water efficiency and reduced waste generation. Kemira's customers focus increasingly on their products' end-of-life properties such as recyclability and biodegradability. As a result, renewable solutions remain a strategic priority for Kemira. Kemira's renewable solutions strategy is covered in more detail in the Annual Review. Kemira aims to expand its renewable solutions, to reach EUR 500 million in revenue by the end of 2030.

One of the key aims of Kemira's strategy is to become the leading provider of sustainable chemical solution for water-intensive industries. This will be achieved by building on our product portfolio, increasing our focus on water treatment and improving our own use of renewable and recycled raw materials. Kemira continues to innovate and to look for new growth from sustainable products and markets while continuously improving its own processes.

**General disclosures**

Environmental information

Social information

Governance information

**Kemira's value chain**

Kemira has a global raw material supply chain. Kemira's products are dependent on refined mineral, fossil, renewable and recycled raw material feedstocks. Kemira's position in the value chain is utilizing primary chemicals and further refining those into specialty chemicals.

Kemira's offering in both business segments, in Pulp & Paper and in Industry & Water, focuses on:

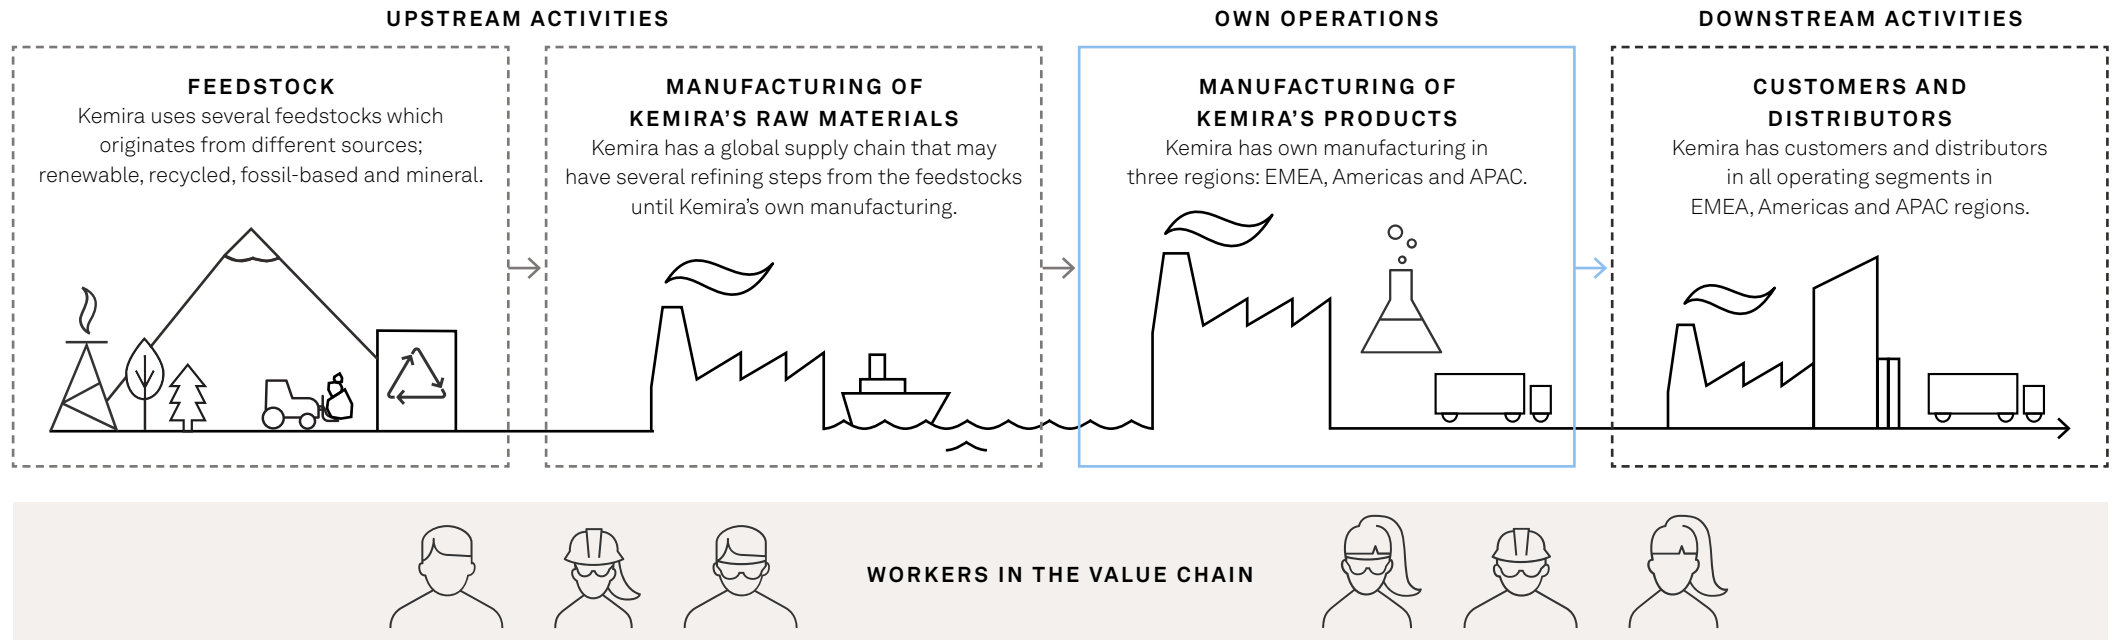

- products and services which enhance customers' process efficiency and lead to lower energy, water and virgin raw material consumption
- new renewable carbon-based chemistry concepts to lower the carbon footprint in customer end products
- chemistry concepts which enhance the quality of the end products
- digital services to optimize the customers' processes

Based on the materiality assessment outcomes, Kemira's sustainability priorities focus on the most material impacts, risks and opportunities. The materiality assessment considers external and internal stakeholders' expectations, covers the full value chain from upstream to downstream and also considers varying timeframes, from short-term to long-term.

**Interests and views of stakeholders**

Kemira regularly reviews stakeholders' expectations and potential concerns. Our approach to stakeholder engagement includes activities ranging from information sharing to active dialogue and collaboration on issues of mutual interest. The feedback and information gathered from these activities are integrated into Kemira's operational development and decision-making. Stakeholder feedback is considered in setting company strategy. The views of stakeholders were used in the materiality assessment carried out in 2024, which is described in more detail in the Material impacts, risks and opportunities section which follows.

**MATERIAL IMPACTS, RISKS AND OPPORTUNITIES**

Sustainability is embedded into all operations, including Strategy and Enterprise Risk Management (ERM). From the Enterprise Risk Management perspective, integrating sustainability is crucial to mitigating risks and to ensuring long-term resilience. The materiality assessment helps to prioritize the most important risks in the annual review process. Kemira has systematic procedures in place to evaluate and address the environmental, social and governance material impacts of its own operations and business relationships. Kemira's sustainability work is based on day-to-day responsible practices in all our operations. Our corporate sustainability priorities are based on the most material impacts across our business; on the increasing expectations of our customers, investors and other stakeholders and on our commitment to the Kemira Code of Conduct and internationally agreed sustainability principles.

**Double materiality assessment**

The materiality assessment was based on Kemira's strategic priorities and the management's view on Kemira's most important sustainability matters. Kemira's sustainability-related impacts, risks and opportunities were identified and prioritized in a materiality assessment. Kemira's first materiality assessment based on the European Sustainability Reporting Standard was conducted in 2023. It covered Kemira's entire value chain, including own activities as well as activities in the upstream and downstream value chain. The initial results were communicated in the 2023 Sustainability report. The materiality assessment was revised in 2024 to reflect business changes, mainly the divestment of the Oil & Gas business. The materiality scoring was also reviewed and realigned.

The materiality assessment followed General disclosure requirements and the materiality scoring was linked to Kemira's existing internal Enterprise Risk Management scale, both in impact materiality and financial materiality assessments.

Kemira's materiality assessment was a cross-functional work, covering the view of all critical Kemira operations and stakeholders. It brought together expertise from both the financial and sustainability perspectives. Both business segments were represented throughout the assessment. The global approach and engagement of Kemira's higher management and a wide range of internal subject matter experts ensured that high-risk factors were covered in the materiality assessment. All the participants paid attention to the company's impacts on

the environment, society, employees and other stakeholders, as well as to the qualitative and financial risks and opportunities for the company's business related to sustainability matters.

Kemira defined six phases for conducting the materiality assessment. The process started with the scoping of impacts, risks and opportunities which were finally validated by Kemira's stakeholders and management. The phases in the materiality assessment were:

**1. Scoping of impacts, risk and opportunities**

The identification of impacts, risks and opportunities started with a comprehensive review of Kemira's internal documents. This documentation review was complemented with a benchmark study of typical industry-related impacts, risks and opportunities.

**2. Engagement of stakeholders to identify impacts, risks and opportunities**

For the interviews, key higher management representatives and subject matter experts were identified within Kemira's organization. Stakeholder interviews also included Kemira's customers and investors. The two first phases focused on collecting a list of potential impacts, risks and opportunities for further assessment.

**3. Assessment of identified individual impacts, risks and opportunities**

Based on the material collected in the first two phases, the impacts, risks and opportunities were reviewed and scored in internal workshops. Separate workshops were held for impact materiality and financial materiality. Impact materiality was scored for severity and likelihood and both positive and negative impacts were scored. Financial materiality was scored for both the scale of potential impacts and their likelihood, considering both risks and opportunities. As a result of the workshops, a comprehensive materiality assessment covering environment, social and governance impacts, risks and opportunities was achieved.

**4. Revision of materiality assessment**

The materiality assessment was revised and validated several times during the process. The final revision was conducted in 2024. In the latest revision, there were no major changes in the scope of materiality compared to the initial results communicated in the 2023 reporting.

General disclosures

Environmental information

Social information

Governance information

5. Prioritization of impacts, risks and opportunities

The materiality is two-dimensional, taking both impact materiality and financial materiality into account in the prioritization. The prioritization of sustainability related matters is determined based on the original scoring of the impacts, risks and opportunities assessment and the set threshold.

6. Management review and validation

The materiality assessment and the threshold was reviewed and validated with the relevant Kemira governance bodies, the Board of Directors and the Audit Committee.

Based on the materiality assessment conducted, we identified positive and negative impacts on the environment, social and governance topics as well as sustainability-related risks and opportunities that are exposed to financial materiality. The outcome of the materiality assessment is summarized in the assessment scale. The most significant sustainability topics for Kemira in the 2024 reporting period were Climate change, Resource use and the circular economy and Water and marine resources. The result follows Kemira's strategy and anticipated future scenarios. The materiality assessment was conducted on sub-topic level, but all the sub-sub topics were considered as part of the process. The sub-topics' financial materiality were classified as moderate, high or very high and the impact materiality was classified as possible, likely or very likely. Some of the standard topics are more widely represented in the Sustainability statement since for some topics all of the sub-topics were defined to be in the scope of materiality, as presented in the *Material sustainability topics* table. Two social standard topics, Affected communities and Consumers and end-users were found not material, which underlines Kemira's position in the value chain and Kemira's business model.

The materiality assessment is a dynamic process subject to changes and it is reviewed at least annually. It is also planned for the materiality assessment to be integrated into Kemira's Strategy and Enterprise Risk Management processes.

Assessment scale for impacts, risks and opportunities

Impact materiality	Very likely				Climate change (E1)	Water and marine resources (E3)	
	Likely		Biodiversity & ecosystem (E4)	Own workforce (S1) Workers in the value chain (S2)	Pollution (E2)	Resource use & circular economy (E5)	
	Possible				Business conduct (G1)		
	Unlikely	Non-material topics:					
	Very unlikely	Affected communities (S3) Consumers & end-users (S4)					
		Very low	Low	Moderate	High	Very high	
		Financial materiality					

## Results of material impact, risks and opportunities for sustainability topics

Standard	Material topics and sub-topics	Position in the value chain			Material impacts	Financial materiality	Number of impacts risks and opportunities

Identification of material impacts, risks and opportunities for sustainability topics

Kemira's business model, strategy, policies and ways of working were part of identifying material impact risks and opportunities for environmental, social and governance topics. Based on the materiality assessment conducted, a total number of 212 positive and negative impacts, risks and opportunities were identified and 50 were found to be material.

Environment information

Significant environmental aspects and impacts on own operations at Kemira's group-level are identified annually, based on collected environmental data. On site level, identification of significant environmental impacts, risks and opportunities are included in the sites' Environment, Health, Safety and Quality (EHSQ) Risk Assessment process that is based on Kemira's EHSQ Assessment procedure. Affected communities are included in site-level risk assessments as a stakeholder group that needs to be considered. Site-specific EHSQ Risk Assessments are internally updated and audited regularly by Kemira's EHSQ function and externally by accredited ISO 14001 auditors. Results are reported in Kemira's sustainability reporting system.

Environmental impacts and risks are initially assessed as part of the environmental permitting process of the sites and the Environmental Impacts Assessments (EIA) at the sites where the assessment is required. Both the environmental permitting process and EIA include consultation with affected communities. Communities affected by environmental permitting have the opportunity to appeal on the permit and the EIA process includes public consultation of affected communities. Results of the site-level assessment of impacts, risks and opportunities have been considered in the risk assessment at a high level, including Global Environmental Impacts and Aspects assessment, the Enterprise Risk Management Process and materiality assessment.

Actual positive and negative impacts and risks as well as potential risks and opportunities were identified in the **Climate change** topics. Together with materiality assessment and Kemira's climate risk scenario, Kemira has developed a climate risk matrix to evaluate the materiality of these climate-related impacts, risks and opportunities and to establish a methodology for risk assessment. The materiality assessment identified various climate-related impacts, risks and opportunities, including transition and physical risks, and opportunities for enhancing efficiency, adopting new technologies and accessing new markets through sustainable innovations.

From a business case perspective the most significant climate risk to Kemira's own operations is related to our energy-intensive manufacturing operations. These operations face potential regulatory restrictions, fluctuations in supply and demand, volatility in energy prices and challenges in securing renewable energy. While Kemira has implemented several mitigation actions to address these risks, we recognize the need for further investigation and improvement. Kemira is committed to further develop its methodology to better capture our exposure to climate risk and to explore additional ways to integrate climate change considerations into our existing processes. This aims to reduce uncertainties and to enhance our resilience to climate-related challenges. Information on the management of climate related impacts, risks and opportunities can be found in more detail under *Identification and management of material impacts, risks and opportunities* in the *E1 Climate change* section.

Actual negative impacts and potential risks for **Pollution of air, water and soil** and potential negative impacts for **Substances of concern or very high concern** were identified as a result of the materiality assessment. Pollution through potential spills and accidental chemical releases as well as actual and potential environmental liabilities related to soil or closed activities was identified as material aspects. Pollution of air and water through air emissions and water effluent from sites which is related to normal operations have not been identified as a material aspect. Substances of concern or very high concern may cause negative impacts on people and the environment.

Actual positive and negative impacts and potential opportunities and risks were identified for **Water**. High water consumption in own operations was identified as a material impact. **Marine resources** is not considered a material topic for Kemira. Dependency on marine resources is limited to the withdrawal of sea water for use as cooling water at one manufacturing site with a single-pass cooling water system and the discharge of a limited amount of process water with no treatment requirement, such as cooling tower blowdown to sea at two sites.

Based on an internal study, supported by an external partner, on biodiversity impacts and dependencies in 2024, high water consumption and discharge was identified as a material negative impact part of both the upstream and downstream value chain. Based on the study, a roadmap has been created and Kemira will report in more detail on the identification and assessment of material impacts, risks and opportunities in the upcoming years. Using location based water stress and water scarcity data and the results of site level EHSQ Assessments, sites with potential risk are selected for a more detailed water risk assessment which includes site interviews and operational risk assessments using

General disclosures

Environmental information

Social information

Governance information

the WWF Water Risk Filter. Site-specific substantive freshwater use and consumption risks were not identified within the timeframe of 3 to 6 years into the future in relation to water stress and water scarcity.

Water stress and water scarcity risks in own operations are assessed by the EHSQ function annually, using World Resources Institute's (WRI) Aqueduct tool to identify sites in water stress areas and the World Wide Foundation (WWF) Water Risk Filter for water scarcity risk in different future scenarios. Most of Kemira's water consumption takes place at sites that are not located within water stress areas. Kemira has 12 sites (21% of the sites) located within water stress areas. In "high" or "extremely high" water stress areas more than 40% of available water is used by industry, households and agriculture.

Actual positive and negative impacts were identified from the upstream and downstream value chain for Direct impact drivers of biodiversity loss in **Biodiversity and ecosystems**. Kemira did not identify actual or potential material impacts, risks or opportunities on biodiversity and ecosystems at own site locations. Material negative impacts with regards to land degradation, desertification or soil sealing were also not identified.

Potential and actual material impacts and opportunities were identified in the whole value chain in **resource use and waste**. The main information sources in the materiality assessment on resource use and the circular economy were industry specific future roadmap studies, benchmarks of sustainability leaders in the chemical industry and internal and external stakeholder interviews. Stakeholders were chosen for the materiality assessment based on stakeholder engagement analysis. The focus in the selection was on the most influential stakeholders from a resource use and circular economy point of view. Kemira is planning to consult a broader set of stakeholders over the upcoming years, to complement the materiality assessment with the views of e.g. affected communities.

Social information

Potential and actual material impacts, risks and opportunities were identified in **Own workforce** along with actual and potential negative impacts in the **Workers in the value chain**. The analysis of social related impact, risk and opportunity was based on internal interviews and materials as well as on Kemira's latest Human Rights Impact Assessment framework which was created in cooperation with an external partner. The methodology of the Human rights Impact Assessment was based on the United Nations Guiding Principles on Business and Human Rights and the OECD Due Diligence Guidance.

The identified material impacts, risks and opportunities were included in a more comprehensive analysis (Human Rights Due Diligence Risk Assessment) which was carried out together with Kemira's key subject matter experts. The analysis was built on the identification and assessment of affected stakeholders and a consideration of the high-risk factors related to Kemira's business model and strategy. The most significant high risk factors were assessed to be the nature of work for the different value chain worker groups who are likely to be impacted, geographical location and chemical properties and their usage volumes. Within each worker group particularly vulnerable workers were identified. The identification was done by assessing the potential negative impact against the nature of the work and the environment in which the actual work is conducted.

Governance information

Actual positive impacts and potential negative impacts, risks and opportunities were identified in **Corporate conduct**, potential opportunities in **Political engagement and lobbying activities**, and potential negative impacts in **Corruption and bribery**. When carrying out the materiality assessment for these topics, the following criteria were taken into consideration: industry sector, nature of operations, geographical scope of operations and the typical structure of business transactions.

EU taxonomy

The European Union’s target is to reduce net greenhouse gas emissions to zero by 2050. In order to reduce greenhouse gas emissions and to better engage the private sector in the green transition, the EU has introduced the EU taxonomy, a common classification system to define environmentally sustainable economic activities. The aim of the taxonomy is to classify economic activities based on their contribution to six environmental objectives 1) climate change mitigation, 2) climate change adaptation, 3) sustainable use and protection of water and marine resources, 4) transition to a circular economy, 5) pollution prevention and control, and 6) protection and restoration of biodiversity and ecosystems. The EU taxonomy is still developing and as yet does not cover all economic activities. For 2024, companies are required to disclose what proportion of their turnover, capital expenditure (CapEx) and operating expenditure (OpEx) are both eligible and aligned according to the EU taxonomy’s two environmental objectives and eligible according to the EU taxonomy’s environmental objectives 3–6. \*

The manufacturing sector, which Kemira is considered to be part of, is largely out of the scope of the current legislation. Currently this mainly includes the manufacturing of basic materials and chemicals such as chlorine, soda ash and hydrogen. Kemira on the other hand mostly produces specialty chemicals and therefore its current eligibility and alignment figures are low. The EU taxonomy’s third environmental objective covers the sustainable use of water. However, it does not include enabling activities for the sustainable use of water, but instead focuses more on activities that are directly linked to water infrastructure, from construction to operation to renewal of water infrastructure. Kemira’s products are essential for clean drinking water and wastewater, but they are currently excluded from the scope of the EU taxonomy. Kemira is in active dialogue with the EU commission regarding the scope of the EU taxonomy and the importance of chemicals as an enabler for water infrastructure.

ACCOUNTING PRINCIPLES

The EU taxonomy requires the disclosure of three financial indicators: turnover, capital expenditure (CapEx) and operating expenditure (OpEx). These indicators are defined by the EU taxonomy and the definitions differ from the IFRS-definitions of CapEx and OpEx, which are used elsewhere in Kemira’s financial reporting. Kemira has calculated the KPIs based on the

definitions used in the EU taxonomy and has taken a conservative approach when interpreting the EU Taxonomy Regulation. The EU taxonomy also requires companies to disclose how they have avoided double counting of their economic activities. Kemira avoided double-counting by ensuring that turnover, CapEx and OpEx were only allocated once to the taxonomy activities and only to one environmental objective: climate change mitigation. Kemira does not contribute to multiple environmental objectives.

KEMIRA’S TAXONOMY-ELIGIBLE AND TAXONOMY-ALIGNED ECONOMIC ACTIVITIES (PLEASE SEE TABLES ON FOLLOWING PAGES FOR A MORE DETAILED BREAKDOWN)

Key Performance Indicator	Total (MEUR)	Share of taxonomy-eligible economic activities (%)	Share of taxonomy non-eligible economic activities (%)	Share of taxonomy aligned economic activities (%)	Share of taxonomy non-aligned economic activities (%)
Turnover	2,948.1	0	100	0	100
Capital expenditure (CapEx) as per definition of the EU Taxonomy	208.7	1	99	0	100
Operating expenditure (OpEx) as per definition of the EU Taxonomy	109.4	0	100	0	100

Turnover in EU Taxonomy equals revenue in Kemira’s financial reporting. Capex as per the definition of the EU taxonomy equals Kemira’s reported capital expenditure with additions into right-of-use assets. Opex as per the definition of the EU taxonomy equals direct R&D and maintenance expenditure. Please refer to the Financial Statements note 2.1 for more information on revenue, 3 for capital expenditure and 2.2 for operating expenditure.

**Turnover.** Kemira’s eligible turnover mainly consisted of industrial by-products, such as hydrogen and waste heat that is sold for district heating. Kemira’s waste heat turnover is taxonomy-aligned, while hydrogen turnover is not taxonomy-aligned due to the lack of life-cycle-assessments in a form required by the EU Taxonomy Regulation.

**Capital expenditure.** Kemira had no revenue-related CapEx as the taxonomy-eligible turnover consisted of industrial by-products for which Kemira does not specifically spend CapEx. In terms of individually sustainable CapEx\*\*, Kemira spent EUR 1.2 million CapEx on electric vehicles in 2024.

General disclosures

**Environmental information**

Social information

Governance information

**Operating expenditure.** Kemira had no revenue-related OpEx as the taxonomy-eligible turnover consisted of industrial by-products on which Kemira does not specifically spend OpEx. Based on Kemira's analysis, individually sustainable OpEx\*\* was not material in 2024.

\*Taxonomy-eligibility means that an activity is classified in the taxonomy, which is an indication that it might have a substantial contribution to one of the six environmental objectives of the taxonomy. Taxonomy-aligned means that an activity is environmentally sustainable, according to the EU taxonomy criteria. Economic activities are considered to be aligned according to the EU taxonomy when they:

- Make a substantial contribution to one of the six objectives mentioned above and they comply with certain technical screening criteria.
- Do no significant harm (DNSH) to the achievement of any other objective of the EU taxonomy.
- Comply with minimum safeguards for human rights, taxation, corruption and fair competition.

Kemira has assessed its eligible revenue based on the above categories, to determine whether the taxonomy-eligible activities are also taxonomy-aligned activities. In 2023, Kemira performed a minimum safeguards self-assessment in relation to the EU Taxonomy reporting in the fields on human rights, taxation, corruption and fair competition. The conclusion from this assessment is that Kemira meets the EU Taxonomy minimum safeguards on a group level. In its taxonomy reporting, Kemira has taken into account the latest regulation regarding DNSH criteria and delegated acts.

\*\*Individually sustainable CapEx / OpEx refers to CapEx / OpEx that enables an economic activity to be conducted in a low-carbon manner or to reduce greenhouse gas emissions.

## FORM 1 FOR THE ECONOMIC ACTIVITIES OF CERTAIN ENERGY SECTOR – NUCLEAR ENERGY AND FOSSIL GAS RELATED ACTIVITIES

Row	Nuclear energy related activities	
1.	The undertaking carries out, funds or has exposures to the research, development, demonstration and deployment of innovative electricity generation facilities that produce energy from nuclear processes with minimal waste from the fuel cycle.	NO
2.	The undertaking carries out, funds or has exposures to construction and safe operation of new nuclear installations to produce electricity or process heat, including for the purposes of district heating or industrial processes such as hydrogen production, as well as their safety upgrades, using the best available technologies.	NO
3. ## Identification of material impacts, risks and opportunities

Kemira has identified climate-related impacts, risks and opportunities through the materiality assessment process, which can be found under *Impacts, risks and opportunities* in the *General disclosure* section. The management of identified climate-related impacts, risks and opportunities is summarized in the table on the previous page.

## Strategy and transition plan

As a company, Kemira is committed to operating in a manner that minimizes its negative impact and maximizes our positive contributions to achieving the UN Sustainable Development Goals (SDGs). More detailed information on Kemira's SDGs can be found in the *Board of Directors' review*.

Kemira is also committed to the Science Based Targets initiative (SBTi) to ensure climate action, which is fact-based and aligned with the expectations of our stakeholders and the scientific community. Kemira's climate targets were validated by the Science Based Targets initiative in 2024. Additionally, Kemira joined the Renewable Carbon Initiative, to demonstrate our commitment to accelerate the shift from fossil carbon to renewable carbon and raw materials. Kemira's near-term Scope 1 and 2 target is in line with the Paris Agreement target to limit global warming to 1.5°C. Kemira is not excluded from the EU Paris-aligned Benchmarks (PAB). More detailed information on the SBTi targets can be found under *Targets related to Climate change*.

Kemira's supports customers in becoming more sustainable by offering sustainable chemical solutions. Climate-related impacts, risks, and opportunities are integral to our business model and strategy. The considerations of our climate-related impacts, risks, and opportunities are embed into our operations by assessing the climate resilience of our business and by focusing on climate-related transition and physical risks and opportunities, following the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).

Kemira conducted an initial climate risk scenario analysis following the TCFD framework in 2022, followed by a second phase in 2023, with support from external parties. These assessments evaluated climate risks from a global perspective and included local evaluations across Kemira's 11 manufacturing sites and 8 business functions. This established process can be applied across all of Kemira's manufacturing sites and functions over time, providing a comprehensive assessment of our climate risk.

Climate-related transition risks and opportunities are also an integrated aspect of Kemira's investment strategy. Kemira's New Product Development (NPD) process ensures that successful projects clearly demonstrate both sustainability and business benefits, with every decision to proceed to product launch. We conduct comprehensive sustainability evaluations, assessing the economic, environmental and social impacts of new products and solutions on both our operations and those of our customers. The New Product Development process aims to improve the sustainability performance of each product that is replaced, including climate-related indicators for both reducing the footprint and increasing the handprint.

The climate risk scenario analysis included interviews with Business Controllers and Finance functions, to evaluate the financial impact of identified risks on the company. The climate risk scenario analysis was evaluated across three time horizons: short-term (until 2030), medium-term (2030-2050), and long-term (2050 and beyond). The analysis included 15 transition risks, including policy and legal, reputational, technological and markets risks, as well as five physical risks, including acute and chronic risks. In addition, it identified various opportunities. Climate change scenarios from the Intergovernmental Panel on Climate Change (IPCC), specifically the Representative Concentration Pathways (RCPs), were used to evaluate these risks and opportunities. RCP 2.6 represents a scenario where the global temperature rise remains below 2°C by 2100, reflecting the strictest possible regulatory environment, while RCP 8.5 is considered a worst-case scenario with continued emissions increases through 2100, leading to severe chronic and acute climate risks. Risks and opportunities were assessed for their potential to materialize under one, both or neither of these scenarios.

As a company operating in a high climate impact sector, Kemira acknowledges a responsibility for sustainability and protecting the planet. Complementing these efforts, an in-depth geographical climate risk assessment will be completed in 2025, strengthening our resilience against future regulatory requirements, such as carbon pricing mechanisms that can impact energy and chemical raw materials. In late 2023, Kemira conducted a geographical climate risk assessment with an external third party. This assessment was based on site location coordinates and utilized several international databases, and the initial high-risk locations were identified. Kemira is committed to not only measuring and tracking greenhouse gas (GHG) emissions but also actively working to reduce them. Kemira's strategy supports the company's operations to focus on reducing reliance on fossil fuels and to significantly increase the proportion of biobased products by 2030. To mitigate potential negative impacts within their value chains, Kemira actively encourages suppliers to transition to renewable energy sources.

General disclosures

**Environmental information**

Social information

Governance information

Since Scope 3 emissions constitute more than 80% of Kemira's total GHG emissions, engagement with value chain partners is crucial. Most of the supply chain emissions stem from purchased goods and services, primarily originating from hard-to-abate sectors. To address this, Kemira has identified and implemented several strategic levers aimed at reducing emissions within our own supply chain.

Also the transition to renewable resources is one of the core elements in Kemira's product portfolio strategy. In 2024, Kemira intensified efforts to minimize these impacts by enhancing energy efficiency and adopting strategic energy-sourcing practices. Through ongoing improvements in energy efficiency at manufacturing sites, Kemira is consistently decreasing energy consumption, emissions and associated costs.

In 2025, Kemira will complete a climate transition plan to bind together all climate related initiatives and activities. This plan will be included in action and resource planning as well as integrated in Kemira business plans.

### **POLICIES RELATED TO CLIMATE CHANGE**

As Kemira strives to become the leading provider of sustainable chemical solutions, we acknowledge our dual responsibility to drive positive impacts by helping industries adopt more sustainable practices and minimize potential negative impacts, such as emissions, from our energy-intensive manufacturing operations.

Kemira is committed to operating safely and responsibly and reducing its impacts through its whole value chain whilst also continuously improving its sustainability performance following strategy, the Code of Conduct and other policies and the Integrated Management System. Kemira's Integrated Management System is intended to ensure that Kemira can meet its commitments and be compliant with the applicable requirements. The Sustainability Policy includes e.g Kemira's commitment to climate change mitigation and adaptation and to energy efficiency and renewable energy deployments. It is aligned with the Kemira Code of Conduct and other internal Kemira policies. Kemira's sustainability approach is also contributing to the risk management process at Kemira, as defined in the Kemira Group Risk Management Policy. Key contents, scope, the process, accountability and availability of the policies is described in the *G1 Business Conduct* section, under *Corporate Culture and Business Conduct Policies*.

Kemira monitors and reviews information on the relevant interested parties and their specific requirements at least once a year. Partners in our value chain are evaluated for their sustainability performance, in line with Kemira's Code of Conduct for Business Partners policy. Kemira's suppliers must follow our Code of Conduct for Business Partners in their business activities, with set requirements for environmental responsibility. Kemira also has a due diligence process that must be applied to all new agents and distributors who act as third parties for Kemira. In addition, Kemira continued enrolling its suppliers into the Kemira Sustainability program by assessing them through EcoVadis. In 2024, a total of 528 suppliers have gone through the assessment. This assessment also addresses the suppliers' commitment to the SBTi as well as their quantitative objectives in environmental matters. Results with low scores were reviewed together with suppliers and improvement plans were made accordingly.

### **ACTIONS RELATED TO CLIMATE CHANGE**

Kemira has actions which relate to climate change impacts, risks and opportunities from our suppliers to own manufacturing. Kemira's supply chain decarbonization actions focus on improving resource efficiency and on encouraging suppliers to switch to renewable energy. In 2023, Kemira launched a Supplier Engagement Program to collect product carbon footprint data ("primary data") from our suppliers, replacing general secondary data. This approach enhances our Scope 3 emissions process, identifies reduction opportunities and supports lifecycle decarbonization. The program also improves emissions data quality for raw materials, benefiting both our sustainability goals and our value chain partners, while positively impacting local communities and customers.

In 2023, Kemira assessed the top 350 Raw Material Suppliers, corresponding to 98% of cumulative emissions from raw materials and trade goods. Less than half of these suppliers publicly report Scope 1 and 2 emissions or have set targets for these emissions. Approximately 20% of the suppliers report their Scope 3 emissions and only 7% have set targets for Scope 3 reductions. Around 50 supplier entities have committed to or have set SBTi targets, either near-term or net-zero. Kemira conducted an internal abatement cost analysis for Scopes 1, 2 and 3 in 2024. For Scope 1 and 2, the analysis showed that the most cost effective way to reduce emissions is to concentrate on low carbon and carbon-free energy sourcing related to Scope 2.

Governance information

## Energy

Kemira continued implementing our E3plus (Energy Efficiency Enhancement) program throughout 2024. This initiative aims to reduce the overall specific energy consumption at Kemira's own manufacturing sites. In 2024, we achieved significant energy savings through the implementation of 55 projects across Kemira's operations, resulting in a total of 20,675 MWh per year of energy savings, equivalent to EUR 1.1 million in savings. Since the start of the E3plus program in 2010, more than 725 projects have been implemented, estimated cumulatively saving EUR 16 million. Kemira is also participating in Finland's voluntary national Energy Efficiency Agreement ("Energiatehokkuussopimus") for the period 2017–2025, which is part of Finland's national ratification of the EU's response to the Paris Climate Agreement. Since 2017, the total energy savings reported to the National Energy Authority in Finland ("Energiavirasto") amount to 125,000 MWh per year, equivalent to approximately EUR 3.8 million a year.

In addition, we continued the Energy Reduction 5% (EnRe5) program which especially targets Kemira's own coagulant and polymer manufacturing sites. This program aims to achieve a 5% reduction in energy consumption over the next two to three years, using 2022 as the base year. During 2024, 18 projects were identified which resulted in a saving of around 16,000 MWh of energy. This corresponds to a total reduction of 8.5%, which significantly surpasses the initial target of a 5% reduction in energy consumption. To date, the database includes over 68 projects, collectively achieving energy consumption savings of approximately 55,000 MWh.

## Climate change adaptation and mitigation

Kemira launched a new Growth Accelerator unit in 2022, to accelerate the commercialization of new and unique biomaterials into our current markets and to create business opportunities in new, adjacent markets for both new and existing Kemira products. Kemira has set a target of growing the revenue from Kemira's renewable solutions to more than EUR 500 million by 2030 and achieved EUR 240 million in 2024.

Kemira has initiated several research and development projects to increase the share of renewable and recycled materials used as raw materials for own products. These projects aim to reduce the product carbon footprint of these products and to meet other sustainability market demand drivers. One of Kemira's approaches to replacing fossil raw materials is the mass balance concept, which enables quick expansion towards biobased and sustainable

products and having a significantly lower carbon footprint compared to traditional products. This means that renewable raw materials can be utilized in existing production infrastructures, creating identical product quality and performance in making conventional products. The mass balanced products have an ISCC PLUS\* certification for the mass-balance accreditation. Kemira produces certified biomass balance products in ISCC-accredited manufacturing sites in multiple locations and supplies them to customers globally in water-intensive industries. In 2022, Kemira was the first company in the world to sell ISCC PLUS-certified polyacrylamide (PAM) polymers.

To further reduce reliance on fossil fuels like oil and gas derivatives, Kemira focuses on obtaining renewable energy attributes and energy efficiency programs for the most emissions- and electricity-intensive manufacturing sites. Other projects, such as replacing fossil fuels with biofuels and modifying processes that use hydrogen generated from carbon-containing feedstocks to either directly purchase green hydrogen or to generate green hydrogen onsite are also due to be considered. Kemira's strategy to reduce reliance on fossil fuels is a combination of renewable power purchase agreements (RE-PPAs), equity ownership of low-emission portfolio power companies through Teollisuuden Voima and Pohjolan Voima and the further electrification of our processes. For instance, Kemira's Mojave site in California has recently agreed to install a 927-kW photovoltaic solar system to power the site.

Kemira has two Power Purchase Agreements in wind power and an ownership in Pohjolan Voima Oyj and Teollisuuden Voima Oyj (Financial statements note 3.5 Other Shares) producing CO<sub>2</sub>-free electricity with nuclear and hydro power plants in Finland. CO<sub>2</sub>-emissions and energy efficiency matters are considered in capital investments, thus also affecting non-current assets (Financial note 3.3 Property, Plant and Equipment) as well as future cash flow forecasts used in goodwill impairment testing (Financial note 3.1 Goodwill).

To clarify its focus on sustainability and strategic priorities, Kemira divested its Oil & Gas related portfolio in early 2024. The divestment reduced Kemira's emissions in all three Scopes which was then taken into account in the SBTi target setting. Changes in Kemira's business structures since 2018 have corresponded to a decrease of 35,770 tonnes of CO<sub>2</sub>eq, resulting from business transactions and the closure of certain sites.

General disclosures

**Environmental information**

Social information

Governance information

While the specific costs associated with energy and climate change mitigation and adaptation efforts have not yet been fully quantified and allocated, Kemira is proactively implementing measures to manage these risks. Climate change-related natural catastrophes, such as more frequent and severe weather events present significant risks to manufacturing infrastructure, supply chains and downstream business activities.

To address these risks, Kemira is considering several response measures, including:

- Reinforcing critical infrastructure,
- Inspecting and maintaining heating and cooling systems in manufacturing areas and warehouses,
- Establishing comprehensive preparedness plans to ensure safety, including increasing site cooling systems capacities and increasing automation to reduce manual labor,
- Installing backup generators to ensure the functionality of critical equipment during power outages,
- Increasing inventory levels before severe weather seasons,
- Preparing contingency plans with alternative raw material suppliers and implementing a dual supplier policy,
- Constructing dykes and embankments at sites susceptible to flooding.

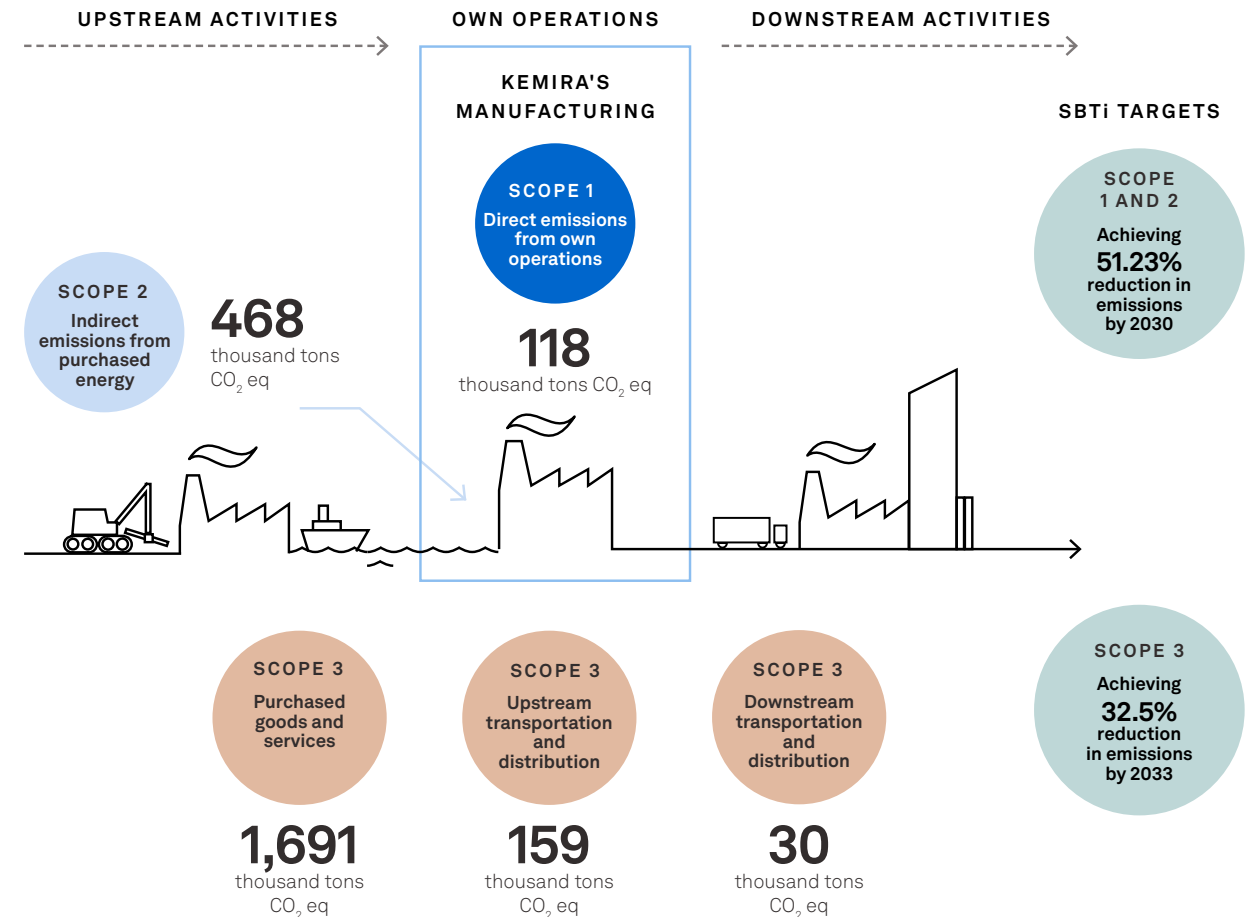

Kemira has allocated resources from different functions to execute the actions related to climate change and other Environmental topics, for example EHSQ, Sourcing, R&D, Product lines and Manufacturing.

## TARGETS RELATED TO CLIMATE CHANGE

Kemira's emission reduction targets for Scope 1 and 2 as well as Scope 3 were formally validated by SBTi in 2024, continuing progress towards the targets established as part of the updated climate commitment in 2022. The SBTi targets were developed in close collaboration with internal stakeholders such as EHSQ, sourcing, logistics and R&D.

Kemira's targets drive efforts in climate change mitigation, adaptation, energy efficiency and the increasing use of renewable energy. Kemira is making significant progress toward its climate targets, having successfully reduced Scope 1 and 2 emissions by 34.5% and Scope 3 emissions by 19.5% compared to the base year 2018.

## GREENHOUSE GAS EMISSIONS

SBTi targets include significant Scope 3 GHG emissions, but Oil & Gas business-related emissions are excluded.

Kemira's Scope 1 and 2 near-term target follows an absolute contraction approach, requiring an annual reduction rate of 4.27% from the 2018 base year to the 2030 target year. In total, it equals to 51.23% reduction in Scope 1 and 2 emissions, from 894,303 tonnes of CO<sub>2</sub>eq in 2018 to 436,000 tonnes of CO<sub>2</sub>eq by 2030. Scope 3 GHG emission reductions require a reduction rate of 2.71% annually from the 2021 base year to the 2033 target year meaning a total of a 32.50% reduction in Scope 3 emissions from 2,337,475 tonnes of CO<sub>2</sub>eq in 2021 to 1,577,000 tonnes of CO<sub>2</sub>eq by 2033. 2021 was selected as the base year for Scope 3 due to significant improvements in Scope 3 emissions data accuracy since 2018. Progress towards Kemira's climate goals is reported quarterly to Kemira's Management Board.

GHG emissions reduction	Target year	Absolute value <sup>1)</sup>		Reduction %	
		2024	Target	2024	Target
Scope 1 and 2 (market-based)	2030	585.9	436.0	34.48	51.23
Scope 3	2033	1880.7	1,577.0	19.54	32.50

1) Absolute value kt CO<sub>2</sub>eq

**Scope 1 and 2 emissions reduction**

Kemira's long-term ambition is to achieve carbon neutrality by 2045 for combined Scope 1 and 2 market-based GHG emissions and we will continuously evaluate this goal in response to global legislation, own strategy and advances in climate science.

As Scope 2 emissions constitute 80% of Kemira's total Scope 1 and 2 emissions, with emissions from purchased electricity accounting for approximately 79%, Kemira will focus on significant investments in renewable energy, energy efficiency and new technologies to meet our Scope 1 and 2 targets. In addition, decarbonization efforts within Scope 2 generally do not require significant CapEx, leading to a much lower cost per ton of CO<sub>2</sub>eq abated compared to Scope 1.

**Scope 3 emissions reduction**

Kemira's SBTi Scope 3 target covers emissions from Scope 3.1, 3.4 and 3.9. Scope 3.1 covers raw materials and traded goods, and Scope 3.4 and 3.9 cover intercompany transportation and outbound transportation from Kemira to customers, covering about 75% of our total Scope 3 emissions.

In 2024, Kemira conducted an internal Scope 3.1 GHG abatement analysis to identify key abatement levers. Over 50% of Kemira's Scope 3.1 abatement relies on renewable electricity and heat for our Tier 1 and Tier 2 suppliers. Key levers also consider renewable feedstocks, including renewable naphtha, ammonia and methanol and the implementation of CCS (Carbon Capture) technologies for emission intensive processes like steam methane reformers and stream crackers. These elements are included in the Kemira Supplier Engagement Program. The Scope 3.1 abatement strategy includes a combination of levers influenced by both Kemira and our suppliers. These levers include e.g. innovating sustainable material sourcing, enhancing resource circularity and improving efficiencies throughout our supply chain.

For Scope 3.4 and 3.9 emissions, we are using a bottom-up approach that consists of conducting regional logistics assessments to develop strategies for reducing CO<sub>2</sub>eq emissions in Kemira transport, combined with a top-down approach that utilizes supply chain management to assess regulatory impacts and service provider commitments for reducing emissions in line with SBTi. The levers for Scope 3.4 and 3.9 include e.g. reducing freight transportation demand as well as optimizing freight transport modes, enhancing fleet energy efficiency with the cooperation of logistics service providers and lowering the carbon intensity of energy used and market and regulations-driven emissions reduction.

Progress towards the targets for all the Scopes are reported annually in our Sustainability Statement and through CDP Climate Change and EcoVadis submissions. Kemira will reevaluate these targets in 2029 at the latest and will set reduction targets for every five years after 2030, as needed. Our near-term targets have been validated by the SBTi, ensuring they are science-based and that our Scope 1 and 2 targets are aligned with limiting global warming to 1.5°C. Kemira rates amongst the top performers in the chemical industry in CDP and EcoVadis. The new CDP Climate Change 2024 ratings were published in February 2025. Kemira retained its B score.

Future considerations, including sales volumes, mergers and acquisitions, the cost of carbon and other market drivers will be factored into our emissions reduction roadmaps. While regulatory impacts and carbon costs are subject to uncertainty, we remain committed to achieving our targets through proactive and strategic measures.

## METRICS RELATED TO CLIMATE CHANGE

### ENERGY CONSUMPTION

Kemira operates in high climate impact sectors. Sectors are defined based on the EU's Nomenclature of Economic Activities (NACE) classifications of economic activities, where Kemira operations are allocated under other organic and inorganic chemical manufacturing.

Energy consumption and mix	2024	2023
(1) Fuel consumption from coal and coal products, MWh	N/A	N/A
(2) Fuel consumption from crude oil and petroleum products, MWh	19,714	24,076
(3) Fuel consumption from natural gas, MWh	375,310	465,513
(4) Fuel consumption from other fossil sources, MWh	237,737	270,635
(5) Consumption of purchased or acquired electricity, heat, steam, and cooling from fossil sources, MWh	604,137	629,042
<b>(6) Total fossil energy consumption, MWh</b>	<b>1,236,898</b>	<b>1,389,266</b>
Share of fossil sources in total energy consumption, %	31.3	34.0
<b>(7) Other non-renewable energy consumption, MWh</b>	<b>334,966</b>	<b>325,698</b>
Share of other non-renewable sources in total energy consumption, %	8.5	8.0
<b>(8) Consumption from nuclear sources, MWh</b>	<b>1,283,988</b>	<b>1,439,084</b>
Share of consumption from nuclear sources in total energy consumption, %	32.5	35.3
(9) Fuel consumption from renewable sources, MWh	—	—
(10) Consumption of purchased or acquired electricity, heat, steam, and cooling from renewable sources, MWh	1,100,753	927,881
(11) Consumption of self-generated non-fuel renewable energy, MWh	144	78
<b>(12) Total renewable energy consumption, MWh</b>	<b>1,100,898</b>	<b>927,959</b>
Share of renewable sources in total energy consumption, %	27.8	22.7
<b>Total energy consumption, MWh (sum of lines 6, 7, 8 and 12)</b>	<b>3,956,749</b>	<b>4,082,007</b>
(13) Energy delivered off-site, MWh	401,845	401,281
<b>Total energy consumption, energy delivered off-site deducted, MWh</b>	<b>3,554,905</b>	<b>3,680,726</b>

1) Total of Scope 1 and 2 is based on Kemira's SBTi target which can be found in more detail under Targets related to Climate change

2) Sum of 2018 Scope 1 and 2 baseline values and 2021 Scope 3 baseline value. Kemira does not have a separate reduction target for total GHG emission

The most significant Scope 3 categories for Kemira are 3.1, 3.4, and 3.9, which account for the majority of the Scope 3 GHG emissions. These categories are also included in Kemira's near-term SBTi target as disclosed in the table above. Categories 3.13, 3.14, and 3.15 are irrelevant for Kemira and 3.10 and 3.11 are pending for quality improvement and are therefore excluded from the GHG inventory. The remaining categories 3.3, 3.5, 3.6, 3.7, and 3.8 are relevant, but not significant due their relative small contribution to overall emissions. All relevant, significant and not significant, Scope 3 emission categories are included to the Gross GHG emissions.

In 2024, the share of contractual instruments for Scope 2 GHG emissions was 5.6%. Kemira didn't have any contractual instruments for Scope 2 GHG emissions in 2023.

Gross GHG emissions, tCO <sub>2</sub> eq	2024	2023
Scope 1 <sup>1)</sup>	118,364	136,676
Scope 2 (location-based) <sup>1)</sup>	626,533	643,300
Scope 2 (market-based) <sup>1)</sup>	467,561	487,520
Scope 3 <sup>2)</sup>	2,528,713	2,876,625
<b>Total GHG emissions (location-based)</b>	<b>3,273,610</b>	<b>3,656,600</b>
<b>Total GHG emissions (market-based)</b>	<b>3,114,638</b>	<b>3,500,821</b>

1) Excludes Oil & Gas business-related emissions in 2024

2) Includes all relevant Scope 3 emission categories (3.1, 3.3-3.9). Includes Oil & Gas business-related emissions

General disclosures

**Environmental information**

Social information

Governance information

## **GREENHOUSE GAS REMOVALS AND OFFSETTING**

Kemira does not currently reduce its GHG emissions with carbon credits. However, Kemira is planning to look into available options in the future.

## **INTERNAL CARBON PRICING**

In 2019, Kemira introduced an internal carbon pricing sensitivity analysis for investments exceeding EUR 500,000, to mitigate environmental risks and promote responsible investments. This was updated in June 2022 to align with EU emission trading scheme (ETS) prices, setting our internal carbon price at EUR 100/tonnes of CO<sub>2</sub>eq. The scope of the internal carbon price is global for Kemira's entire value chain, and, as of January 2024, it applies to all CapEx investments exceeding EUR 100,000. In 2024, internal carbon pricing applied to projects with significant climate impacts totaled in EUR 217,000.

In the short term, Kemira's internal carbon pricing has increased awareness within the company regarding the current and future costs of carbon, fostering a strong corporate sustainability culture and enhancing its external reputation. This initiative has also led to tangible carbon reductions and decreased energy consumption costs. In the long term, our internal carbon price has strengthened internal controls related to risk management, enabling us to respond more effectively to changing risk assessments. Additionally, it has helped with identifying and capitalizing on opportunities within our operations and supply chain, aligning the entire company and portfolio towards a common sustainability goal. This alignment has further bolstered our corporate reputation externally.

## **The Group's reporting principles**

### **Energy consumption and mix**

Energy consumption at Kemira is assessed based on natural gas used on-site for generating steam or heat, electricity purchased or supplied by third parties and steam procured or provided by third parties. The total energy consumption is determined by aggregating the total fossil energy consumption, energy consumption from nuclear sources, and total renewable energy consumption. Self-generated non-fuel renewable energy is now included under the total renewable energy consumption, which was not previously considered. Energy intensity data is expressed in kilowatt-hours per metric ton of production. To determine energy intensity, Kemira divides total energy consumption by annual production volume, noting that energy intensity is significantly influenced by the production mix.

Energy is categorized as fossil, other non-renewable, renewable or nuclear energy according to established reporting standards and frameworks. Data is collected through meter readings and invoices, with a current emphasis on invoice data.

The Energy Efficiency Index measures specific energy consumption, which is the ratio of energy use to production volumes, normalized to a 2012 base year for Kemira's 15 largest manufacturing sites. These sites account for approximately 90% of our total energy consumption and about 80% of our Scope 1 and 2 emissions. The index for the 2012 base year was set at 100.0, with values below this signifying improvements.

The 2024 energy consumption figures exclude the sites that were part of the Oil & Gas business operations in January 2024, prior to the divestment transaction closing in February 2024. These sites are estimated to account for 0.3% of the total energy consumption in 2024.

### **Gross Scopes 1, 2 and 3 and total GHG emissions**

Kemira prepares its corporate GHG emissions inventory following the WRI/WBCSD GHG Protocol for all Scopes. GHG emissions are calculated as CO<sub>2</sub>eq, encompassing CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs, SF<sub>6</sub> and NF<sub>3</sub>. Kemira's GHG inventory complies with the GHG Protocol: A Corporate Accounting and Reporting Standard and the Corporate Value Chain (Scope 3) Accounting and Reporting Standard.

Energy, fuel and production data are collected quarterly to calculate Scope 1 and 2 emissions. Scope 3 emissions are calculated and reported annually, with results included in Sustainability Statement, EcoVadis and CDP reports. In 2024, 27.6% (10.8%) of Scope 3 emissions were calculated using primary data.

The gross Scope 1 and Scope 2 GHG emissions exclude the sites that were part of the Oil & Gas business operations in January 2024, prior to the divestment transaction closing in February 2024. These sites are estimated to account for less than 0.5% of the total gross Scope 1 + Scope 2 (market-based) GHG emissions in 2024. The gross Scope 3 GHG emissions for 2024 include emissions from Kemira's Oil & Gas business for January 2024, prior to the divestment transaction closing in February 2024.

Categories 3.3, 3.5, 3.6, 3.7, and 3.8 are included in the calculation of the gross Scope 3 GHG emissions. Categories 3.10 and 3.11 have been estimated but excluded from the inventory due

to pending quality improvements. Categories 3.13, 3.14, and 3.15 are irrelevant for Kemira and are therefore excluded from the GHG inventory.

Kemira's GHG emissions are primarily CO<sub>2</sub>, with negligible emissions of methane (CH<sub>4</sub>) and nitrous oxide (N<sub>2</sub>O). GHG emissions are estimated using CO<sub>2</sub>eq factors, as CO<sub>2</sub> comprises over 99% of CO<sub>2</sub>eq emissions.

**Direct GHG emissions (Scope 1):** Scope 1 emissions are based on the GHG Protocol and cover all direct GHG emissions from Kemira's operations. These include emissions from:

- Combustion of fuels: natural gas and fuel oil used by boilers, dryers and internal combustion engines to generate on-site steam, heat and electricity.
  - Hydrogen combustion: at sodium chlorate sites, by-product hydrogen gas is used in boilers, offsetting fossil fuel use. Emissions from hydrogen combustion are reported as zero.
  - Sulfur combustion: At the site in Helsingborg, Sweden, a sulfur boiler generates steam and electricity with reported emissions of zero.
- Mobile sources: fuels such as propane, diesel and gasoline used by forklifts and company vehicles.
- Processing of raw materials: physical or chemical processing of carbon-containing feedstock, such as natural gas, sodium carbonate, calcium carbonate and coke.
- Transportation fleet: our North American coagulants business unit operates a fleet to deliver raw materials to our manufacturing sites as well as products to our customers.

**Indirect GHG emissions (Scope 2):** Scope 2 emissions, based on the GHG Protocol, include indirect GHG emissions from the off-site generation of purchased electricity, heat and steam consumed by Kemira. These are acquired from local municipal authorities, private companies or separate manufacturing facilities within the same industrial complex. Scope 2 emissions from renewable and nuclear energy sources are reported as zero.

These emissions are calculated using:

- A location-based method: emissions are calculated based on average country-specific emission factors.
- A market-based method: emissions are calculated considering Power purchase agreements, guarantees of origin, supplier-specific contracts and emission rates currently purchased by Kemira.

Location- and market-based emissions are calculated for each site. Supplier-provided emissions data (tonnes CO<sub>2</sub>eq/MWh) is used where available. If not, fuel mix data from the supplier is used to calculate a market-based emissions factor. The sources for these emissions factors include Power Purchase Agreements, the IEA, the UK Government's Department for Environment, Food and Rural Affairs (DEFRA), Motiva Ltd and energy utility companies.

Kemira's Scope 1 and Scope 2 target covers our own manufacturing sites, excluding North American transportation fleet emissions, which represent approximately 3% of our total Scope 1 and Scope 2 emissions.

**Indirect GHG emissions (Scope 3):** Kemira estimates Scope 3 emissions for all relevant Kemira categories established in the GHG Protocol Corporate Value Chain (Scope 3) Accounting and Reporting Standard, and the supporting document, Guidance for Accounting & Reporting Corporate GHG Emissions in the Chemical Sector Value Chain. Emissions are estimated using guidance documents from the Chemical Sector, DEFRA, IEA, Ecoinvent, CEFIC and ECTA.

The Scope 3 inventory is split into 15 subcategories (category 1 to category 15):

- Category 1: Purchased goods and services.
  - Emission calculations in this category use supplier-specific, hybrid, spend-based average data and average product methods.
- Category 2: Capital goods.
  - Emission calculations are based on supplier-specific, hybrid, spend-based average data and average product and average spend-based methods.
- Category 3: Fuel-and-energy-related activities (not included in Scope 1 or Scope 2).
  - Using average data and spend-based methods.
- Category 4: Upstream transportation and distribution.
  - Using average data, fuel-based and spend-based methods.
- Category 5: Waste generated in operations.
  - Waste data are collected in seven categories and Kemira follows local environmental permits for waste reporting and definitions of recovery and disposal methods. Waste diverted from disposal is assumed to have zero emissions.

- Category 6: Business travel.
  - Calculations are based on the distance-based method using Thrust Carbon methodology. Emissions are reported using historical annual data and we periodically re-evaluate and update the estimates as necessary.
- Category 7: Employee commuting.
  - Calculations are based on fuel-based and distance-based methods, using DEFRA 2012 guidelines and DECC GHG conversion. Emissions are reported using historical annual data and we periodically re-evaluate and update the estimates as necessary.
- Category 8: Upstream leased assets.
  - Employees in leased asset. Calculations are based on the average data method, using WBCSD guidance, considering energy use of 300 kWh/m<sup>2</sup> and emissions of 0.7 kg CO<sub>2</sub>eq/kWh.
- Category 9: Downstream transportation.
  - Calculations are based on the GLEC methodology, considering the transportation mode, adjusted weight, average distance and emission intensity factor, along with average data, fuel-based, and distance-based methods.
- Category 10: Processing of sold products.
  - Emissions are not calculated due to data tracking limitations.
- Category 11: Use of sold products.
  - Using the average data method, emissions are estimated to be zero or close to zero. The hydrogen provided to third-parties is zero-carbon fuel.
- Category 12: End-of-life treatment of sold products.
  - Calculations are based on the average data method. If a product does not have a new lifecycle it is classified as waste. Emission factors are sourced from Ecoinvent for wastewater treatment, incineration and landfill.
- Category 15: Investments.
  - No information on emissions from investments is available. All investments are reported as Scope 1 and 2 emissions linked to physical assets.

The most significant Scope 3 categories for Kemira are 3.1, 3.4, and 3.9, which account for the majority of the Scope 3 GHG emissions. These categories are also included in Kemira's near-term SBTi target. To ensure alignment with Kemira's internal data systems, category 3.2 is calculated as part of category 3.1. While categories 3.3, 3.5, 3.6, 3.7, and 3.8 have been calculated, they are not reported as significant emission categories due to their relatively small contribution to overall emissions. Categories 3.10 and 3.11 have been estimated but excluded from the inventory due to pending quality improvements. Categories 3.13, 3.14, and 3.15 are irrelevant for Kemira and are therefore excluded from the GHG inventory. Oil & Gas business related emission are not included to Kemira's SBTi target.

**GHG intensity (Scope 1, 2 and 3):**

This is calculated as total Scope 1, Scope 2 (market- and location-based) and Scope 3 emissions, divided by our net revenue.

Kemira has no significant operational expenditures (OpEx) or capital expenditures (CapEx) as defined in ESRS to report related to implementations of the actions.

Measurements of the metrics excluding SBTi targets are not validated by an external body other than Ernst & Young Oy, through assurance.

MATERIAL IMPACTS, RISKS AND OPPORTUNITIES RELATED TO POLLUTION

Material impacts, risks and opportunities	Position in the value chain	Key management areas of processes and policies

Identification and management of impacts, risks and opportunities

Kemira has identified material impacts, risks and opportunities for pollution in the materiality assessment which is described under *Material impacts, risks and opportunities* in the *General disclosure* section. Significant environmental aspects and impacts including the pollution of air, water and soil in own operations are identified based on collected environmental data, using the Global Environmental Impacts and Aspects Assessment template. Pollution through potential spills and accidental chemical releases as well as actual and potential environmental liabilities related to soil or to closed activities have been identified as material aspects. Impacts to air, water and soil through air emissions and water effluent from sites relating to normal operations in accordance with environmental permit conditions have not been identified as a material aspect.

For substituting and minimizing the use of substances of concern and phasing out substances of very high concern Kemira has implemented a priority substance management process, which covers Kemira's entire value chain. According to the process Kemira monitors the whole

product portfolio, including raw materials and process chemicals, for substances of concern (SoC) and substances of very high concern (SVHC) and prepares management plans for these substances aimed at defining the specific risks associated with each substance, whilst also examining options for managing these risks and formulating action plans for preferred solutions.

POLICIES RELATED TO POLLUTION

Kemira is committed to operating safely and responsibly and to reducing its impacts through its whole value chain whilst also continuously improving its sustainability performance, following strategy, the Code of Conduct and other policies and the Integrated Management System as set out in the *E1 Climate change* section. All aspects of Health and Safety, the minimization of harmful releases into air, water and soil, the reduction of resource consumption and waste generation and the consistent quality of our products are a fundamental prerequisite for conducting our business in the chemical industry in a sustainable manner. Sustainability Policy is aligned with the Kemira Code of Conduct and other

internal Kemira policies including the Product Stewardship Policy, Recruitment Policy and the Sourcing and Procurement Policy. The key contents, scope, process, accountability and availability of the policies is described in the *G1 Business Conduct* section, under *Corporate Culture and Business Conduct Policies*.

Kemira's sustainability approach is also contributing to the risk management process, as defined in the Kemira Group Risk Management Policy. The Sourcing and Procurement Policy defines how sustainability must be taken into account in sourcing, procurement and supplier management activities as well as requirements for the upstream value chain. Kemira's Product Stewardship Policy ensures that Kemira products can be safely used by Kemira's stakeholders, are safe for the environment and that chemical risks and their impacts are incorporated into decision making relating to Kemira's operations, strategy implementation and long-term strategic development.

Kemira conducts chemical hazard assessments which are prepared for raw materials, products, intermediates and process aids and are incorporated in the change management process. Product stewardship provides a platform that helps Kemira to identify concerns related to specific chemicals and their hazards at an early stage and to manage those risks along the value chain. Kemira is committed to minimizing the use of substances of concern or substances of very high concern when selecting raw materials for product development and replacing raw materials in product recipes.

## **ACTIONS RELATED TO POLLUTION**

### **Actions to prevent environmental incidents in our own operations**

Kemira's certified Integrated Management System includes the development of global and site-level standards and procedures to comply with permit and regulatory requirements associated with pollution. Kemira continuously improves performance to mitigate negative impacts related to pollution to air, water and soil, including preventative actions. For the minimum requirements to prevent environmental incidents Kemira has spill prevention, process safety and maintenance standards. All incidents resulting in impacts to air, water and soil and the related documentation, on incident investigations for example, are reported in Kemira's incident reporting system. Kemira's management systems are audited both internally and externally to evaluate conformance against the latest ISO 9001, ISO 14001 and ISO 45001 standards.

Kemira's sites develop local procedures to implement actions required by their permits and the underlying regulations. All Kemira sites have environmental permits and pollution control technology compliant with Best Available Techniques (BAT) requirements. This includes scrubbers and baghouses for air emissions, and onsite wastewater treatment or connection to third-party wastewater treatment, to comply with applicable environmental requirements. In addition to management system audits, Kemira has a third-party legal compliance audit program. Third-party EHS legal compliance audits are conducted annually, by a sampling of sites. Verification of EHS legal compliance is also provided annually by all sites, as part of the environmental performance data collection and reporting processes. Kemira's robust management system requires all sites and auditors to report spills as well as non-compliance cases to Kemira's EHSQ function, using the internal incident reporting tool.

For emergency situations, Kemira applies precautionary principles and has different mechanisms, processes and procedures to identify, prevent and mitigate negative impacts. Mitigation measures include emergency response and crisis management processes which are first response activities, in case of incidents and accidents but also in case of business interruptions. To ensure continuous improvements, we conduct a root cause analysis to identify both improvements and corrective actions. Kemira has an Emergency Planning and Preparedness standard which establishes sufficient emergency response capability to protect personnel, equipment and the community during emergencies. The primary focus of the emergency response is the safe containment of an incident and the minimization of effects upon employees and the surrounding community.

In addition to the Integrated Management System and EHS legal compliance auditing programs and several site level technical improvements, Kemira launched a Global Safety Training Program for all shop floor supervisors in 2024. The objective of the program is to improve safety culture at the manufacturing sites on shop floor level, from EHSQ Managers to supervisors and from supervisors to employees. Shift supervisors at all manufacturing sites were trained by the end of 2024. The program focuses on all safety topics including spill prevention and environmental compliance. In 2024 Kemira also continued the Transportation Safety enhancement program in EMEA that aims to improve the daily safety of Kemira's transportation operations through enhanced processes and aligned roles and responsibilities across the organization. The focus is on shipment document compliance, delivery operations and manufacturing site operations, including spill prevention concerning the carriers. The program was started in 2023 and it is expected to continue until mid 2025.

General disclosures

**Environmental information**

Social information

Governance information

**Actions to manage environmental liabilities**

Kemira has environmental liabilities related to former activities. Financial environmental provisions for the costs of remediation work have been made in cases where it has been possible to measure Kemira's liability for soil, groundwater or sediment contamination and any post-treatment or post-monitoring obligations. More detailed information on these environmental provisions can be found in the *Financial statement note 4.6 Provisions*. Kemira has a process to manage and to review the status of environmental liabilities. The status of environmental projects and associated provisions is reviewed quarterly by the EHSQ and Finance & Accounting functions. Kemira has ongoing remediation projects to manage environmental liabilities. In cases of mergers and acquisitions, the assessment of potential liabilities is always carried out in accordance with Kemira's Environmental Due Diligence process.

The 2024 key actions to manage environmental liabilities included continuation of a soil and landfill remediation project at a former manufacturing site located in Vaasa, Finland. Soil remediation started in 2022. The site was historically contaminated with heavy metals and pesticides. In addition to the project in Vaasa, Kemira also conducted some smaller scale remediation projects in 2024.

**Actions to manage pollution to air, water and soil in upstream value chain**

For actions to manage pollution to air, water and soil in the upstream value chain see actions disclosed in the *E5 Resource Use and Circular Economy* section.

**Actions to manage substances of concern and very high concern**

Kemira actively monitors its portfolio, including raw materials, intermediates and process chemicals for substances of concern and substances of very high concern, in accordance with our priority substance management process. We prepare management plans for these priority substances aimed at defining the specific risks associated with each substance, examining options for managing these specific risks and formulating action plans for preferred options. These options to mitigate risks may include, for example, substitution, phase-out or limiting exposure. Possible mitigation actions could include delivering more sustainable products by replacing substances of concern when selecting raw materials for product development with Research and Development.

**TARGETS RELATED TO POLLUTION**

Kemira has several indicators that are followed internally for impacts, risks and opportunities related to pollution, however these are not defined as in ESRS. Kemira continues to evaluate and develop these indicators.

As part of the Integrated Management System Kemira has internal indicators and associated targets for its own operations related to pollution that include:

- Number of environmental incidents (ENV);
- Number of loss of primary containment incidents (LOPC);
- Number of reportable process safety incidents (RPSI); and
- Number of environmental operating conditions (EOC)

Kemira is also further developing its Life Cycle Assessment (LCA) capabilities. Kemira intends to use this data for developing future pollution related indicators and metrics for its direct and upstream value chain operations.

**METRICS RELATED TO POLLUTION**

**POLLUTION TO AIR, WATER AND SOIL**

Kemira collects data centrally and annually on emissions of air pollutants and effluent from all manufacturing sites. The total emissions and amounts of each pollutant emitted to air and water were in accordance with ESRS E2-4. In 2024, Kemira had no significant emissions to soil.

Emissions to air, water and land by pollutant, tonnes	2024	2023
Ammonia (to air)	8.7	12.5
Non-methane volatile organic compounds (to air) <sup>1)</sup>	581.9	569.4

1) Cutting oil emission at a site located in the UK where cutting oil is classified as volatile organic compound.

The emissions to air from own operations are estimated based on direct measurements, published emission factors, mass balance or engineering calculations. Measurement methodologies, for example if based on continuous measurements or campaigns, vary between manufacturing sites. The environmental permits of all sites where emissions exceed the thresholds stated in the European Pollutant Release and Transfer Register (E-PRTR) regulation Annex II allow emission of these substances. The emissions reported in the tables represent the consolidated amount from all Kemira sites where the threshold is exceeded.

## SUBSTANCES OF CONCERN AND SUBSTANCES OF VERY HIGH CONCERN

Volumes of substances of concern and substances of very high concern in raw materials, intermediates or Kemira products are calculated based on the material compositions interlinked to sourcing, production and sales data maintained in Kemira's system. Kemira does not centrally collect data on amounts of substances of concern and very high concern that leave facilities as emissions. Collection of the data is planned within the next two years.

Substances of very high concern, tonnes	2024
<b>Total amount of SVHC that are generated or used during production or that are procured</b>	13,945
Carcinogenic (Article 57a)	11,411
Persistent, Bioaccumulative and Toxic (Article 57d)	8
Toxic for reproduction (Article 57c)	1,959
Endocrine disrupting properties (Article 57(f) - environment)	21
Respiratory sensitising properties (Article 57(f) - human health)	546
<b>Total amount of SVHC that leave facilities as emission, as products, or as part of products or services</b>	3,526
<b>Total amount of SVHC that leave facilities as part of products</b>	739
Carcinogenic (Article 57a)	666
Endocrine disrupting properties (Article 57(f) - environment)	2
Respiratory sensitising properties (Article 57(f) - human health)	71
<b>Total amount of SVHC that leave facilities as products</b>	2,787
Carcinogenic (Article 57a)	2,469
Respiratory sensitising properties (Article 57(f) - human health)	318

Substances of concern, tonnes	2024
<b>Total amount of substances of concern that are generated or used during production or that are procured</b>	214,052
Carcinogenicity categories 1 and 2	61,100
Germ cell mutagenicity categories 1 and 2	2,201
Reproductive toxicity categories 1 and 2	5,524
Respiratory sensitisation category 1	11,713
Skin sensitisation category 1	125,715
Chronic hazards to the aquatic environment categories 1 to 4	1,788
Specific target organ toxicity, repeated exposure categories 1 and 2	5,200
Specific target organ toxicity, single exposure categories 1 and 2	811
<b>Total amount of substances of concern that leave facilities as emission, as products, or as part of products or services</b>	74,814
<b>Total amount of substances of concern that leave facilities as part of products</b>	20,730
Carcinogenicity categories 1 and 2	304
Reproductive toxicity categories 1 and 2	971
Skin sensitisation category 1	13,890
Chronic hazards to the aquatic environment categories 1 to 4	671
Specific target organ toxicity, repeated exposure categories 1 and 2	4,859
Specific target organ toxicity, single exposure categories 1 and 2	35
<b>Total amount of substances of concern that leave facilities as products</b>	54,084
Germ cell mutagenicity categories 1 and 2	1,155
Reproductive toxicity categories 1 and 2	1,655
Skin sensitisation category 1	50,911
Specific target organ toxicity, repeated exposure categories 1 and 2	363

## 📖 The Group's reporting principles

Kemira's data on pollution to air, water and soil in own operations is limited to manufacturing sites with environmental permits. The following Kemira operations are excluded:

- Kemira's R&D centers located in Atlanta, USA; Shanghai, China; and Espoo, Finland.
  - Sites that have limited emissions to air, water and soil and no environmental permits and are not required to report emissions of air, water and soil to authorities.
- Kemira's corporate headquarters in Helsinki, Finland and other corporate offices, sales offices and warehouses, if different from the sites' locations.
  - Sites that have limited emissions to air, water and soil and no environmental permits and are not required to report emissions of air, water and soil to authorities.
- Tolling and contract manufacturers:
  - In 2024, less than 1% of Kemira sales volumes (in terms of quantity) came from tolling plants and contract manufacturers. On this basis pollution to air, water and soil at toll and contract manufacturers is assumed to be limited and not material.

Kemira has no significant operational expenditures (OpEx) or capital expenditures (CapEx) as defined in ESRS to report related to implementations of the actions.

Measurements of the metrics are not validated by an external body other than Ernst & Young Oy through assurance.

ANNUAL REVIEW

CORPORATE GOVERNANCE

FINANCIAL STATEMENTS

SUSTAINABILITY STATEMENT

General disclosures

Environmental information

Social information

Governance information

Identification and assessment of material impacts, risks and opportunities

Kemira has identified material impacts, risks and opportunities for water and marine resources in the materiality assessment which is described in the *General disclosure* section under *Material impacts, risks and opportunities*.

POLICIES RELATED TO WATER AND MARINE RESOURCES

Kemira has Sustainability Policy Commitments that include commitments to protect the environment, reduce emissions and improve energy efficiency, with approaches to reduce greenhouse gas emissions, releases to air, water and soil and to reduce water and material use and waste generation through circular economy principles, to improve energy efficiency and energy sourcing management and to protect biodiversity through sustainable raw material

General disclosures

**Environmental information**

Social information

Governance information

sourcing programs, reducing waste and pollution in our operations. The commitment to reduce water use includes material water consumption in areas of water risk and water stress areas.

The Sustainability Policy Commitment states that Kemira will provide products for wastewater treatment that enable the availability of clean and high-quality water to people and nature, including water bodies. How the policy is implemented with regard to managing the use and sourcing of water and marine resources and the prevention and abatement of water pollution resulting from our own activities is described under the *Actions related to water and marine resources* and *E2 Pollution* section.

With our Sustainability Policy and Nature Stewardship program, Kemira strives to minimize water consumption and minimize the negative impact of water discharge activities on the quality of receiving water bodies in our whole value chain. Product and service design considerations and practices related to addressing water-related issues are covered in Kemira's Product Stewardship Policy and program. The key contents, scope, process, accountability and availability of the policies is described in the *G1 Business Conduct* section under *Corporate Culture and Business Conduct Policies* and in the Stewardship program under the *E2 Pollution* section.

## **ACTIONS RELATED TO WATER AND MARINE RESOURCES**

### **Actions to manage water consumption in own operations**

Through both Kemira's environmental management system that applies ISO 14001 standards and Kemira's Nature Stewardship program we are continuously evaluating opportunities and implementing actions to decrease water withdrawal, consumption, discharge and associated impacts through water recycling and reuse as well as through process redesign and optimization. As an additional measure to reduce freshwater consumption, Kemira will increase the use of recycled water from third-party water suppliers at two sites located in high water stress areas.

In addition to continuous improvement at sites, Kemira has an action plan for improvement of water accounting, implementation of water impact assessments to be included in existing internal processes, development of the water related risk assessment process and general improvement of water stewardship in the company driven by the CDP Water Security framework.

The project to improve water accounting across the company was continued through a systematic review of water balances of all manufacturing sites and centralized reporting in 2024. Based on the review, critical water flow measurements were installed to reduce uncertainties in water data, including in water consumption data. The water balances of all manufacturing sites were reviewed and critical measurements were installed by the end of 2024. Through improved data quality and existing internal processes, Kemira centrally collects information on identified opportunities and projects across the company, including those for reduction of water consumption. This information will be used in 2025 to update the water stewardship action plan for the upcoming years, with a special focus on high water stress areas and other areas at water risk.

Water withdrawal, consumption and discharge are considered in Kemira's internal decision making processes. In cases of mergers and acquisitions the impact of changes in water consumption and potential locations in water stress areas are included in Kemira's Environmental Due Diligence (EDD) assessment. The assessment also includes Phase I Environmental Site Assessment (ESA) procedures. Water consumption is also assessed as part of CapEx investments exceeding EUR 100,000 and the investment impact on water consumption is recorded in Kemira's reporting tool. Kemira's New Product Development process ensures that successful projects demonstrate both sustainability and business benefits, with every decision to proceed to product launch. This process includes the assessment of water consumption.

Kemira's water consumption has decreased significantly in its own operations in recent years, mostly due to decrease in the proportion of water-intensive products. Total water consumption has decreased by 26% (21%) and water consumption intensity by 33% (38%) since 2019.

### **Actions to manage water in the upstream and downstream value chain**

Kemira has announced in 2024 a new operating model that has three business units to better meet our profitable growth ambitions. The planned changes aim to increase customer centricity, strategic focus, speed of delivery and to accelerate growth and shareholder value creation. Water Solutions will become Kemira's largest business unit, reflecting Kemira's ambitions to significantly grow the water business both organically and inorganically. Further information on Kemira's new operating model can be found in the Board of Directors' review.

Water is one of the most important and material topics for Kemira. Kemira's strategic business ambition is to double water solutions revenue, which is well aligned with the identified

General disclosures

**Environmental information**

Social information

Governance information

material topics. Our chemistry solutions are an essential part of low carbon footprint water treatment processes and address ever growing global water challenges to secure water supply and wastewater treatment. Kemira's primary business focus and revenue growth ambition correlates strongly with these positive environmental impacts, since Kemira solutions help customers to treat, re-use and recycle water. Key examples include removing impurities like carbon, phosphorous and nitrogen from water and improving water efficiencies by using less water. Kemira strategy on water solutions is driven by challenges like climate change, population growth, resource scarcity and the increasing need for water resilience.

Kemira offers chemistry solutions and digital services for applications like wastewater, industrial raw- and process water, drinking water, sludge, biogas and water disinfection. This is accomplished with a product and solution portfolio of polymers, coagulants, process chemicals and smart digital technologies. The chemistry binds and extracts impurities from water and wastewater and is used as a dewatering agent for semi-finished or finished products. Digital solutions are used to improve process efficiencies. Kemira's strategic focus on water intensive industries means that both new organic and inorganic growth opportunities are under continuous development. The Kemira solutions are applied to three main customer groups:

- Cities' and municipalities' water treatment plants, where Kemira helps ensure citizens have access to clean, safe and affordable drinking water
- Municipalities and industries where Kemira ensures that discharged wastewater meets environmental permit standards, reducing the load on local water bodies
- Water-intensive industries where Kemira helps use less water and make processes more efficient, by enabling the use of recycled water rather than freshwater in processes, for example.

More information on Kemira's Industry & Water segment can be found in the Financial Statements (*Board of Directors' review Financial performance 2024 and Segments, in note 2.1. Segment information*).

In 2023 and 2024, Kemira invested in expanding coagulant capacity in Norway, Spain and the UK which helped to manage our risks and opportunities concerning tightening regulations. These coagulant investments support Kemira's ambition to grow in water and sustainable solutions and offer added security of supply to Kemira's customers. They also enable Kemira to better support customers' sustainability efforts. The demand for coagulants in Europe is expected to grow following tightening regulation.

Kemira is active in research and development and has several water solution focus areas such as, for example, renewable water treatment growth, phosphorus recovery from wastewater and micropollutants removal from drinking water. In 2024, Kemira also completed the acquisition to purchase Norit's UK reactivation business, this is a first step for Kemira in entering the activated carbon market for micropollutants removal.

Kemira is expanding its water treatment offering to include activated carbon in water treatment applications. This is the most common technology to remove odor and taste in drinking water, as well as micropollutants including per- and polyfluoroalkyl substances (PFAS). Micropollutant removal is expected to become more relevant for water and wastewater treatment plants due to growing concern for both consumer health and environmental safety. In addition, the requirements for PFA removal from drinking water and micropollutant removal from wastewater have been introduced in recent EU regulation updates.

Phosphorus in wastewater is a major environmental challenge and causes overfertilization of surface waters if it is not removed properly. At the same time, phosphorus is a key nutrient needed for agriculture and many different industrial applications. The European Commission has repeatedly listed phosphorus as one of the critical raw materials on the EU Critical Raw Materials List.

Kemira uses the EcoVadis platform to assess the sustainability of its suppliers. Water management is included as one criterion on the EcoVadis platform. On EcoVadis, suppliers are requested to meet certain standards and to continuously improve in the area of the environment including in environmental compliance, waste, air emissions, climate change, water and groundwater, wastewater, energy, nuisance (noise and odor), land use, biodiversity, soil and hazardous chemicals.

Kemira's sustainability and circular economy strategies also set the direction for identifying e.g. circular economy related opportunities in the water business, with relevant value chain partners. Kemira does not currently have policy commitments for its upstream water impacts, this is planned for development during the upcoming years.

The management of water and marine resources in our own operations and value chain are included in Kemira's Nature Stewardship program which covers the management of water, waste and biodiversity. The Nature Stewardship program reports to the Sustainability Steering Team. This ensures that specific cross-functional resources, roles and responsibilities have

General disclosures

**Environmental information**

Social information

Governance information

been assigned which in turn help to ensure the effective implementation and reporting of strategies related to water and marine resources.

In 2021, Kemira joined the CEO Water Mandate and, in 2023, the UN Global Compact Forward Faster initiative, to solidify our commitment to world class water management.

## **TARGETS RELATED TO WATER AND MARINE RESOURCES**

Kemira has set internal water targets to improve water management in our own operations.

Kemira also has water related indicators that are followed internally for impacts, risks and opportunities related to water. These indicators are not currently defined as in the ESRS.

Kemira will continue the evaluation of these internal indicators in the following years. Kemira is also preparing to set water related targets for downstream operations since Kemira's ambition is to double its water business.

### **Carbon Disclosure Project (CDP) Water Security management target**

In 2021, Kemira introduced a voluntary water target to improve our water management to Leadership level, based on the Carbon Disclosure (CDP) Project Water Security scoring methodology, by the end of 2025 (score A/A-). Kemira has retained a B score (Management level) since the first full reporting questionnaire in 2021, even as the scoring criteria have been tightened in the intervening years. The scoring reports show that Kemira's overall water management has improved every year and that Kemira ranks above European, Global and Chemical industry averages (all score C). The objective of the CDP Management target is to improve our water stewardship at all levels and throughout the whole value chain and to show our customers and other stakeholders that our water management is at a high level. Management of impacts, risks and opportunities related to areas at water risk, responsible management of marine resources and reduction of water consumption are included in the CDP Water Security scoring criteria.

Kemira has 58 manufacturing sites, varying from small and simple sites with limited water consumption to complex sites with several production lines. 12 sites are located in water stress areas. The materiality of water and marine resources related impacts, risks and opportunities therefore vary from site to site. Manufacturing sites set their own site specific water targets based on the results of site level materiality assessments, in accordance with Kemira's management system. Not all sites have water and marine resources related targets as not all sites have identified water and marine related impacts as material. For example, at Kemira's coagulant sites water consumption is typically low and at many coagulant sites most or all process wastewater is recycled back to the process. Typically, site level targets include a reduction in water consumption and/or an improvement in wastewater discharge quality. Kemira is currently evaluating global level water target options to reflect this variance and is planning to set a new water target for its own operations.

Kemira's water targets are overseen by the Sustainability Steering Team. Specific roles and responsibilities have been assigned to ensure effective implementation and reporting of our water strategies.

Governance information

## METRICS RELATED TO WATER AND MARINE RESOURCES

### WATER SOLUTIONS

Kemira's goal is to expand in water solutions. Kemira uses sustainability-driven key figures to indicate expansion in business, in addition to revenue and other financial metrics. Water treatment solutions and cooperation are an important part of Kemira's business and one metric to help evaluate this is *Water treated with the help of Kemira chemistry*. This metric is calculated annually, based on the sales of coagulant chemistry, and it gives an estimate of how Kemira's solutions positively impact the treating of water. In 2024, it was estimated that Kemira helped to treat 21 billion cubic meters of water, which can be compared to the water consumption of approximately 370 million Europeans and North Americans, based on regional water consumption data. Only coagulants revenue has been used to calculate the financial opportunity and the water handprint.

### WATER CONSUMPTION

Water consumption and intensity	2024	2023
Total water consumption, m <sup>3</sup>	4,843,124.0	5,194,856.0
Water consumption in areas at water risk, m <sup>3</sup> <sup>1)</sup>	599,507.0	584,531.0
Water recycled and reused, m <sup>3</sup>	982,132.0	1,014,784.0
Water intensity ratio <sup>2)</sup>	1,642.8	1,535.3

1) Includes high-water stress areas

2) Water consumption m<sup>3</sup> per million EUR net revenue

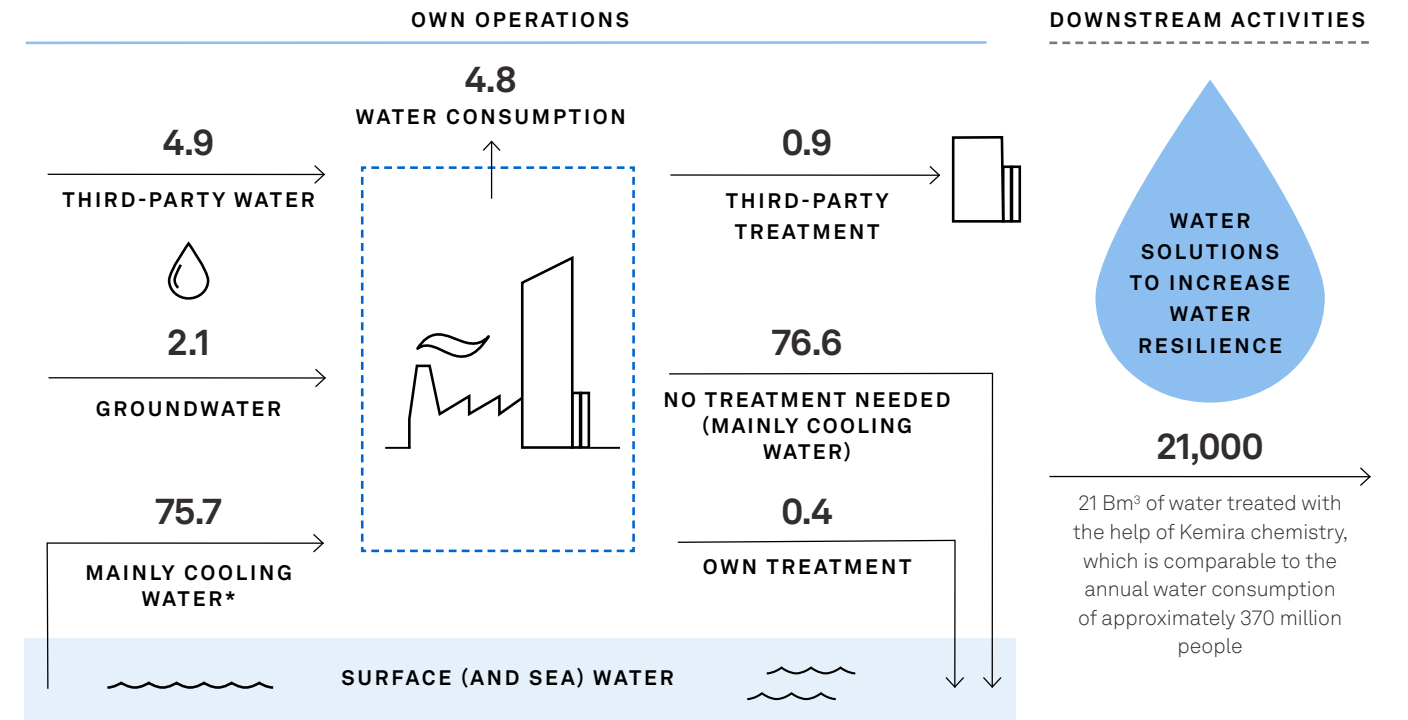

Water (recycled and reused) is defined as water and wastewater (treated or untreated) that has been used more than once before being discharged from the undertaking's or shared facility's boundary, so that water demand is reduced. This may be in the same process (recycled) or in a different process within the same facility (own or shared with other

undertakings) or in another of the undertaking's facilities (reused). The calculation for recycled and reused water is often estimated due to the challenges in measuring all streams directed to recycling and therefore the data contains uncertainty. Most recycled water is steam condensate. The calculation for the volume of steam condensate is normally based on steam flow measurements which limits uncertainty.

Water consumption is defined as the amount of water drawn into the boundaries of Kemira's manufacturing sites and not discharged back to the water environment or to a third party

over the course of the reporting period. Water consumption is calculated as total water withdrawals minus total water discharges. To ensure calculated water consumption data (total water withdrawals minus total water discharges) quality and that sites report full water balances in Kemira's sustainability reporting system, all sites are required to report water consumption separately, using the following breakdown: evaporated cooling water, water to products, water to waste, other evaporation and leakage/storage/calculation and calibration error/production losses.

### DIAGRAM OF WATERFLOWS

\* 99% cooling water and 1% process water

## 📄 The Group's reporting principles

Kemira's data for water and marine resources in our own operations is limited to manufacturing sites with environmental permits. The following Kemira operations are excluded:

- Kemira's R&D centers are located in Atlanta, USA; Shanghai, China; and Espoo, Finland. In 2024, the total water consumption in R&D centers remained on the same level as in 2023 or was significantly below 1% with no changes in operations, and it is not considered material.
- Kemira's corporate headquarters in Helsinki, Finland and other corporate offices, sales offices and warehouses, if different from the sites' locations. Total water consumption at these facilities is well below 1% of Kemira's total water consumption.
- In 2024, less than 1% of Kemira sales volumes (in terms of quantity) came from tolling plants and contract manufacturers. On this basis, water consumption at toll and contract manufacturers is expected to be limited and not material.
- Kemira has former production sites with environmental liabilities but with no active manufacturing operations and no significant water consumption. Kemira's activity at these sites includes environmental monitoring and remediation measures. Site operation at the closed sites is limited to remediation and environmental monitoring operations, with no significant water consumption.

Calculated water consumption is compared to the reported data. The expectation for the sites is that the difference between the calculated and reported water consumption will be no more than  $\pm 5\%$ . Water withdrawals and water discharges are measured at most sites. In case some stream in the water balances is not measured and if it cannot be calculated then it will be estimated as a final option.

Kemira has no significant operational expenditures (OpEx) or capital expenditures (CapEx) as defined in ESRS to report related to implementations of the actions.

The measurements of the metrics are not validated by an external body other than Ernst & Young Oy, through assurance.

**Identification and assessment of material impacts, risks and opportunities**

Kemira has identified material impacts, risks and opportunities for Biodiversity in the materiality assessment which is described in the *General disclosure* section under *Material impacts, risks and opportunities*. Kemira's approach to conducting consultations with affected communities on sustainability assessments is described in the *General disclosure* section under *Identification of material impacts, risks and opportunities for sustainability topics*.

Kemira has not identified actual or potential material impacts, risks or opportunities for biodiversity and ecosystems at its own manufacturing site locations. Material negative impacts with regard to land degradation, desertification or soil sealing, as well as operations that affect threatened species were not identified.

**Strategy and transition plan**

Kemira initiated an internal evaluation of its direct impacts, dependencies, risks and opportunities related to biodiversity and ecosystems at the end of 2021. The assessment of indirect impacts, dependencies, risks and opportunities began in 2023. As biodiversity and ecosystem related risks are expected to increase in the future, Kemira will, in the next two years, develop a strategic plan for the adaptation of its business model and strategy in response to the ongoing assessment findings. An initial, high-level resilience assessment

of Kemira's business model and strategy, relative to biodiversity and ecosystems-related physical and transition risks, was conducted in 2023. Systemic risks were not evaluated as part of the assessment. The scope of the resilience analysis included both Kemira's direct and indirect impacts, dependencies, risks and opportunities in the upstream and downstream value chain and in own operations. The results of the analysis provided an outlook on the likely role of biodiversity in Kemira's operations up to 10 years into the future and these were communicated to Kemira's Board of Directors and Management Board.

As sustainability is integrated into Kemira's strategy, Kemira's current business model is considered resilient to biodiversity and ecosystems-related risks. The key assumptions indicate that the most significant indirect impact in the future is likely to occur within the upstream value chain, associated with the utilization of both conventional and renewable raw materials. As customer awareness on the topic of biodiversity is rising, Kemira has a positive role in mitigating biodiversity impacts in its downstream operations through its focus on improved customer efficiency and water treatment solutions.

## **POLICIES RELATED TO BIODIVERSITY**

Through Kemira's Sustainability Policy and Nature Stewardship program, Kemira is committed to reducing negative impacts on biodiversity and ecosystems and to promoting the responsible and efficient use of natural resources in the whole value chain. Kemira's Sustainability Policy incorporates the evaluation of near-term and long-term risks and opportunities related to climate change mitigation and adaptation in own operations and the value chain. The Sustainability Policy does not cover all material dependencies nor material, physical and transition risks and opportunities related to biodiversity. Kemira's Sustainability Policy Commitment document includes a pledge to protect the environment through energy efficiency and energy sourcing management. This includes reducing greenhouse gas emissions and releases to air, water and soil. In addition, Kemira aims to minimize water and material use and waste generation by applying circular economy principles. To protect biodiversity, Kemira commits to sustainable raw material sourcing programs, reducing waste generation and pollution in its operations and to providing wastewater treatment solutions to customers.

Kemira's Sourcing and Procurement Policy defines how sustainability must be taken into account in sourcing, procurement and supplier management activities and requirements in the upstream value chain. Kemira's Product Stewardship Policy ensures that Kemira products can be safely used by Kemira's stakeholders and are safe for the environment. Kemira's policies do not fully cover traceability of products, components and raw materials with significant actual or potential impacts on biodiversity and ecosystems along the value chain. Kemira's approach is to ethically enhance positive impacts across its entire value chain, involving Kemira's people, business partners, the environment and surrounding communities. The Sustainability Policy does not address the social consequences of biodiversity and ecosystems-related impacts. The Sustainability Policy is aligned with the Kemira Code of Conduct and other internal Kemira policies e.g. the Nature Stewardship Policy, Product Stewardship Policy, Recruitment Policy and the Sourcing and Procurement Policy. The key contents, scope, process, accountability and availability of the policies is described in the *G1 Business Conduct* section under *Corporate Culture and Business Conduct Policies*. Kemira has not adopted separate biodiversity and ecosystem protection policies covering operational sites owned, leased or managed in or near a biodiversity sensitive area nor the following: policies related to sustainable land / agriculture practices, sustainable oceans / seas practices or policies to address deforestation.

Kemira initiated an assessment of actual and potential impacts to biodiversity and ecosystems in the upstream value chain for Tier 1 suppliers in 2023. The assessment was conducted to identify major, indirect nature impacts and dependencies in Kemira's Pulp & Paper, Polymers and Coagulants product lines. The work was carried out in accordance with the Step 1a&b guidelines of the Science Based Targets Network's (SBTN) Science-Based-Targets for nature, and both primary and secondary data sources were utilized. The results identified that the main, indirect biodiversity impacts in the upstream value chain are caused through terrestrial ecosystem use, water use, GHG emissions and pollution.

## **ACTIONS RELATED TO BIODIVERSITY**

Kemira has not used biodiversity offsets in its action plans and does not plan to do so in the upcoming years. Kemira has not incorporated local and indigenous knowledge and nature-based solutions into its biodiversity and ecosystems-related actions and does not plan to do so in the next two years. Kemira has not concluded that it is necessary to implement biodiversity loss mitigation measures.

## **TARGETS RELATED TO BIODIVERSITY**

Kemira has indicators that are followed internally for impacts, risks and opportunities related to Biodiversity and ecosystems. These targets are not defined as in ESRS. Kemira will continue the evaluation of these indicators in the following years.

## **IMPACTS METRICS RELATED TO BIODIVERSITY AND ECOSYSTEMS CHANGE**

Kemira has not yet established metrics related to material impacts, risks and opportunities in the upstream and downstream value chain related to biodiversity and ecosystems. Kemira is planning to establish such metrics in the upcoming years, based on an impacts, dependencies, risks and opportunities assessment. Kemira's Nature Stewardship program sets out the process for development of the policies and actions related to material biodiversity impacts, risks and opportunities. The program's ambition is to establish, at a minimum, internal quantitative indicators to track the progress of such policies and actions. The base period from which progress is measured will be determined once the quantitative indicators are established. Kemira is also further developing its Product Carbon Footprint (PCF) and Life Cycle Assessment (LCA) capabilities. More information can be found under *E2 Actions related to Pollution*.

General disclosures

**Environmental information**

Social information

Governance information

Kemira has not identified manufacturing sites located in or near biodiversity-sensitive areas that it is negatively affecting. Kemira uses the Integrated Biodiversity Assessment Tool (IBAT) and the WWF Risk Filter Suite (Water Risk Filter and Biodiversity Risk Filter) to monitor priority sites in its own operations that are in proximity to protected areas and key biodiversity areas. An assessment is conducted annually for existing sites and on a basis as required for site acquisitions. Kemira uses the number of sites in proximity to biodiversity areas as an indicator of possible changes in the classification of the land surrounding the manufacturing sites and to understand whether Kemira may have a negative impact on such areas. In 2024, Kemira had 10 sites located in and/or near protected areas and key biodiversity areas. Kemira's manufacturing sites (58) have environmental permits, are located on industrial land and utilize already existing infrastructure. Environmental impacts and risks, including biodiversity related impacts and risks, are initially assessed as part of the environmental permitting process of the sites and the Environmental Impacts Assessments (EIA) at the sites where EIA is required. Based on the environmental impact assessments conducted as part of the environmental permitting of the sites, Kemira's manufacturing sites do not negatively affect biodiversity-sensitive areas.

## The Group's reporting principles

Measurements of the metrics are not validated by an external body other than Ernst & Young Oy, through assurance.

## E5 Resource use and circular economy

**Identification and assessment of impacts, risks and opportunities**

Kemira identified material impacts, risks and opportunities for resource use and the circular economy in the materiality assessment which is described under *Material impacts, risks and opportunities* in the *General disclosure* section. The material impacts, risks and opportunities are summarized in the table on the previous page. Kemira is planning to consult a broader set of stakeholders over the upcoming years, to complement the materiality assessment with the views of e.g. affected communities.

**POLICIES RELATED TO RESOURCE USE AND CIRCULAR ECONOMY**

Kemira has a Sustainability Policy and a Sourcing and Procurement Policy which set the principles and guidelines on Kemira's resource use and the circular economy. In the Sustainability Policy, Kemira commits to reducing emissions and waste, improving resource efficiency, to enabling a circular economy, adopting circular business practices and having a positive impact across Kemira's value chain. The policy covers Kemira's global value chain activities in full. The key contents, the scope, process, accountability and availability of the policies is described in the *G1 Business Conduct* section, under *Corporate Culture and Business Conduct Policies*.

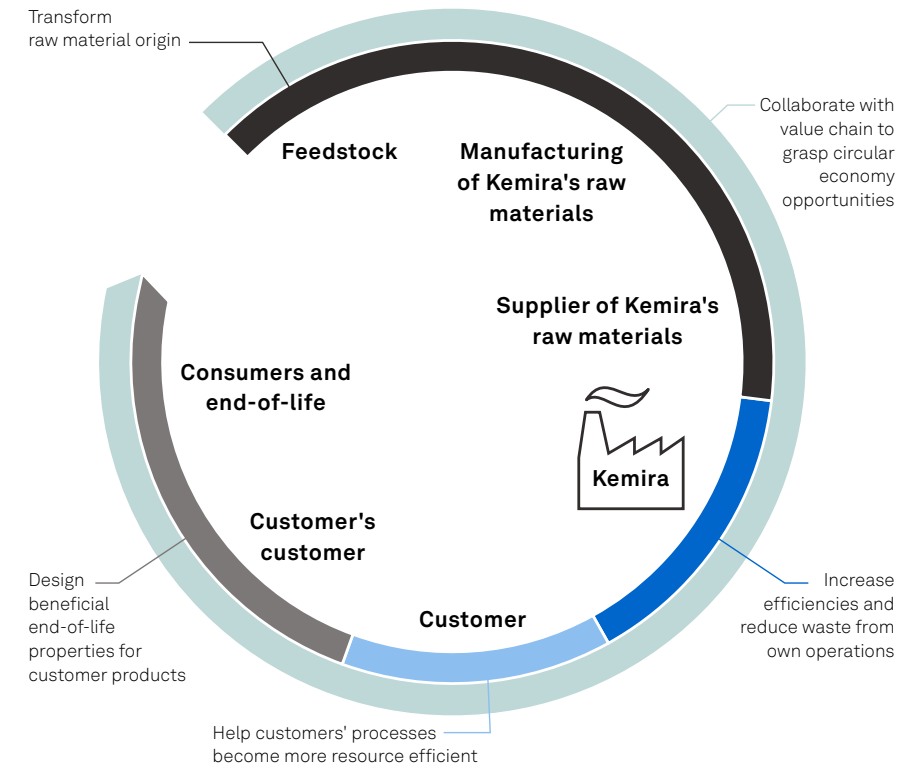

Kemira's Sourcing and Procurement Policy aligns activities with the company sustainability program and sets expectations for environmental performance. The policy particularly focuses on inflow-related impacts, risks and opportunities and it covers global activities that especially apply to the sourcing and purchasing of direct materials and corporate services, manufacturing sourcing, energy and logistics. The policy sets guidelines and key principles for sourcing activities and supplier selection, based on sustainability performance. The supplier management focus is on improving economic and sustainability performance, anticipating risks and initiating approaches with suppliers that are responsible and innovative. The policy covers Kemira's upstream sourcing and purchasing activities globally.

Kemira does not currently have a policy related to transitioning away from the use of virgin resources or the utilization of secondary resources. However, Kemira's circular economy approach is included in the corporate sustainability program. The circular economy approach is based on five circular economy principles that are aligned with Kemira's identified material resource use and circular economy related impacts, risks and opportunities:

1. Transform raw material origin
2. Increase efficiencies and reduce waste from own operations
3. Help customer processes become more resource efficient
4. Design beneficial end-of-life properties for customer products
5. Collaborate with value chain to grasp circular economy opportunities

Kemira is planning to introduce policies for the sourcing of renewable and secondary materials. This is still in development and statements on these topics are to be included in official documentation during the upcoming years.

**CIRCULAR ECONOMY PRINCIPLES**

General disclosures

**Environmental information**

Governance information

## ACTIONS RELATED TO RESOURCE USE AND CIRCULAR ECONOMY

### Renewable and recycled raw materials and products

The transition to renewable resources is a core element in Kemira's strategy. Replacing fossil raw materials with more sustainable alternatives is advancing in three different ways: a focus on expanding in existing renewable solutions in the market, on biomass-balanced solutions and on innovating new chemistries. This strategy is advanced through research and development activities, dedicated commercial acceleration resources and partnerships. Kemira dedicated 46% of research and development CapEx to renewable materials in 2024. Kemira also established a Growth Accelerator unit in 2023, to speed up the commercialization of renewable products and other strategic initiatives.

Kemira utilizes existing, well-known, biobased chemistries in the market but also offers mass balanced products to customers. This means that raw materials originating from renewable and circular feedstocks can be utilized in existing production infrastructures, creating identical product quality and performance to that of conventional products. Biomass-balance can also contribute to lower product carbon footprints, more information can be found in *E1 Actions related to Climate change*.

The focus on new chemistries requires innovating new chemical concepts and technologies for the applications that Kemira serves. This is advanced through strategic upstream partnerships with International Flavours and Fragrances (IFF) on the alfa glucan chemistry platform and with Danimer Scientific on the polyhydroxyalkanoate (PHA) platform, for example.

Alongside raw materials from renewable sources, a significant part of raw materials also come from recycled sources like industrial by-products, side-streams and waste. These originate mainly from smelters as well as from steel and metal manufacturing. Coagulants is one of the largest product lines in terms of volumes and up to 70-80% of the raw materials for these products come from recycled sources. In 2024, 49.2% of Kemira's purchased raw materials came from such sources. Kemira does not have a target for increasing the amount of recycled materials in use but it tracks the quantity of these on annual level.

Kemira uses the EcoVadis platform to assess and secure the sustainability of suppliers. Sustainable procurement and environmental performance, including waste management, are included as criteria on the EcoVadis platform. On EcoVadis, suppliers are required to

meet certain standards and to continuously improve in the areas of sustainable procurement and the environment, including environmental compliance, waste, air emissions, climate change, water and groundwater, wastewater, energy, nuisance (noise and odor), land use and biodiversity, soil and hazardous chemicals.

Kemira has several voluntary indicators related to the upstream value chain. These indicators can be considered as Kemira's internal targets that aim to prevent and mitigate the negative impacts and risks which are related to suppliers.

- Supplier spend coverage that is assessed by Ecovadis
- Number of non-compliant key suppliers with Ecovadis ratings improved over Kemira's minimum rating criteria
- Number of supplier quality audits
- Number of supplier Corporate Social Responsibility (CSR) audits

Targeted suppliers are defined annually based on segmentation and risk prioritization and indicators are monitored regularly. Indicators are managed by Kemira's Sourcing function and planned with the Sourcing management team and are approved as a part of annual function target setting. These indicators are not currently defined as in ESRS. Kemira will continue the evaluation of these indicators in the following years. Kemira has dedicated persons within the Sourcing function to take forward supplier-related resource use and circular economy actions.

### Improving customer processes and products

Kemira R&D supports Kemira's resource use and circular economy objectives with New Product Development (NPD) projects, Technical Customer Service (TCS) and Production Support (PS). Besides chemical products, Kemira also focuses on digital services that improve customer resource efficiency. Kemira dedicated 6% of research and development capex to digital solutions in 2024. Along with the development of renewable and customer resource improving products, Kemira also innovates products and solutions that improve customer product durability, recyclability and biodegradability.

### Waste reduction

Kemira is continuously evaluating opportunities to decrease waste and associated impacts, using the Integrated Management System. The Integrated Management System applies ISO 14001 standards to environmental topics and to the Nature Stewardship program. Kemira does not have its own active waste disposal, e.g., its own active landfills. Waste from

manufacturing sites is collected by third-party waste handling companies that have permits to receive and to manage waste. All waste is managed by third-party companies, in compliance with local regulations. This is ensured by the waste management service sourcing process.

Actions to reduce waste include improved recovery of raw material ore and the sourcing of higher quality raw-materials. Further, in coagulant production the focus is on cooperation with waste handling companies to find recovery options for filtrate wastes. Waste compositions have been studied in our R&D centers and by third-party waste handling companies to better understand waste characteristics and the potential for recovery and converting waste to by-products.

The assessment of waste impacts is included in Kemira's internal processes such as CapEx investment management, mergers and acquisitions and in the New Product Development (NPD) process. Kemira has dedicated experts in the EHSQ function for taking waste reduction related actions forward. This is conducted in close co-operation with Kemira's manufacturing.

**TARGETS RELATED TO RESOURCE USE AND CIRCULAR ECONOMY**

	Target	Target year	Base-line	Baseline year	2024	2023	Relation to inflows/outflows
Renewable solutions revenue, EUR million	500	2030	184	2020	240	226	Inflows (raw materials) outflows (product)
Products improving customer resource efficiency, %	>50	-	50	2017	58	59	Outflows (products)
Disposed production waste intensity reduction, kg/tonnes of production	-15%	2030	4.4	2019	4.2	4.1	Outflows (waste)

Kemira wants to ensure profitable growth by becoming the leading provider of sustainable chemical solutions for water-intensive industries. Kemira has set targets which are based on its strategy, the business model and on creating solutions for our customers. Kemira regularly reviews both customer expectation and their potential concerns. Our approach to customer engagement includes activities ranging from information sharing to active dialogue and collaboration on issues of mutual interest. The feedback and information gathered from these activities is integrated into Kemira's operational development and decision-making. This feedback is an important input for setting targets. Kemira's targets are set based on the best

possible available data. Primary data sources and scientific frameworks are applied where available and applicable (e.g. in the climate targets). The targets have been set and approved by Kemira's highest management, which also monitors progress on the targets.

**Renewable and recycled raw materials and products**

Kemira has set a target for renewable solutions revenue of EUR 500 million by the end of 2030. This is voluntary target is aligned with Kemira's business ambitions. The target is not directly related to the waste hierarchy, but is aligned with well-known circular economy principles targeting the substitution of virgin and fossil materials and replacing these with renewable alternatives. The target is one of the key performance indicators for Kemira's strategic initiatives. Kemira's definition of a "renewable solution" is that more than 50% of the organic carbon is derived from renewable sources, e.g. from plants, fermentation, recycled carbon, chemical recycling and CO<sub>2</sub> derived sources. The remaining part of the organic carbon derives from fossil sources. Kemira has been continuously growing its renewable solutions portfolio over the past years and is on track to reach the EUR 500 million target.

Renewable raw materials are sourced from a variety of plant based sources and established raw material value chains, some being from side streams of industrial processes. Kemira uses the ISCC PLUS certification system. This ensures that the cascading principle is followed and transparency and traceability can be determined.

**Improving customer processes and products**

To ensure that Kemira's product portfolio is aligned with its strategic sustainability ambitions, Kemira has a process for assessing the product portfolio performance in customers' processes. In 2024, 58% of Kemira's revenue was related to products that improve customer resource efficiency. The target is to ensure that at least 50% of Kemira revenue is generated through products that improve customers' resource efficiency, without a specific target year. This is a voluntary target set by Kemira's highest management. The target is calculated annually, by analyzing 34 different customer applications and rating these on a scale including high, medium, low or no impact. Having an impact means reducing raw material consumption, improving energy efficiency, reducing water consumption, improving production yield, eliminating greenhouse gases, reducing waste and/or extending customer asset life. Besides the above-measured products, Kemira has a strategic ambition to grow in digital services. These often inherently improve customer resource efficiency. This solution category has been included in the calculation during 2024.

The target to improve resource efficiency relates to the waste hierarchy aim of minimizing systematic leakage and negative externalities. It also helps customers reduce their use of virgin resource inflows. Kemira has been continuously improving on the target and has stayed well above the expected threshold of 50%. In the past reporting period, due to product portfolio changes, there has been some performance decline.

### Waste reduction

Kemira's target is to reduce disposed production waste intensity at manufacturing sites by 15% by the end of 2030. The target includes both hazardous and non-hazardous waste but waste that is recovered, e.g. by recycling, reuse and incineration with energy recovery is excluded. The target is expressed as an intensity, tons of waste per thousand tons of production. The baseline was 4.4 in 2019 and the target is 3.7 by the end of 2030. The intensity was 4.2 in 2024, which is less than the baseline 4.4. Kemira has been gradually reducing the amount of disposed production waste.

### METRICS RELATED TO RESOURCE USE

#### RESOURCE INFLOWS

Kemira has identified and assessed resource inflows as a material sub-topic in the materiality assessment. The material impacts, risks and opportunities are summarized at the beginning of the *Resource use and circular economy* section. Amongst the inflow categories, Kemira has focused on the most material topics, including mainly raw materials, covering over 52% of Kemira's total spend. The materiality of plants and equipment and water and packaging was assessed to be non-material, based on either spend or volume criteria.

#### RAW MATERIALS

Kemira's manufacturing processes depend on raw materials. These raw materials can be based on non-renewable (fossil, mineral), renewable or recycled sources and include the by-products, side-streams and waste of other industries. The raw materials are both organic and inorganic. Kemira further refines the raw materials into bulk and specialty chemicals that are sold as products to the main customer segments. The main product lines consist of large volume inorganic chemistries like bleaching and coagulants and organic chemistries like polymers and sizing. These product lines cover over 75% of Kemira's product portfolio. Besides the main product lines, new chemistries are entering the product portfolio through an increased focus on renewable solutions

In 2024, the overall total weight of products, raw materials and biological materials used was 2.6 (2.5) million tons. 2.6% (2.8%) of purchased raw materials originated from renewable sources (biological materials), accounting for 65,380 tons in weight (70,456). 1.3 million tons (1.1) or 49% (44%) of raw materials originated from recycled sources (secondary materials).

### RESOURCE OUTFLOWS

Kemira has identified and assessed resource outflows, including waste, as a material sub-topic in the materiality assessment. Packaging was identified as non-material in the materiality assessment. The material impacts, risks and opportunities are summarized at the beginning of the *Resource use and circular economy* section.

### Products and materials

Kemira's products can be categorized in two main ways:

1. Products and solutions that enable and improve the customer process. These solutions are usually only a small part of the customer process but they have a major impact on the process. Examples of these are pulping chemistries (e.g. bleaching), water treatment chemistries (e.g. coagulants and polymers), biogas yield improvement and digital services.
2. Products and solutions that enable and improve the customer end-product. These solutions become a part of the customer end product. Examples of these are strength chemistries that also create light weighting properties (e.g. polymers and sizing), coating chemistries (e.g. barriers) and chemistries enabling the use of circular economy aligned products like textile fibers with a renewable or a recycled origin.

Due to the nature of Kemira's products (industrial chemicals), durability or repairability is not seen as an applicable attribute. However, Kemira products do contribute strongly to customers' product durability which enables them to utilize recycled fibers in their production, for example.

Kemira is aiming to increase the percentage of recycled or side-product originated raw material base in the coming years. Kemira has major product lines where the content of recycled materials (secondary materials) can be 70-80% of the total volume of the product, e.g. coagulants. More than 90% of Kemira's products are delivered to customers as bulk transports, with no packaging. The rest are transported in Intermediate Bulk Containers (IBCs) that are made of plastic with metal frames. The recyclability of the containers depends on the transported chemicals. Kemira is not systematically collecting the data on the recycling rate of packaging to customers due to majority of transportations being in bulk.

General disclosures

Social information

Governance information

## WASTE

Kemira generated 72,483 tons of waste as a part of manufacturing processes in reporting year 2024. Waste data is centrally collected, by seven composition categories, including chemical waste, sludge, metallic waste, mineral waste from construction and demolition and other mineral waste, soils, wastewater and other waste. Kemira follows local environmental permits in waste reporting and recovery and disposal method definitions. The most significant waste categories at manufacturing sites include chemical waste and wastewater. Some wastewater streams are defined as waste in local environmental permits and are reported as waste to local environmental authorities. In 2024, Kemira continued decreasing trend to reduce waste volumes in its manufacturing operations - both hazardous and non-hazardous. Since 2019, Kemira's total waste in its manufacturing operations has decreased by 52% (hazardous 70% and non-hazardous 42%). The reduction in waste from manufacturing operations from previous year is primarily attributed to a process change at one site, which led to a decrease of 13,524 tons of non-hazardous waste. Additionally, the divestment of the Oil & Gas business contributed to an average annual reduction of 2,500 tons.

In addition to manufacturing-related waste from our manufacturing operations, waste is generated in liability site management and demolition related operations such as soil, groundwater and landfill remediation and building demolition. In 2024, liability site management and demolition related waste was generated for example at closed manufacturing sites in Vaasa, Finland through soil and landfill remediation and building demolition and at Pierre Benite, France through soil remediation. The decrease in waste from liability and demolition sites from previous year is mainly due to the remediation and building demolition project in Vaasa. In 2023, this project generated 104,033 tons of soil and demolition waste, whereas in 2024, it generated only 36,946 tons.

Hazardous and non-hazardous waste, tons	Manufacturing sites		Liability and demolition sites		Total	
	2024	2023	2024	2023	2024	2023
<b>Hazardous waste</b>	17,196.0	17,281.1	9,189.3	20,682.7	26,385.3	37,963.9

**The Group's reporting principles**

**Inflows**

Kemira calculates amounts of indirect and direct materials through direct data. Data is taken from centralized systems where Kemira also manages financial and volume data directly. A separate report is generated using spend and volume data, separated by categories.

Kemira calculates the amounts of renewable and recycled raw materials used in a two step measurement, the first step is estimating the amount of renewable content in the product, based on information from suppliers, and the second step is to combine the data with centralized system data.

- Recycled materials data is gathered from the suppliers and is reported for calculating the total recycled material share.
- Renewable materials data is reported and used as a basis when calculating the total renewable material share.

Biological material is wholly or partly derived from materials of biological origin where the source is either fossilized or not, used to manufacture products and services, but not for energy purposes.

Secondary material is based on side streams, by-products or wastes of other industries, e.g. materials from smelters and steel and metal manufacturing such as scrap iron, ferrous sulfate and spent pickling liquor bath.

**Outflows (products)**

Renewable solutions revenue and volumes of products are reported and consolidated in the centralized system. The revenues attributable to the Renewable solutions revenue calculation are recorded in the system where revenue from products which are classified as renewable, partly renewable and not renewable.

Products improving customer resource efficiency describes the share of revenue from products sold for use-phase resource efficiency. Each product line has been qualitatively scored and weighted, for 34 different customer applications.

Product end-of-life data is based on product sales information from the centralized system which is categorized based on product line and on product end-use. Calculations on product

volumes are made based on product end-uses. The total volume of product for each end-use category is calculated, with an estimate for the fraction of organic or inorganic content. After this the volumes are compared to publicly available end-of-life statistics for the main applications.

**Outflow (waste)**

Waste data is collected through consolidation systems from manufacturing sites. Kemira's waste target excludes non-production waste and disposed products, which are defined as follows:

- Non-production waste: expired or outdated raw materials, contaminated soil or debris from spills, construction and demolition waste including waste (reusable and non-reusable) associated with plant or site closures, biomass from gardening and pruning activities, laboratory/warehouse cleanouts and non-routine tank/railcar cleaning waste.
- Disposed products: Kemira's products that have been disposed of or recovered by a third-party disposal company.

62% of Kemira's non-recycled waste is waste that is incinerated with energy recovery. 51% of non-recycled waste is generated at one site where the waste fraction from one process is transported in a pipeline to an adjacent paper mill where the fraction is then incinerated with energy recovery. Kemira monitors an internal recovery rate that includes preparation for reuse, recycling, incineration with energy recovery and other recovery operations as waste recovery. The internally followed recovery rate in 2024 was 71%.

The 2024 waste figures exclude the sites that were part of the Oil & Gas business operations in January 2024, prior to the divestment transaction closing in February 2024. Waste generation at these sites in January 2024 is estimated to account for less than 0.3% of the total waste generated in 2024.

Kemira has no significant operational expenditures (OpEx) or capital expenditures (CapEx) as defined in ESRS to report related to implementations of the actions.

Measurements of the metrics are not validated by an external body other than Ernst & Young, through assurance.

Management of material impacts, risks and opportunities

Kemira has identified material impacts, risks and opportunities for its own workforce in the materiality assessment which is described in the *General Disclosure* section, under *Material impacts, risks and opportunities*. Following the materiality assessment, the identified negative material impacts and risks were taken into a more comprehensive assessment (Human Rights

Due diligence risk assessment) in which the high-risk factors related to Kemira's business model and strategy were considered. As an outcome of the more detailed risk assessment, Kemira has defined possible salient human rights impacts, risks and opportunities for its own workforce, as described in the table above.

General disclosures

Environmental information

**Social information**

Governance information

Own workforce in this context refers to both Kemira employees and non-employees. *Employees* are employed by Kemira and include both white-collar employees and operational employees who are working in operational roles at manufacturing sites. Non-employees (contingent workforce) are employed by a third-party partner or are self-employed but perform their work on behalf of Kemira.

In the risk assessment, certain groups in Kemira's own workforce were identified as potentially being negatively affected by the material impacts and risks with a greater likelihood than others. For health and safety topics this applies to employees handling chemicals in production, in Research & Development (R&D), in sales and in driver jobs. In these groups, temporary employees and pregnant women in particular could be at potential risk. For DEI topics, potential risks apply particularly to women and to certain minority groups (sexual orientation, age groups, ethnicity).

**Strategy and business model**

Kemira's material impacts, risks and opportunities related to Kemira's own workforce are part of Kemira's social sustainability agenda, which is aligned with Kemira's strategy and business model. Most of Kemira's impacts, risks and opportunities in this area are widespread (those apply to own workforce in general), with the exception of potential violations of privacy which refer to possible individual incidents. There are no material impacts for Kemira's own workforce arising from transition plans for reducing negative impacts on the environment and achieving ecological and climate neutral operations.

All the identified material positive and negative impacts, risks and opportunities for own workforce are connected to Kemira's strategy and business model. For Kemira, as a global chemical industry company, health and safety impacts and risks are directly originated from Kemira's business model and industry environment. Kemira's value "We care for people and the environment" is a guiding principle in Kemira's business and operations. Safety and well-being is the first core principle in Kemira's Code of Conduct which guides Kemira's operations.

Diversity, Equity and Inclusion (DEI) topics are central to Kemira's values and growth strategy as DEI is essential for attracting and retaining talent for growth and innovations. Employee well-being and safety are crucial for a high performing organization and Kemira's growth strategy is made possible by its culture. In addition to employee safety, data privacy and security is also essential. Ensuring consistent data privacy procedures and compliance

with applicable laws and regulations is important for Kemira which operates globally in the manufacturing industry.

**POLICIES RELATED TO OWN WORKFORCE**

Kemira has the following policies in place regarding the identified possible salient human rights impacts on own workforce. The key contents, the scope, process, accountability and availability of the policies is described in the *G1 Business Conduct* section under *Corporate Culture and Business Conduct Policies*.

Kemira's Code of Conduct sets the standard for the company's human rights approach. In the Code of Conduct, Kemira states that the company is committed to the principles of The Universal Declaration of Human Rights and to the core conventions of the International Labor Organization (ILO) and the United Nations' Global Compact. According to the Code of Conduct, Kemira is committed to providing safe and healthy working conditions at all Kemira locations and to respecting the diversity, talent and abilities of others. Kemira defines diversity as all the unique characteristics that make up each of us; personality, lifestyle, work experience, ethnicity, religion, gender, sexual orientation, age, national origin, ability and other characteristics. Kemira is committed to treating people with dignity, decency and respect and to respecting the fundamental human rights. Kemira also respects the privacy of personal data and processes personal data only for legitimate business purposes and in compliance with applicable laws. Everyone at Kemira who has access to personal data is responsible for handling such data with due care and for safeguarding it from unauthorized access and use.

With the Sustainability Policy, Kemira is committed to operating safely and responsibly, to reducing its impacts throughout its value chain and to continuously improving its sustainability performance following the Code of Conduct, Strategy and the Integrated Management System. The purpose of an effective Integrated Management System is to ensure that Kemira can meet its commitments and be compliant with the applicable sustainability requirements.

Kemira's Recruitment Policy applies to all internal and external recruitments. It states that Kemira is committed to recruiting fairly and responsibly, following the Code of Conduct principles and Kemira's strategy. In all recruitments, Kemira respects diversity, equal opportunity and treatment regardless of race, color, gender, sexual orientation, creed, political persuasion, age, social status, origin or any other status protected by legislation.

General disclosures

Environmental information

**Social information**

Governance information

The Group Privacy Policy complements the Code of Conduct by defining more detailed requirements on privacy and protection of personal data at Kemira. It covers the key principles of handling personal data, possible data breaches and the consequences of non-compliance.

The Remuneration Policy for governance bodies provides a framework for the remuneration of the governing bodies of Kemira as well as information for investors on the remuneration of Kemira's governing bodies. It describes the remuneration as required by the Finnish Limited Liability Companies Act and the Finnish Corporate Governance Code 2020, issued by the Securities Market Association. Kemira's key remuneration principles (pay-for-performance, competitive, market driven remuneration, effective communication of remuneration principles and programs and compliance with local laws and Kemira's internal remuneration approval principles) are applied to the President and CEO as well as to Kemira employees.

Kemira does not use any form of forced or child labor and has published a public statement on slavery and human trafficking. The Modern Slavery statement is publicly available on the Kemira website and has been approved by the Board of Directors. It summarizes Kemira's Codes and Policies related to human rights issues and the general approach on how those are managed and remediated. It also addresses trafficking in human beings as well as child and forced labor.

To further demonstrate the commitment to equal learning and development opportunities, Kemira will be publishing a global Employee Learning & Development Procedure and share it with all employees in Q1 2025. Kemira has a Diversity and Inclusion statement about its commitment and aspiration in this area, defining what DEI means and what Kemira's focus areas are. This statement is available for all employees and contingent workforce.

### **Processes for employee engagement**

#### **Continuous employee listening and feedback**

Kemira has adopted continuous listening and feedback methods, working with a leading provider of confidential online pulse surveys and using external benchmarks since 2019. Participation rates typically vary between 70–80%. Kemira ordinarily conducts engagement pulse surveys twice a year, to follow the Engagement Index and Inclusion Index. Kemira also measures employee perception and satisfaction in other areas such as safety, Ethics & Compliance (Integrity Index) and IT through pulse surveys. In addition, there are regular meetings with leaders of Employee Resource Groups (ERGs) such as KemPride and the

Women's Network to collect feedback. Employees are encouraged to report any kind of unsafe conditions via an internal reporting system or to raise concerns through formal and informal channels (more information on channels for raising concerns and follow-up in the section *Incidents, complaints and severe human rights impacts*).

### **Performance and Development Discussion process**

Kemira's global performance and development discussion (PDD) process facilitates meaningful conversations between employees and managers, emphasizing performance, development and commitment to the company. It is an ongoing process that aims to establish a shared understanding of what needs to be achieved and how to achieve it, covering target setting, competence development, career aspirations, continuous feedback and follow-up as well as overall performance evaluation. Potential assessment is additionally conducted for white-collar employees.

### **Works councils and co-operation with employee representatives**

Continuous collaboration with employee representatives and Works councils is important for employee listening and involvement. This is ensured by regular meeting procedures locally. The Kemira European Forum, which includes representatives from the biggest EU countries, also meets on an annual basis. This a further channel for dialogue.

### **Engaging with non-employees**

All non-employees (contingent workforce) have a nominated supervisor at Kemira whom they can contact on any topic. Contingent workers are also included in local communication and collaboration activities. Kemira's Ethics and Compliance hotline is available for contingent workforce (described in more detail in the section *Incidents, complaints and severe human rights impacts*), as are various communication channels and trainings.

### **Kemira Health and Safety standards and procedures**

Kemira has multiple Health & Safety standards and procedures which describe Health & Safety processes (e.g. risk assessments, process safety management, management of change, permits to work, incident reporting, incident investigation and communication). Kemira ensures that employees from all levels of the organization participate in these processes and also communicates the results of assessments to all relevant employees. Engagement in these activities is measured through global safety surveys and by the number of reported safety observations, for example.

General disclosures

Environmental information

**Social information**

Governance information

## **ACTIONS RELATED TO OWN WORKFORCE**

Kemira takes actions to mitigate, prevent or remediate material negative impacts and to advance positive impacts on its own workforce.

### **Health and Safety**

Kemira maintains an effective Health and Safety Management System to ensure that Kemira can meet its commitments and be compliant with the applicable requirements towards safety. This includes e.g.

- Systematic occupational risk assessments and chemical risk assessments
- Operational requirements for Process Safety Management practices at Kemira facilities
- Proper Management of Change procedure
- Engaging our own workforce in reporting safety observations and proposals for improvement
- Focusing on behavior based safety (BBS) and creating a positive safety culture
- Developing safety training and competence programs

Kemira is prepared for remediation in case of incidents.

- Kemira has standards for emergency preparedness and incident reporting
- All incidents are reported and preventive/corrective actions created as a part of incident investigation (root cause analysis)
- Incident analysis and learnings are shared globally in monthly reports

The effectiveness of actions and remediation are tracked by incident frequency, completed actions of incidents and number of leading safety indicators (number of hazardous conditions and behavior based safety observations).

### **Equal opportunities and treatment for all**

Kemira conducts global engagement surveys to measure employee perceptions on the Inclusion Index (more information in the section *Targets related to Own Workforce*), as well as the Engagement Index and the Integrity Index. Kemira's employee engagement has been consistently strong over the years, and 2024 was another year showing continued strong employee engagement. In May 2024, the Kemira engagement score was 80, being 7 points above the global Manufacturing benchmark (73).

## **Awareness on Diversity, Equity and Inclusion (DEI) and Human Rights**

Kemira has had a DEI program in place since 2023 and work has progressed as planned in 2024. To build awareness on DEI and Human Rights topics, Kemira offers DEI awareness training. During 2023-2024 87% of white collar employees have completed DEI eLearning and 92% of people managers globally have attended DEI training. In addition, in 2024 local HR together with management, facilitated DEI workshops at 21 manufacturing sites in local languages. There is also an Inclusive Leaders Program (virtual and face-to-face workshops), for designated sites and teams, attended by 132 employees in 2024. Kemira's global training offering includes both regular and compulsory training on the Code of Conduct, covering a harassment-free environment, as well as Human Rights and Business eLearning for all new, white collar hires.

Kemira has Employee Resource Groups (ERGs), such as KemPride & the Women's Network, which have been in place since 2022. The effectiveness of these groups is followed in regular meetings with ERG leaders and Executive DEI champions, by collecting feedback from the ERGs and by external benchmarking.

### **Recruitment, learning and remuneration**

A recruitment handbook and trainings are available for people managers, to ensure a successful recruitment process with awareness and avoidance of biases, active listening and open and targeted recruitment questions. This is measured through a global onboarding survey for new hires, for example, which is used for collecting feedback about experiences on the recruitment and onboarding process. Kemira takes actions on the survey results when needed.

Kemira has committed to openly posting all positions, with the exception of Management Board and organizational restructuring. In 2024, Kemira piloted internal Diverse Recruitment Panels in management level recruitments, to promote gender balanced candidate pools, to increase gender diversity and to reduce biases in recruitment.

Kemira offers possibilities to explore projects of interest outside of one's usual role, to develop skills and competencies and to build networks cross-functionally through short-term or part-time work gigs that are openly posted for internal application process. In addition, company-wide global events like the Learn & Grow Month are open to all employees, irrespective of job grade and location.

General disclosures

Environmental information

**Social information**

Governance information

Kemira has inbuilt structures in place that drive fair and objective pay decisions globally. Together with market data and salary data information, these structures enable Kemira to evaluate, analyze and implement equitable remuneration. Transparency and guidance around pay related principles and practices support pay-related decision-making.

**Potential violations of privacy in high-risk countries**

Kemira takes actions to prevent, mitigate and remediate the negative impacts of potential violations of privacy by increasing awareness of data privacy, by having Employee Privacy Notices available for all employees and by conducting risk and gap assessments for action taking. Kemira has a confidential channel available for reporting potential data privacy breaches and reacts promptly to all reported incidents.

**Resources**

Several functions at Kemira are responsible for taking actions related to the material impacts, risks and opportunities for Kemira's own workforce.

- The Human Resources (HR) function, led by EVP, HR is responsible for global HR processes and procedures in areas such as talent development, remuneration and the employment life-cycle.
- The Environment, Health, Safety and Quality (EHSQ) function, led by VP, EHSQ is responsible for occupational Health & Safety development for our own workforce, in collaboration with HR.
- The Ethics and Compliance function, led by the Director, Ethics and Compliance, is part of Legal and is responsible for overseeing the global grievance mechanism which covers the hotline channel and for managing the process of handling internal reports in the Compliance Committee.
- The Legal function, led by Group General Counsel, is responsible for the global policies and procedures for data privacy, with the support by HR.
- Corporate Sustainability, led by Director, Corporate Sustainability, is a Group-level function which coordinates the cross-functional work for social sustainability topics, in collaboration with HR, EHSQ and Legal.

**TARGETS RELATED TO OWN WORKFORCE**

Kemira has identified people and safety as its social sustainability focus areas. Ensuring workplace safety is a key priority in all of Kemira's operations. Kemira's safety target Total Recordable Injury Frequency (TRIF) was originally set in 2019 when it was proposed to the Management Board by the EHSQ function, based on safety performance of previous years and the industrial benchmark. At the time, in 2019, TRIF (baseline value) was 2.1 and the target was set to reach level of 1.5 by end of 2025, and 1.1 by end of 2030. The Management Board approved the target, and it is being reported on monthly basis by the EHSQ function. The target is reviewed annually based on safety performance in the previous year, and for 2024 the target was 1.9. Due to several minor hand and finger injuries in 2024, the TRIF was 3.2 which resulted in Kemira re-evaluating the target and adjusting it from 1.5 to 2.2 by end of 2025, and from 1.1 to 1.5 by end of 2030. To achieve this ambitious target Kemira will continue to focus on safety awareness via training, behavior-based safety, contractor management and a hierarchy of controls.

In people focus area, Kemira's target is to reach the top 10% cross-industry norm for Diversity, Equity & Inclusion (DEI) by the end of 2025, in comparison to an external benchmark. The target was defined based on an employee survey in 2020 for all employees and Kemira chose the key gaps as an ambitious sustainability target for 2025. Inclusion Index items (Authenticity, Belonging, Growth and Inclusive Leaders) were selected as target metrics and the target was approved by the Management Board. Progress towards this target is followed through global employee surveys which are typically conducted twice a year. In 2024, the employee survey was conducted in May and the Inclusion Index score was 77, being 3 points away from the latest top 10% cross-industry norm (80). Kemira has identified Growth and Inclusive Leaders as key focus areas on which actions are consistently being taken (more information is available in the section *Actions related to own workforce*).

The TRIF target applies to all in Kemira's own workforce and the Inclusion Index target applies to all Kemira employees in all operations. The TRIF target was adjusted in 2024 as described above, whereas the Inclusion Index target has not changed during the reporting period.

## METRICS RELATED TO OWN WORKFORCE

### EMPLOYEES

At the end of 2024, Kemira employed 4,698 people (4,915). The number of employees (headcount) decreased by 217 compared to the previous year, mainly due to the divestment of the Oil & Gas business in 2024 which also impacts the turnover rate. Most employees work with permanent and full-time employment contracts. A temporary (fixed-term) employment contract is a type of employment contract used mainly in EMEA and it is atypical for the Americas and APAC. At the end of 2024, there were 76 (76) employees with temporary contracts in total.

Total number of employees by gender	2024	2023

More information on the financial performance of Kemira's segments and regions (ESRS2 SMB-1, 40 (b, c) and the number of personnel by geographical area (ESRS2 SMB-1, 40 (a) i-iii) can be found in the Financial Statements (*Board of directors' review Financial performance 2024 and Segments, in note 2.1. Segment information and 2.2 Other operating income and expenses*).

### NON-EMPLOYEES

The contingent workforce describes non-employees who are employed by a third-party partner or are self-employed but perform their work on behalf of Kemira. Typically, the contingent workforce provides temporary resourcing with specific skills and competences, substitutes others or balances out seasonal workload fluctuations. In 2024, there were 424 (428) contingent workers (headcount at the end of the reporting period) as part of Kemira's own workforce.

### WORKING CONDITIONS

#### Collective bargaining coverage and social dialogue

Kemira respects freedom of association and collective bargaining, as stated in the Code of Conduct and through the commitment to the United Nations Global Compact. To increase Kemira employees' awareness of their rights regarding freedom of association and collective bargaining, Kemira provides regular training on the Code of Conduct. In 2024, Kemira did not identify any violations of freedom of association or collective bargaining agreements in its own operations.

General disclosures

Environmental information

**Social information**

Governance information

### Collective bargaining agreements

In 2024, 2,225 and 47% of Kemira employees globally were covered by collective bargaining agreements. The working conditions and terms of employment of those employees who are not covered by collective agreements are defined based on company policy, local labor laws and applicable legislation.

Coverage rate <sup>1)</sup>	Collective bargaining: Employees – EEA	Workplace representation: Employees – EEA
0–19%		
20–39%		
40–59%		
60–79%		
80–100%	Finland	Finland

<sup>1)</sup> This table includes countries with more than 50 employees representing at least 10% of total number of employees

### Adequate wages

All employees at Kemira receive a salary above adequate wage. The adequate wage level has been analyzed and confirmed by comparing employee salaries in the lowest pay categories to available data on adequate wages. The adequate wage benchmarks follow wage levels as established in collective bargaining agreements, national or sub-national legislation, or living wage references.

### Health and safety

All Kemira locations and operations implement and maintain an Integrated Management System that meets the ISO 45001 standard. Certification is sought when stakeholder expectations or customer benefits are evident. Kemira's share of ISO 45001 certified locations has improved from 94% in 2023 to 97% in 2024, as a result of 68 Kemira locations (manufacturing, R&D and offices) having an ISO certification.

Own workforce covered by health and safety management system, %	2024	2023
Employees	100	100
Non-Employees	100	100

Kemira reports its occupational safety performance indicator as a number of Total Recordable Injuries (TRI) and Lost Time Incidents (LTI), and their frequencies (TRIF, LTIF) per million working hours.

Total Recordable Injuries	Number		Frequency <sup>1)</sup>	
	2024	2023	2024	2023
Employees	29	21	2.7	1.9
Contractors	14	16	5.3	4.8
<b>Total</b>	<b>43</b>	<b>37</b>	<b>3.2</b>	<b>2.5</b>

<sup>1)</sup> Total Recordable Injuries per million working hours

Lost Time Incidents	Number		Frequency <sup>1)</sup>	
	2024	2023	2024	2023
Employees	7	12	0.6	1.1
Contractors	9	9	3.4	2.7
<b>Total</b>	<b>16</b>	<b>21</b>	<b>1.2</b>	<b>1.4</b>

<sup>1)</sup> Lost Time Incidents per million working hours

The total number of TRIs in 2024 was 43 (37) and TRIF was 3.2 (2.5). Kemira employees' TRIF was 2.7 as a result of 29 injuries. The total number of LTIs was 16 (21), lower than previous year, and corresponding LTIF was 1.2 (1.4). No permanent injuries were reported in 2024 and there have not been fatalities involving Kemira employees, contingent workforce or contractors since 2005.

### Incidents, complaints and severe human rights impacts

Kemira emphasizes the importance of employees and non-employees (contingent workforce) raising any issues or concerns and provides and promotes various channels for reporting any suspicion of misconduct to Ethics and Compliance (hotline or by email) or to the management.

The Ethics and Compliance Hotline is hosted by an external service provider and is available for both Kemira employees and contingent workforce. Reporters can submit reports in their own language by phone and through a web form. The channel is available 24/7 on Kemira's intranet and is promoted on posters in all company locations. The Ethics and Compliance function manages the hotline system and the process of handling the reports. The reports are reviewed and investigated under the supervision of the Ethics and Compliance Committee which is also responsible for ensuring that there is a consistency in all remedial actions taken across the organization. The members of the Ethics and Compliance Committee are

General disclosures

Environmental information

**Social information**

Governance information

the Group General Council, the EVP Human Resources, the Head of Internal Audit and the Ethics and Compliance Director.

Reporters of issues or concerns have an option to remain anonymous and all reports are treated in confidentially, to allow proper investigation and to comply with applicable legislation. The Ethics and Compliance Committee has the task to examine all reported cases and to evaluate and classify all received allegations, based on a description of the facts, events and circumstances. It is then determined whether an investigation is needed, in which case a person or team within the organization is assigned to investigate the case. The case may also be handled by Internal Audit. The Ethics and Compliance Committee concludes the outcome and provides an overview to the Audit Committee. If misconduct has occurred, Kemira will take appropriate measures, including corrective, disciplinary and/or legal measures, taking into consideration the applicable legal rules.

During 2024, a total of 59 complaints were reported of which 33 were related to discrimination or harassment. At the end of the year 2024, 25 of those had been investigated and closed and 14 of them were confirmed as discrimination or harassment cases. Kemira has not categorized the discrimination cases by gender, racial or ethnic origin, nationality, religion or belief, disability, age or sexual orientation. During the year 2024, Kemira has not received any allegations of severe human rights incidents. Therefore, Kemira has not paid any compensation for remediation of any human rights incidents or complaints in 2024.

The grievance and remediation data is collected by several functions. The Ethics and Compliance and Internal Audit functions collect the reported cases. In addition, HR function collects the numerical case data of human rights violations globally from local HR contact persons. HR numerical data collection is conducted to ensure that all severe grievance cases have been reported to Ethics and Compliance or Internal Audit and handled through a comprehensive process.

**Integrity Index**

By measuring the Integrity Index on employees' perceptions of integrity, Kemira seeks to ensure that employees are aware of and trust the processes described above as a way to raise their concerns. The Integrity Index question ("*I can report unethical behavior or practices without fear of retaliation at Kemira*") is usually measured as part of Kemira's global engagement survey. The next employee survey will be conducted in 2025 and Integrity Index figures will be reported based on those results.

**EQUAL TREATMENT AND OPPORTUNITIES FOR ALL**

**Diversity Metrics**

Kemira monitors the distribution of gender and age groups to promote diversity across all levels in the company.

Management by gender <sup>1)</sup>	Number		Distribution, %	
	2024	2023	2024	2023
Female	38	42	29	31
Male	92	94	71	69
<b>Total</b>	<b>130</b>	<b>136</b>	<b>100</b>	<b>100</b>

1) Kemira management (Director, Vice President and Senior Vice President positions, excluding the Management Board)

Employees by age group	Number		Distribution, %	
	2024	2023	2024	2023
< 30	444	484	9	10
30 to 50	2,758	2,847	59	58
> 50	1,496	1,584	32	32
<b>Total</b>	<b>4,698</b>	<b>4,915</b>	<b>100</b>	<b>100</b>

**Training and skills development**

Kemira is committed to the training and skills development of all employees. Kemira provides each employee with access to relevant competence development programs and learning opportunities and supports the upgrading of employee skills through on-the-job learning programs (including generic and job-specific competence development), buddy/coaching/mentoring programs and traditional methods like classroom and digital learning. In 2024, Kemira continued to advance towards its aim to capture all training and employee development related hours in the global learning management system. At present, leadership development activities, regional and global competence development, vocational training programs and many local programs are recorded in the learning management system. However, some training and development activities are still recorded locally and not yet covered in the global system.

Environmental information

**Social information**

Governance information

Examples of global and regional programs offered during 2024:

- Trainings on Code of Conduct, Human Rights & Business, Gifts, Entertainment and Anti-Bribery, Speak Up, Information Security Awareness and other compliance programs delivered mainly as eLearning courses
- Training programs on Diversity, Equity and Inclusion (DEI), offered through eLearning and facilitator-led virtual, face-to-face and hybrid training sessions
- Trainings on Kemira principles (Focus on Growth, Collaborate to Succeed, Deliver Value), completed by approx. 3400 employees in 2024, and on Kemira's growth culture, incl. the Kemira Catalyst Summit for approx. 100 Kemira leaders and talents globally
- The Learn & Grow month was opened to all employees, with 20 sessions and approx. 420 attendees globally
- Sustainability trainings, e.g. Kemira as a Sustainability-Focused Company
- EHSQ-related programs including Sustainability Policy and EHSQ Standards, assigned as mandatory training to relevant employees to ensure safety awareness, understanding, compliance and the further development of Kemira's Safety culture
- The Global Safety Training Program for all shop floor supervisors in 2024. The program is designed to set clear expectations for manufacturing supervision at Kemira, emphasizing safety and sharing best practices

**Performance management and development**

Kemira's global performance and development discussion (PDD) process is an ongoing process covering four elements:

1. My Performance - setting performance targets at the beginning of the year and reviewing progress and achievements regularly
2. My Development - discussing competencies, strengths and development areas, as well as career aspirations
3. My Follow-up and Feedback - follow-up and feedback from manager, colleagues and other stakeholders throughout the year
4. Overall Performance and Potential - an annual assessment and calibration of performance and potential of white-collar employees.

The global process covers all permanent employees, both professional and operational employees. Temporary employees may also be included, based on the length of their contract.

Employees received regular performance and career development review <sup>1)</sup>	Number		Coverage, %	
	2024	2023	2024	2023
<b>Employees by gender</b>				
Female	1,211	1,233	99	98
Male	3,287	3,175	98	91
<b>Employees by employee category</b>				
White-collar employees	2,735	2,770	98	98
Operational employees	1,763	1,638	98	85
<b>Total</b>	<b>4,498</b>	<b>4,408</b>	<b>98</b>	<b>93</b>

<sup>1)</sup> Covers permanent employees (excl. employees on leaves) as of Sep 30, 2024

**Remuneration**

Pay equity at Kemira means that employees are paid and rewarded with fairness. Kemira is a global manufacturing company with employees in 38 countries. Due to global presence and workforce structure, remuneration levels differ across the employee groups and the countries. Kemira reported an unadjusted gender pay gap of 5.8% in 2024, covering all employees in all operating countries.

Kemira reported a closing of an unexplained pay gap already in September 2023. Kemira has identified what are considered as justified pay differences: Differences in pay may exist based on employee location, position level and expertise required, performance of the individual and possible local requirements such as collective agreements. After considering these justifiable factors it is possible to identify an unjustified pay gap. For Kemira this is not limited to the gender pay gap, as all available information, including gender, nationality, ethnicity, age and other possible attributes are reviewed. Regular pay equity monitoring at Kemira takes into account all of the above, seeks to detect any unjustified gaps and then initiates action to address and close them without delay.

The annual total remuneration ratio reflects the annual total remuneration of the highest paid individual relative to the annual average remuneration of all Kemira employees, excluding the highest paid individual, Kemira's President & CEO. To ensure the alignment of the interests of the CEO and of the shareholders, the weighting of variable remuneration and particularly long-term incentive plans in the CEO's total remuneration opportunity is substantial. In contrast, employee remuneration is less volatile, with a smaller proportion of the total remuneration consisting of variable components. The ratio is also influenced by the size of Kemira and by the differing market remuneration levels between countries. In 2024, the annual total

General disclosures

Environmental information

**Social information**

Governance information

remuneration ratio was 27 (ratio of highest paid individual to the annual average remuneration of all Kemira employees). Based on Kemira's experience and understanding, the given average figure represents median as required by the directive.

## OTHER WORK-RELATED RIGHTS

### Child and forced labour

According to Kemira's Code of Conduct, Kemira does not use any form of forced or child labor. Kemira acknowledges that in spite of mitigation procedures there could potentially be an increased risk related to these in certain high risk countries in which Kemira has operations: China, Brazil, India, Indonesia and South Korea. To mitigate this risk, Kemira conducts identity and age checks during the hiring process. Also, in many countries, the local labor laws and/or collective bargaining agreements have very extensive rules for young people, restricting working hours, work activities, work environments and overall health, well-being and educational opportunities.

### 📄 The Group's reporting principles

The total number of Kemira employees and non-employees (contingent workforce) are indicated as the numbers at the end of the reporting period (31 December 2024). The number of Kemira employees also includes non-active employees such as employees on long leaves.

Employee turnover refers to all permanent Kemira employees who have left the company during 2024, in comparison to the average permanent headcount for the reporting period.

The coverage of collective agreements and employee representatives is based on the number of employees on 30 September, 2024. Any changes in the last quarter are not expected to affect the result of this metric.

The remuneration figures are reported based on active employees on 31 December 2024, including all white collar employees and operational employees (full-time, part-time and temporary contracts). The gender pay gap has been calculated using the gross, annual average salaries of female and male employees, converted to euros before calculation. The figure represents the difference in pay between the groups, expressed as a percentage of the average pay of male employees. The calculation excludes all additional compensation elements like incentives, over-time, shift allowances or benefits.

The annual total remuneration ratio is calculated using remuneration paid during the respective year. CEO remuneration includes the regular base salary, benefits and short and long-term incentive payments. The average total remuneration for all employees includes all employee wages and salaries, including accrued short-term incentives and yet excluding side costs and total CEO remuneration.

Coverage of Performance and Development Discussions (PDD) is indicated as the percentage of permanent employees on 30 September 2024 who have had an approved PDD discussion in 2024 (excl. employees who are on long leave, e.g. family leave).

Number of TRIs is the sum of the reported lost time injuries, restricted work cases and medical treatment cases for Kemira employees, contingent workforce and contractors. When a TRI frequency is reported, it is normalized to one million working hours. LTI is the total number of reported lost time incidents for Kemira employees, contingent workforce and contractors. When LTIF is reported, it is normalized to one million working hours. Working hours and incidents affecting contingent workforce are included in the overall incident statistics instead of being reported separately, in line with Kemira's current reporting practices. Working hours are manually reported through an EHSQ software by Kemira Operations. In 2025, Kemira is planning to conduct a comprehensive review of working hours reporting to address this identified opportunity area.

The Inclusion Index figures are calculated using the average scores of four items (Authenticity, Belonging, Growth and Inclusive Leaders) obtained from Kemira's global engagement survey which is usually conducted twice a year for all employees. Kemira scores are compared to a cross-industry norm. Responses are collected on a scale of 1–5 (fully disagree/fully agree) and an external service provider converts the responses to indices on a scale of 0–100 (100 = everyone fully agrees).

Measurements of the metrics are not validated by an external body other than Ernst & Young Oy, through assurance.

#### Identification and assessment of material impacts, risks and opportunities

Kemira has identified material impacts, risks and opportunities for value chain workers in the materiality assessment which is described under *Material impacts, risks and opportunities* in the *General disclosure* section. The value chain worker related impact, risk and opportunity analysis was based on internal interviews and materials as well as on Kemira's latest Human Rights Impact Assessment framework. The methodology of the Human rights Impact Assessment was based on the United Nations Guiding Principles on Business and Human Rights and on OECD Due Diligence Guidance. As an outcome of the analysis, Kemira has identified the possible salient human rights impacts and risks for workers in the value chain, as described in the table above.

#### Strategy and business model

Kemira provides sustainable chemical solutions for water-intensive industries, best suited products and expertise to improve our customers' product quality and process and resource

efficiency. Sustainability is embedded into Kemira's strategy and long-term success as Kemira's customers are increasingly seeking sustainable solutions.

Kemira's products and upstream raw materials are industrial chemicals which need to be handled, stored, transported and used according to high safety standards, to prevent negative impacts on people and the environment. Kemira's priority obligation is to ensure that the workers in the upstream and downstream value chains are not negatively impacted by chemicals, especially by substances of very high concern. When Kemira's current processes are updated, special attention needs to be paid to certain groups of people who are likely to be impacted by Kemira's business. This can be done by careful supplier and contractor management and by providing appropriate guidance in the safe use of chemicals for Kemira's customers and other value chain workers.

**Social information**

Governance information

Kemira’s strategy towards renewable chemistries might lead to new social sustainability related impacts and risks in the upstream value chain. These will need to be taken into account in future strategy implementation.

Kemira has identified high risk countries within its upstream and downstream value chains which have an increased risk of the use of child and forced labor. The increased risk is particularly evident in the APAC region. The high-risk countries have been defined by a third-party, utilizing a set of different human rights and labor rights related indices that are publicly available (Business social compliance initiative 2022, Labor Rights index, Global Rights index).

Material impacts	Position in the value chain	Workers who are likely to be impacted	Particularly vulnerable workers or people groups
<b>Working conditions</b>			
○ Human rights violations e.g. health and safety issues in the value chain, particularly in high risk countries	↗ Upstream ↘ Downstream	<u>Upstream:</u> Manufacturing, laboratory personnel, logistics and storage personnel, who are handling chemicals <u>Downstream:</u> Kemira’s customers’ personnel who are handling Kemira’s products	Maintenance personnel, temporary employees, migrants, children, pregnant women
○ Risks related to labour law practices in certain renewable feedstock value chains	↗ Upstream	Workers who are working in the origin of Kemira’s raw-material feedstocks	Children, migrants, workers who cannot read
● Health and safety incidents with contractors, a high risk group among value chain workers	● Own operations	Maintenance, repair, turnaround, major renovation or specialty work at Kemira operations	Maintenance personnel, temporary employees, migrants
<b>Other work-related rights</b>			
○ Human rights violations e.g. child labour and forced labour in the value chain, particularly in high risk countries	↗ Upstream ↘ Downstream	Workers who are working in high risk countries either in Kemira’s upstream or downstream value chain	Children, migrants, workers who cannot read

**POLICIES RELATED TO WORKERS IN THE VALUE CHAIN**

Kemira has several policy statements which set the high level human rights objectives for Kemira’s business partners to follow. All of the policies cover the whole value chain and all value chain workers. The key contents, scope, process, accountability and availability of the policies is described in the *G1 Business Conduct* section, under *Corporate Culture and Business Conduct Policies*.

Kemira’s general approach towards human rights is described in the Code of Conduct and the summary can be found in the *S1 Own workforce* section. Kemira’s general approach towards human rights in the Code of Conduct for Business Partners is to commit the business partners to respecting fundamental human rights, to never use child or forced labor and to pay compensation which complies with all applicable wage laws. These requirements are in accordance with the UN Universal Declaration of Human rights and the core conventions of the International Labour Organization (ILO). Kemira also commits its business partners to making and developing products according to the highest ethical and safety standards, as well as to following applicable laws and regulations on product safety, including communication of hazards and information about the safe use of chemicals. All suppliers must follow the Code of Conduct for Business Partners in all dealings with Kemira. The Code of Conduct for Business Partners is communicated to all suppliers through the ordering process, as part of Kemira’s terms and conditions.

The Kemira Group Product Stewardship Policy aims to ensure that Kemira’s products are handled and used safely by Kemira’s stakeholders, that they are safe for the environment and that potential chemical risks and their impacts are incorporated into decision making related to Kemira’s operations, strategy implementation and long-term strategic development. The proactive management of the safe use of chemicals and protection of the environment and human health are fundamental prerequisites for Kemira’s business. The Kemira Group Product Stewardship Policy continuously communicates and raises awareness on product stewardship among employees, suppliers, business partners and other possible stakeholders in the value chain.

The Modern Slavery statement is a publicly available statement, approved by Kemira’s Board of Directors. It summarizes both Kemira’s Codes and Policies related to human rights issues and a general approach for how those are managed and remediated. It also addresses human trafficking as well as child and forced labor related prevention and mitigation methods and actions.

## PROCESSES RELATED GRIEVANCE, REMEDIATION AND STAKEHOLDER ENGAGEMENT

### Stakeholder engagement in upstream and downstream value chain

Kemira regularly reviews stakeholders' expectations and potential concerns. Our approach to stakeholder engagement includes activities ranging from information sharing to active dialogue and collaboration on issues of mutual interest. The feedback and information gathered from these activities is integrated into Kemira's operational development.

Stakeholder feedback is an important part of risk management, also regarding upstream and downstream value chain workers.

Kemira maintains active dialogue with its upstream suppliers. Supplier audits and supplier performance evaluation are carried out regularly. The results of the evaluations are reviewed together with the suppliers and improvement plans are created and followed up accordingly, as part of our supplier management practices.

Succeeding with customers is a core value at Kemira. Our goal is to understand customers' needs, to provide an excellent experience with our products and services and to build close relationships that help them remain loyal customers. To measure customers' satisfaction with their experience, Kemira conducts an annual Voice of Customer (VoC) relationship survey to gain valuable insights, to understand what customers need and to understand our performance in meeting their expectations. The Voice of Customer survey gathers insights on our customers' experience and their satisfaction with our products, deliveries, safety, services and their relationship with their Kemira representative.

Kemira uses external service providers (external contractors) who work at Kemira locations. These services cover maintenance, repair, turnaround, major renovation or specialty work at Kemira sites. External contractors are engaged by carrying out regularly contractor performance evaluations and the results are then reviewed together with the selected external contractors. In addition, there are several local practices for engaging external contractors such as safety events covering topical health and safety subjects.

Despite an active dialogue with suppliers, customers and external contractors, Kemira has not yet adopted a general process to engage with all workers in the value chain or with their legitimate representatives to hear their perspectives and needs in relation to Kemira's material impacts on them.

### Grievance and remediation mechanisms in upstream and downstream value chain

Kemira's Ethics and Compliance Program aims to enhance compliance management at Kemira on a continuous basis. The Ethics and Compliance function is responsible for overseeing the effective implementation of Kemira's Ethics and Compliance program and for reporting on it directly to the Audit Committee on a regular basis.

The Ethics and Compliance Committee oversees the management of compliance allegations, to ensure that fair and sufficient investigation, remediation and consistent disciplinary action are taken across the organization. Kemira emphasizes the importance of employees and other key stakeholders raising any issues or concerns to the Ethics and Compliance hotline. More detailed information on the Ethics and Compliance hotline process can be found under *Incidents, complaints and severe human rights impacts in S1 Own workforce*. Kemira also has a Misconduct Reporting Policy for the protection of whistleblowers which is disclosed in the *G1 Business Conduct* section.

The customer and supplier complaint channel is an application which can be utilized by Kemira personnel to raise their concerns related to issues within the upstream and downstream value chains. The complaints are handled by a formal process. This channel is indirectly available for both upstream and downstream workers. However, it is currently mainly utilized for quality related complaints. Kemira also uses an internal system for collecting and processing health, safety and quality related issue reports as well as observations related to hazardous conditions, near-misses and other similar issues or concerns. The channel is indirectly available for value chain workers to raise their concerns and health and safety observations. During 2024, Kemira did not receive any allegations related to value chain workers severe human rights violations by hotline, Ethics and Compliance function's e-mail and other grievance channels.

Kemira does not actively assess whether value chain workers are aware of or trust Kemira's grievance channels or Kemira's structures and processes. However, Kemira is currently conducting a comprehensive study of its grievance and remediation management. The study aims to identify the deficiencies of the current mechanisms as well as to enhance the stakeholder engagement and transparency of this part of the due diligence process.

Environmental information

**Social information**

Governance information

## **ACTIONS RELATED TO WORKERS IN THE VALUE CHAIN**

Kemira takes actions to mitigate, prevent or remediate material negative impacts and to advance positive impacts on workers in the value chain. The following actions were conducted during 2024, covering the whole value chain.

### **Upstream value chain**

Supplier management and supplier risk and compliance management are cornerstones of Kemira's sustainable sourcing roadmap which ensures responsibility in the supply chain. This is the global process for Kemira to identify and assess upstream related sustainability impacts, risks and opportunities. The focus of supplier management is on improving economic performance, anticipating risk and initiating approaches with suppliers that are responsible and innovative. It is described in three main processes: Supplier Segmentation, Supplier Performance Evaluations and the Vendor Value Program.

Kemira suppliers are segmented into four categories: strategic, critical, volume and base suppliers. They are prioritized based on multi-factor risk criteria to better help to manage supplier relationships and to plan actions for necessary risk mitigation. The Supplier Performance Evaluations program collects and provides regular feedback to suppliers, on both their operational and sustainability performance. The majority of strategic, critical and volume suppliers are part of regular supplier reviews. The Vendor Value Program aims to develop capabilities that will enable the identification, partnering with and management of suppliers, along the various value chains associated with Kemira's product lines. Kemira supplier risk and compliance management defines the requirements for suppliers to do business with Kemira, as well as provides tools and processes for mitigating sustainability risk with suppliers, e.g sustainability assessments and audits.

Kemira uses EcoVadis to carry out sustainability assessments for key suppliers, including those related to social matters. The assessment focuses on 21 sustainability criteria that are grouped into four themes: Environment, Labor & Human Rights, Ethics and Sustainable Procurement. The rating methodology measures the quality of a company's sustainability management system through 3 management pillars: Policies, Actions, and Results. Suppliers receive a sustainability scorecard with detailed insights into strengths and potential improvement areas. If the ratings do not meet Kemira performance criteria, suppliers are expected to take corrective action.

Kemira audits relevant direct material suppliers for quality and Corporate Social Responsibility (CSR), to ensure they meet expectations. The CSR audits are conducted by a certified third party and aim to ensure that suppliers do not violate Kemira's Code of Conduct. The quality audit validates suppliers' processes related to management systems, sustainability, workplace health and safety standards, production, quality and supply security. Supplier assessments and audits are part of sourcing processes and target setting for the Sourcing function and are monitored on a monthly basis. Audit results are reviewed together with suppliers, with improvement plans created and followed up as necessary as part of supplier management practices.

### **Downstream value chain**

Kemira's product portfolio consists of four major product lines. All products are documented and labeled according to legal requirements, including the identification of hazardous components and information on their safe use. Kemira provides Safety Data Sheets (SDS) for all its products. Kemira's IT system for Product Lifecycle Management enables to prepare SDSs and labels in alignment with the latest regulatory data requirements and in the official languages of the countries where the products are manufactured, stored or sold.

Kemira actively monitors its product portfolio, including raw materials, intermediates and process chemicals for substances of concern (SoC) and substances of very high concern (SVHC), in accordance with our priority substance management process. Actions to manage substances of concern and very high concern in Kemira's value chain are disclosed in the *E2 Pollution* section.

Kemira complies with all laws and regulations relating to chemicals and trade. Kemira does not sell any banned products. We continuously screen substances that are covered by any regulatory restrictions or are subject to substitution requirements imposed by non-regulatory stakeholders. We proactively work to mitigate health, safety, environmental and image-related risks.

### **Own operations and external contractors**

Kemira uses external service providers (external contractors) at Kemira locations. These services cover maintenance, repair, turnaround, major renovation or specialty work at Kemira sites. Kemira has a contractor management standard which defines the minimum requirements for selecting, managing and auditing external contractors who perform work at Kemira facilities or on behalf of Kemira at customer locations. Contractors have a mandatory

General disclosures

Environmental information

**Social information**

Governance information

safety induction, provided before starting the actual work at Kemira's sites and contractor work is controlled by the "permit-to-work" process. Kemira is also prepared for remediation in the case of contractor incidents.

### Action plan and resources

Kemira has planned the following actions for 2025 to prevent, mitigate and remediate the material impacts, risks and opportunities on workers in the value chain:

- Finalizing the internal grievance and remediation study and prepare an implementation plan and roadmap for needed actions
- Conducting supplier Ecovadis assessments, supplier quality audits and supplier Corporate Social Responsibility (CSR) audits, per annual segmentation and risk management practices and according to annual targets
- Assessing the currently used CSR audit methodology and opportunities relative to alternative CSR audit methodologies
- Increasing the coverage of contractor performance evaluations and health & safety qualifications for Kemira's on-site contractors (external). Continuing contractor liaison trainings to improve site-level contractor program engagement
- Actively engaging contractors to report their safety observations and to make proposals for improvements

Kemira has dedicated persons in the Sourcing, the EHSQ and the PSRA (Product Stewardship and Regulatory affairs) functions to carry out the actual work for the actions mentioned in the action plan.

### TARGETS RELATED TO WORKERS IN THE VALUE CHAIN

Kemira has indicators that are followed internally for impacts, risks and opportunities management related to workers in the value chain. These targets are not defined as ESRS targets. Kemira will continue the evaluation of the indicators in the following years.

### Upstream and downstream workers in the value chain

Upstream related indicators are disclosed in more detail under E5 *Resource use and circular economy*. Such indicators are, for example, the number of supplier quality and CSR audits. Kemira has identified potential health and safety impacts, especially the risks related to chemical safety to be the most significant potential negative impact for value chain workers. Kemira has internal indicators related to negative impacts for Substances of Very High Concern and Substances of Concern. Since 2016, Kemira has made priority substance

management plans for existing Substances of Very High Concern and Substances of Concern in Kemira's product portfolio, including for raw materials and process chemicals. Kemira aims to cover all identified priority substances with the management plan.

### External contractors working at Kemira's sites

Incidents among external contractors working at Kemira's own locations have been identified as a material negative impact. Kemira reports its occupational safety performance indicator as Total Recordable Injuries (TRI). TRI Frequency (TRIF) is measured as Total Recordable Injuries per million working hours and covers both Kemira employees and contractors.

Kemira's target is to improve TRIF to 2.2 by the end of 2025 and to 1.5 by the end of 2030. The number of external contractor injuries was 14 (16) in 2024 and the external contractor TRIF changed from 4.8 to 5.3. Contractor working hours are tracked for the TRI frequency. Third-party transportation companies, whether on-site or off-site, are excluded and incidental facility services such as janitorial work, food and drink services, laundry, delivery or other supply/resupply services are also excluded. External contractor safety performance is described in the Health and Safety tables in the *S1 Own workforce* section. The target setting process is described in detail in the *S1 Own workforce* section.

Kemira does not directly engage upstream and downstream value chain workers, contractors or their legitimate representatives in the supplier management, Product Stewardship management or target setting processes. However, Kemira does request that external contractors make safety observations and the collected information is then utilized to enhance external contractor safety and working conditions.

## **Identification of material impacts, risks and opportunities**

Kemira has identified its material impacts, risks and opportunities for its business conduct matters as part of the company-wide materiality assessment which is described under *Material impacts, risks and opportunities* in the *General disclosure* section.

## **TARGETS RELATED TO BUSINESS CONDUCT**

Kemira has internal indicators that are followed for impact, risks and opportunities related to Business Conduct. These targets are not as defined in ESRS. Kemira will continue the evaluation of these indicators in the following years. Kemira nevertheless tracks the effectiveness of its policies and actions in relation to compliance with ethical business practices and environmental and health and safety laws through Kemira's internal controls and audits and by following the reports filed with Kemira's Ethics and Compliance Hotline. The results of these processes are reviewed periodically in the course of normal business process management, with an aim to constantly improve the trend and take corrective actions if adverse deviations are detected. Kemira's management systems, applied in many of Kemira's locations, have been certified under the following international standards: ISO 9001 (Quality management systems), ISO 14001 (Environmental management systems), ISO 45001 (Occupational health and safety management systems), and ISO 50001 (Energy management systems). These standards require organizations to monitor and constantly improve their operations, in accordance with the Plan-Do-Check-Act principle.

## **CORPORATE CULTURE AND BUSINESS CONDUCT POLICIES**

### **Corporate values and Code of Conduct**

Kemira's Board of Directors has approved the Code of Conduct (the "Code") which provides a framework around the company's values and reflects its commitments towards its key stakeholders. Kemira's values and Code principles are an expression of who we are as a company and how we want to be perceived by our stakeholders. Together, the corporate values and the Code are the foundation of Kemira's business conduct.

Kemira's corporate values were created by a large number of Kemira employees who voiced their opinions on what they appreciate about Kemira and what kind of common beliefs and ways of working should be strengthened within the company. The corporate values are: *We are committed to customers' success, We drive performance and innovation, We care for people and the environment and We succeed together*. Kemira's Code emphasizes that its decisions and actions must be guided by integrity and ethics. According to the company Code, that how

we do things is even more important than what we do. The Code gives the organization and everyone working for Kemira the guidance and principles they need to adhere to the highest standards of integrity, legal compliance and ethical conduct.

Being a responsible business means supporting internationally defined principles on human rights, labor conditions, the environment and anti-corruption. We have committed to these principles by signing The United Nations Global Compact and by reflecting these principles in our Code. Kemira is a signatory of Responsible Care®, the voluntary initiative of the global chemical industry.

In the company Code it is communicated to all Kemira staff that all personally responsible for ensuring that individual actions and decisions reflect Kemira's values and the Code principles. The Code includes 19 Code principles that reflect the company's commitments towards its key stakeholders: the work community, customers, suppliers, markets, society and investors.

The Code sets out that each individual at Kemira must act in accordance with the company's values and Code principles and must comply with company policies, laws and regulations. The Code states that it applies to every employee and manager and even to the Board of Directors. Everyone is encouraged to raise questions relating to the Code with their line managers and it is the responsibility of all Kemira managers to support their teams in matters relating to the Code. The Code of Conduct has been made public and it is available in multiple languages.

In addition, all suppliers must follow Kemira's Code of Conduct for Business Partners in relation to all of their dealings with Kemira. The Code of Conduct for Business Partners is communicated to all suppliers during their supplier onboarding and also through the ordering process, as part of Kemira's terms and conditions. It sets forth the minimum standards of behavior business partners are expected to follow in terms of business conduct, human rights, environment and safety, product safety, quality and sustainability.

### **Other business conduct policies**

Kemira has a systematic process to issue and maintain corporate policies to document and communicate Kemira's values, rules and expectations. Kemira's policies support the implementation of its business strategy, values and Code of Conduct and create a framework for consistent and fair practices across all business units and locations. Many of the policies extend and further elaborate on the Code of Conduct commitments and make them more understandable and concrete for our organization and stakeholders.

General disclosures

Environmental information

Social information

**Governance information**

Kemira's policies are prepared in respective functions within the company and they are approved either by the Management Board or the Board of Directors, depending on the subject matter. The policies are set out in a standardized document format, each of them has a named policy owner and author with certain responsibilities and there is a process to review and, where necessary, revise the policies every two years. All policies are internally available to Kemira's employees.

The contents of the business conduct policies are part of the training for all employees at the beginning of their employment and there is repeat training, typically every two years. The Code of Conduct is trained to all employees and the other policies are trained to selected target

groups of employees based on risk assessment. The training includes the key contents of Kemira's policies, standards and procedures and explains how to perform work in accordance with Kemira's policies and what consequences may follow from not complying with the policies. The main channel to deliver training is a globally used electronic training platform which can be used to keep track of the trainings offered to and taken by each employee. The platform enables Kemira to monitor that mandatory trainings are completed in a timely manner by the designated target groups.

The below table sets out a summary of the key business conduct policies.

**Key business conduct policies**

Policy	Key contents	Scope	Process for monitoring	Accountability	Third-party standards	Availability
<b>Code of Conduct</b>	19 Code principles that reflect our commitments towards our work community, customers, suppliers, markets, society and investors.	All Kemira activities, employees and managers globally	Management oversight, E&C Hotline, internal investigations, internal audits	The President & CEO	The United Nations Global Compact, Responsible Care	Publicly available on company website
<b>Code of Conduct for Business Partners</b>	The minimum standards of behavior business partners are expected to follow in terms of business conduct, human rights, environment and safety, product safety, quality and sustainability.	Business partners (e.g., suppliers, consultants, advisers, distributors and agents) globally	Key controls: STP3, CTC1 Periodic audits of business partners, E&C Hotline	SVP Sourcing	OECD Guidelines for Multinational Enterprises	Publicly available on company website
<b>Kemira Group Sustainability Policy</b>	Policy outlines the commitment and management of sustainability requirements within Kemira. It states 12 commitments with respect to stakeholders, environment and governance.	All Kemira operations and employees globally, contractors working at Kemira sites and those working on behalf of and/or in alliance with Kemira.	ISO 9001, 14001, 45001, 50001 certificates (for certain sites) and certifiability as management target	EVP Operational Excellence & Sustainability		Publicly available on company website
<b>Gifts, entertainment and anti-bribery policy</b>	Kemira has a zero tolerance towards bribery and corruption. Kemira and its employees must never offer, pay, give, solicit or accept a bribe in any form. The policy explains what kind of gifts and hospitality are acceptable in our business.	Policy applies to gifts and entertainment offered or received by any Kemira company or employee to or from any person outside of Kemira.	Management oversight, E&C Hotline, internal investigations, internal audits	Group General Counsel		Internally available to all Kemira staff
<b>Recruitment Policy</b>	Policy reinforces Kemira's diversity and inclusion statement, respect for human rights and equal opportunity principle.	Policy applies to to all internal and external recruitments leading to a candidate's employment within Kemira Group globally.	Key controls: HR1	EVP HR	UN Global Compact	Internally available to all Kemira staff

**Governance information**

Policy	Key contents	Scope	Process for monitoring	Accountability	Third-party standards	Availability
<b>Sourcing &amp; Procurement Policy</b>	All commitments to suppliers are to be managed by Sourcing department personnel only, subject to a few minor exceptions: All sourcing and procurement must be aligned with the published company values and sustainability goals. Conflicts of interest must be strictly avoided and the principle of impartiality must be followed. No personal purchases are to be connected to company purchases.	Policy applies to all purchases made within Kemira Group save for certain exclusions. Policy applies to purchasing of direct materials, corporate services, manufacturing related capital and operational expenditures, energy and logistics.	Key controls: STP2-3, STP 5-9	EVP Operational Excellence & Sustainability		Internally available to all Kemira staff
<b>Competition Law Compliance Policy</b>	Kemira strongly supports fair competition and competes vigorously, yet fairly and ethically, and within the framework of applicable competition laws. Kemira does not enter into any anti-competitive agreements or carry out any other anti-competitive activities.	Policy applies globally to all companies and employees within Kemira Group. The Policy applies to Kemira’s actual and potential competitors, customers, distributors and suppliers as well as trade associations.	Management oversight, E&C Hotline, internal investigations	Group General Counsel		Internally available to all Kemira staff
<b>Product Stewardship Policy</b>	Kemira is committed to the set of principles including among others controlling and minimizing safety risks and adverse effects on health and the environment that could be caused by the products throughout our value chain; and replacing substances of concern that would pose an unacceptable risk to human health, safety or environment, making risk assessments covering regulatory compliance, providing safe use guidance to our customers.	Policy describes the commitment and management of requirements for product stewardship and chemicals regulatory compliance within Kemira globally.	Management oversight	Head of Product Safety & Regulatory Affairs	Responsible Care Global Charter	Internally available to all Kemira staff
<b>Logistics and Transportation Policy</b>	Policy aim among others at ensuring efficient and well performing logistics network that operates in a sustainable and safe manner in full compliance with all laws and regulations applicable to transportation and warehousing of chemicals.	Policy applies to sourcing and operative management of transportation and logistics activities in all Kemira Group companies globally.	Management oversight	SVP Supply Chain Management		Internally available to all Kemira staff
<b>Trade Compliance Policy</b>	Kemira’s international trade transactions are carried out in accordance with applicable laws, regulations, licensing requirements and procedures of the country of import/ export/re-export and/or the country of origin.	Policy sets forth the requirements and provides general principle to be complied with in Kemira’s international import and export trade operations.	Management oversight	VP Product Safety & Regulatory Affairs		Internally available to all Kemira staff
<b>Misconduct Reporting Policy</b>	Policy encourages everyone working for or with Kemira to report any suspicion of misconduct confidentially and without fear of retaliation. Policy sets out the procedures applicable when reporting misconduct to Kemira, including how these reports will be followed up, and how the reporters are protected. Kemira supports an open culture that encourages everyone to speak freely and without fear of harassment. Kemira provides a channel for reporting any suspicion of misconduct confidentially and without fear of retaliation. A reporting person will not be dismissed, bullied, discriminated or otherwise retaliated against for making a report or complaint. Any person, regardless of position, who engages in retaliatory behavior will be subject to disciplinary action.	Policy applies to reporting of breaches of Kemira’s Code of Conduct; misrepresentation of Kemira’s financial information, criminal offenses, and other violations of the applicable law. Policy applies to employees of Kemira group, whether current or past, including trainees, employee candidates and those who have otherwise carried out work for Kemira, for example under a self-employed consultant status, external service provider and contingent workforce; shareholders and persons belonging to the administrative, management or supervisory body of any Kemira Group company; and anyone working under the supervision and direction of contractors, subcontractors and suppliers of Kemira Group. Policy is global.	E&C Hotline, internal investigations	Group General Counsel	EU Whistleblower Directive	Internally available to all Kemira staff. Confidential and anonymous reporting channel is publicly available to anyone on Kemira’s website.

## Promoting corporate culture

Kemira's corporate culture is based on its corporate values and the Code of Conduct. As we operate in chemicals manufacturing, occupational safety has been strongly emphasized as a priority. The importance of a diverse and inclusive workplace has been recognized as an important success factor in our globally operating organization.

Sustainability transformation is regarded as the cornerstone of Kemira's business strategy. Kemira's strategic goal is to become the leading provider of sustainable chemical solutions for water intensive industries. Kemira aims to expand its renewable solutions portfolio and to reach EUR 500 million in revenue by the end of 2030.

Kemira's leadership has acknowledged the importance of synchronizing culture and strategy which will lead to improved employee engagement, higher customer satisfaction and ultimately to increased revenue and profitability.

To drive the implementation of Kemira's values, the Code of Conduct, safety, diversity and inclusion and the sustainability focused business strategy, Kemira's leadership has defined a set of principles, habits and behaviors that are the basis of Kemira's corporate culture. These principles, habits and behaviors are communicated to all staff through trainings and communication campaigns and the effectiveness of cultural development is measured through regular employee engagement surveys.

Kemira's policy commitments become visible in the organization through strategic target setting, including targets covering safety, people, water, circularity and climate topics. Our commitments are also visible through our management processes. Besides these management processes, we create task groups for specific topics, like the focus area-based sustainability programs or the Human Rights Council, which is a cross-functional group developing and discussing Kemira human rights practices. We have established a comprehensive framework to advance our commitment to diversity, equity and inclusion (DEI).

Employees are the key contributor to the organizational culture, driving our values and shaping the environment in which we operate. Kemira has adopted methods of continuous listening and feedback and is working with a service provider administering anonymous employee surveys and using external benchmarks. The results of the employee surveys are made available to employees and managers. Participation rates typically range from 70% to 80%.

Kemira uses short engagement pulse surveys twice a year to follow the development of the Engagement Index, an internal key performance indicator describing the engagement level of Kemira's staff. Our employee engagement is above the external benchmark.

## Reporting and investigating concerns

Kemira's Management Board has approved the Misconduct Reporting Policy and the Investigation Procedure, which are available to all Kemira staff. According to the Misconduct Reporting Policy, Kemira supports an open culture and encourages everyone working for or with Kemira to report any suspicion of misconduct confidentially and without fear of retaliation. The policy sets out the procedures on how reports alleging misconduct will be followed up and how the reporters are protected. The Investigation Procedure sets out the standard investigation process to assess allegations of non-compliance with the Code of Conduct or with company policies.

Kemira has an externally hosted Ethics and Compliance hotline (whistleblower mechanism), which enables the reporting of suspected violations of the Code of Conduct and other ethical concerns in multiple languages. A report can be filed either anonymously or with a disclosure of the reporter's name. The reporting channel is available to all Kemira employees and external persons, such as anyone working for the contractors and suppliers of Kemira. Information about the Ethics and Compliance hotline is shared with employees on Kemira's intranet, in training and in communication campaigns. Kemira's website has guidance for external persons. Further, there is an e-mail address that can be used by third-parties to report cases of potential misconduct relating to Kemira or to our business partners. This information is available on our website and in Kemira's Code of Conduct for Business Partners.

All allegations of potential violations of our Code of Conduct made in good faith will receive a fair and comprehensive investigation, using external assistance where needed. All misconduct reports are treated confidentially. The Investigation Procedure describes the roles and responsibilities, general principles and the process related to the internal investigations. The investigations are based on the principles of neutrality, objectivity, professionalism, compliance with applicable labor and privacy laws and the presumption of innocence.

Kemira's Ethics and Compliance Committee consists of the Group General Counsel, EVP HR, the Chief Auditor and the Director, Ethics and Compliance. The Ethics and Compliance Committee coordinates investigations of internally or externally reported misconduct.

General disclosures

Environmental information

Social information

**Governance information**

The Committee may escalate a matter to the President & CEO and/or to relevant Management Board member(s), and the Committee reports to the Audit Committee of the Board of Directors.

In addition to the confidential reporting channel and the investigations overseen by the Ethics and Compliance Committee, Kemira also has an Internal Audit function which, in addition to its other duties, is involved in identifying, reporting and investigating unlawful behavior and violations of the Code of Conduct. Internal auditors have complete and unrestricted access to all Kemira activities. The Internal Audit function is free to determine the scope of internal auditing, the ways of performing its work and the communication of its findings. The Internal Audit function reports its material findings quarterly to the Audit Committee of the Board of Directors. The Internal Audit also reports all of its observations to the management and to the auditor.

**CORRUPTION AND BRIBERY**

Kemira’s policy is not to accept any form of corruption, such as bribery, facilitation payments, embezzlement, fraud, conflict of interest, or money laundering. Kemira’s policy on corruption and bribery is documented in the Kemira Code of Conduct and Kemira Group Gifts, Entertainment and Anti-Bribery Policy documents. The policy is consistent with the UN Convention Against Corruption.

The company’s anti-corruption principles are communicated to all of its employees through recurring, mandatory training. The members of Kemira’s Board of Directors are aware of the company’s anti-corruption principles. The principles are communicated to all of Kemira’s suppliers and vendors who are required to commit to Kemira’s business ethics principles as a condition for the establishment of a business relationship.

Anti-corruption training for white-collar employees by region <sup>1)</sup>	2024	
	Number of employees	Coverage, %
EMEA	1,561	92
APAC	488	97
Americas	751	92

<sup>1)</sup> White-collar employees who have completed the training at least once during 2022-2024

Kemira has assessed which of its operations are most at risk in respect of corruption and bribery. Geographic location has a significant impact on corruption risk. While Kemira's headquarters is based in Finland which ranks second best world-wide in Transparency International's Corruption Perceptions Index 2023 publication, Kemira has operations in nearly 40 countries and sells products to customers in over 100 countries, including several countries where the risk of corruption is significant. In terms of the customer base, Kemira sells water treatment chemicals to public utilities, such as municipal water treatment plants, which by their nature pose a higher risk of public corruption.

Kemira has addressed these risks in its internal anti-corruption training and by establishing a third-party due diligence process applicable to its distributors and sales agents. The due diligence process has a risk-based approach, considering the corruption perception index in the geographic location, the type of the customer segment and the foreseeable value of the annual transactions. Depending on the risk classification, distributors and sales agents must respond to inquiries about themselves and must acknowledge a commitment to Kemira’s business ethics principles.

To prevent and detect corruption, Kemira relies on its globally implemented key controls which cover the use of the company’s funds and assets, maintaining accurate accounting and records as well as sales and purchase contracting. The key controls have been approved by Kemira's Management Board. The verification of compliance with the key controls is based on the three-lines-of-defence-model:

1. Employees and management are expected to execute the process activities as described in the key controls guidance,
2. Management is responsible for testing the key controls, and
3. Kemira’s Internal Audit is responsible for verifying that controls have been performed and tested. The Internal Audit reports to the Board of Director’s Audit Committee.

Furthermore, Kemira maintains an Ethics and Compliance Hotline, a confidential reporting channel where any employee or any external person can report allegations of corruption. More information on the Ethics and Compliance Hotline can be found under *S1 Own workforce*.

Any allegations or detected incidents of corruption are addressed through an internal investigation which is overseen by the Compliance Committee, as described in the section on *Reporting and investigating concerns* above. The investigators are separate to the management involved in the matter. The results of the investigation are shared with the

General disclosures

Environmental information

Social information

**Governance information**

relevant management and an overview of all investigations is reported to the Audit Committee of the Board of Directors.

In 2024, Kemira did not have any convictions or fines for violation of anti-corruption and anti-bribery laws. During the year Kemira recorded eight allegations related to violation of internal anti-corruption and anti-bribery policies. Diligent internal investigation confirmed seven incidents where own employees had breached internal procedures relating to anti-corruption or anti-bribery. In total seven own employees were either dismissed or otherwise disciplined for confirmed corruption or bribery-related incidents.

### **POLITICAL INFLUENCE AND LOBBYING ACTIVITIES**

According to Kemira's Code of Conduct, we observe neutrality with regard to political parties and candidates for public office. We do not take part in political activities nor make corporate donations to political parties or candidates. Neither the names nor the assets of Kemira shall be used to promote the interests of political parties or candidates.

The above-mentioned Code principle is further elaborated in Kemira Group Sponsorship and Donation Policy and Kemira Group Gifts, Entertainment and Anti-bribery Policy, which both prohibit any financial support to politicians, political parties or political organizations. No financial or any in-kind political contributions paid by Kemira have come to Kemira's attention during 2024.

Kemira maintains dialogue with stakeholders that shape and participate in the legislative processes relevant to Kemira, including the European Commission, members of the European Parliament and the Council of the EU. The political influence is mainly, but not exclusively, carried out through the trade associations in which Kemira is a member, that is, Cefic – the European Chemical Industry Council – and Kemianteollisuus ry, the national chemical industry association in Finland.

Kemira has engaged mainly those EU policies which belong to:

- Chemical Strategy for Sustainability,
- EU Water and Wastewater Regulations,
- EU Packaging Regulations,
- Food Contact Material Regulation, and Bioeconomy.

Kemira's communication activities include mainly personal discussions with members of the EU institutions, submission of position papers, participation in public consultations and stakeholder workshops.

Kemira has been registered in the EU's Transparency Register with registration number 934980845504-83. Kemira has committed to complying with the code of conduct of the transparency register.

Kemira's engagement in the EU law making process is conducted by its Public Affairs department, managed by the Corporate Communications Department, and supervised by Kemira's Management Board. Members of the Management Board determine and oversee the strategic direction of Kemira's public affairs objectives and act like a supervisory and approval body.

The following members of Kemira's Management Board and Board of Directors have held a comparable position in public administration (including regulators) in the two years preceding the year 2024:

- Antti Salminen, President & CEO of Kemira since 2024, has been a member of the Board of Directors of the Geological Survey of Finland since 2020.
- Tina Sejersgård Fanø, a member of the Board of Directors of Kemira since 2022, has been the chair of the Board in Innovationsfonden (Denmark) until the year 2022.
- Timo Lappalainen, a member of the Board of Directors of Kemira Oyj since 2014, has been a member of the council in the Helsinki Region Chamber of Commerce until the year 2022.

## DATA POINTS DERIVING FROM OTHER EU LEGISLATION

The table below includes all of the data points that derive from other EU legislation as listed in ESRS 2 appendix B, indicating where the data points can be found in Kemira's Annual Review and which data points are assessed as 'Not material'.

ESRS	Disclosure Requirement	Data point	Disclosure Requirement related data point	Section in Sustainability Statement
ESRS 2	GOV-1	21 (d)	Board's gender diversity	General disclosures
ESRS 2	GOV-1	21 ( e)	Percentage of board members who are independent	General disclosures

**GROUP PROFILE**

Kemira Oyj is a Finnish public limited liability company, domiciled in Helsinki, with its registered address at Energiakatu 4, FI-00180 Helsinki, Finland. Kemira Oyj's shares are listed on Nasdaq Helsinki Oy. The parent company Kemira Oyj and its subsidiaries together form the Kemira Group. A list of subsidiaries is disclosed in Note 6.2.

Kemira is a global chemicals company serving customers in water-intensive industries. The company provides expertise in applications and chemicals that improve customers' efficient use of water, energy and raw materials. Kemira's two business segments, Pulp & Paper and Industry & Water, focus on customers in the pulp & paper and water treatment industries, respectively.

The Board of Directors of Kemira Oyj has approved the Consolidated Financial Statements for publication at its meeting on February 10, 2025. Under the Finnish Limited Liability Companies Act, the General Meeting of Shareholders is entitled to decide on the adoption of the financial statements. A copy of the Consolidated Financial Statements is available at [www.kemira.com](http://www.kemira.com) or at Energiakatu 4, FI-00180 Helsinki, Finland.

In compliance with the reporting requirements of the European Single Electronic Format (ESEF), Kemira also publishes the Consolidated Financial Statements and the Board of Directors' report as an xHTML file, which is available at [www.kemira.com](http://www.kemira.com).

**BASIS OF PREPARATION FOR THE CONSOLIDATED FINANCIAL STATEMENTS**

The Group has prepared its Consolidated Financial Statements in accordance with the International Financial Reporting Standards (IFRS) and International Financial Reporting Interpretations Committee (IFRIC) interpretations, adopted by the European Union. The Consolidated Financial Statements have been prepared in accordance with IFRS standards and IFRIC Interpretations, effective on December 31, 2024. The Notes to the Consolidated Financial Statements also comply with the requirements of the Finnish accounting and corporate legislation that supplement the IFRS regulations.

The Consolidated Financial Statements are presented in EUR million and have been prepared based on historical cost, except for the items measured at fair value through other comprehensive income, including unlisted PVO/TVO shares, financial assets and liabilities at fair value through profit or loss and share-based payments which are measured at fair value.

Individual figures presented in the Consolidated Financial Statements have been rounded to the nearest exact figure. Therefore, the sum of the individual figures may deviate from the sum figure presented in the Consolidated Financial Statements. The key figures are calculated using exact values.

**NEW, AMENDED IFRS STANDARDS AND IFRIC INTERPRETATIONS IN EFFECT IN 2024**

For the first time, the Group has applied the following standards and amendments to its annual reporting period commencing January 1, 2024:

- Amendments to the standard IAS 1, Classification of liabilities into current and non-current. The amendments clarify how to classify debts as current or non-current when the entity has the right to postpone the payment of the debt for at least 12 months. The amendments did not have any significant impact on the Consolidated Financial Statements.
- Amendments to IFRS 16 Leases: Lease Liability in Sale and Leaseback. The amendment requires a seller-lessee to subsequently measure lease liabilities arising from a leaseback in a way that it does not recognize any amount of the gain or loss that relates to the right of use it retains. The new requirements do not prevent a seller-lessee from recognizing in profit or loss any gain or loss relating to the partial or full termination of a lease. The amendments did not have any significant impact on the Consolidated Financial Statements.
- Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures: Supplier Finance Arrangements. The amendment provides additional disclosures about supplier finance arrangements that enable investors to assess the effects on a company's liabilities, cash flow and exposure to liquidity risk.

## SUSTAINABILITY STATEMENT

The amendments did not have any significant impact on the Consolidated Financial Statements.

### NEW, AMENDED IFRS STANDARDS AND IFRIC INTERPRETATIONS NOT YET ADOPTED

- Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability (effective from 1 January 2025). The amendment provides guidance on identifying situations where a currency cannot be considered freely exchangeable and on how to take this into account in the exchange rate used in reporting and when providing additional information in these situations. The amendment is not expected to have any significant impact on the Consolidated Financial Statements.
- The new IFRS 18 standard (Presentation and Disclosure in Financial Statements) replaces IAS 1 Presentation of Financial Statements (effective from 1 January 2027, early application is permitted). The key new concepts in IFRS 18 relate to the structure of the income statement with specified subtotals, the presentation of management performance measures and the consolidation and disaggregation of information in primary statements and notes to the financial statements. The Group is currently assessing the impact of the new standard.

### CONSOLIDATION PRINCIPLES OF SUBSIDIARIES AND NON-CONTROLLING INTERESTS

The Consolidated Financial Statements include the parent company Kemira Oyj and its subsidiaries. Subsidiaries are all entities that the Group has control over (voting rights generally being over 50 percent). The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and when it has the ability to affect those returns through its power over

the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date on which this control ceases.

All intra-group transactions are eliminated when preparing the Consolidated Financial Statements. Intra-group shareholdings are eliminated using the acquisition method. The consideration transferred for the acquisition of a subsidiary is defined as an aggregate of the fair values of the assets transferred, the liabilities assumed and the equity interest issued by the Group. The consideration transferred may include the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and any liabilities and contingent liabilities that are assumed in a business combination are measured at their fair values on the acquisition date. On an acquisition-by-acquisition basis, the Group recognizes any non-controlling interest in the acquiree, either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The amount that exceeds the aggregate of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the Group's share of the net assets acquired is recognized as goodwill on the Balance Sheet. If this is less than the fair value of the net assets of the subsidiary acquired by bargain purchase, the difference is recognized directly in the Income Statement.

Net profit or loss for the financial year and other comprehensive income attributable to the equity holders of the parent company and to non-controlling interests is

presented in the Income Statement and in the Statement of Comprehensive Income. The portion of equity attributable to non-controlling interests is stated as an individual item, separate to the equity held by equity holders of the parent company. Total comprehensive income shows the total amounts attributable to the equity holders of the parent company and to non-controlling interests separately. The Group also recognizes negative non-controlling interests, unless the non-controlling interest does not have a binding obligation to cover losses up to the amount of their investment.

If the parent company's ownership interest in the subsidiary is reduced but control is retained then the transactions are treated as equity transactions. When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured at its fair value and the difference is recognized as profit or loss.

### ASSOCIATES

Associated companies are companies over which the Group exercises significant influence (voting rights generally being 20–50 percent) but which it does not control. Holdings in associated companies are consolidated using the equity method. If the Group's share of the associate's losses exceeds the carrying amount of the investment, the exceeding losses will not be consolidated unless the Group has a commitment to fulfill the obligations on behalf of the associate. The Group's share of the associated companies' net profit for the financial year is stated as a separate item in the Consolidated Income Statement, in operating profit, in proportion to the Group's holdings. The Group's share of the other comprehensive income of its associates is recognized in the Group's other comprehensive income.

## SUSTAINABILITY STATEMENT

### FOREIGN CURRENCY TRANSLATION

The Consolidated Financial Statements are presented in euros, which is the Group's presentation currency as well as the parent company's functional and presentation currency. Items included in the financial statements of each of the Group's entities are measured by using the currency of the primary economic environment in which the entity operates (the functional currency).

If the functional currency of the subsidiary is a currency other than the euro, its Income Statement is translated into euros using the financial year's average foreign currency exchange rates and the balance sheets are translated using the exchange rates quoted on the balance sheet date. Translating the net profit for the period using different exchange rates in the Income Statement and in the balance sheet causes a translation difference which is recognized as equity on the Balance Sheet. The change in this translation difference is presented under Other Comprehensive Income. Goodwill and fair value adjustments to the carrying amounts of the assets and liabilities that arise from the acquisition of a foreign entity are accounted for as part of the assets and liabilities of the foreign entity and are translated into euros at the rate quoted on the balance sheet date.

Translation differences in the loans granted to some foreign subsidiaries are treated as an increase or decrease in other comprehensive income. When the Group ceases to have control over a subsidiary, the accumulated translation difference is transferred into the Income Statement as part of the gain or loss on the sale.

In their day-to-day accounting, the Group companies translate foreign currency transactions into their functional currency at the exchange rates quoted on the transaction

date. In the Financial Statements, foreign currency denominated receivables and liabilities are measured at the exchange rates quoted on the balance sheet date. Non-monetary items are measured using the rates quoted on the transaction date. Any foreign exchange gains and losses related to business operations are treated as adjustments to sales and purchases. Exchange rate differences associated with financing transactions and with the hedging of the Group's overall foreign currency position are stated in foreign exchange gains or losses, under finance income and expenses.

### THE ITEMS IN THE FINANCIAL STATEMENTS THAT INCLUDE ACCOUNTING ESTIMATES AND ACCOUNTING POLICIES THAT REQUIRE JUDGMENT BY THE MANAGEMENT

When preparing Consolidated Financial Statements in accordance with IFRS, the management is required to make accounting estimates and assumptions concerning the future. The resulting accounting estimates will seldom be equal to actual results. In addition, management is required to exercise judgment when applying accounting policies.

The estimates and assumptions are continuously evaluated and are based on past experience and expectations of future events that may have financial implications and are considered to be reasonable under the circumstances.

The following table lists items in the financial statements that include significant accounting estimates and includes the notes related to them. Also included are the accounting policies and the sensitivity analysis applied to the items. The items that include accounting estimates are subject to a risk of changes in the carrying amount of assets and liabilities during the next financial period.

The items in the Financial Statements	Note in the Financial Statements
Goodwill	3.1. Goodwill
Fair value of shares in the PVO Group	3.5. Other shares
Deferred taxes and uncertain tax positions	2.6. Income taxes and 4.4. Deferred tax liabilities and assets
Defined benefit pension plans	4.5. Defined benefit pension plans and employee benefits
Provisions	4.6. Provisions

### THE EFFECTS OF CLIMATE-RELATED MATTERS IN FINANCIAL STATEMENTS

Sustainability is a key driver of Kemira's profitable growth strategy. Sustainability at Kemira focuses on five topics: safety, people, circularity, water and climate. Kemira's ambition is to be carbon neutral by 2045.

Climate-related matters have an impact in several areas of Kemira's Consolidated Financial Statements. As a chemicals company operating in an energy-intensive industry, Kemira has two Power Purchase Agreements in wind power, along with ownership in Pohjolan Voima Oyj and Teollisuuden Voima Oyj (Note 3.5 Other Shares), producing CO<sub>2</sub>-free electricity with nuclear and hydro power plants in Finland. CO<sub>2</sub>-emissions and energy efficiency matters are considered in capital investments, thus also affecting non-current assets (Note 3.3 Property, Plant and Equipment) as well as future cash flow forecasts used in goodwill impairment testing (Note 3.1 Goodwill). Kemira has a partnership with Danimer Scientific Inc. to develop fully biobased barrier coatings for paper and board products, generating intangible assets (Note 3.2 Other Intangible Assets).

In addition, Kemira has an undrawn revolving credit facility of EUR 400 million, with sustainability targets (Note 5.5 Management of Financial Risk). Kemira's long-term incentive programs for years 2023-2025 and 2024-2026 also include climate-related targets in the KPIs to be measured.

## 2. Financial performance

### 2.1 SEGMENT INFORMATION

Kemira's organization consists of two segments: Pulp & Paper and Industry & Water.

#### Pulp & Paper

Pulp & Paper has expertise in applying chemicals and in supporting pulp and paper producers in innovating and constantly improving their operational efficiency. The segment develops and sells products to meet the needs of its customers, thus ensuring a leading portfolio of products and services for the paper wet-end, focusing on packaging and board as well as tissue products.

#### Industry & Water

Industry & Water supports municipalities and water intensive industries in the efficient and sustainable utilization of resources. In water treatment, the segment helps in the optimization of every stage of the water cycle.

On January 1, 2025 Kemira changed to a new operating model. As part of the change, Kemira's new operating model now includes three segments: Water Solutions, Packaging & Hygiene Solutions and Fiber Essentials.

### ALTERNATIVE PERFORMANCE MEASURES

Kemira provides certain financial performance measures (alternative performance measures) that are not defined by IFRS. Kemira believes that alternative performance measures followed by capital markets and Kemira management, such as revenue growth in local currencies, excluding acquisitions and divestments (=organic growth), EBITDA, operative EBITDA, operative EBIT, cash flow after investing activities and gearing provide useful information about Kemira's comparable business performance and financial position. Selected alternative performance measures are also used as performance criteria in remuneration.

Kemira's alternative performance measures should not be viewed in isolation from the equivalent IFRS measures and should instead be read in conjunction with the most directly comparable IFRS measures. Definitions of the key figures are disclosed in the section Definitions of key figures.

Americas	526.2	483.2
Asia Pacific	154.4	166.0
<b>Total</b>	1,913.2	1,912.8

#### Information about major customers

The Group has several significant customers. No more than 10% of the Group's revenue was accumulated from any single external customer in 2024 or in 2023.

#### The Group's accounting policies

##### Segment reporting

Segment information is presented in a manner consistent with the Group's internal organizational and reporting structure. Kemira's management evaluates the performance of the segments based on operative EBITDA and operative EBIT, among other factors. Assets and liabilities dedicated to a particular segment's operations are included in that segment's total assets and liabilities. Segment assets include property, plant and equipment, intangible assets, right-of-use assets, investments in associates, inventories and certain current non-interest-bearing receivables. Segment liabilities include certain current non-interest-bearing liabilities. Geographically, Kemira's operations are divided into three business regions: Europe, the Middle East and Africa (EMEA), the Americas and the Asia Pacific (APAC).

## SUSTAINABILITY STATEMENT

### Revenue recognition

IFRS 15 standard establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. The core principle is that an entity should recognize revenue to depict the transfer of promised goods or services to customers to an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group recognizes revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the good or service underlying the particular performance obligation is transferred to the customer.

The Group's revenue consists mainly of contract types that include sales of chemical products as well as services and equipment which are related to sales of these chemical products. In 2024 and 2023, services have not formed a significant part of the Group's revenue.

Revenue recognition occurs at the point when the control of the products is transferred to the customer. Generally, in the Group's sales agreements, control is transferred to the customer based on delivery terms and the revenue is recognized at a point in time.

The Group provides delivery and handling services in conjunction with the sale of chemical products to customers. The delivery and handling services are recognized at the same time as revenue from products and they are not treated as a separate performance obligation.

Kemira recognizes the sale of products and the delivery and handling services for the same reporting period.

Discounts provided to customers are not a significant component of the sales price in Kemira's sales contracts.

## 2.2 OTHER OPERATING INCOME AND EXPENSES

### OTHER OPERATING INCOME

EUR million	2024	2023
Gains on the sale of non-current assets	0.1	0.1
Rental income	0.6	0.7
Services	1.0	3.1
Other income from operations <sup>1)</sup>	0.4	4.8
<b>Total</b>	<b>2.1</b>	<b>8.6</b>

1) Other income from operations consists mainly of insurance compensations in 2023.

### OPERATING EXPENSES

EUR million	2024	2023
Materials and supplies <sup>2)</sup>	1,422.9	1,754.2
Employee benefit expenses	431.9	440.8
External services and other expenses <sup>3) 4)</sup>	340.9	440.5
Freights and delivery expenses	204.1	216.9
<b>Total</b>	<b>2,399.8</b>	<b>2,852.3</b>

2) In 2024, materials and supplies included EUR 4.7 million (71) Government grants for energy intensive industry in several European countries.

3) Includes equipment costs, travel expenses, leases, office related expenses, insurance, consulting, and other operational expenses. Other expenses include EUR 11 million (101) loss on the divestment of the Oil & Gas business, including transaction fees. Kemira completed the divestment in February 2024.

4) In 2024, other operating expenses included research and development expenses of EUR 33.7 million (32.8) including government grants received. Government grants received for R&D were EUR 0.4 million (0.6). The extent of the grants received reduces the research and development expenses.

### EMPLOYEE BENEFIT EXPENSES

EUR million	Note	2024	2023

Ernst & Young Oy is acting as the principal auditor for Kemira Group.

### 🔖 The Group's accounting policies

#### Government grants

Government grants for investments are recognized as a deduction from the carrying amount of PP&E. The grants are recognized in the income statement as smaller depreciation over the asset's useful life. Government grants for research activities are recognized as a deduction from expenses. Certain other grants are recognized either as a deduction from expenses or as other income from operations.

### Research and developments costs

Research and development costs are recognized as an expense as incurred. Development costs are capitalized as intangible assets when it can be shown that a development project will generate a probable future economic benefit, and the costs attributable to the development project can reliably be measured. Capitalized development costs include material, labor, and testing costs, as well as any capitalized borrowing costs that are directly attributable to bringing the asset ready for its intended use. Other development costs that do not meet these criteria are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in the subsequent periods.

### 2.3 SHARE-BASED PAYMENTS

#### Share incentive plans 2019–2023

In December 2018, Kemira's Board of Directors of Kemira Oyj decided to establish a long-term incentive plan for 2019–2023. The long-term share incentive plan was directed towards a group of key employees. This was composed of two one-year performance periods for the years 2019 and 2020 and three three-year performance periods for the years 2019–2021, 2020–2022 and 2021–2023. The Board decided on the plan's performance criteria and the targets for each criterion at the beginning of each performance period.

The rewards for the performance periods have been paid partly in Kemira Oyj's shares and partly in cash. The cash proportion is intended to cover taxes and tax-related costs arising to the participant from the reward. As a rule, no reward has been paid if a participant's employment or service has ended before the reward payment. The shares paid as a reward may not be transferred during the restriction period, which ends two years after the end of the performance period. If a participant's employment or service has ended during the restriction period, the participant has, as a rule, gratuitously returned the shares given as a reward, without consideration. The restriction period only applies to the one-year performance period.

#### Share incentive plans 2022–2026

In December 2021, the Board of Directors of Kemira Oyj decided to establish a long-term share incentive plan directed to a group of key employees at Kemira. The long-term share incentive plan includes three three-year performance periods: years 2022–2024, 2023–2025 and 2024–2026. The Board shall decide on the plan's performance criteria and on the required performance levels for each criterion at the beginning of each performance period. The Board shall also decide on the plan's participants and on share allocations at the beginning of each performance period.

The potential reward is paid partly in Kemira Oyj's shares and partly in cash. The cash portion covers taxes and tax-related costs arising to the participant from the reward. As a rule, no reward will be paid if a participant's employment or service ends before the reward payment.

#### Share incentive plans 2025–2029

In December 2024, the Board of Directors of Kemira Oyj decided to establish a long-term share incentive plan directed to a group of key employees at Kemira. The aim of the plan is to combine the objectives of the shareholders and the persons participating in the plan to increase the value of Kemira, to commit the participants to Kemira and to offer them a competitive reward plan. The long-term share incentive plan includes three three-year performance periods: years 2025–2027, 2026–2028 and 2027–2029.

The Board shall decide on the plan's performance criteria and on the required performance levels for each criterion at the beginning of each performance period. The Board shall also decide on the plan's participants and on share allocations at the beginning of each performance period.

The potential reward is to be paid partly in Kemira shares and partly in cash. The cash portion covers taxes and tax-related costs arising to the participant from the reward. As a rule, no reward will be paid if a participant's employment or service ends before the reward payment.

#### Restricted Share Plan

In December 2023, the Board of Directors of Kemira Oyj also decided to establish a restricted share plan. In particular, the Restricted Share Plan can be used as a commitment instrument in specific executive recruitment situations. The terms allow for the plan to be used with careful consideration in retention situations also.

The restricted share plan is continuous. The Board will approve, for each calendar year, an annual quota of shares which can be granted within a respective year under the RSP. The annual quota shall mean a net number of shares together with a cash proportion required for cover all taxes. The total amount of shares offered during the year cannot exceed the respective quota approved by the Board.

The plan offers participants the opportunity to receive a predetermined number of company shares, after a specific restriction period which can vary from twelve (12) to forty (40) months, with a decision by the Board of Directors. No earnings criteria are applied to the restricted share plan and the delivery of the share reward is subject to the continuation of employment.

## SUSTAINABILITY STATEMENT

The maximum aggregated amount of shares that may be granted under the Restricted Share Plan in year 2024 is 70,000 Kemira shares. In addition, a cash proportion intended to cover the taxes and tax-related costs arising from the reward is included. No persons were under the plan during 2024. The maximum amount of shares that may be granted under the Restricted Share Plan in year 2025 is 96,090 Kemira shares (referring to gross earnings before the withholding of the applicable payroll tax).

### Share incentive plans 2025–2027

Participation in the long-term share incentive plan's performance period 2025–2027 is directed to approximately 80 people. Should the performance targets set for the PSP 2025–2027 be fully achieved, the maximum number of shares to be paid is approximately 960,898 shares (referring to gross earnings before the withholding of the applicable payroll tax).

Share incentive plan	2020–2022	2021–2023	2022–2024	2023–2025	2024–2026
Performance period (calendar year)	2020–2022	2021–2023	2022–2024	2023–2025	2024–2026
Issue year of shares	2023	2024	2025	2026	2027
Share price at the grant date	13.41	12.57	13.32	14.58	16.87
Number of transferred shares from the plans	254,375	468,437	—	—	—
Estimated number of shares on December 31, 2024	—	—	458,700	337,126	415,800
Number of participants on December 31, 2024	—	—	78	77	86
Performance criteria	1)	1)	1)	2)	2)

1) Intrinsic value and organic growth-%. Intrinsic value is defined as follows: operative EBITDA \* 8 - net debt.

2) ROCE-%, average organic revenue growth-%, Kemira CO<sub>2</sub> emission reduction from Scope 1 & 2 and revenue growth of renewable products.

The Board recommends that a member of the Group Leadership Team shall own such a number of the Company's shares that the total value of his or her shareholding corresponds to the value of his or her annual gross salary, for as long as the membership continues. The Board further recommends that a member of the Group Leadership Team shall hold at least 50 per cent of the number of shares given on the basis of this plan, even after a possible reward payout, until his or her shareholding in total corresponds to the value of his or her annual gross salary.

## THE EFFECT OF SHARE-BASED PAYMENTS ON OPERATING PROFIT

EUR million	Note	2024	2023
Rewards provided in shares		5.5	5.9
Rewards provided in cash		7.0	7.1
<b>Total</b>	<b>2.2.</b>	<b>12.5</b>	<b>13.1</b>

## The Group's accounting policies

### Share-based payments

The Group has equity-settled share-based incentive plans under which the Group receives services from persons as consideration for share-based rewards. The potential rewards for these services are provided to the person partly in shares and partly in cash. The Group's share incentive plan includes persons in several different countries where the Group is obliged under local tax laws or regulations to pay the tax liability to the tax authorities on behalf of a person in cash. The Group's share-based incentive plans have been entirely classified as an equity-settled transaction.

The rewards granted on the basis of a share-based arrangement are recognized as personnel expenses in the income statement and in equity. The expense is recognized on a straight-line basis over the vesting period, which is the period over which the specified vesting conditions are to be satisfied.

The fair value of the share awards has been determined at the grant date minus the estimated expected dividends that will not be received during the vesting period. The fair value of the rewards is based on the Group's estimate of the number of shares to which the right is expected to be vested at the end of the vesting period. The estimate of the number of shares is reviewed at each balance sheet date. The potential effect of revisions to estimates is recognized as a personnel expense in the income statement, with the corresponding fair value adjustment made to equity.

## 2.4 DEPRECIATION, AMORTIZATION AND IMPAIRMENTS

EUR million	2024	2023
<b>Amortization of intangible assets and depreciation of property, plant and equipment</b>		
Other intangible assets <sup>1)</sup>	17.8	19.0
Buildings and constructions	23.9	23.8
Machinery and equipment	105.0	116.3
Other tangible assets	6.8	6.4
<b>Total</b>	<b>153.5</b>	<b>165.5</b>
<b>Depreciations of right-of-use assets</b>		
Land	1.9	1.6
Buildings and constructions	9.1	10.3
Machinery and equipment	21.8	25.6
Other tangible assets	0.5	0.6
<b>Total</b>	<b>33.3</b>	<b>38.1</b>
<b>Impairments of intangible assets and property, plant and equipment <sup>2)</sup></b>		
Goodwill	0.0	0.0
Buildings and constructions	0.0	0.0
Machinery and equipment	0.0	0.0
Other tangible assets	0.7	0.0
<b>Total</b>	<b>0.7</b>	<b>0.0</b>
<b>Total depreciation, amortization and impairments</b>	<b>187.4</b>	<b>203.6</b>

1) Amortization of intangible assets related to business acquisitions amounted to EUR 5.8 million (6.9) during the financial year 2024.

2) In 2024, impairments related to the closure of a manufacturing site in Vancouver, Canada.

Goodwill impairment tests are disclosed in Note 3.1. Goodwill.

## The Group's accounting policies

### Depreciation/amortization

Depreciation/amortization is calculated on a straight-line basis over the asset's estimated useful life. Land is not depreciated. The most commonly applied depreciation/amortization periods included in the Group's accounting policies are presented in the following table.

Depreciation of property, plant and equipment and amortization of intangible assets in years	
Buildings and constructions	20-40
Machinery and equipment	3-15
Development costs	a maximum of 8 years
Customer relationships	5-7
Technologies	5-10
Non-compete agreements	3-5
Other intangible assets	5-10
Right-of-use assets	during a lease term

Depreciation/amortization of an asset begins when it is available for use and ceases at the moment when the asset is classified under IFRS 5 as held for sale or it is included in the disposal group.

## SUSTAINABILITY STATEMENT

### 2.6 INCOME TAXES

EUR million	2024	2023
Current taxes	-70.5	-87.3
Taxes for prior years	-3.0	2.6
Change in deferred taxes	0.0	4.1
<b>Total</b>	<b>-73.6</b>	<b>-80.7</b>

### RECONCILIATION BETWEEN TAX EXPENSE AND TAX CALCULATED AT DOMESTIC TAX RATE

EUR million	2024	2023
Profit before tax	336.3	292.0
Tax at parent company's tax rate 20%	-67.3	-58.4
Foreign subsidiaries' different tax rate	-3.8	-8.0
Non-deductible expenses and tax-exempt profits	-0.4	-30.8
Share of profit or loss of associates	0.1	-0.1
Tax losses during the period without deferred tax	-0.1	-1.3
Tax for prior years	-3.0	2.6
Effect of change in tax rates	0.0	-0.1
Utilization of prior years' tax losses with no deferred tax	0.6	1.0
Changes in deferred taxes	0.4	14.4
<b>Income taxes in the Income Statement</b>	<b>-73.6</b>	<b>-80.7</b>

In 2024, the effective tax rate of the Group was 21.9% (27.6%). Effective tax rate for the year 2023 was impacted by the divestment of the Oil & Gas business.

### TAX LOSSES AND RELATED DEFERRED TAXES

EUR million	Tax losses carried forward		Recognized deferred taxes		Unrecognized deferred taxes	
	2024	2023	2024	2023	2024	2023
Expiry within 5 years	26.2	42.6	4.1	7.9	2.0	2.2
Expiry after 5 years	24.1	2.5	3.5	0.6	2.2	0.0
No expiry	33.9	52.5	5.8	9.2	5.0	7.5
<b>Total</b>	<b>84.2</b>	<b>97.6</b>	<b>13.4</b>	<b>17.7</b>	<b>9.2</b>	<b>9.7</b>

At the end of 2024, the subsidiaries had EUR 32.3 million (31.1) tax losses, of which no deferred tax benefits have been recognized. The subsidiaries' tax losses are incurred in different currencies and born mainly in China and Brazil.

Kemira is within the scope of the OECD Pillar 2 model rules. Pillar 2 legislation has been enacted in many Kemira countries, including Finland, where the rules came into effect from 1 January 2024. Kemira applies the mandatory IAS 12 exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar 2 income taxes. Kemira has established a process and tools to analyse the outcome of Pillar 2 related safe harbour rules and GloBE calculations, and manages the analysing and compliance requirements centrally. Based on the Kemira's assessment majority of the group companies are expected to pass the safe harbour rules during the transitional period, and only 2-3 group companies are expected to require detailed GloBE calculations, which, however, are not expected to result any increase in taxes. Therefore, it is not expected that Pillar 2 has an impact on the amount of the Group's income taxes.

### The Group's accounting policies

#### Income taxes

The Group's tax expense for the period comprises current tax, adjustments from prior tax periods and deferred tax. Tax is recognized in the income statement, except where it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity.

The current income tax charge is calculated based on tax laws enacted or substantively enacted on the balance sheet date in the countries where the parent company and its subsidiaries and associated companies operate and generate taxable income.

✕ **The items in the financial statements that include significant accounting estimates and accounting policies that require judgment**

**Deferred taxes and uncertain tax positions**

The management regularly evaluates the positions taken in the tax returns to identify situations where the applicable tax regulation may be subject to interpretation. The management evaluates also other potential uncertainties related to the tax positions identified in the tax audits or tax disputes. Taxes of uncertain tax positions are recognized based on estimated outcome and probability.

<b>Diluted earnings per share, EUR</b>	1.61	1.28

<sup>1)</sup> Weighted average number of shares outstanding, excluding the number of treasury shares held by Kemira Oyj.

### The Group's accounting policies

#### Earnings per share

The basic earnings per share is calculated by dividing the profit attributable to the equity owners of the parent company by the weighted average number of shares issued during the period, excluding treasury shares held by parent company Kemira Oyj. The diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares with the dilutive effect of all the potential dilutive shares, such as shares from share-based payments.

### 2.8 OTHER COMPREHENSIVE INCOME

## 3. Capital expenditures and acquisitions

### 3.1 GOODWILL

EUR Million	Note	2024	2023
<b>Net book value on Jan 1</b>		480.9	510.5
Acquisition of subsidiaries and business acquisitions		2.5	2.3
Impairments		0.0	0.0
Transferred to assets classified as held-for-sale <sup>1)</sup>	3.7.	0.0	-26.5
Exchange differences		7.3	-5.3
<b>Net book value on Dec 31</b>		490.6	480.9

1) In 2023, goodwill was reclassified as held-for-sale assets which was related to the sale of the Oil & Gas business. See Note 3.7. for further details regarding the held-for-sale assets.

#### Impairment testing of goodwill

Goodwill is allocated to the two individual cash-generating units that are the Group's reportable segments. The reportable segment represents the lowest level within the Group at which goodwill is monitored for internal management purposes. The Group's two reportable segments are Pulp & Paper and Industry & Water. A summary of the tested net book values and goodwill relating to the Group's reportable segments is presented in the following table.

EUR Million	2024		2023	
	Net book value	of which goodwill	Net book value	of which goodwill
Pulp & Paper	1,246	353	1,263	349
Industry & Water	638	137	615	132
<b>Total</b>	<b>1,884</b>	<b>491</b>	<b>1,878</b>	<b>481</b>

The Group carries out its impairment testing of goodwill annually, or whenever there is an indication that the recoverable amount may be less than its carrying amount. The recoverable amounts of the cash-generating units have been determined based on value in use calculations which require the use of estimates and assumptions. The key assumptions in the value in use calculations are the EBITDA margin and the discount rate.

The long-term EBITDA margin assumption used for the impairment testing of goodwill is based on past experience regarding EBITDA margins and also reflects the management's perception of developments in sales prices and sales volumes during the forecast period. The impact of

climate-related risks to the Group's long-term performance has been considered in the cash flow forecasts. The cash flow forecasts used in the impairment testing are based on cash flow forecasts approved by the management, covering a five-year horizon. The expected growth used to extrapolate cash flows in the subsequent five-year forecast period was assumed to be 1% (2023: 1%) in both cash-generating units, Pulp & Paper and Industry & Water.

The discount rates applied were based on the Group's adjusted Weighted Average Cost of Capital (WACC) before taxes. The risk-adjusted WACC rate was defined for both cash-generating units. The pre-tax discount rates used in performing the impairment tests of the Group's reportable segments are presented in the following table.

%	2024	2023
Pulp & Paper	9.0	9.3
Industry & Water	9.0	9.3

In addition, an impairment test based on market value has been carried out as part of impairment testing. The value in use calculation based on cash flow forecasts has been validated by comparing it against the quoted market value of Kemira Oyj.

During the financial years 2024 and 2023, the impairment tests have not indicated any impairment and no impairment loss has been recognized in the income statement.

#### Sensitivity analysis

In 2024, as part of the impairment testing, the Group carried out a sensitivity analysis that assessed key changes in assumptions as follows: a decrease of 2 percentage points in EBITDA margin, a decrease of 10% in estimated cash flow during the forecast period, an increase of 1 and 2 percentage points in the discount rates or a decrease of 10% in cash flows and an increase of 2 percentage points in the discount rate.

Based on the sensitivity analyses carried out, the management has estimated that changes in the key assumptions of EBITDA margins, discount rates and cash flows would not result in the cash-generating units carrying amounts exceeding the recoverable amounts and, consequently, there would be no impairment losses recorded in either of the reportable segments.

## SUSTAINABILITY STATEMENT

### 🔖 The Group's accounting policies

#### Goodwill

Goodwill arises from business combinations. Goodwill represents the excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired. Goodwill is measured at cost less the accumulated impairment losses.

#### Impairment testing

On each balance sheet date, the Group assesses whether there is any indication of an asset's impairment. If any indication of impairment exists, the recoverable amount of the asset or of the cash-generating unit is calculated on the basis of the value in use or the net selling price.

For the purpose of impairment testing goodwill, a cash-generating unit has been defined as an operating segment. Two or more operating segments are not combined into one reportable segment. The recoverable amount of a reportable segment is defined as its value in use, which consists of the discounted future cash flows to the unit. Estimates of future cash flows are based on the continuing use of an asset and on forecasts by the management. Cash flow estimates do not include the effects of improved asset performance, investments or future reorganizations.

Goodwill impairment is tested by comparing the recoverable amount with the carrying amount for the reportable segments Pulp & Paper and Industry & Water. The carrying amount includes goodwill, intangible assets and PP&E, right-of-use assets and working capital. Other than goodwill, the Group does not have intangible assets with indefinite useful lives. All goodwill has been allocated to the reportable segments.

An impairment loss is recognized whenever the carrying amount of an asset or a cash-generating unit exceeds its recoverable amount. An impairment loss is recognized in the income statement. If there has been a positive change in the estimates used to determine an asset's recoverable amount since the last impairment loss was recognized, an impairment loss recognized for previous years is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognized for the previous years. An impairment loss for goodwill is never reversed.

### ✕ The items in the financial statements that include significant accounting estimates and accounting policies that require judgment

#### Impairment test of goodwill

The impairment tests of goodwill and other assets include determining future cash flows which, with regard to the most significant assumptions, are based on EBITDA margin and discount rates. Significant adverse developments in cash flows and interest rates may necessitate the recognition of an impairment loss.

## 3.2 OTHER INTANGIBLE ASSETS

2024, EUR million	Other intangible assets	Prepayments	Total
<b>Acquisition cost on Jan 1</b>	334.5	3.4	337.9

## SUSTAINABILITY STATEMENT

### 🔖 The Group's accounting policies

#### Other intangible assets

Other intangible assets include, for instance, software and software licenses and patents, technologies, non-compete agreements and customer relationships acquired in business combinations. Contrarily, acquisitions of cloud-based softwares as a service generally do not, by their nature, meet the characteristics of an intangible asset and they are therefore recognized as an expense. Intangible assets are measured at cost, less accumulated amortization and any impairment losses. The Group has no intangible assets that have an indefinite useful life other than goodwill.

#### Emission rights

Emission rights purchased on the market are accounted for as intangible assets, measured at cost. Emission rights received free of charge are measured at their nominal value (zero). Emission rights are not amortized. A provision for the fulfillment of the obligation to return emission rights is recognized if the free-of-charge emissions are not sufficient to cover actual emissions. The Group's consolidated balance sheet shows no items related to emission rights where the volume of actual emissions is lower than that of the free-of-charge emissions allowances and the Group has not bought allowances on the market.

1) Prepayment and non-current assets under construction are mainly composed of plant investments.

2) In 2023, property, plant and equipment amounting to EUR 172.5 million was reclassified as held-for-sale assets. These assets were used by the Oil & Gas business. See Note 3.7 for further details regarding the held-for-sale assets.

### 🔖 The Group's accounting policies

#### Property, plant and equipment

Property, plant and equipment is measured at cost, less accumulated depreciation and any impairment losses. The residual values and useful lives of the assets are reviewed at least at the end of each financial year. Gains and losses on the sale of non-current assets are included in other operating income and expenses. Borrowing costs directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of

the asset in question, when it is probable that they will generate future economic benefits and the costs can be reliably measured. The costs of major inspections or of the overhaul of an asset performed at regular intervals are identified as separate components and are capitalized and depreciated over their useful lives.

## 3.4 LEASES

### SUSTAINABILITY STATEMENT

#### Leases

At the time of entering into an agreement, the Group assesses whether the agreement is a lease or whether it contains a lease. An agreement is a lease in accordance with IFRS 16 if the agreement gives the Group, as the lessee, the right to control the asset and to control its use for a specified period, against consideration. The Group's leases are mainly for land, buildings and transport equipment.

The lease is recognized as a right-of-use asset and as a corresponding liability when the leased asset is available to the Group. The rent paid is divided into debt and interest expenses. Interest expenses are recognized in the income statement over the lease term and the asset is amortized over the lease term. Assets and liabilities arising from leases are initially measured at present value. Lease liabilities include the net fair value of rentals, consisting of a fixed payment and a variable rent that are index- or price-level dependent. The lease liability is discounted to its present value using an interest rate on the additional loan, consisting of the reference interest rate and the lessee's credit margin, which the lessee would pay on the acquisition of the corresponding asset by debt financing. This additional loan rate will vary depending on the duration of the lease and on the currency.

The lease term is the period during which the lease cannot be canceled. The Group leases typically have a fixed term and some contracts have options for renewal. The option is included in the lease liability if it is reasonably certain that the option will be exercised. If there is a change in the estimate of the exercise of the option, the lease liability and the related asset are reassessed.

A right-of-use asset is measured at cost, which includes the original amount of the lease liability. In building leases, the lease and non-lease components are treated separately, wherever they can be identified and distinguished from the right-of-use asset. In subsequent periods, the accumulated depreciation and impairment losses are deducted from the asset. Fixed assets are tested for impairment in accordance with IAS 36 Impairment of Assets.

Payments for short-term and low-value leases are recognized as an expense in the income statement, on a straight-line basis over the lease term. Leases with a maximum term of 12 months are regarded as short-term. Low value assets include IT equipment, office furniture and other low value machines.

## SUSTAINABILITY STATEMENT

### 🔖 The Group's accounting policies

#### Other shares

Other shares are classified at fair value through other comprehensive income. Changes in the fair value of other shares are recognized in other comprehensive income, under equity in the fair value reserve, taking the tax effect into account and including gains and losses from sales. The dividends are recognized in the profit or loss statement. Other shares include non-listed companies, with the shareholdings in Pohjolan Voima Oyj (PVO) and Teollisuuden Voima Oyj (TVO) representing the largest investments.

PVO and its joint venture TVO comprise a private energy generating group, owned by Finnish manufacturing and power companies, to whom it supplies energy at cost. Kemira Group has A series shares in TVO and A, B and G series shares in PVO. The shareholdings of PVO's B series are related to the holdings in TVO and TVO operates three nuclear power plant units (Olkiluoto 1, 2 and 3) in Olkiluoto in the municipality of Eurajoki in Finland. Different share series entitle the shareholder to electricity generated by different power plants. The owners of each separate share series are responsible for the fixed costs of the series in question, in proportion to the number of the shares they hold, regardless of whether they use their power/energy share or not, and for variable costs in proportion to the amount of energy used.

Kemira Oyj's ownership in the PVO Group, which entitles it to electricity from the power plants in regular production, is measured at the fair value based on the discounted cash flow resulting from the difference between the market price of the electricity and the cost price. The forward electricity price quotations for the Finnish price area, published by the Nordic Electricity Exchange, have been used as the basis for the market price for the electricity for the first five years and, thereafter, the development of the electricity price is to be based on a fundamental simulation model of the Nordic electricity market. The impact of inflation in the coming years is taken into account in the price of the electricity and in the cost prices. The cost prices are determined by each share series. Future cash flows have been discounted based on the estimated useful lifecycles of the plants related to each share series and hydro power also includes terminal values. The discount rate has been calculated using the annually determined average weighted cost of capital.

### ✕ The items in the financial statements that include significant accounting estimates and accounting policies that require judgment

#### Estimated fair value of shares in the PVO Group

The Group's shareholding in the unlisted PVO Group is measured at fair value, based on the discounted cash flow resulting from the difference between the market price of electricity and the cost price, using the valuation model. Developments in the actual fair value may differ from the estimated value due to factors such as electricity prices, inflation, the forecast period or the discount rate.

## SUSTAINABILITY STATEMENT

### 3.6 BUSINESS COMBINATIONS

#### 2024: The acquisition of Norit's UK reactivation operations

In Q3 2024, Kemira acquired Norit's UK reactivation operations. Kemira has a 100% interest in the acquired business. The acquisition was not material to Kemira's consolidated income statement and balance sheet.

The acquisition calculation under IFRS 3 is provisional. The fair values of the net assets and goodwill may change during the 12-month period during which the acquisition calculation will be finalized. The purchase price of EUR 3.2 million was paid in cash. Based on preliminary acquisition calculations, EUR 0.6 million was allocated to intangible assets such as customer lists. A provisional goodwill of EUR 2.5 million arises mainly from the expected synergies.

The acquired subsidiary Purton Carbons Limited was consolidated into the Industry & Water segment in Q3 2024.

#### 2023: The acquisition of SimAnalytics Oy

In Q3 2021, Kemira acquired a minority interest in the advanced process optimization start-up SimAnalytics Oy. In Q1 2023, Kemira acquired the rest of the business and now has a 100% interest in the acquired business. The acquisition was not material to Kemira's consolidated income statement and balance sheet.

The purchase price of EUR 3 million was paid in cash, except for certain payments which will be made later. The purchase price is divided into two installments, of which EUR 2 million was paid in Q1 2023 and EUR 1 million was paid earlier in 2021. The remainder of the payments to the acquired company's employees, made after the acquisition date, are remunerations for services under IFRS 3 and these payments have no effect on goodwill.

Based on acquisition calculations, EUR 1 million was allocated to intangible assets such as software. A goodwill of EUR 2 million arises mainly from the expected synergies.

The acquired business has been consolidated into the Pulp & Paper segment, beginning in Q1 2023.

### The Group's accounting policies

#### Business combinations

The acquisition method is applied to business combinations. The consideration transferred for the acquisition of a subsidiary is defined as an aggregate of the fair values of the assets transferred, the liabilities assumed and the equity interest issued by the Group. The consideration transferred may include the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities that are assumed in a business combination are measured at their fair values on the acquisition date.

### 3.7 ASSETS CLASSIFIED AS HELD-FOR-SALE

#### Sale of the Oil & Gas business to Sterling Specialty Chemicals, LLC

On December 4, 2023, Kemira signed an agreement to divest its Oil & Gas-related portfolio to Sterling Specialty Chemicals LLC, a US subsidiary of Artek Group, a global industrial chemicals group based in India. On February 2, 2024, Kemira announced that it has completed the divestment of its Oil & Gas-related portfolio to the buyer.

Approximately 250 employees transferred to the buyer as part of the transaction, which includes Kemira's manufacturing facilities in Mobile, Columbus and Aberdeen in the United States and the novel liquid polymer (NLP) manufacturing assets in Botlek, the Netherlands. The Teesport manufacturing facility in the United Kingdom is also included in the transaction. The closing of the Teesport is expected to happen later, subject to site specific closing conditions.

The total consideration on a cash and debt-free basis amounts to approximately USD 280 million, around EUR 260 million. The recognized loss from the sale of the Oil & Gas business was EUR 112 million, including related expenses, of which EUR 11 million was recognized in 2024. The Oil & Gas business was part of Kemira's Industry & Water segment.

## SUSTAINABILITY STATEMENT

As of Q4 2023, the assets and liabilities related to the sale of the Oil & Gas business were classified as a disposal group, held for sale according to IFRS 5. As a result, the assets and liabilities related to the sale of the Oil & Gas business were presented on the consolidated balance sheet, on separate lines. The tables below provide more information on the assets as held-for-sale and on the related liabilities.

### ASSETS CLASSIFIED AS HELD-FOR-SALE AT FAIR VALUES

EUR million	Note	2024	2023
Goodwill	3.1.	—	—
Intangible assets	3.2.	—	1.6
Property, plant and equipment	3.3.	4.5	109.5

Cash and cash equivalents	5.4.	—	2.2
<b>Total</b>		<b>9.9</b>	<b>255.6</b>

### LIABILITIES DIRECTLY ASSOCIATED WITH THE ASSETS CLASSIFIED AS HELD-FOR-SALE

EUR million	Note	2024	2023
Liabilities related to right-of-use assets	5.3.	12.0	24.1
Deferred tax liabilities	4.4.	—	32.1
Trade payables and other liabilities	4.3.	—	44.0
Current income tax liabilities		—	4.6
<b>Total</b>		<b>12.0</b>	<b>104.8</b>

## The Group's accounting policies

### Non-current assets held for sale

Non-current assets are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale transaction is considered highly probable. Since the time of classification, the assets have been valued as the lower of the carrying amount or the fair value, less the costs to sell. Depreciation on these assets discontinues at the time of classification. Non-current assets classified as held for sale are disclosed separately in the balance sheet.

## 4. Working capital and other balance sheet items

### NET WORKING CAPITAL

EUR million	Note	2024	2023
Inventories	4.1.	307.9	281.8
Trade receivables and other receivables	4.2.	420.1	468.2
Excluding financing items in other receivables <sup>1)</sup>		-7.1	-18.6
Trade payables and other liabilities	4.3.	517.8	489.4
Excluding financing items in other liabilities <sup>1)</sup>		-44.5	-37.0
<b>Total</b>		<b>247.7</b>	<b>278.9</b>

<sup>1)</sup> Includes mainly interest income and expenses, exchange gains and losses and hedging related items.

Due to the Oil & Gas divestment, in net working capital in 2023, EUR 48.3 million of inventory, EUR 57.0 million of trade receivables and other receivables and EUR 44.0 million trade payables and other payables have been reclassified as held-for-sale. Kemira has completed the divestment in February 2024.

Quarterly information on net working capital is disclosed in the section on Reconciliation to IFRS figures.

### 4.1 INVENTORIES

EUR million	2024	2023
Materials and supplies	115.1	113.0
Finished goods	171.6	149.4
Prepayments	21.3	19.4
<b>Total</b>	<b>307.9</b>	<b>281.8</b>

In 2024, EUR 1.5 million (2.4) of the inventory value was recognized as an expense in order to decrease the book values of the inventories to correspond with their net realizable value.

### The Group's accounting policies

#### Inventories

Inventories are measured at the lower of cost and net realizable value. Costs are determined on a first-in first-out (FIFO) basis or by using a weighted average cost formula, depending on the nature of the inventory. The cost of finished goods and work in progress includes the proportion of production overheads at normal capacity. The net realizable value is the sales price received in the ordinary course of business, less the estimated costs for completing the asset and the sales costs.

### 4.2 TRADE RECEIVABLES AND OTHER CURRENT RECEIVABLES

EUR million	2024	2023
<b>Trade and other receivables</b>		
Trade receivables	345.8	386.2
Prepayments	11.2	8.5
Prepaid expenses and accrued income	25.5	38.9
Other current receivables	37.6	34.7
<b>Total</b>	<b>420.1</b>	<b>468.2</b>

### AGING OF OUTSTANDING TRADE RECEIVABLES

## SUSTAINABILITY STATEMENT

EUR million	2023		
	Receivables, gross amount	Expected credit losses	Receivables, net amount
Not due trade receivables	327.9	-0.1	327.7
Trade receivables 1–90 days overdue	58.1	-0.3	57.8
Trade receivables more than 91 days overdue	5.0	-4.3	0.6
<b>Total</b>	<b>390.9</b>	<b>-4.8</b>	<b>386.2</b>

In 2024, the impairment loss (+) /gain(-) of trade receivables amounted to EUR 0.6 million (-0.2).

In 2024, items that were due in a time period longer than one year included trade receivables of EUR 0.8 million (0.3), prepaid expenses and an accrued income of EUR 1.6 (1.3), other receivables of EUR 0.4 (0.1) and prepayments of EUR 0.2 (0.0).

### The Group's accounting policies

#### Trade receivables, loan receivables and other current receivables

Trade receivables, loan receivables and other current receivables are initially recognized at fair value and subsequently measured at amortized cost, taking impairment into account. These items are subject to a simplified impairment model, in accordance with the IFRS 9 standard, where the estimated amount of credit losses is based on the expected credit losses over their expected life.

The expected credit loss rates for the impairment model vary for trade receivables in EMEA, Americas and APAC, according to age distribution and geographical area. Credit loss rates are based on sales payment profiles and historical credit losses.

The expected credit losses for trade receivables are recognized using the simplified impairment model, in accordance with IFRS 9. Expected credit losses are calculated by multiplying the book value of unpaid trade receivables by the expected credit loss rate for the geographical area. Any trade receivables overdue by more than 180 days are assessed using a specific risk assessment. In addition, an estimate of a credit loss is recognized for individual trade receivables when there is objective evidence that the receivables will not be recovered on all the original terms.

Trade receivables, loan receivables and other current receivables do not include a significant financial component.

## 4.3 TRADE PAYABLES AND OTHER CURRENT LIABILITIES

EUR million	2024	2023
<b>Trade payables and other liabilities</b>		
Prepayments received	3.1	1.6

### The Group's accounting policies

#### Trade payables and other current liabilities

Trade and other payables are presented as current liabilities if payment is due within 12 months after the financial period. Trade payables are initially recognized at fair value and subsequently measured at amortized cost.

## SUSTAINABILITY STATEMENT

### 🔖 The Group's accounting policies

#### Deferred taxes

Deferred tax is recognized, using the liability method, on temporary differences arising between the tax bases of the assets and liabilities and their carrying amounts in the Consolidated Financial Statements. Deferred tax in the initial recognition of goodwill is recognized only in cases where goodwill is locally tax deductible. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that a future taxable profit will be available against which the temporary differences can be utilized.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not be reversed in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset the current tax assets against current tax liabilities, and when the deferred income tax assets and liabilities relate to the income taxes levied by the same taxation authority on either the same tax entity or on different taxable entities where there is an intention to settle the balances on a net basis.

### ✕ The items in the financial statements that include significant accounting estimates and accounting policies that require judgment

#### Deferred taxes

For the recognition of deferred tax assets for tax losses and other items, the management assesses the amount of a probable future taxable profit against which unused tax assets can be utilized. Actual profits may differ from the forecasts and in such cases may affect taxes in future periods.

## SUSTAINABILITY STATEMENT

### 4.5 DEFINED BENEFIT PENSION PLANS AND EMPLOYEE BENEFITS

The Group has several defined benefit pension plans and other employee benefit obligations. The main defined benefit pension plans are in Finland, Sweden and Germany.

#### Finland

The Group's most significant defined benefit plan is in Finland, through Pension Fund Neliapila, which takes care of part of some employees' supplementary pension benefits. Pension Fund Neliapila covers employees whose employment with Kemira began before January 1, 1991, meaning that the fund is closed to new employees. Currently the majority of the members of Pension Fund Neliapila are pensioners. At the end of 2024, the obligations of Pension Fund Neliapila totaled EUR 141.8 million (156.2) and the assets of the plan totaled EUR 257.4 million (262.5).

Pension Fund Neliapila's supplementary benefits include old-age pensions, disability pensions, survivors' pensions and funeral grants. The aggregated pension benefit is 66 percent of the pension salary. To qualify for a full pension, an employee must have accrued a pensionable service of 25 years. The supplementary pension benefit is the difference between the aggregated and compulsory pension benefits.

The Board of Directors of Pension Fund Neliapila decided in December 2024 to return the fund's surplus of EUR 10 million to Kemira Group companies. The return of the surplus will be paid by Pension Fund Neliapila when approval is obtained from the Financial Supervisory Authority. The approval is required by the Pension Fund Act. The surplus payment is expected to be paid during the first half of 2025. The Group has not recognized any items regarding the return of the surplus in the Consolidated Financial Statements 2024.

#### Sweden

In Sweden, there is a defined benefit pension plan called the ITP 2 plan for white-collar employees. To qualify for a full pension, an employee must have a projected period of pensionable service, from the date of entry until retirement age, of at least 30 years. The pension arrangements comprise the normal retirement pension, complementary retirement pensions and a survivors' pension. In addition, Kemira must have credit insurance from PRI, the Pensionsgaranti Mutual Insurance Company, for the ITP 2 plan pension liability. At the end of 2024, the defined benefit obligations in Sweden totaled EUR 41.7 million (38.2).

### ASSETS AND LIABILITIES OF DEFINED BENEFIT PLANS RECOGNIZED IN THE BALANCE SHEET

### PLAN ASSETS BY ASSET CATEGORY IN DEFINED BENEFIT PLANS

EUR million	2024	2023
Interest rate investments and other assets	131.1	144.1
Shares and share funds	91.2	79.5
Properties occupied by the Group	43.0	46.8
Kemira Oyj's shares	—	1.9
<b>Total assets</b>	<b>265.3</b>	<b>272.2</b>

The Finnish Pension Fund Neliapila holds most of the defined benefit plan's assets. At the end of 2024, Pension Fund Neliapila's assets amounted to EUR 257.4 million (262.5), which consisted of interest rate investments and other assets of EUR 123.3 million (134.5), shares and share funds of EUR 91.1 million (79.4) and property investments of EUR 43.0 million (46.8). Within Pension Fund Neliapila, the investment position is managed within an asset-liability matching (ALM) framework that has been developed to combine long-term investments in line with the obligations under the pension plan. Market risks can be considered a significant investment risk within Pension Fund Neliapila. The market risks arising from cyclical fluctuations of the financial markets are managed by ensuring that the investment position is sufficiently diversified.

## SUSTAINABILITY STATEMENT

The income (+) / expense (-) of the actual returns on the plan assets of the Group's defined benefit plan were EUR 18.3 million (41.2).

### SIGNIFICANT ACTUARIAL ASSUMPTIONS

%	2024	2023
Discount rate	3.0 - 5.6	3.1 - 4.5
Inflation rate	1.9 - 3.2	1.6 - 3.1
Future salary increases	2.3 - 2.5	2.1 - 2.5
Future pension increases	2.0 - 2.2	2.0 - 2.3

The significant assumptions used in calculating the obligations of the Finnish Pension Fund Neliapila were as follows: discount rate 3.2% (3.1%), inflation rate 1.9% (2.1%), future salary increases 1.9% (2.1%) and future pension increases 2.1% (2.3%).

### Sensitivity analysis

The sensitivity analysis is based on keeping other assumptions constant when one assumption is changed. In practice, this is unlikely to occur and changes in some of the assumptions may correlate with each other. When calculating the sensitivity of the defined benefit obligation with significant actuarial assumptions, the same method has been applied as when calculating the pension liability recognized within the balance sheet.

If the discount rate would be 0.5 percentage points lower in all of the significant countries, the defined benefit obligation would increase by EUR 11.1 million (5.0%), if all other assumptions were held constant.

### SENSITIVITY ANALYSIS - PENSION FUND NELIAPILA IN FINLAND

EUR million	Defined benefit obligation		Impact on defined benefit obligation	
	2024	2023	2024	2023
Discount rate 3.2% (3.1%)	141.8	156.2		
Discount rate +0.5%	135.6	149.2	-4.3%	-4.5%
Discount rate -0.5%	148.4	163.8	4.7%	4.9%
Future pension increases 2.1% (2.3%)	141.8	156.2		
Future pension increases +0.5%	147.7	163.0	4.2%	4.4%
Future pension increases -0.5%	136.2	149.8	-3.9%	-4.1%

A change in the mortality assumption where life expectancy is increased by one year will increase the defined benefit obligation by EUR 6.3 million (4.4%).

### SENSITIVITY ANALYSIS - ITP 2 PENSION PLAN IN SWEDEN

EUR million	Defined benefit obligation		Impact on defined benefit obligation	
	2024	2023	2024	2023
Discount rate 3.0% (3.8%)	41.7	38.2		
Discount rate +0.5%	39.2	36.0	-6.1%	-5.8%
Discount rate -0.5%	44.6	40.7	6.8%	6.4%
Future salary increases 2.3% (2.1%)	41.7	38.2		
Future salary increases +0.5%	42.5	38.9	1.8%	1.6%
Future salary increases -0.5%	41.0	37.7	-1.6%	-1.5%

A change in the mortality assumption where life expectancy is increased by one year will increase the defined benefit obligation by EUR 1.7 million (4.1%).

Expected contributions to the defined benefit plans for the year ending on December 31, 2025 are EUR 3.6 million. In addition, Pension Fund Neliapila is expected to pay a surplus return of EUR 10 million to Kemira Group companies during the first half of 2025.

## SUSTAINABILITY STATEMENT

### 🔖 The Group's accounting policies

#### Defined benefit pension plans and employee benefits

The Group has different post-employment schemes, including both defined contribution and defined benefit pension plans, in accordance with the local legislation and practices of the countries in which it operates. Pension plans are generally funded through contributions to pension insurance companies or to a separate pension fund.

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. A defined benefit plan is a pension plan that is not a defined contribution plan.

Typically, defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as their compensation level and their years of service.

The liability recognized in the balance sheet in respect to the defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period, less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries, using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows, using the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and with their terms to maturity approximating the terms of the related pension obligation. In countries where there is no deep market in such bonds, the market rates for government bonds are used.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

Current service costs are included in the Consolidated Income Statement, in the employee benefit expenses and net interest costs on finance income and finance expense. Past service costs are recognized immediately in profit or loss.

For defined contribution plans, the Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expenses when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

### ✕ The items in the financial statements that include significant accounting estimates and accounting policies that require judgment

#### Defined benefit pension plans

Determining pension liabilities under defined benefit pension plans includes a number of actuarial assumptions and significant changes in these assumptions may affect the amounts of pension liabilities and expenses. Actuarial calculations include assumptions by the management, such as the discount rate and assumptions of salary increases and the termination of employment contracts. The pension liability is calculated by independent actuaries.

1) The Group's operations in the chemical industry are governed by numerous international agreements as well as by regional and national legislation all over the world. The Group treats its environmental liabilities and risks according to established internal principles and procedures. In 2024, provisions for environmental remediation totaled EUR 17.3 million (20.1). The biggest provisions relate to site closures and to the reconditioning of the sediment of a lake in Vaasa, Finland.

2) Other provisions totaled EUR 33.8 million (34.2). The biggest provisions relate to expected liabilities for an energy company producing steam in Pori, Finland, owned via Pohjolan Voima.

EUR million	2024	2023
<b>Breakdown of the total amount of provisions</b>		
Non-current provisions	37.9	37.8
Current provisions	17.9	16.9
<b>Total</b>	<b>55.8</b>	<b>54.6</b>

### The Group's accounting policies

#### Provisions

Provisions for restructuring costs, personnel related costs, environmental obligations, legal claims and onerous contracts are recognized when the Group has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation and, furthermore, a reliable estimate of the amount of this obligation can be made. A restructuring provision is recognized when there is a detailed and appropriate plan prepared for it and the implementation of the plan has begun or has been notified to those whom the restructuring concerns.

The amount recognized as a provision is the present value of the expenditure expected to be required to settle the obligation on the balance sheet date, using a pre-tax interest rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

### The items in the financial statements that include significant accounting estimates and accounting policies that require judgment

#### Provisions

Recognizing provisions requires the management's estimates, since the precise amount of obligations related to the provisions is not known when preparing the Financial Statements.

## 5. Capital structure and financial risks

### 5.1 CAPITAL STRUCTURE

EUR million	2024	2023
Equity	1,803.5	1,684.2
Total assets	3,381.0	3,489.3
Gearing, % <sup>1)</sup>	16	32
Equity ratio, % <sup>2)</sup>	53	48

1) The definition of the key figure for Gearing is  $100 \times \text{Interest-bearing net liabilities} / \text{Total equity}$ .

2) The definition of the key figure for the Equity ratio is  $100 \times \text{Total equity} / (\text{Total assets} - \text{prepayments received})$ .

### INTEREST-BEARING NET LIABILITIES

EUR million	Note	2024	2023
Non-current interest-bearing liabilities	5.3.	547.1	615.7
Current interest-bearing liabilities	5.3.	263.6	322.1
<b>Interest-bearing liabilities</b>		<b>810.7</b>	<b>937.8</b>
Cash and cash equivalents	5.4.	519.2	402.5
<b>Interest-bearing net liabilities</b>		<b>291.5</b>	<b>535.2</b>

Quarterly information on interest-bearing net liabilities is disclosed in the section on the Reconciliation with IFRS figures.

Kemira aims to achieve over 4% average annual organic growth, with an operative EBITDA margin of 18–21%. Operative Return on Capital Employed, ROCE, is targeted to be over 16%. The revolving credit facility agreement and some bilateral loan agreements contain a covenant, which is reported quarterly, according to which company gearing must be below 115%. At the end of the financial year there were EUR 363.5 million loans in the balance sheet bearing the covenant. Kemira has no indication that it will have difficulty complying with this covenant.

The Board of Directors proposes a per-share dividend of EUR 0.74 for 2024 (0.68), corresponding to a dividend payout ratio of 46% (52%). Kemira's dividend policy aims for a competitive dividend that will increase over time.

### 🔖 The Group's accounting policies

#### Dividend distribution

Any dividend proposed by the Board of Directors is not deducted from distributable equity until it has been approved by the Annual General Meeting.

#### Interest-bearing liabilities and cash and cash equivalents

The accounting policies for interest-bearing liabilities and cash and cash equivalents are described in Note 5.4. Financial assets and liabilities by measurement category.

Kemira Oyj has one class of shares. Each share entitles its holder to one vote at the Annual General Meeting. On December 31, 2024, the share capital was EUR 221.8 million and the number of shares was 155,342,557, including 1,359,348 treasury shares. Under the Articles of Association of Kemira Oyj, the company does not have a minimum or maximum share capital or a par value for a share. All issued shares have been fully paid.

Kemira had possession of 1,359,348 (1,722,725) treasury shares on December 31, 2024. The average share price of the treasury shares was EUR 7.58 (6.73) and they represented 0.9% (1.1%) of the share capital and the aggregate number of votes conferred by all shares. The aggregate par value of the treasury shares is EUR 1.9 million (2.5).

## SUSTAINABILITY STATEMENT

### Share premium

The share premium is a reserve accumulated through subscriptions and participation in the management stock option program of 2001. This reserve is based on the old Finnish Companies Act (734/1978) and the value of the reserve will no longer change.

### Fair value reserves

The fair value reserve is a reserve accumulated based on other shares, measured at fair value and using hedge accounting.

### Other reserves

Other reserves originate from local legal requirements. On December 31, 2024, other reserves were EUR 4.1 million (4.1).

### Unrestricted equity reserve

The unrestricted equity reserve includes other equity-type investments and the subscription price of shares to the extent that they will not, based on a specific decision, be recognized in share capital.

### Exchange differences

Foreign currency exchange differences arise from the translation of foreign subsidiaries' financial statements. Additionally, loans have been granted to some foreign subsidiaries and the exchange differences of these have been included in foreign currency exchange differences.

### The Group's accounting policies

#### Treasury shares

Purchases of own shares (treasury shares), including the related costs, are deducted directly from equity in the Consolidated Financial Statements.

## 5.3. INTEREST-BEARING LIABILITIES

### MATURITY OF INTEREST-BEARING LIABILITIES

2024, EUR million	2025	2026	2027	2028	2029	2030–	Book value, total

## SUSTAINABILITY STATEMENT

There were no transfers between levels 1–3 during the financial year.

Level 3 specification, financial assets EUR million	2024	2023
Net book value on Jan 1	305.4	383.3
Effect on other comprehensive income	-34.9	-76.7
Increases	0.0	-0.3
Decreases	—	-1.0
Net book value on Dec 31	270.5	305.4

### The Group's accounting policies

When a financial asset or a financial liability is initially recognized on the trade date, it is measured at cost, which equals the fair value of the consideration given or received.

#### Financial Assets

The Group's financial assets are classified for subsequent measurement as financial assets at fair value through profit or loss, at amortized cost and at fair value through other comprehensive income.

Category	Financial instrument
Fair value through profit or loss	Currency forward contracts, currency swaps, interest rate swaps, electricity derivative contracts and natural gas derivative contracts, certificates of deposit, and commercial papers
Amortized cost	Loan receivables, cash at bank and in hand, bank deposits, trade receivables, and other receivables
Fair value through other comprehensive income	Other investments: shares, derivatives qualifying for hedge accounting (cash flow or fair value hedging)

### Financial assets at fair value through income statements

All derivatives are recognized at fair value on the balance sheet. Fair value is the amount for which an asset could be exchanged or loans paid between knowledgeable, willing parties in an arm's length transaction. These derivative contracts, to which hedge accounting in accordance with IFRS 9 is not applied, are classified as financial assets at fair value through profit or loss. On the balance sheet, these derivative contracts are shown under prepaid expenses and accrued income and accrued expenses and prepaid income. Any gains or losses arising from changes in fair value are recognized through profit or loss on the transaction date.

### Financial assets at amortized cost

Financial assets at amortized cost include non-current receivables carried at amortized cost, using the effective interest rate method and accounting for any impairment.

### Cash and cash equivalents

Cash and cash equivalents consist of cash at banks and in hand, demand deposits and other short-term, highly liquid investments. Items classified as cash and cash equivalents have a maximum maturity of three months from the date of purchase. Credit facilities in use are included in current interest-bearing liabilities.

### Financial assets at fair value through other comprehensive income

The accounting policy on Other shares is described in Notes 3.5. Other shares. The accounting treatment of change in the fair value of the derivatives qualifying for hedge accounting is presented in 5.6. Derivatives.

### Impairment of financial assets

The Group assesses any impairment losses on its financial instruments on each balance sheet date. An impairment of a financial asset is recognized in accordance with the requirements of the expected credit loss model of the IFRS 9 standard. For items measured at an amortized cost, the amount of the impairment loss equals the difference between the asset's carrying amount and the present value of estimated future cash flows from the receivable. This is discounted at the financial asset's original effective interest rate. For items measured at fair value, the fair value determines the amount of impairment. Impairment charges are recognized in the income statement.

The Group sells certain trade receivables to finance companies within the framework of limits stipulated in the agreement. The credit risk associated with these sold receivables and the contractual rights to the financial assets in question are transferred from the Group on the selling date. The related expenses are recognized in the financial expenses.

**Financial liabilities**

Financial liabilities are classified as financial liabilities accounted at fair value through profit or loss, at amortized cost and at fair value through other comprehensive income. Financial liabilities at fair value through profit or loss include derivatives to which hedge accounting is not applied, whereas derivatives which are qualified for hedge accounting are booked at fair value through other comprehensive income.

Other financial liabilities are initially recognized on the balance sheet at the initial value of received net assets, with direct costs deducted. Later, these financial liabilities are measured at amortized cost and the difference between the received net assets and amortizations is recognized as an interest cost over the loan term. Changes in the fair value of loans under fair value hedge accounting are booked in the income statement together with the changes in the fair value of derivatives under fair value hedge accounting.

If the terms of a loan measured at amortized cost are modified and the loan is not derecognized, the gain or loss of the modification is booked in the income statement at the point of modification and is then amortized over the life of the modified loan. Profit or loss is equal to the difference between the present value of the cash flows under the original and modified terms, discounted at the original effective interest rate.

Category	Financial instrument
Financial liabilities at fair value through profit or loss	Currency forward contracts and currency swaps, interest rate swaps, electricity derivative contracts, and natural gas derivative contracts
Amortized cost	Current and non-current loans, pension loans, bonds, lease liabilities, and trade payables
Financial liabilities at fair value through other comprehensive income	Derivatives qualifying for hedge accounting (cash flow hedging)

The following levels are used to measure fair value:

Level 1: Fair value is determined based on quoted market prices.

Level 2: Fair value is determined with valuation techniques. Fair value refers either to the value that is observable from the market value of elements of the financial instrument or the market value of corresponding financial instruments, or to the value that is observable by using commonly accepted valuation models and techniques if the market value can be reliably measured with them.

Level 3: Fair value is determined by using valuation techniques which use inputs that have a significant effect on the recorded fair value and the inputs are not based on observable market data. Level 3 mainly includes the shares of Pohjolan Voima Group.

## SUSTAINABILITY STATEMENT

### 5.5 MANAGEMENT OF FINANCIAL RISKS

Kemira Group Treasury's objective is to ensure sufficient funding in the most cost efficient way and to manage financial risks. Approved by the Board of Directors, treasury policy defines the principles of treasury management. The Board of Directors approves both the annual Treasury plan and the maximum permissible financial risk levels.

Financial risk management aims to protect the Company from unfavorable changes in financial markets, thereby contributing to safeguarding the Company's profit performance and shareholders' equity and ensuring sufficient sources of finance. Management of financial risks is centralized in the Group Treasury, which uses, for hedging purposes, derivative instruments whose market values and risks can be monitored continuously and reliably.

#### Foreign exchange risk

Foreign currency transaction risk arises from currency flows, assets and liabilities denominated in currencies other than the domestic currency. Transaction risks arise from cash flows and balance sheet items where changes in exchange rates will have an impact on earnings and cash flows. Translation risk arises when the currency denominated income statement and the balance sheet items of group companies located outside the euro area are consolidated into euro. The transaction risk is mainly hedged using foreign currency forwards.

The Group's most significant transaction currency risks arise from the US dollar, the Chinese renminbi, the Canadian dollar and the Swedish krona. At the end of the year, the US dollar denominated exchange rate risk against EUR had an equivalent value of approximately EUR 142 million (132), the average hedging rate and hedging ratio being 1.09 and 62% (56%) respectively. The Chinese renminbi denominated exchange rate risk was approximately EUR 121 million (115), the average hedging rate and hedging ratio being 7.72 and 74% (69%) respectively. The Canadian dollar denominated exchange rate risk was approximately EUR 41 million (56), the average hedging rate and hedging ratio being 1.50 and 73% (56%) respectively. The denominated exchange rate risk of the Swedish krona against EUR had an equivalent value of approximately EUR 39 million (35), the average hedging rate and hedging ratio being 11.46 and 71% (73%) respectively.

In addition, Kemira is exposed to smaller transaction risks against EUR, mainly in relation to the Danish krona, the Polish zloty, the Korean won and the Norwegian krona and against USD mainly in relation to the Brazilian real and the Canadian dollar with the annual exposure in those currencies being approximately EUR 144 million.

Transaction exposure, the most significant currencies, EUR million	2024				2023			
	USD against EUR	CNY against EUR	CAD against EUR	SEK against EUR	USD against EUR	CNY against EUR	CAD against EUR	SEK against EUR
Operative cash flow forecast, net <sup>1)</sup>	141,5	-120,7	40,9	-38,7	131,8	-115,1	55,5	-35,3
Loans, net	289,2	59,2	0,0	-13,6	390,8	57,6	0,0	-9,3
Derivatives, operative cash flow hedging, net	-98,5	90,2	-33,7	25,8	-74,5	82,8	-39,9	25,3
Derivatives, hedging of loans, net	-64,5	-59,3	0,0	14,0	-180,1	-57,6	0,0	9,9
<b>Total</b>	<b>267,7</b>	<b>-30,6</b>	<b>7,2</b>	<b>-12,6</b>	<b>268,0</b>	<b>-32,3</b>	<b>15,6</b>	<b>-9,4</b>

<sup>1)</sup> Based on a 12-month foreign currency operative cash flow forecast.

At the end of 2024, the foreign currency operative cash flow forecast for 2025 was EUR 553 million, of which 69% was hedged (61%). The hedge ratio is monitored daily. A minimum of 40% and a maximum of 100% of the forecast flow must always be hedged. A 10 percent strengthening of the euro against the Swedish krona, based on the exchange rates as of December 31, 2024, without hedging, would increase EBITDA by approximately EUR 4 million and a 10 percent strengthening of the euro against the Chinese renminbi, without hedging, would increase EBITDA by approximately EUR 12 million. Whereas, a 10 percent strengthening of the euro against the Canadian dollar and the US dollar, without hedging, would cause a EUR 4 and 14 million negative impact on EBITDA, respectively. A corresponding decrease in the exchange rates would have approximately an equal opposite impact.

On the balance sheet date, the market value of currency derivatives included in cash flow hedge accounting was EUR -3.8 million (4.7). Cash flow hedge accounting deals have been done to hedge highly probable currency flows. In 2025, no ineffectiveness in derivatives under hedge accounting was recognized in the Income statement (-).

The most significant translation risk currencies are the US dollar, the Canadian dollar, the Polish zloty, the Swedish krona and the Chinese renminbi.

Kemira's main equity items denominated in foreign currencies are in the Canadian dollar, the Swedish krona and the US dollar. The objective is to hedge the balance sheet risk by maintaining a balance between foreign currency denominated liabilities and assets, currency by currency. In hedging the net investment in its units abroad, Kemira monitors the equity

ratio. Long-term loans and currency derivatives can be used for hedging net investments in foreign subsidiaries. These hedges do not apply to hedge accounting. Loans in US dollars have been granted to some foreign subsidiaries and the currency differences have been included in foreign currency translation differences.

### Interest rate risk

Kemira is exposed to interest rate risks through interest-bearing loans and derivatives.

Movements in interest rates create re-pricing and price risks, generating fluctuation in cash flows and fair value of loans and derivatives. A total of 114% (77%) of the Group's entire net debt portfolio, including lease liabilities, was fixed at the end of 2024. The net financing cost for the Group was 6.2% (5.6%). The net financing cost is attained by dividing yearly net interest and other financing expenses, excluding exchange rate differences and dividends, by the average interest bearing net debt figure for the corresponding period. The most significant impact on the net financing cost arises from variation in the interest rate levels of the euro, the US dollar and the Chinese renminbi.

In accordance with treasury policy, the Group's interest rate risk is measured with the duration which describes the average repricing moment of the loan portfolio, excluding lease liabilities. The duration must be in the range of 6–60 months. The Kemira Group Treasury manages duration by borrowing with fixed and floating rate loans in addition to interest rate derivatives. On the balance sheet date, the Group had no outstanding interest rate derivatives. The duration of the Group's interest-bearing loan portfolio, excluding lease liabilities, was 13 months (16) at the end of 2024. On the balance sheet date, the average interest rate of the loan portfolio was approximately 2.8% (2.8%). A total of 75% (69%) of the loan portfolio consists of floating rate or fixed rate loans that mature in the following 12 months.

Due to a strong cash position, Kemira will reprice -26% (30%) of the Group's net debt portfolio in 2025, as shown in the table below.

<b>2024</b>				
<b>Time to interest rate fixing, EUR million</b>	<b>&lt;1 year</b>	<b>1–5 years</b>	<b>&gt; 5 years</b>	<b>Total</b>
Floating net liabilities	-130.7	—	—	-130.7
Fixed net liabilities <sup>1)</sup>	90.0	200.0	—	290.0
<b>Total</b>	<b>-40.7</b>	<b>200.0</b>	<b>—</b>	<b>159.3</b>

<b>2023</b>				
<b>Time to interest rate fixing, EUR million</b>	<b>&lt;1 year</b>	<b>1–5 years</b>	<b>&gt; 5 years</b>	<b>Total</b>
Floating net liabilities	123.8	—	—	123.8
Fixed net liabilities <sup>1)</sup>	—	290.0	—	290.0
<b>Total</b>	<b>123.8</b>	<b>290.0</b>	<b>—</b>	<b>413.8</b>

<sup>1)</sup> Excluding lease liabilities.

If interest rates had risen by one percentage point on January 1, 2025, the consequent net interest expenses before taxes resulting from loans, cash, deposits and money market investments over the next 12 months would decrease by approximately EUR 1.4 million (0.5). Correspondingly, a decrease of one percentage point would increase net interest expenses by EUR 1.4 million.

## SUSTAINABILITY STATEMENT

### Commodity price risk

Kemira Group is exposed to commodity market price variation, mainly related to the price of electricity. Kemira Group takes hedging measures with respect to its commodity purchases in order to even out its raw material costs. In line with its hedging policy, the Group hedges its existing sales agreements in such a way that the hedges cover the commitments made. The hedging policy aims to minimize the cash flow risk of electricity and natural gas purchases.

The price of electricity varies greatly according to the market situation. The company primarily uses electricity derivatives as hedging instruments. Regional price risks in Finland and in Sweden are hedged. The outstanding electricity derivatives are treated in accordance with cash flow hedge accounting. The forecasts for physical deliveries of the underlying assets, or purchases, are not recorded until the delivery period. A +/- 10% change in the market price of electricity hedging contracts outstanding at year end would impact the valuation of these contracts by EUR +/- 1.4 million (+/- 3.6). This impact would be in equity.

In addition to electricity derivatives, the Group manages the price risk of electricity by entering into long-term electricity sourcing agreements. The Group also has shares of 5% of Pohjolan Voima Oy (PVO) and a 1% share of Teollisuuden Voima Oy. More information on the share ownership can be found in Note 3.5.

Natural gas price risk is hedged with derivative contracts. The outstanding natural gas derivatives are treated in accordance with cash flow hedge accounting. A +/- 10% change in the market price of natural gas hedging contracts outstanding at year end would impact the valuation of these contracts by EUR +/- 0.2 million (0.0). This impact would be in equity.

### Credit risk

The Group is exposed to credit risks through commercial accounts receivables, as bank account balances, deposits, short-term investments, other current receivables and derivatives.

The Group's treasury policy defines the credit rating requirements for the counterparties of investment activities and derivative agreements as well as the related investment policy. The Group seeks to minimize its counterparty risk by dealing solely with counterparties that are financial institutions with a solid credit rating, as well as by spreading agreements among them. Counterparty risk is regularly monitored.

The counterparty risk in treasury operations is due to the possibility that a contractual party to a financing transaction might not necessarily be able to fulfill its contractual obligations. Risks are mainly related to investment activities and the counterparty risks associated with derivative contracts.

The Group Treasury approves the new banking relationships of subsidiaries. Financial institution counterparties, used by the Group Treasury, have a credit rating of at least an investment grade based on Standard & Poor's credit rating information. The maximum risk assignable to the Group's financial institution counterparties on the balance sheet date amounted to EUR 521,1 million (414.8). Kemira monitors its counterparty risk on a monthly basis, by defining the maximum risk associated with each counterparty based on the market value of receivables. Kemira has defined an approved limit for each financial institution.

No material changes related to the Group's credit risk were associated with financing transactions in the year 2024 and these transactions did not result in credit losses during the financial year.

Kemira has a group-wide credit policy related to commercial activities. According to the policy, each customer has a predefined risk category and credit limit. These are constantly monitored. Based on the customer evaluation, Kemira decides the applicable payment terms to minimize credit risks. Pre-approved payment terms have been defined at the group level. If necessary, securities and documentary credit, such as letters of credit, are applied. The Group does not have any significant credit risk concentrations due to its extensive customer base across the world. The credit losses related to trade receivables are described in Note 4.2.

In the USA, Kemira has an accounts receivable purchase facility worth USD 75 million, enabling Group companies in the USA to sell certain accounts receivables to a counterparty. The credit risk of the accounts receivables is transferred to the financial institutions and 95.5% of the receivables transferred are derecognized from the balance sheet. The amount of outstanding receivables transferred, which also reflects the fair value of the receivables before the transfer, was EUR 38.8 million (30.5) on December 31, 2024. The amounts recognized in the balance sheet are EUR 1.8 million (4.6) in assets and EUR 1.0 million (0.9) in liabilities.

## SUSTAINABILITY STATEMENT

### Liquidity and refinancing risks

Kemira's liquidity is secured with cash and cash equivalents, account overdrafts and a revolving credit facility. At the end of 2024, the Group's cash and cash equivalents stood at EUR 519.2 million (402.5), consisting of cash in bank accounts of EUR 266.7 million (271.0) and bank deposits of EUR 252.5 million (131.5). In addition, the Group has a revolving credit facility of EUR 400 million linked to sustainability targets which will mature on April 17, 2026. At the turn of the year 2024/2025, the revolving credit facility was undrawn.

The Group has a EUR 600 million domestic commercial paper program enabling it to issue commercial papers with a maximum maturity of one year. At the end of 2024, the Group did not have any commercial paper outstanding on the market (-).

Kemira manages its refinancing risk with a diversified loan portfolio. Long-term financing consists of bonds and bilateral loan agreements with several financial institutions. In addition, the Group had leasing liabilities, in accordance with the IFRS 16 standard, of EUR 132.2 million (121.4) at the end of the year.

According to Group treasury policy, the Group must have committed credit facilities to cover planned funding needs, the current portion of long term debt, commercial paper borrowings and other uncommitted short-term loans in the next 12 months. The average maturity of outstanding loans, excluding lease liabilities, may temporarily be under the 3-year minimum target. The average maturity of debt, excluding lease liabilities, at the end of 2024 was 2.9 years (2.5).

## 5.6 DERIVATIVE INSTRUMENTS

Nominal values, EUR million	Maturity structure					2024	2023
	2025	2026	2027	2028	2029	Total	Total
<b>Currency derivatives</b>							
Forward contracts	589.2	—	—	—	—	589.2	789.6
Inflow	279.3	—	—	—	—	279.3	440.2
of which cash flow hedges	25.7	—	—	—	—	25.7	48.7
Outflow	309.9	—	—	—	—	309.9	349.3
of which cash flow hedges	101.4	—	—	—	—	101.4	217.1
<b>Commodity derivatives</b>							
Commodity forward contracts (GWh)	231.4	80.4	24.3	10.9	—	347.0	637.8
of which cash flow hedges	231.4	80.4	24.3	10.9	—	347.0	637.8

The nominal values of the financial instruments do not necessarily correspond to the actual cash flows between the counterparties and therefore individual items do not give a fair view of the Group's risk position.

Fair values, EUR million	2024			2023		
	Positive	Negative	Net	Positive	Negative	Net
<b>Currency derivatives</b>						
Forward contracts	4.8	-7.6	-2.8	8.4	-4.2	4.2
of which cash flow hedges	0.5	-4.3	-3.8	4.8	-0.1	4.7
<b>Commodity derivatives</b>						
Commodity forward contracts <sup>1)</sup>	1.6	-3.0	-1.4	11.2	-3.5	7.7
of which cash flow hedges	1.6	-3.0	-1.4	11.2	-3.5	7.7

<sup>1)</sup> Includes the fair value of electricity forward contracts of EUR 0.1 million (1.6) and EUR -1.8 million (-2.1) maturing after the year 2025. Commodity derivatives are mainly electricity derivatives.

The Group has ISDA or EFET Master netting agreements with the counterparties of derivative contracts. They allow for the net settlement of outstanding market value within the scope of the agreement in cases of non-payment, as defined in the agreement. At the end of the reporting period, counterparty risk according to the master netting agreements was EUR 1.8 million (15.4) to Kemira and EUR 5.9 million (3.5) to counterparties.

**SUSTAINABILITY STATEMENT**

**Derivatives**

The fair values of currency, interest rate and commodity derivatives as well as publicly traded shares are based on prices quoted in active markets on the balance sheet date. The value of other financial instruments measured at fair value is determined on the basis of valuation models, using information available in the financial markets.

All the derivatives are measured at their fair values on the balance sheet date. Changes in the value of forward contracts are calculated by measuring the contracts against the forward exchange rates on the balance sheet date and comparing them with the counter values calculated through the forward exchange rates on the date of entry into the forward contracts. The fair value of interest rate derivatives is determined using the market value of similar instruments on the balance sheet date. Other derivatives are measured at the market price on the balance sheet date.

Derivative assets maturing during the following 12 months are presented in the balance sheet as part of line item Trade receivables and other receivables, whereas derivatives with a maturity of over 12 months are posted to Other financial assets, under Non-current assets. Derivative liabilities maturing in less than 12 months are presented in the balance sheet as part of line item Trade payables and other liabilities, whereas the fair value of derivative liabilities with a maturity beyond 12 months is posted under Non-current liabilities, in Other financial liabilities.

**Hedge accounting**

Hedge accounting is applied according to IFRS 9. This refers to a method of accounting aimed at allocating one or more hedging instruments in such a way that their fair value offsets, in full or in part, the changes in the fair value or cash flows of the hedged item. Hedged items must be highly probable. The Group applies hedge accounting for hedging interest rate risk, currency risk, commodity risk and fair value, if the designated derivative contracts meet the hedge accounting criteria.

Hedge effectiveness is monitored as required by IFRS 9. Effectiveness refers to the capacity of a hedging instrument to offset changes in the fair value of the hedged item or the cash flows from a hedged transaction, which are due to the realization of the risk being hedged. A

hedging relationship is considered to be highly effective when the change in the fair value of the hedging instrument offsets changes in the cash flows attributable to the hedged items. Hedge effectiveness is assessed prospectively. Hedge effectiveness testing is repeated on each balance sheet date.

Hedge accounting is discontinued when the criteria for hedge accounting are no longer fulfilled. Gains or losses recognized in other comprehensive income and presented under equity are derecognized and transferred immediately in the income statement if the hedged item is sold or falls due. However, gains or losses arising from changes in the fair value of those derivatives not fulfilling the hedge accounting criteria are recognized directly in the income statement.

At the inception of a hedge, the Group documents the existence of the economic relationship of the hedged item and the hedging instrument, including the identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged, the objectives of risk management and the strategy for undertaking hedging as well as the description of how hedge effectiveness is assessed.

**Cash flow hedging**

Cash flow hedging is used to hedge against variability in cash flows attributable to a particular risk associated with a recognized asset or liability in the balance sheet or a highly probable forecast transaction. Currency, interest rate and commodity derivatives are used as hedging instruments in cash flow hedging. Cash flow hedge accounting, as specified in IFRS 9, is applied by the Group to selected hedging items only. Changes in the fair value of derivative instruments associated with cash flow hedges are recognized in other comprehensive income (including the tax effect) and presented under equity, providing that they fulfill the criteria set for hedge accounting and are based on effective hedging. The ineffective portion of the gain or loss on the hedging instrument is recognized under financial items in the income statement. Derivatives not fulfilling the hedge accounting criteria are recognized in financial items, through profit or loss.

## 6. Group structure

### 6.1 RELATED PARTIES

Parties are considered to be related if one party has the ability to control or exercise significant influence on the other party or if the parties exercise joint control in making financial and operating decisions. The Group's related parties include the parent company, subsidiaries, associates, joint-ventures and the Pension Fund Neliapila. Related parties also include the members of the Board of Directors and the Group's Management Board, the CEO and his Deputy and their immediate family members.

### EMPLOYEE BENEFITS PAID TO THE CEO, THE INTERIM CEO, CEO'S DEPUTY AND MEMBERS OF THE MANAGEMENT BOARD

EUR	Salaries and other benefits	Bonuses	Share-based payments <sup>1)</sup>	2024 Total	2023 Total

<b>Total</b>	<b>2,825,827</b>	<b>1,419,659</b>	<b>4,900,051</b>	<b>9,145,538</b>	<b>10,052,134</b>

1) Includes share and cash portions. Share-based incentive plans for the management and key personnel are disclosed in Note 2.3. Share-based payments.

2) Includes all salaries and benefits paid during 2024.

3) The CEO Jari Rosendal left on sick leave on July 11, 2023 and died after a short illness on July 31, 2023. The final salary and ongoing incentive plans 2020-2022, 2021-2023 and 2022-2024 were paid in cash to his death estate, in accordance with the terms of the plans. These are included in the figures disclosed in 2023.

4) Jukka Hakkila acted as the CEO's Deputy from July 11 to July 17, 2023. No remuneration was paid to the CEO's Deputy based on CEO substitution.

5) Other members of the Management Board on December 31, 2024 are CFO Petri Castrén, EVP Strategy Linus Hildebrandt, CTO Matthew R. Pixton, EVP Operational Excellence Esa-Matti Puputti, President Segment Industry & Water Tuija Pohjolainen-Hiltunen, Interim President Segment Pulp & Paper Harri Eronen and EVP Human Resources Eeva Salonen. Other members of the Management Board who are employed by a Finnish Kemira company do not have any supplementary pension arrangements in addition to their statutory pensions. The members of the Management Board who are employed by a foreign Kemira company participate in the pension systems based on statutory pension arrangements and market practices. The Kemira policy is that all new supplementary pension arrangements are defined contribution pension plans.

6) Includes salaries and benefits paid related to Antti Salminen during 2023 and to Petri Castrén from 1 January 2023 to 17 July 2023.

### Employment terms and conditions of the CEO

Remuneration of the CEO comprises a monthly salary, including opportunity for a car benefit, a mobile phone benefit and performance-based incentives. The performance-based incentives consist of an annual short-term bonus plan and a long-term share incentive plan. The annual short-term bonus plan is based on terms approved by the Board of Directors and the maximum bonus is 80% of the annual base salary. The long-term share incentive plan is based on the terms of the plan. The maximum reward is determined as a number of shares and a cash portion, intended to cover taxes and the tax-related costs arising from the reward.

The CEO belongs to the Finnish Employees' Pension Act (TyEL) scheme, which provides pension security based on years of service and earnings, as stipulated by law. No supplementary pension has been offered to the CEO.

The mutual termination notice period is 6 months. The CEO is entitled to severance pay of 12 months' salary, in addition to the salary earned during the notice period, in case the company terminates his service.

### The Board of Directors' emoluments

On March 20, 2024, the Annual General Meeting decided that the Board of Directors' annual fee shall be paid as a combination of the company's shares and cash, in such a manner that 40% of the annual fee is paid with Kemira shares owned by the company or, if this is not possible, then with Kemira shares acquired from the securities market, and 60% is paid in cash. On May 6, 2024, 9,940 shares owned by the company were distributed to the members of the Board of Directors.

There are no special terms or conditions associated with owning the shares received as part of the annual fee. The members of the Board of Directors are not eligible for any of Kemira Oyj's short-term bonus plans, long-term share incentive plans or supplementary pension plans.

Meeting fees are paid in cash and travel expenses are paid according to Kemira's travel policy.

## SUSTAINABILITY STATEMENT

## 7. Off-balance sheet items

### 7.1 COMMITMENTS AND CONTINGENT LIABILITIES

#### COMMITMENTS

EUR million	2024	2023
<b>Guarantees</b>		
On behalf of own commitments	114.8	109.5
On behalf of associates	10.9	11.7
On behalf of others	2.8	2.7
<b>Other obligations</b>		
On behalf of own commitments	0.8	0.7

#### The most significant off-balance sheet investments commitments

On December 31, 2024, the major amounts of contractual commitments for the acquisition of property, plant and equipment were EUR 18.7 million (6.0), primarily for plant investments.

In addition, the Group has a lease commitment related to the R&D Center to be constructed in Finland, with a value of EUR 46.5 million.

#### Litigation

In November 2024, Kemira received a court ruling in Yanzhou, China, related to the way Kemira's Joint Venture with Tiancheng Wanfeng Chemical Technology Co. (TCWF) is run. The joint venture, where Kemira holds 80% and TCWF 20%, mainly produces AKD wax and its key raw material, fatty acid chloride. The joint venture has been in operation in Shandong Province in China since 2018. Kemira has filed an appeal to a higher court in China as it believes the Yanzhou court ruling is without merit. There is a risk that the JV's operations might be impacted, depending on the outcome of the decision by the higher court.

In addition to the above, the Group is involved in some legal proceedings such as litigations, arbitrations, administrative and tax proceedings incidental to its global operations. The Group does not expect that the outcome of any of these legal proceedings will have a materially adverse effect upon its consolidated results or financial position.

### 🔖 The Group's accounting policies

#### Contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed by the occurrence of uncertain future events not wholly within the control of the Group, or it may concern a present obligation which will most probably not require an outflow of resources embodying economic benefits to settle the obligation or when the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are disclosed in the notes.

### 7.2 EVENTS AFTER THE BALANCE SHEET DATE

The Group has no significant events after the balance sheet date.

# Notes to the parent company financial statements

## 1. The parent company's accounting policies for the financial statements

### BASIS OF PREPARATION

The parent company's financial statements have been prepared in compliance with the relevant acts and regulations in force in Finland (FAS). Kemira Group's financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS), and the parent company applies the Group's accounting policies whenever it has been possible according to FAS.

### VALUATION AND ALLOCATION PRINCIPLES

#### VALUATION OF NON-CURRENT ASSETS

Planned depreciation and any impairment losses have been deducted from the acquisition cost of the intangible and tangible assets entered in the balance sheet. The acquisition cost includes the variable costs of acquisition and manufacturing. Government grants received are recognized as a deduction from the carrying amount of property, plant, and equipment. Planned depreciation is calculated on a straight-line basis over the estimated intangible and tangible asset's useful life. Depreciation starts from the month of commencement of use.

#### Depreciation periods:

Other intangible assets 5–10 years  
Buildings and structures 20–40 years  
Machinery and equipment 3–15 years

Shares of non-current assets are valued at their acquisition cost or less impairment.

### VALUATION OF INVENTORY

Inventories are stated at cost, at the lower of replacement cost, or probable selling price. In addition to variable costs, the cost of inventories includes a portion of the fixed costs of acquisition and manufacturing. The acquisition cost of the raw material inventory are determined using a weighted average cost formula. The acquisition cost of finished goods and work in progress include the proportion of production overheads at normal capacity.

### VALUATION OF FINANCIAL INSTRUMENTS

The hedging of financial risk of Kemira Group is concentrated in Kemira Oyj, which enters into currency, interest rate, and commodity derivatives with third parties. Changes in the fair value of currency derivatives that are applicable for hedge accounting in the Group, but not in the parent company (as underlying hedged item are with group companies) are entered in the profit and loss. Also, changes in the fair value of other currency derivatives not qualifying for hedge accounting in the Group, hedging commercial purchases, or sales or financial items in foreign currencies are entered in the profit and loss. Changes in the fair value of interest rate derivatives are recorded as financial items in both hedge accounting and non-hedge accounting. Commodity derivatives consist of electricity and natural gas derivative contracts.

The fair value of commodity derivatives hedging the parent company's commodity purchases and qualifying for hedge

accounting is posted to the hedging reserve under equity as well as the change in the fair value of currency derivatives that qualify for hedge accounting in the parent company. These currency derivatives are hedging estimated currency flows in Kemira Oyj for the next 12-month period. When the hedging instrument is maturing or the hedging relationship is discontinued due to inefficiency, the hedging reserve is adjusted by the value of the derivative by booking the value in the Income Statement.

The valuation of Fair value derivative instruments is done according to the Finnish Accounting Act Chapter 5 Section 2a.

The valuation methods of derivative instruments are described in Notes 5.4 and 5.6 in the Consolidated Financial Statements.

Defining the fair value of financial assets and liabilities is described in Group Note 5.4. Financial Risk management principles is illustrated in Group note 5.5. Hedge accounting principles and valuation of derivative instrument are described in Group note 5.6.

Reductions in the capital of other non-current loans as well as loan transaction costs have been capitalized in a manner allowed by the Finnish Accounting Act in the parent company's financial statement. The non-expensed portion of these expenses, EUR 1.1 million (1.6), is included in the balance sheet.

## SUSTAINABILITY STATEMENT

### OBLIGATORY PROVISIONS

Obligatory provisions are recognized from pensions, personnel-related costs, environmental, and restructuring obligations.

### REVENUE

Kemira Oyj's revenue consists mainly of revenues from the sale of goods and services. Revenue also includes intercompany service charges on a gross basis.

### PENSION ARRANGEMENTS

The company's statutory pensions are handled by pension insurance companies and supplemental pensions mainly by Kemira's own pension fund. Pension costs consist of payments to pension insurance companies and possible contributions to the pension fund and are recognized in the income statement.

### SHARE-BASED INCENTIVE PLANS

The treatment of share-based plans is described in the Group's accounting policies. In the parent company, the cash proportion of share-based incentive plans is recognized as an expense in the performance year, and the share proportion is recognized in the year the shares are given using the average share price.

### FOREIGN CURRENCY TRANSLATION

In day-to-day bookkeeping, foreign currency transactions are translated into their functional currency at the exchange rates quoted on the transaction date. In the Financial Statements, foreign currency denominated receivables and liabilities are measured at the exchange rates quoted on the balance sheet date. Business-related exchange rate differences and business related foreign currency exchange rate hedges are treated as sales and purchase adjustments.

Any foreign exchange gains and losses related to financial items and respective hedging instruments are booked into financial income and expenses.

### DEFERRED TAXES

Deferred tax liabilities or assets are recognized for temporary differences between tax and financial statements using the tax rate for the year following as determined on the balance sheet date. The balance sheet includes the deferred tax liability in its entirety and the deferred tax asset at the estimated probable amount as assessed by the management. The efficient part of changes in the value of the electricity and currency derivatives qualifying for hedge accounting is recorded as a fair value reserve less deferred taxes.

### LEASE

Lease payments are treated as rental expenses.

### CASH FLOW STATEMENT

The parent company's cash flow statement has been prepared in accordance with the general guidelines on cash flow by the Finnish Board of Accounting.

### Financial Liabilities

The company is obliged to review the VAT deductions it has made for real estate investments completed in 2016–2024 if the taxable use of the properties decreases during the review period. The maximum liability is EUR 1.2 million and the last review year is 2033.

## 24. Related party transactions

Thousand EUR	2024	2023
<b>Related party notes required by the Finnish Companies Act</b>		
The most significant Group companies with which the company has loans		
Kemira Water Solutions Inc.	173,041	162,690
Kemira Chemicals Oy	67,400	77,400
Kemira Chemicals (Nanjing) Co.,Ltd.	59,679	56,109
Other Group companies	215,208	242,396
<b>Total</b>	<b>515,327</b>	<b>538,594</b>

Kemira Oyj acts as principal in the EMEA and APAC businesses. The most significant related party transactions on the balance sheet are Group companies' loans. For the most part, the loan is issued in the accounting currency of the subsidiary, while the parent company hedges the currency risk. The margins added to loan reference rates are market-based.

The Group uses consolidated bank account systems as a cash management tool. When involved, the parent company acts as the holder of the consolidated accounts. Subsidiaries are always entitled to the assets in their consolidated assets account, and consolidated account operations do not adversely affect the continuity of subsidiaries' operations.

### Changes in the group structure

Kemira Oyj acquired 100% of the share capital of Purton Carbons Ltd. (now Kemira Purton Ltd.) in the UK in October 2, 2024.

Kemira Oy acquired 35.2% of the shares of Kemira Argentina S.A. on September 24, 2024.

Kemira Germany GmbH was merged with Kemira Chemicals Germany GmbH on January 1, 2024.

Kemira Oyj sold the shares of Kemira Chemicals Canada Inc. to Kemira Europe Oy on July 1, 2024.

Kemira Oyj sold the shares of Kemira Chemicals, Inc shares to Artek US Holding Corp on February 2, 2024.

The Group's subsidiaries and investment in associates are presented in Note 6.2. in the Consolidated Financial Statements.

# Kemira Oyj’s Board of Directors’ proposal to the Annual General Meeting for the distribution of distributable funds and signing of the Financial Statements and Board of Directors’ Review

On December 31, 2024, Kemira Oyj’s distributable funds are EUR 794,029,352 of which the net profit for the period amounts to EUR 183,609,785.

The Board of Directors proposes for the Annual General Meeting to be held on March 20, 2025 and that a dividend of EUR 0.74 per share be distributed. No dividend will be paid on the own shares held by the company as treasury shares on the dividend record date.

On the date of this proposal for the distribution of profits, a total of 153,983,209 shares are held outside the company and the total dividends paid would amount to EUR 113,947,575. Distributable funds of EUR 680,081,777 are to be retained as equity.

There have been no material changes in the company’s financial position since December 31, 2024. The liquidity of the company remains good and the proposed dividend payment does not risk the solvency of the company.

The financial statements have been prepared in accordance with applicable accounting laws and regulations and give a true and fair view of the assets, liabilities, financial position and profit or loss of the parent company and of the companies included in its consolidated financial statements.

We also confirm that the Board of Directors’ Review includes:

- A true and fair view of the development of the business and the financial result,
- A description of the most significant risks and uncertainties and other aspects of the company’s condition, and
- A sustainability report prepared in accordance with the reporting standards referred to in Chapter 7 of the Accounting Act and Article 8 of the Taxonomy Regulation.

## Report on the Audit of Financial Statements

**OPINION**

We have audited the financial statements of Kemira Oyj (business identity code 0109823-0) for the year ended 31 December 2024. The financial statements comprise the consolidated balance sheet, income statement, statement of comprehensive income, statement of changes in equity, statement of cash flows and notes, including material accounting policy information, as well as the parent company's balance sheet, income statement, statement of cash flows and notes.

In our opinion

- the consolidated financial statements give a true and fair view of the group's financial position, financial performance and cash flows in accordance with IFRS Accounting Standards as adopted by the EU.
- the financial statements give a true and fair view of the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements.

Our opinion is consistent with the additional report submitted to the Audit Committee.

**BASIS FOR OPINION**

We conducted our audit in accordance with good auditing practice in Finland. Our responsibilities under good auditing practice are further described in the *Auditor's Responsibilities for the Audit of Financial Statements section of our report.*

We are independent of the parent company and of the group companies in accordance with the ethical requirements that are applicable in Finland and are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

In our best knowledge and understanding, the non-audit services that we have provided to the parent company and group companies are in compliance with laws and regulations applicable in Finland regarding these services, and we have not provided any prohibited non-audit services referred to in Article 5 (1) of regulation (EU) 537/2014. The non-audit services that we have provided have been disclosed in note 2.2 to the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**KEY AUDIT MATTERS**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

We have also addressed the risk of management override of internal controls. This includes consideration of whether there was evidence of management bias that represented a risk of material misstatement due to fraud.

## SUSTAINABILITY STATEMENT

### RESPONSIBILITIES OF THE BOARD OF DIRECTORS AND THE MANAGING DIRECTOR FOR THE FINANCIAL STATEMENTS

The Board of Directors and the Managing Director are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with IFRS Accounting Standards as adopted by the EU, and of financial statements that give a true and fair view in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors and the Managing Director are responsible for assessing the parent company's and the group's ability to continue as going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting. The financial statements are prepared using the going concern basis of accounting unless there is an intention to liquidate the parent company or the group or cease operations, or there is no realistic alternative but to do so.

### AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance on whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with good auditing practice will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with good auditing practice, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for

one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the parent company's or the group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the parent company's or the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the parent company or the group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events so that the financial statements give a true and fair view.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

## SUSTAINABILITY STATEMENT

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## Other reporting requirements

### INFORMATION ON OUR AUDIT ENGAGEMENT

We were first appointed as auditors by the Annual General Meeting on 21 March 2019 and our appointment represents a total period of uninterrupted engagement of six years.

### OTHER INFORMATION

The Board of Directors and the Managing Director are responsible for the other information. The other information comprises the report of the Board of Directors and the information included in the Annual Report, but does not include the financial statements and our auditor's report thereon. We have obtained the report of the Board of Directors prior to the date of this auditor's report, and the Annual Report is expected to be made available to us after that date.

Our opinion on the financial statements does not cover the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. With respect to report of the Board of Directors, our responsibility also includes considering whether the report of the Board of Directors has been prepared in compliance with the applicable provisions, excluding the sustainability report information on which there are provisions in Chapter 7 of the Accounting Act and in the sustainability reporting standards.

In our opinion, the information in the report of the Board of Directors is consistent with the information in the financial statements and the report of the Board of Directors has been

prepared in compliance with the applicable provisions. Our opinion does not cover the sustainability report information on which there are provisions in Chapter 7 of the Accounting Act and in the sustainability reporting standards.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### OTHER OPINIONS ON ASSIGNMENT OF THE BOARD OF DIRECTORS

We support that the financial statements should be adopted. The proposal by the Board of Directors regarding the use of the profit shown on the balance sheet is in compliance with the Limited Liability Companies Act. We support that the Board of Directors of the parent company and the Chief Executive Officer should be discharged from liability for the financial period audited by us.

**SUSTAINABILITY STATEMENT**

**(Translation of the Finnish original)**

**TO THE ANNUAL GENERAL MEETING OF KEMIRA OYJ**

We have performed a limited assurance engagement on the group sustainability statement of Kemira Oyj (0109823-0) that is referred to in Chapter 7 of the Accounting Act and that is included in the report of the Board of Directors for the financial year 1.1.–31.12.2024.

**OPINION**

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the group sustainability statement does not comply, in all material respects, with

- 1) the requirements laid down in Chapter 7 of the Accounting Act and the sustainability reporting standards (ESRS);
- 2) the requirements laid down in Article 8 of the Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088 (EU Taxonomy).

Point 1 above also contains the process in which Kemira Oyj has identified the information for reporting in accordance with the sustainability reporting standards (double materiality assessment) and the tagging of information as referred to in Chapter 7, Section 22 of the Accounting Act.

Our opinion does not cover the tagging of the group sustainability statement with digital XBRL sustainability tags in accordance with Chapter 7, Section 22, Subsection 1(2), of the Accounting Act, because sustainability reporting companies have not had the possibility to comply with that provision in the absence of the ESEF regulation or other European Union legislation.

**BASIS FOR OPINION**

We performed the assurance of the group sustainability statement as a limited assurance engagement in compliance with good assurance practice in Finland and with the International Standard on Assurance Engagements (ISAE) 3000 (Revised) *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*.

Our responsibilities under this standard are further described in the *Responsibilities of the Group Sustainability Auditor* section of our report.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**OTHER MATTER**

We draw attention to the fact that the group sustainability statement of Kemira Oyj that is referred to in Chapter 7 of the Accounting Act has been prepared and assurance has been provided for it for the first time for the financial year 1.1.–31.12.2024. Our opinion does not cover the comparative information that has been presented in the group sustainability statement. Our opinion is not modified in respect of this matter.

**GROUP SUSTAINABILITY AUDITOR'S INDEPENDENCE AND QUALITY MANAGEMENT**

We are independent of the parent company and of the group companies in accordance with the ethical requirements that are applicable in Finland and are relevant to our engagement, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

The group sustainability auditor applies International Standard on Quality Management ISQM 1, which requires the sustainability audit firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

## SUSTAINABILITY STATEMENT

### RESPONSIBILITIES OF THE BOARD OF DIRECTORS AND THE MANAGING DIRECTOR

The Board of Directors and the Managing Director of Kemira Oyj are responsible for:

- the group sustainability statement and for its preparation and presentation in accordance with the provisions of Chapter 7 of the Accounting Act, including the process that has been defined in the sustainability reporting standards and in which the information for reporting in accordance with the sustainability reporting standards has been identified as well as the tagging of information as referred to in Chapter 7, Section 22 of the Accounting Act and
- the compliance of the group sustainability statement with the requirements laid down in Article 8 of the Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088;
- such internal control as the Board of Directors and the Managing Director determine is necessary to enable the preparation of a group sustainability statement that is free from material misstatement, whether due to fraud or error.

### INHERENT LIMITATIONS IN THE PREPARATION OF A SUSTAINABILITY STATEMENT

The preparation of the group sustainability statement requires a materiality assessment from the company in order to identify relevant disclosures. This significantly involves management judgment and choices. Group Sustainability reporting is also characterized by estimates and assumptions, as well as measurement and estimation uncertainty.

The determination of greenhouse gases is subject to inherent uncertainty due to the incomplete scientific data used to determine the emission factors and the numerical values needed to combine emissions of different gases.

In addition, when reporting forward-looking information, the company must make assumptions about possible future events and disclose the company's possible future actions in relation to these events. The actual outcome may be different because predicted events do not always occur as expected.

### RESPONSIBILITIES OF THE GROUP SUSTAINABILITY AUDITOR

Our responsibility is to perform an assurance engagement to obtain limited assurance about whether the group sustainability statement is free from material misstatement, whether due to fraud or error, and to issue a limited assurance report that includes our opinion.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the decisions of users taken on the basis of the group sustainability statement.

Compliance with the International Standard on Assurance Engagements (ISAE) 3000 (Revised) requires that we exercise professional judgment and maintain professional skepticism throughout the engagement. We also:

- Identify and assess the risks of material misstatement of the group sustainability statement, whether due to fraud or error, and obtain an understanding of internal control relevant to the engagement in order to design assurance procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the parent company's or the group's internal control.
- Design and perform assurance procedures responsive to those risks to obtain evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

### DESCRIPTION OF THE PROCEDURES THAT HAVE BEEN PERFORMED

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. The nature, timing and extent of assurance procedures selected depend on professional judgment, including the assessment of risks of material misstatement, whether due to fraud or error. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Our procedures included for ex. the following:

- We have interviewed the key persons responsible for collecting and reporting the information included in the group sustainability statement.
- Through interviews, we gained an understanding of the group's control environment related to the group sustainability reporting process.

## SUSTAINABILITY STATEMENT

- We evaluated the implementation of the company's double materiality assessment process against the requirements of ESRS standards and the compliance of the information provided for the double materiality assessment with ESRS standards.
- We assessed whether the group sustainability statement in material respect meets the requirements of ESRS standards for material sustainability topics:
  - We have tested the accuracy of the information presented in the group sustainability statement by comparing the information on a sample basis with supporting company documentation.
  - We have on a sample basis performed analytical assurance procedures and related inquiries, recalculation and inspected documentation, as well as tested data aggregation to assess the accuracy of the group sustainability statement.
- We gained an understanding of the process by which a company has defined taxonomy-eligible and taxonomy-aligned economic activities and evaluate the regulatory compliance of the information provided.

## Independent Auditor's Report on the ESEF Consolidated Financial Statements of Kemira Oyj

### TO THE BOARD OF DIRECTORS OF KEMIRA OYJ

We have performed a reasonable assurance engagement on the financial statements 74370031Y7RK5H88CQ48-2024-12-31-fi.zip of Kemira Oyj (y-identifier: 0109823-0) that have been prepared in accordance with the Commission's regulatory technical standard for the financial year ended 31.12.2024.

#### *Responsibilities of the Board of Directors and Managing Director*

The Board of Directors and the Managing Director are responsible for the preparation of the company's report of Board of Directors and financial statements (the ESEF financial statements) in such a way that they comply with the requirements of the Commission's regulatory technical standard. This responsibility includes:

- preparing the ESEF financial statements in XHTML format in accordance with Article 3 of the Commission's regulatory technical standard
- tagging the primary financial statements, notes and company's identification data in the consolidated financial statements that are included in the ESEF financial statements with iXBRL tags in accordance with Article 4 of the Commission's regulatory technical standard and
- ensuring the consistency between the ESEF financial statements and the audited financial statements

The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of ESEF financial

statements in accordance the requirements of the Commission's regulatory technical standard.

#### *Auditor's Independence and Quality Management*

We are independent of the company in accordance with the ethical requirements that are applicable in Finland and are relevant to the engagement we have performed, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

The firm applies International Standard on Quality Management (ISQM) 1, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

#### *Auditor's Responsibilities*

Our responsibility is to, in accordance with Chapter 7, Section 8 of the Securities Markets Act, provide assurance on the financial statements that have been prepared in accordance with the Commission's technical regulatory standard. We express an opinion on whether the consolidated financial statements that are included in the ESEF financial statements have been tagged, in all material respects, in accordance with the requirements of Article 4 of the Commission's regulatory technical standard.

Our responsibility is to indicate in our opinion to what extent the assurance has been provided. We conducted a reasonable assurance engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000.

The engagement includes procedures to obtain evidence on:

## SUSTAINABILITY STATEMENT

- whether the primary financial statements in the consolidated financial statements that are included in the ESEF financial statements have been tagged, in all material respects, with iXBRL tags in accordance with the requirements of Article 4 of the Commission's regulatory technical standard and
- whether the notes and company's identification data in the consolidated financial statements that are included in the ESEF financial statements have been tagged, in all material respects, with iXBRL tags in accordance with the requirements of Article 4 of the Commission's regulatory technical standard and
- whether there is consistency between the ESEF financial statements and the audited financial statements.

The nature, timing and extent of the selected procedures depend on the auditor's judgement. This includes an assessment of the risk of material deviations due to fraud or error from the requirements of the Commission's technical regulatory standard.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### *Opinion*

Our opinion pursuant to Chapter 7, Section 8 of the Securities Markets Act is that the primary financial statements, notes and company's identification data in the consolidated financial statements that are included in the ESEF financial statements of Kemira Oyj 74370031Y7RK5H88CQ48-2024-12-31-fi.zip for the financial year ended 31.12.2024 have been tagged, in all material respects, in accordance with the requirements of the Commission's regulatory technical standard.

Our opinion on the audit of the consolidated financial statements of Kemira Oyj for the financial year ended 31.12.2024 has been expressed in our auditor's report 10.2.2025. With this report we do not express an opinion on the audit of the consolidated financial statements nor express another assurance conclusion.

# Group key figures

Kemira provides certain financial performance measures (alternative performance measures) that are not defined by IFRS. Kemira believes that alternative performance measures followed by capital markets and Kemira management, such as revenue growth in local currencies, excluding acquisitions and divestments (=organic growth), EBITDA, operative EBITDA, operative EBIT, cash flow after investing activities and gearing provide useful information about Kemira's comparable business performance and financial position. Selected alternative performance measures are also used as performance criteria in remuneration.

Kemira's alternative performance measures should not be viewed in isolation to the equivalent IFRS measures and alternative performance measures should instead be read in conjunction with the most directly comparable IFRS measures. Definitions of the alternative performance measures can be found in the Definitions of the key figures in these Financial Statements, as well as at [www.kemira.com](http://www.kemira.com) > Investors > Financial information.

## SUSTAINABILITY STATEMENT

KEY FIGURES	DEFINITION OF KEY FIGURES	PURPOSE OF KEY FIGURES
RETURN ON EQUITY (ROE) (%)	$= 100 \times \frac{\text{Net profit attributable to equity owners of the parent company}}{\text{Equity attributable to equity owners of the parent company}^{2)}$	Return on equity (%) is used to measure how effectively the equity owned by the owners of the parent company is used.
RETURN ON CAPITAL EMPLOYED (ROCE) (%)	$= 100 \times \frac{\text{Operating profit (EBIT)}^{3}}{\text{Capital employed}^{4}}$	Return on capital employed (%) is used to measure how efficiently capital is employed.
OPERATIVE RETURN ON CAPITAL EMPLOYED (OPERATIVE ROCE) (%)	$= 100 \times \frac{\text{Operating profit (EBIT)}^{3}}{\text{Capital employed}^{4}}$	Operative return on capital employed (%) is used to measure how efficiently capital is employed.
CASH FLOW AFTER INVESTING ACTIVITIES	Net cash generated from operating activities + net cash used in investing activities	Cash flow after investments is a key figure that describes the cash flow from operating activities after investments. This is free cash flow that remains, for example, in the payment of dividends and liabilities.
INTEREST-BEARING NET LIABILITIES / EBITDA	$\frac{\text{Interest-bearing net liabilities}}{\text{Operating profit (EBIT) + depreciation and amortization + impairments}}$	Interest-bearing net liabilities / EBITDA ratio measures the Group's capital structure. The key figure describes how long it would take to pay interest-bearing net liabilities at the current level of profitability if the EBITDA in its entirety were used to repay the debt.
NET FINANCIAL COST (%)	$= 100 \times \frac{\text{Finance costs, net - dividend income} + /- \text{exchange rate differences}}{\text{Interest-bearing net liabilities}^{2}}$	Net financial cost (%) describes the financial expense structure and the key figure can be compared to the existing average interest rate level.
NET WORKING CAPITAL	Inventories + trade receivables + other receivables, excluding derivatives, accrued interest income and other financing items - trade payables - other liabilities, excluding derivatives, accrued interest expenses and other financing items	Net working capital is the amount of capital tied up in business operations. It describes the amount of cash needed to run the Group's day-to-day operations.
CAPITAL EMPLOYED	Property, plant and equipment + right-of-use assets + intangible assets + net working capital + investments in associates	Capital employed describes the capital committed to the Group's operations (e.g. production facilities), which is a premise for the manufacture of the Group's products for sale. Restricted capital is used as a component in calculating the return on capital employed.
CAPITAL EXPENDITURE	Property, plant and equipment + intangible assets + other shares + investments in associates	Investments excluding acquisitions are cash used on the acquisition of non-current assets. The key figure is part of the cash flow statement.
CAPITAL EXPENDITURE EXCL. ACQUISITIONS	Property, plant and equipment + intangible assets + other shares + investments in associates - acquisitions	Investments excluding acquisitions are cash used on the acquisition of non-current assets, excluding acquisitions. The key figure is part of the cash flow statement.

## Shares and share capital

On December 31, 2024, Kemira Oyj's share capital amounted to EUR 221.8 million and the number of shares was 155,342,557. Each share entitles the holder to one vote at the Annual General Meeting.

## Shareholders

At the end of December 2024, Kemira Oyj had 48,255 registered shareholders (49,659 on December 31, 2023). Non-Finnish shareholders held 38.3% of the shares (34.7% on December 31, 2023), including nominee-registered holdings. Households owned 18.1% of the shares (19.0% on December 31, 2023). Kemira held 1,359,348 treasury shares (1,722,725 on December 31, 2023), representing 0.9% (1.1% on December 31, 2023) of all company shares.

A list of Kemira's largest shareholders is updated monthly and can be found on the company website at [kemira.com/investors](https://kemira.com/investors).

## Listing and trading

Kemira Oyj's shares are listed on Nasdaq Helsinki. The trading code for the shares is KEMIRA and the ISIN code is FI0009004824.

Kemira Oyj's share price increased by 16% during the reporting period and closed at EUR 19.52 on the Nasdaq Helsinki at the end of December 2024 (16.79 on December 31, 2023). The shares registered a high of EUR 24.58 and a low of EUR 15.96 in January-December 2024 and the average share price was EUR 19.84. The company's market capitalization, excluding treasury shares, was EUR 3,006 million at the end of December 2024 (2,579 on December 31, 2023).

In January-December 2024, Kemira Oyj's share trading turnover on the Nasdaq Helsinki was EUR 892 million (EUR 688 million in January-December 2023). The average daily trading volume was 183,567 shares (174,707 in January-December 2023). The total volume of Kemira Oyj's

share trading in January-December 2024 was 63 million shares (57 million shares in January-December 2023), 25% (23% in January-December 2023) of which was executed on other trading platforms (e.g. Turquoise, CBOE DXE). Source: Nasdaq and [Kemira.com](https://kemira.com).

Up-to-date information on Kemira's share price is available on the company's website at [kemira.com/investors](https://kemira.com/investors).

## Dividend policy and dividend distribution

On December 31, 2024, Kemira Oyj's distributable funds totaled EUR 794,029,352 of which net profit for the period was EUR 183,609,785. No material changes have taken place in the company's financial position after the balance sheet statement date.

Kemira Oyj's Board of Directors proposes to the Annual General Meeting to be held on March 20, 2025 that a dividend of EUR 0.74 per share, totaling EUR 114 million, be paid on the basis of the adopted balance sheet for the financial year that ended on December 31, 2024. The dividend will be paid in two installments. The first installment, EUR 0.37 per share, will be paid to shareholders who are registered in the company's shareholder register maintained by Euroclear Finland Oy on the record date for the dividend payment: March 24, 2025. The Board of Directors proposes that the first installment of the dividend be paid out on April 3, 2025. The second installment, of EUR 0.37 per share, will be paid in November 2025. The second installment will be paid to shareholders who are registered in the company's shareholder register maintained by Euroclear Finland Oy on the record date for the dividend payment. The Board of Directors will decide the record date and the payment date for the second installment at its meeting in October 2025. The record date is planned for October 28, 2025 and the dividend payment date for November 4, 2025 at the earliest. Kemira's dividend policy aims for a competitive dividend that increases over time.

## Board authorizations

The 2024 AGM authorized the Board of Directors to decide upon the repurchase of a maximum of 6,500,000 of the company's own shares ("Share repurchase authorization"). This corresponds to approximately 4.2% of all shares and votes in the company. The shares shall be repurchased by using unrestricted equity, either through a tender offer with equal terms to all shareholders at a price determined by the Board of Directors or otherwise than in proportion to the existing shareholdings of the company's shareholders (directed repurchase). The price paid for the shares repurchased through a tender offer under this authorization shall be based on the market price of the company's shares in public trading. The minimum price to be paid would be the lowest market price of the shares quoted in public trading during the authorization period and the maximum price the highest market price quoted during the authorization period. The price paid for the shares repurchased through directed repurchase under the authorization shall be based on the share price formed in public trading on the date of the repurchase or a price otherwise formed on the market. The shares shall be acquired and paid for in accordance with the rules of Nasdaq Helsinki and the rules of Euroclear Finland Ltd, as well as other applicable regulations. The shares may be repurchased to be used in implementing or financing mergers and acquisitions, or for developing the company's capital structure, improving the liquidity of the company's shares or for the payment of the annual fee payable to the members of the Board of Directors or implementing the company's share-based incentive plans. In order to realize the aforementioned objectives, the shares acquired may be retained, transferred further or cancelled by the company. The Board of Directors shall decide upon how the shares are to be repurchased and on the other terms related to any share repurchase. The Share repurchase authorization is valid until the end of the next Annual General Meeting. The authorization was not used by December 31, 2024.

The Annual General Meeting authorized the Board of Directors to decide to issue, through one or through several share issues, a maximum of 15,600,000 of new shares and to transfer a maximum of 7,800,000 of the company's own shares currently held by the company ("Share issue authorization"). The new shares may be issued and the company's own shares held by the company may be transferred, either for consideration or without consideration. The new shares may be issued and the company's own shares held by the company may be transferred to the company's shareholders in proportion to their current shareholdings in the company, or by disapplying the shareholders' pre-emption right, through a directed share issue, if the company has a weighty financial reason to do so, such as financing or implementing mergers and acquisitions, developing the capital structure of the company, improving the liquidity

of the company's shares or, if it is justified, for the payment of the annual fee payable to the members of the Board of Directors or implementing the company's share-based incentive plans. The directed share issue may be carried out without consideration only in connection with the implementation of the company's share-based incentive plans. The subscription price of new shares shall be recorded in the invested unrestricted equity reserves. The consideration payable for the company's own shares shall be recorded in the invested unrestricted equity reserves. The Board of Directors shall also decide upon any other terms related to the share issues. The Share issue authorization is valid until May 31, 2025. The share issue authorization has been used and shares owned by the Group were conveyed to members of the Board of Directors and key employees in connection with their remuneration.

## Management shareholding

The members of the Board of Directors as well as the Interim President and CEO and his Deputy held 280,562 (214,529) Kemira Oyj shares on December 31, 2024 or 0.18% (0.14%) of all outstanding shares and voting rights (including treasury shares and shares held by the related parties and controlled corporations). Antti Salminen, President and CEO, held 99,166 shares on December 31, 2024. Members of the Management Board, excluding the President and CEO and his Deputy, held a total of 286,517 shares on December 31, 2024 (245,128), representing 0.18% (0.16%) of all outstanding shares and voting rights (including treasury shares and shares held by the related parties and controlled corporations). Up-to-date information regarding the shareholdings of the Board of Directors and Management is available on Kemira's website at [kemira.com/investors](https://kemira.com/investors).

## SUSTAINABILITY STATEMENT

## Financial reporting in 2025

Kemira will publish three financial reports in 2025:

Interim report January-March 2025	April 25, 2025
Half-year financial report January-June 2025	July 18, 2025
Interim report January-September 2025	October 24, 2025

The financial reports and related presentation material are available on Kemira's website at [kemira.com/investors](https://kemira.com/investors). Furthermore, Kemira's stock exchange and press releases, Annual Reports (incl. Corporate Responsibility Report and Financial Statements) and other investor information are also available on the website. On the site, visitors can register to receive releases by e-mail and order the company's Financial Statements.

## Investor communications

The purpose of Kemira's investor communications is to provide capital markets with open and reliable information on the company and its operating environment in order to give market participants a factual overview of Kemira as an investment.

Kemira's investor communications aims to ensure that everyone operating in the markets has equal access to sufficient and correct information concerning the company, and to ensure that information is disclosed consistently and without delay.

Kemira Oyj is domiciled in Helsinki, Finland, and the company's shares are listed on Nasdaq Helsinki. Kemira Oyj complies with the laws of Finland and the regulations of Nasdaq Helsinki and Finland's Financial Supervisory Authority.

## Silent period

Kemira observes a silent period before issuing financial statements or interim reports. During the period, Kemira's representatives do not comment on Kemira's financial statements or interim reports for the ongoing reporting period the specific silent period relates to. The schedule for the silent period and publication of financial information and closed periods is displayed on Kemira's website under Investors > Investor Calendar. Kemira's Investor Relations function is responsible for keeping the calendar up-to-date.

## Annual General Meeting

Kemira's Annual General Meeting will be held on Thursday, March 20, 2025 at 1.00 p.m. EET at Finlandia Hall, Mannerheimintie 13e Helsinki, Finland. Shareholders who on the record date of the Annual General Meeting, March 10, 2025, are registered in the company's shareholders' register maintained by Euroclear Finland Ltd, are entitled to attend in the Annual General Meeting and exercise their rights as shareholders by voting in advance. Registered shareholders who are not attending the meeting in person, have the possibility to follow the Annual General Meeting via a live webcast, which is not deemed as official participation.

Registration for the Annual General Meeting will begin on February 25, 2025 and invitation and registration instructions have been published on February 11, 2025 as a stock exchange release and at Kemira's web site at [kemira.com/agm2025](https://kemira.com/agm2025).

Kemira will release a stock exchange release on the Annual General Meeting's decisions immediately after the meeting.

## Dividend distribution

For dividend proposal, please see page 244.

## Change of address

Kemira's shareholders are kindly requested to report any change of address to the bank or brokerage firm in which they have their book-entry account. This will also update information in registers, maintained by Euroclear Finland Ltd, which Kemira uses to send mail to its shareholders.
